   1. The following soils tests are required under these specifications:
      a. Native Soil: Prior to construction, Contractor shall submit native soil for horticultural soil analysis, consisting of one-quart samples from proposed container planting areas. Sample shall be a representative composite taken from several planting areas.
      b. Pre-Plant: Following amendment and fine grading and prior to installation of plant material, contractor shall submit for horticultural soil analysis: one quart-sized sample of in-place topsoil. Sample shall be a representative composite taken from several planting areas.
      c. If test results indicate that soils fail to meet the specifications, contractor shall retest and resubmit until a passing result is obtained.
      d. Testing costs for initial samples and costs for any additional samples due to non-compliance shall be paid for by the Contractor.
      e. No material shall be delivered to the site until the City's Representative approves the material.
      f. Contractor shall allow for sufficient time for testing prior to construction.

D. Amendment Samples: Contractor shall provide an analysis of the amendment from a Seal of Testing Assurance (STA) Certified Compost Lab, designated by the US Composting Council. Or, send a one-gallon sample of each proposed amendment to Waypoint Analytical, Inc. of Anaheim, (714) 282-8777, for their testing for conformance to this specification. No material shall be delivered to the site until the Owner's Representative approves the samples. Testing costs shall be paid for by the Contractor. If an alternate laboratory is used, they must be an approved US Composting Council Seal of Testing Assurance laboratory, using test methods described in the TMECC test methods manual.

1. No material shall be delivered to the site until the City's Representative approves the samples.
2. Testing costs shall be paid for by the Contractor.
3. If an alternate laboratory is used, the laboratory must be STA certified by the USCC, using test methods described in the "Test Methods of the Examination of Composting and Compost" (TMECC) test methods manual.

E. Planting Areas: All areas to be planted, whether in container stock, flats, or otherwise, are defined as planting areas in these documents.

PART 2 PRODUCTS

2.1 MATERIALS

A. Native Topsoil: Shall be the existing surface layer of soil on site. This layer typically will be a different color and texture than the subsoil, and may be of varying thicknesses. The Contractor shall be responsible for reviewing the area limits and depths of native topsoil on site with the City's Representative.

B. Import Topsoil: Shall be a homogeneous mineral soil classified as loam, sandy clay loam, or sandy loam with clay content between 15 and 25%. The sum of silt plus clay shall be less than 35%. Import topsoil shall not contain more silt and clay than the on-site native soil.
   1. Particle size data shall be based upon standard USDA methodology. Of the material falling in the sand category, a minimum of 50% shall fall in the fine sand range .05 - 5mm. Gravel content greater than 2.0mm shall be less than 15%.
   2. Soil chemistry shall be suitable for growing the plants specified; the soil shall be non-saline as determined on the saturation extract. Salinity shall not exceed 3.0 mmhos/cm, boron shall not exceed 1.0 ppm and the sodium absorption ratio (SAR) shall not exceed 6.0. Soil reaction as determined on a saturated paste shall fall between 5.5 and 7.5.
   3. The soil shall be free of organic herbicides, or other growth-restricting chemicals. Contamination may be tested by greenhouse trials using rye grass and radish as test crops using the proposed import soil as substrate. These trials require four to five weeks for completion.

C. Fertilizer: Types and application rates shall be determined from soils analysis results. For purposes of bidding only, assume the use of 6-20-20 commercial fertilizer, 20-10-5 planting tablets by Agriform International Chemicals, Inc., and iron sulfate.

D. Organic Amendment:
   1. Compost: Shall be Z-Best's Organic Compost available through Z-Best Composting (408) 846-1574 shall conform to:
      a. Seal of Testing Assurance Program from the US Composting Council.
      b. Compost parameters, below:

Property	Test Method	Unit of Measurement	Requirement
pH	TMECC 04.11-A Elastomeric pH 1:5 slurry method pH	units	6–8.5
Soluble salts	TMECC 04.10-A Electrical conductivity 1:5 slurry method	dS/m (mmhos/cm)	0– 10

Moisture content	TMECC 03.09-A Total solids & moisture at 70 ± 5 °C	% wet weight basis	30-60
Organic matter Content	TMECC 05.07-A Loss-on-ignition organic matter method (LOI)	% dry weight basis	30–60
Maturity	TMECC 05.05-A Germination and vigor	% relative to positive control	Seed emergence 80 or above Seedling vigor 80 or above
Stability	TMECC 05.08-B Carbon dioxide evolution rate	mg CO_2-C/g OM per day	4 or below
Pathogen	TMECC 07.01-B Salmonella < 3 MPN per 4 grams, dry weight basis	Pass/ Fail	Pass
Pathogen	TMECC 07.01-B Fecal coliform bacteria < 1,000 MPN per gram, dry weight basis	Pass/ Fail	Pass
Physical contaminants	TMECC 02.02-C Man-made inert removal and classification: Plastic, glass, and metal % > 4 mm fraction	% dry weight basis	combined total: < 0.5%
Physical contaminants	TMECC 02.02-C Man-made inert removal and classification: Sharps (sewing needles, straight pins and hypodermic needles) % > 4mm fraction	% dry weight basis	none detected
Particle size fine for compost used as soil amendment	TMECC 02.02-B Sample sieving for aggregate Size classification	% dry weight basis	Pass 2”-inch sieve 98% min Pass 3/8-inch sieve 95% min
Heavy metals	PASS / FAIL	mg/kg (ppm), dry weight basis	All EPA 503 metal contaminant limits
Carbon:Nitrogen Ratio		Carbon : Nitrogen	≤25:1

Note: TMECC refers to "Test Methods for the Examination of Composting and Compost," published by the United States Department of Agriculture and the United States Compost Council (USCC). (Table modified from the US Composting Council Landscape Architectural Specifications 2005.)

2. Nitrogen-treated Fir Bark shall conform to:
   a. Physical Properties: 95%-100% passing, sieve size 6.35mm (1/4 inch), 80%-100% passing, sieve size 2.38mm (No. 8, 8 mesh), and 0%-30% passing, sieve size 500 micron (No. 35, 32 mesh)
   b. Chemical Properties: Nitrogen Content (dry weight basis) - 0.4-0.6% iron content - minimum 0.08% dilute acid soluble Fe on dry weight basis, soluble salts - maximum 3.5 millimhos/centimer @ 25 degrees C. as determined by saturation extract method; ash - 0-6.0%

PART 3 EXECUTION

3.1 LIMITS AND GRADES

A. Grade Review: Prior to commencing soil preparation operations, Contractor shall request a review by the City's Representative to verify specified limits and grades of work completed to date and soil preparation work to commence. Contractor shall complete the rough grading as necessary to round the top and toe of all slopes, providing naturalized contouring to integrate newly graded areas with the natural topography. Finish grading under this section shall be completed in accordance with the grades indicated on the drawings.

3.2 STRIPPING AND STOCKPILING OF EXISTING TOPSOIL

A. Excavation Areas: The native topsoil shall be stripped and stockpiled on-site in sufficient quantities to provide a six-inch layer throughout all planting areas. Topsoil to be stripped and stockpiled shall be taken from the surface layer after all organic litter and foreign debris has been removed and properly disposed.

B. Existing Grade Unchanged: In those areas where grades are not proposed to be modified (areas of no excavation or fill) the native topsoil shall be left in place. All debris, as well as all rocks over 0.75 inches in diameter, shall be removed from the surface of planting areas.

3.3 TOPSOIL PLACEMENT

A. Soil Moisture: If soils are saturated, suspend soil work operations until the soil moisture drains to below field capacity.

B. Subgrade preparation: Excavate planting areas to the proposed subgrade and remove all construction debris and materials.
   1. Do not over excavate compacted subgrades of adjacent pavement or structures.
   2. Subgrades shall slope approximately parallel to the finished grade and/or toward the subsurface drain lines as shown on the drawings.
   3. Scarify or rip to a depth of seven inches and protect from compaction.
   4. Topsoil Incorporation: Uniformly distribute a three-inch layer of topsoil and incorporate into the top six inches of subsoil by ripping, scraping, or tilling to mix the subsoil with the topsoil into a homogeneous mixture. Repeat until the total depth of topsoil placed is as indicated on the drawings. The final layer of topsoil shall be uniformly distributed in the planting areas and compacted in place to 85% compaction
   5. Existing Topsoil to Remain: Except within tree protection zones, in those planting areas where native topsoil is to be left in place, cross rip to a depth of ten inches. Then incorporate the amendments to a homogeneously blended soil depth of six inches.

3.4 ORGANIC AMENDMENT AND FERTILIZER INCORPORATION

A. Organic amendment: After topsoil placement and compaction, spread organic amendment at a rate of 6 cubic yards per 1000 square feet, unless otherwise specified by the soils report.

B. Fertilizer: Spread uniformly on top of compost at rates determined by soil tests. For bidding, assume per 1000 square feet:
   1. 30 pounds commercial fertilizer (6-20-20)
   2. 10 pounds iron sulfate

a. Note: Iron sulfate should be applied cautiously, avoiding contact with concrete, since permanent staining may result. Any such stained concrete shall be replaced at Contractor's expense.

C. Incorporate organic amendment and fertilizer into the top 6 inches of topsoil, until homogeneously blended.

3.5 PLANT PITS

A. Plant Pit Preparation: Plant pits shall have their sides and bottoms loosened or otherwise broken to prevent glazed or compacted surfaces and shall be as shown on the planting detail.

3.6 BACKFILL

A. Backfill Material and Placement: Only unamended soil shall be used beneath the root ball; cultivate bottom of plant pit to improve porosity. Backfill around sides of rootball shall be the amended soil taken from adjacent prepared areas. Spread material excavated from plant pits onto adjacent areas as replacement. Should additional backfill be necessary, a mixture of one-third organic amendment/fertilizer mix and two-thirds topsoil may be used for the top 12 inches of backfill.

3.7 PLANT PACKETS

A. Packet Quantities: All container plants shall receive plant packets as follows:
1. one-gallon plants one 10-gram packets
2. five-gallon plants two 10-gram packets
3. fifteen-gallon plants nine 10-gram packets
4. 24 inch box trees sixteen 10-gram packets
5. 36 inch box trees twenty-four 10-gram packets

B. Space the packets evenly around the root ball in backfill, 6-8 inches from soil surface, 1 inch away from root ball. City's Representative may require excavation of up to 5% of all plants selected at random for conformance review.

3.8 FINISH GRADING

A. Grading Operations: Contractor shall finish grade all irrigated planting areas unless otherwise noted, and shall remove all rocks and clods over one cubic inch to a depth of one inch below finish grade. All areas shall be smooth and uniformly graded. All erosion damage during the construction period shall be repaired by the Contractor.

B. Finish Grades: Unless otherwise noted, all soil finish grades shall be one inch below finish grade of walks, pavements, and curbs.

3.9 MEASUREMENT AND PAYMENT

A. All work under this section shall be included in the lump sum price bid for landscape soil preparation and shall include full compensation for furnishing all labor, materials, tools, equipment, and incidentals, and for doing all the work involved in landscape soil preparation, and related incidental work.

END OF SECTION

SECTION 329300 - PLANTING

PART 1 GENERAL

1.1 SCOPE

A. Furnish and install all container plantings, groundcover, root barrier, mulch, headboard, staking, and related work thereto.

1.2 REFERENCES

A. Interpretations of plant names and descriptions shall reference the following documents. Where the names or plant descriptions disagree between the several documents, the most current document shall prevail.
   1. USDA – The Germplasm Resources Information Network (GRIN) www.ars-grin.gov/npgs/searchgrin.html.
   2. Manual of Woody Landscape Plants; Michael Dirr; Stipes Publishing, Champaign, Illinois; most current edition.
   3. New Sunset Western Garden Book, Oxmoor House, most current edition.

B. ANSI American Standard for Nursery Stock

C. Federal, State, and County laws requiring inspection for plant disease and insect control.

1.3 QUALITY CONTROL

A. Reviews: The Contractor shall specifically request the following reviews prior to progressing with the work:
   1. Plant material approval
   2. Plant layout
   3. Finish grade
   4. Substantial completion
   5. Final completion

1.4 SUBMITTALS

A. Refer to Section 013300 - Submittal Requirements for submittal procedures.

B. Plant Material: Within (15) fifteen days after award of contract, Contractor shall submit notice to the City's Representative certifying the quantity and species of plant material ordered, the nursery supplying the material, any plant material unavailable at the time, and proposed plant substitutions. No plants shall be ordered or delivered prior to written acceptance by the City's Representative.

C. Mulch: Name of supplier and one quart-sized sample.

D. Certificates: All plant materials shall meet the specifications of Federal, State, and County laws requiring inspection for plant diseases and insect infestations. Inspection certificates required by law shall accompany each shipment, invoice, or order of stock, and when such plants arrive at the site of work, the certificate of inspection shall be filed with the City's Representative.

PART 2 PRODUCTS

2.1 MATERIALS

A. Nomenclature and Labels: Plant botanical names shall conform to current literature noted in section 1.2. All plants of each clone, species, and cultivar shall be delivered to the site labeled with their full botanical names. Every plant species shall be labeled with no less than one label for every ten plants of a species.

B. Quality: Minimum quality of all plant material shall conform to prevailing published specifications of the California Association of Nurserymen and the American Association of Nurserymen's American Standard for Nursery Stock unless otherwise indicated. Additional specifications shall be indicated on the drawings.

C. Quantities: The quantities shown on the plant list and in labels are for the City's Representative's use and are not to be construed as the complete and accurate limits of the contract. Contractor shall furnish and install all plants shown schematically on the drawings. Any unlabeled plants shall be considered as the smaller size shown for that type on the drawings.

D. Root Systems: All container-grown stock shall be grown in its container for at least six months prior to its planting. Contractor shall allow one percent of the quantity of plants for removal and inspection. Any plant material, within one year following the final acceptance of the project, determined by the City's Representative to be defective, restricted, declining or otherwise deficient due to abnormal root growth, shall be replaced by Contractor to the equal condition of adjacent plants at the time of replacement.

E. Trees: All trees shall have straight trunks of uniform taper, larger at the bottom. Trunks shall be free of girdling roots or damaged bark, with all minor abrasions and cuts showing healing tissue. Sucker basal growth and sucker lateral growth shall be removed and treated to eliminate re-sprouting. Normal lower side branching shall remain. Trees unable to stand upright without support shall be rejected.

F. Health: Foliage, roots and stems of all plants shall be of vigorous health and normal habit of growth for its species. All plants shall be free of all diseases, insect stages, burns, or disfiguring characteristics.

G. Untrue Species: All plant material, within two years following the final acceptance of the project, determined by the City's Representative to be untrue to the species, clone, and/or variety specified, shall be replaced by the Contractor, to the equal condition of adjacent plants at the time of replacement.

H. Mulch: shall be per plans.

I. Headerboard: shall be per plans.

PART 3 EXECUTION

3.1 GENERAL

A. Plant Material Approvals: Before planting operations commence, all or a representative sampling of plant material shall be reviewed at the site by the City's Representative. Defective plants

installed without such review shall be removed from the site upon request by the City's Representative and an acceptable plant substituted in its place.

B. Storage and Handling:
   1. Plant materials shall be protected and maintained in good condition. Bare root and balled materials shall be watered regularly and placed in a cool area. Plant material shall be protected at all times from animal damage, vandalism, drought damage, wind damage, frost damage, toxic irrigation water, or any other condition that would damage or reduce the viability of the plants. Plants shall be kept moist at all times and shall be completely watered twelve (12) hours or less before planting and shall be moist when installed.

C. Layout: Only those plants to be planted in any single day shall be laid out. Locations of all plants shall be reviewed prior to planting. Plants installed without this review shall be transplanted as directed by the City's Representative.

D. Protection of Plants: Contractor shall maintain all plant material in a healthy growing condition prior to and during planting operations. Contractor shall be responsible for vandalism, theft and damage to plant material until the commencement of the maintenance period.

E. Root Systems: Contractor shall be responsible for inspection of all root systems on plant materials. Inspection shall include, but not be limited to, checking for rootbound stock, encircling roots at the perimeter of the container, evidence of girdling roots, and other defective root conditions. Such inspections shall include the complete removal of soil from one percent of plant material containers, or at least one plant from each nursery and each plant type. Contractor shall cut defective or potentially defective girdling, rootbound, and encircling roots and spread the root system into the surrounding backfill. Plants with excessively defective root systems shall be rejected by the Contractor.

F. Pruning: Contractor shall do no pruning without the specific approval of the City's Representative. Plants pruned without approval shall be replaced by the Contractor, if required.

G. Basins: Construct basins as necessary to water plants. Remove basins from all plants under a permanent irrigation system prior to final inspection and finish grade the planting area. Basins for plants to be hand-watered shall remain in place. Basin bottoms shall drain to berm away from plant stem.

H. Staking: All trees shall be staked as drawn with stakes driven securely into existing soil aligned with the trunk and perpendicular to the direction of the prevailing winds. A minimum of two figure-eight rubber tree ties required per stake.

I. Plant Pits, Backfill and Finish Grading: See Section 329113 - Landscape Soil Preparation for materials and installation requirements.

J. Cleanup: After completion of all operations, Contractor shall remove all trash, excess soil and other debris. All walks and pavement shall be swept and washed clean, leaving the entire area in a neat, orderly condition.

3.2 MEASUREMENT AND PAYMENT

A. All work under this section shall be paid for at the lump sum price bid for PLANTING and shall include full compensation for furnishing all labor, materials, tools, equipment, and incidentals, and for doing all the work involved in PLANTING, and related incidental work.

END OF SECTION

SECTION 331113 - FACILITY WATER DISTRIBUTION

PART 1 GENERAL

1.1 APPLICABLE PUBLICATIONS:

A. The publications listed below form a part of this specification to the extent referenced. The publications are referred to in the text by the basic designation only.

1. American National Standards Institute (ANSI) Publications:
   a. B16.18-1978 Cast Copper Alloy Solder-Joint Pressure Fittings
   b. B18.2.2-1972 Square and Hex Nuts
   c. B18.5-1978 Round Head Bolts (Inch Series)
2. American Society for Testing and Materials (ASTM) Publications:
   a. A47-99(2022)e1 Standard Specification for Ferritic Malleable Iron Castings
   b. A48-22 Standard Specification for Gray Iron Castings
   c. A307-21 Standard Specification for Carbon Steel Bolts, Studs, and Threaded Rod 60 000 PSI Tensile Strength
   d. B32-20 Standard Specification for Solder Metal
   e. C94-22a Standard Specification for Ready-Mixed Concrete
   f. C150-22 Standard Specification for Portland Cement
   g. D2241-20 Standard Specification for Poly(Vinyl Chloride) (PVC) Pressure-Rated Pipe (SDR Series)
   h. D2564-20 Standard Specification for Solvent Cements for Poly(Vinyl Chloride) (PVC) Plastic Piping Systems
   i. D2855-20 Standard Practice for the Two-Step (Primer and Solvent Cement) Method of Joining Poly (Vinyl Chloride) (PVC) or Chlorinated Poly (Vinyl Chloride) (CPVC) Pipe and Piping Components with Tapered Sockets
   j. D3139-19 Standard Specification for Joints for Plastic Pressure Pipes Using Flexible Elastomeric Seals
   k. F402-18 Standard Practice for Safe Handling of Solvent Cements, Primers, and Cleaners Used for Joining Thermoplastic Pipe and Fittings
   l. F477-14(2021) Standard Specification for Elastomeric Seals (Gaskets) for Joining Plastic Pipe
3. American Water Works Association (AWWA) Publications:
   a. C110-12 Gray-Iron and Ductile-Iron Fittings, 3 in. through 48 in., for Water and Other Liquids
   b. C500-19 Gate Valves, 3 in. through 48 in. NPS, for Water and Sewage Systems
   c. C502-18 Dry-Barrel Fire Hydrants
   d. C601-81 Disinfecting Water Mains
   e. C606-81 Grooved and Shouldered Type Joints
   f. C606-81 Grooved and Shouldered Type Joints
   g. C800-66 Threads for Underground Service Line Fittings
   h. C900-81 Polyvinyl Chloride (PVC) Pressure Pipe, 4 in. through 12 in., for Water
   i. C506-78 Reduced Pressure Principal Devices
4. National Fire Protection Association (NFPA) Publication:

a. NFPA 24-1981 Installation of Private Fire Service Mains and Their Appurtenances

5. Underwriter's Laboratories, Inc. (UL) Publications:
   a. UL 246-79 Hydrants for Fire-Protection Service, with revision dated January 4, 1982
   b. UL 262-80 Gate Valves for Fire Protection Service
   c. UL 789-82 Indicator Posts for Fire Protection Service, with revision dated July 27, 1982
6. Uni-Bell Plastic Pipe Association (UNI) Publication:
   a. UNI-B-3-79 Installation of Polyvinyl Chloride (PVC) Pressure Pipe Complying with AWWA Standard C-900
7. Standard Specifications for Public Works Construction ("Orange Book"); the latest edition.

1.2 GENERAL REQUIREMENTS

A. All work shall be performed in compliance with Section 307 of the Standard Specifications for Public Works Construction except as modified herein.

B. Fire Service Lines shall be indicated as polyvinyl chloride (PVC) plastic water main pipe. Provide fire hydrants and assembly, including gate valve, where indicated.

C. Manufacturer's Data: Submit manufacturer's standard drawings or catalog cuts of the following items, except where both are specified:
   1. Pipe and Fittings
   2. Valves
   3. Valve Boxes

D. Standards Compliance:
   1. Submit manufacturer's certificates of conformance or compliance for each of the following materials, which are specified to conform to publications referenced under paragraph, "Materials" in this section:
      a. Valves
      b. Fire Hydrants
   2. All tests required by the applicable referenced publication shall have been performed, whether specified in that publication to be mandatory or otherwise. For tests which are not specified in the referenced publication to be performed at definite intervals during manufacture, the tests shall have been performed within 3 years of the date of submittal of certificates on the same type, class, grade, and size of material as is being provided for the project.

E. Where the term "Architect" is used, it shall mean Engineer.

1.3 DELIVERY, STORAGE, AND HANDLING OF MATERIALS

A. Delivery and Storage: Inspect materials delivered to site for damage. Unload and store with minimum handling. Store materials on site in enclosures or under protective covering. Store plastic piping and rubber gaskets under cover out of direct sunlight. Do not store materials directly on the ground. Keep inside of pipes and fittings free of dirt and debris.

B. Handling: Handle pipe, fittings, valves, hydrants, and other accessories in such manner as to ensure delivery to the trench in sound undamaged condition. Take special care to avoid injury to coatings and linings on pipe and fittings; make satisfactory repairs if coatings or linings are damaged. Carry pipe to the trench; do not drag it. Do not leave rubber gaskets and plastic piping

that are not to be installed immediately out in the sunlight, but store under cover out of direct sunlight.

PART 2 PRODUCTS

2.1 MATERIALS

Piping Materials for Water Distribution Mains:

A. Ductile-Iron Piping
   1. Piping and Fittings: Ductile-iron pipe shall conform to AWWA C151 and shall be Thickness Class 50 minimum. Flanged pipe shall conform to AWWA C115. Fittings shall conform to AWWA C110; fittings with push-on joint ends shall conform to the same requirements as fittings with mechanical-joint ends, except that the bell design shall be modified, as approved, for push-on joint. Fittings shall have pressure rating at least equivalent to that of the pipe. Ends of pipe and fittings shall be suitable for the joints specified in the following paragraph. Pipe and fittings shall have cement-mortar lining conforming to AWWA C104, standard thickness.
   2. Joints and Jointing Material:
      a. Joints, General: Joints for pipe and fittings shall be push-on joints except as otherwise indicated. The following optional jointing methods may be employed, either in whole or in part.
      b. Mechanical-joint in lieu of push-on joint.
      c. Push-on Joints: Shape of pipe ends and fittings ends, gaskets, and lubricant for joint assembly shall conform to AWWA C111.
      d. Mechanical Joints: Dimensional and material requirements for pipe ends, glands, bolts and nuts, and gaskets shall conform to AWWA C111.
      e. Flanged Joints: Bolts, nuts, and gaskets for flanged connections shall be as recommended in the Appendix to AWWA C115.

B. Polyvinyl Chloride (PVC) Plastic Water Main Pipe and Associated Fittings:
   1. Piping and Fittings: Ductile-iron pipe shall conform to AWWA C151 and shall be Thickness Class 50 minimum. Flanged pipe shall conform to AWWA C115. Fittings shall conform to AWWA C110; fittings with push-on joint ends shall conform to the same requirements as fittings with mechanical-joint ends, except that the bell design shall be modified, as approved, for push-on joint. Fittings shall have pressure rating at least equivalent to that of the pipe. Ends of pipe and fittings shall be suitable for the joints specified in the following paragraph. Pipe and fittings shall have cement-mortar lining conforming to AWWA C104, standard thickness.
   2. Joints and Jointing Material: Joints for pipe shall be push-on joints as specified in ASTM D3139. Joints between pipe and metal fittings, valves, and other accessories shall be push-on joints as specified in ASTM D3139 or shall be compression-type joints/mechanical-joints as respectively specified in ASTM D3139 and AWWA C111. Each joint connection shall be provided with an elastomeric gasket suitable for the bell or coupling with which it is to be used. Gaskets for push-on joints for pipe shall conform to ASTM F477. Gaskets for push-on joints and compression-type joints/mechanical-joints for joint connections between pipe and metal fittings, valves, and other accessories shall be as specified in AWWA C111 respectively for push-on joints and mechanical-joints. Mechanically coupled joints using a sleeve-type mechanical coupling, as specified in paragraph,

"Sleeve-Type Mechanical Couplings," may be used as an optional jointing method in lieu of push-on joints on plain-end PVC plastic pipe, subject to the limitations specified for mechanically coupled joints using a sleeve-type mechanical coupling and to the use of internal stiffeners as specified for compression-type joints in ASTM D3139.

C. Plastic Piping: All plastic pipe and fittings shall bear the seal of approval of the National Sanitation Foundation for potable water service. Plastic pipe and fittings shall be supplied from the same source.
   1. Polyvinyl Chloride (PVC) Plastic Piping: Pipe shall conform to AWWA C900, with SDR as necessary to provide 150 psi minimum pressure rating. Fittings shall conform to AWWA c900. Pipe and fittings shall be of the same PVC plastic material and shall be one of the following pipe/fitting combinations, as marked on the pipe and fitting, respectively.

D. Insulating Joints: Joints between pipe of dissimilar metals shall have a rubber-gasketed or other suitable approved type of insulating joint or dielectric coupling which will effectively prevent metal-to-metal contact between adjacent sections of piping.

2.2 VALVES, HYDRANTS, AND OTHER WATER MAIN ACCESSORIES

A. Gate Valves on Buried Piping: Except as otherwise specified in this paragraph, valves shall conform to AWWA C500 or to UL 262. Valves conforming to AWWA C500 shall be non-rising stem type with double-disc gates having parallel or inclined seat. Valves conforming to UL 262 shall be inside-screw type with operating nut, shall have split wedge or double disc type gate, and shall be designed for a hydraulic working pressure of 150 psi. Valves shall open by counterclockwise rotation of the valve stem. Stuffing boxes shall have O-ring stem seals, except when gearing is specified in this paragraph, in which case conventional packing shall be used in place of O-ring seal. Stuffing boxes shall be bolted and constructed to permit easy removal of parts for repair. Valves shall have mechanical-joint or push-on joint ends and gaskets conforming to AWWA C111, except that valves may have special ends, as approved, for connection to asbestos-cement or concrete piping or to sleeve-type mechanical coupling. Valve ends and gaskets for connection to asbestos-cement or concrete piping or to sleeve-type mechanical coupling shall conform to the applicable requirements specified respectively for the joint or coupling. Valves shall have mechanical-joint ends only; ends and gaskets shall conform to AWWA C111. Where a post indicator is shown, the valve shall have an indicator post flange; indicator post flange for AWWA C500 valve shall conform to the applicable requirements of UL 262.

B. Fire Hydrants:
   1. Fire Hydrants, General: Hydrants shall be dry-barrel type. Fire hydrants shall conform to the City of Reno Standards, Mueller A-423.

C. Valve Boxes: Each gate valve on buried piping shall be provided with an adjustable cast-iron or precast concrete valve box of a size suitable for the valve on which it is to be used. The head shall be round and the lid shall have the word "WATER" cast on it. The least diameter of the shaft of the box shall be 5-1/4 inches. Each cast-iron box shall be given a heavy coat of bituminous paint.

D. Tracer Wire for Nonmetallic Piping: Tracer wire shall be bare copper or aluminum wire not less than 0.10 inch in diameter and shall be provided in sufficient length to be continuous over each separate run of nonmetallic pipe.

PART 3 EXECUTION

3.1 INSTALLATION OF PIPELINES

A. General Requirements: These requirements shall only apply to all pipeline installation except where specific exception is made in the "Special Requirements..." paragraphs hereunder.

B. Location of Water Lines: The work covered by this section shall terminate at a point approximately 5 feet from the building, unless otherwise indicated on the drawings. Where the location of the water line is not clearly defined by dimensions on the drawings, do not lay water line closer horizontally than 10 feet from any sewer line. Where water lines cross under gravity sewer lines, encase sewer line fully in concrete for a distance of at least 10 feet on each side of the crossing, unless sewer line is made of pressure pipe with rubber-gasketed joints and no joint is located within 3 feet horizontally of the crossing. Do not lay water lines in the same trench with gas lines, fuel lines or electric wiring.

C. Earthwork: All earthwork shall be in accordance with Section 313000, - Excavation, Backfilling and Compacting.

D. Pipe Laying and Jointing: All pipe, fittings, valves and accessories will be carefully inspected by the Architect before and after installation and those found defective will be rejected. Remove fins and burrs from pipe and fittings. Before placing in position, clean pipe, fittings, valves, and accessories and maintain in a clean condition. Provide proper facilities for lowering sections of pipe into trenches. Do not under any circumstances drop or dump pipe, fittings, valves, or any other water line material into trenches. Cut pipe accurately to measurements established at the site and work into place without springing or forcing. Replace by one of the proper dimensions any pipe or fitting that does not allow sufficient space for proper installation of jointing material. Blocking or wedging between bells and spigots will not be permitted. Lay bell-and-spigot pipe with the bell end pointing in the direction of laying. Grade the pipeline in straight lines, taking care to avoid the formation of any dips or low points. Support pipe at its proper elevation and grade, taking care to secure firm and uniform support. Wood support blocking will not be permitted. Lay pipe so that the full length of each section of pipe and each fitting will rest solidly on the pipe bedding; excavate recesses to accommodate bells, joints, and couplings. Provide anchors and supports where indicated and where necessary for fastening work into place. Make proper provision for expansion and contraction of pipelines. Keep trenches free of water until joints have been properly made. At the end of each day's work, close open ends of pipe temporarily with wood blocks or bulkheads. Do not lay pipe when conditions of trench or weather are unsuitable.

E. Installation of Tracer Wire: Install a continuous length of tracer wire for the full length of each run of nonmetallic pipe. Attach wire to top of pipe in such manner that it will not be displaced during construction operations.

F. Connections to Existing Lines: Make connections to existing water lines in an approved manner and do so with a minimum interruption of service on the existing line. Where connections to existing lines are made under pressure, make these connections in accordance with the recommendations of a manufacturer of pipe of which the line being tapped is made, except as otherwise specified in this paragraph. Tap concrete pipe in accordance with the requirements of AWWA Manual M9 for tapping concrete pressure pipe.

3.2 INSTALLATION OF VALVES AND HYDRANTS FOR WATER MAINS

A. Installation of Valves: Install gate valves in accordance with the requirements of AWWA C600 for valve-and-fitting installation. Make and assemble joints to gate valves as previously specified for making and assembling the same type joints between pipe and fittings.

B. Installation of Hydrants: Install hydrants in accordance with the requirements of AWWA C600 for hydrant installation, as indicated. Make and assemble joints as previously specified for making and assembling the same type joints between pipe and fittings.

3.3 SPECIAL REQUIREMENTS FOR INSTALLATION OF WATER SERVICE PIPING

A. Installation, General: Connect water service piping to the building service where the building service has been installed. Where building service has not been installed, terminate water service lines approximately 5 feet from the building line at a point directed by the Architect; such water service lines shall be closed with plugs or caps.

B. Metallic Piping:
   1. Metallic Piping Installation, General: Install pipe and fittings in accordance with the general requirements for installation of pipelines and with the applicable requirements of AWWA C600 for pipe installation, except as otherwise specified in the other subparagraphs hereunder.
   2. Jointing:
      a. Screwed Joints: Make screwed joints up tight with a stiff mixture of graphite and oil, inert filler and oil, or an approved graphite compound; apply to male threads only. Threads shall be full cut; do not leave more than three threads on the pipe exposed after assembling the joint.
      b. Joints for Copper Tubing: Cut copper tubing with square ends; remove fins and burrs. Handle tubing carefully; replace dented, gouged, or otherwise damaged tubing with undamaged tubing. Make solder joints using ASTM B32, alloy grade Sb5 of equivalent solder. Before making joint, clean ends of tubing and inside of fitting or coupling with wire brush or abrasive. Then apply a rosin flux to the tubing end and on recess inside of fitting or coupling. Then insert tubing end into fitting or coupling for the full depth of the recess and solder. For compression joints on flared tubing, insert tubing through the coupling nut and then flare tubing with an approved flaring tool.
      c. Flanged Joints: Make flanged joints up tight, taking care to avoid undue strain on flanges, valves, fittings, and accessories.

C. Plastic Piping:
   1. Plastic Piping Installation, General: Install pipe and fittings in accordance with the general requirements for installation of pipelines and with the applicable requirements of AWWA C900.
   2. Jointing: Make plastic pipe joints to other pipe materials in accordance with the recommendations of the plastic pipe manufacturer, as approved.
   3. Connections to Water Mains: Connect plastic pipe service lines to water mains in accordance with the recommendations of the plastic pipe manufacturer, as approved.

3.4 DISINFECTION

A. Flush and disinfect new potable water lines and affected portions of existing potable water lines in accordance with AWWA C615. Apply chlorine by the continuous feed method.

3.5 FIELD TESTS AND INSPECTIONS

A. Field Tests and Inspections, General: The Architect will conduct field inspections and witness all field tests specified in this section. The Contractor shall perform all field tests, and provide all labor, equipment, and incidentals required for testing, except that water needed for field tests will be furnished by the Owner. The Contractor shall produce evidence, when required, that any item of work has been constructed properly in accordance with the drawings and specifications. Do not begin testing on any section of a pipeline where concrete thrust blocks have been provided until at least 5 days after placing of the concrete.

B. Testing Procedure: Test water mains and water service lines in accordance with the applicable standard specified in this paragraph, except for the special testing requirements given in the following paragraph. Test ductile iron water mains and water service lines in accordance with the requirements of AWWA C600 for hydrostatic testing. The amount of leakage on ductile-iron pipelines with mechanical-joints or push-on joints shall not exceed the amounts given in AWWA C600; no leakage will be allowed at joints made by any other method. Test PVC plastic water mains and water service lines made with PVC plastic water main pipe in accordance with the requirements of UNI B-3 for pressure and leakage tests. The amount of leakage on pipelines made of PVC plastic water main pipe shall not exceed the amounts given in UNI B-3, except that at joints made with sleeve-type mechanical couplings, no leakage will be allowed.

C. Special Testing Requirements: For pressure test, use a hydrostatic pressure 50 psi greater than the maximum working pressure of the system, but not less than 200 psi. Hold this pressure for not less than 2 hours. Prior to the pressure test, fill that portion of the pipeline being tested with water for a soaking period of not less than 24 hours. For leakage test, use a hydrostatic pressure not less than the maximum working pressure of the system. Leakage test may be performed at the same time and at the same test pressure as the pressure test.

END OF SECTION

SECTION 334100 - STORM SEWER AND DRAINAGE PIPE

PART 1 GENERAL

1.1 SUMMARY:

A. This Section includes gravity-flow, non-pressure storm drainage outside the building, with the following components:
   1. Storm drain piping.
   2. Sanitary sewer piping

1.2 SUBMITTALS:

A. Product Data: For each type of product indicated (PVC pipe)
   1. Shop Drawings: Submit manufacturer's standard drawings or catalog cut sheets for manholes and catch basins. Include manhole frames and covers and catch basin frames and grates.

PART 2 PRODUCTS

2.1 PIPING MATERIALS:

A. Refer to Part 3 "Piping Applications" and the following for pipe, fitting, and joining materials:

2.2 SDR-35 PIPE:

A. SDR-35 Pipe: Type as specified in construction documents.

PART 3 EXECUTION

3.1 PIPING APPLICATIONS:

A. Pipe couplings and fittings with pressure ratings at least equal to pipe rating may be used in applications below, unless otherwise indicated.

B. Gravity-Flow, Non-pressure Storm Sewer Piping: Use the following pipe materials as called for on the drawings:
   1. SDR-35 Pipe (as specified on construction documents)

3.2 PIPING INSTALLATION:

A. General Locations and Arrangements: Drawing plans and details indicate general location and arrangement of underground storm drainage piping. Location and arrangement of piping layout take design considerations into account. Install piping as indicated, to extent practical. Where specific installation is not indicated, follow piping manufacturer's written instructions.

B. Install piping beginning at low point, true to grades and alignment indicated with unbroken continuity of invert. Place bell ends of piping facing upstream. Install gaskets, seals, sleeves, and couplings according to manufacturer's written instructions for using lubricants, cements, and other installation requirements.
   1. Install manholes for changes in direction unless fittings are indicated. Use fittings for branch connections unless direct tap into existing storm sewer is indicated.

2. Install proper size increasers, reducers, and couplings where different sizes or materials of pipes and fittings are connected. Reducing size of piping in direction of flow is prohibited.
3. Install gravity-flow, nonpressure drainage piping according to the following:
   a. Install piping pitched down in direction of flow, at slopes indicated on the plans.
4. Clear interior of piping and manholes of dirt and superfluous material as work progresses.

3.3 PIPE JOINT CONSTRUCTION:

A. Join gravity-flow, nonpressure storm sewer piping according to the following: Join SDR-35 materials with appropriate couplings and fittings.

Air Cooled Refrigeration Systems

ITEM #_____

MINI-PAK REFRIGERATION SYSTEM

The packaged refrigeration system is to be U.L. Listed and will be located on a pad outside of the building. This unit includes the outdoor weather housing, compressor and condenser systems and electrical control panel, all housed within a single assembly. The evaporator coil assemblies will be supplied with all the required options and accessories. All of the component parts, options and accessories will be provided, mounted, piped and wired, as required by the manufacturer. The system shall be manufactured to operate at: _____ volts, _____ phase, _____hertz.

FRAME AND HOUSING

The outdoor weather shall include a welded, de-burred and cleaned structural steel base frame made of 12 gauge. The exterior housing and access doors will be manufactured of a minimum of 16 gauge galvanized steel which has been assembled and cleaned. The frame and housing shall be painted with a primer coat of epoxy based paint and finished with a coat of polyurethane acrylic enamel.

COMPRESSOR AND CONDENSER SYSTEMS

All compressors will be Copelaweld, Copelametic, Scroll or Discus. All compressors will be manufactured to operate with R-404A, R-448A, R-449A, or R-407A refrigerant. Each Compressor system shall be filled with refrigerant compatible refrigeration oil by the manufacturer and will include discharge and suction line vibration protection (vibrasorbers Copelametic and Discus compressors), dual pressure control with hoses, liquid line filter-dryer, moisture indicating sight glass, and crankcase heater. Each of these systems shall also include a receiver tank capable of accepting all of the system refrigerant without exceeding 90% of its volumetric capacity. Each receiver will be provided with a fusible plug or pressure relief vent and, at its outlet, an isolation valve with a service port. Additionally, all compressor systems that will operate at suction temperatures below 0°F shall include a suction line accumulator.

The condenser system shall include the Multi-Circuited condenser, 1/3 horse power condenser fan motor with 20 inch fan blade mounted in a venturi contoured air-scoop protected by plastic coated fan guard, and flooded headpressure controls. The compressors and condenser circuits shall be sized to operate at an average temperature differential between the ambient and condensing temperatures of 20°F.

CONTROL PANEL

The interior mounted, weather proof, electrical control panel will be manufactured of 16 gauge galvanized steel which has been assembled, welded, de-burred and cleaned. The control panel shall be protected by an exterior mounted NEMA 3R rated fused disconnect switch and will include a removable cover, circuit breakers and contactors for each compressor, required defrost time clocks; and circuit breakers, start capacitors, and fan cycle control thermostats for each of the condenser fan motors. A wiring diagram of the refrigeration system shall be provided and mounted inside of the refrigerated system. All internal wiring shall be held in place with fasteners and individually numbered. The wire numbers shall be shown on the wiring diagram.

EVAPORATOR COILS

The evaporator assemblies, and the parts associated with them, will be mounted inside of the walk-ins. Each evaporator coil shall include a matching thermostatic expansion valve, liquid line solenoid valve and thermostat. In cases where two (2) or more evaporator coils are to be piped to a single compressor the thermostat and liquid line solenoid valve will be shipped loose to be mounted and wired at the job site.

INTERNAL REFRIGERATION PIPING

All of the internal refrigeration piping shall be extended to one side of the refrigeration system in a neat and orderly manner. Each set of piping shall have a label permanently affixed identifying the system it will service. All internal refrigeration piping shall be refrigerant grade A.C.R. or type L copper tubing. All tubing shall be held in place with Uni-Strut channels and clamps and protected with neoprene grommets. A minimum of 1/2 inch thick insulation shall cover all suction lines.

After circuiting the condenser shall be tested for leaks at a minimum pressure of 450 pounds per square inch/gauge (psig). After final assembly the entire system shall be tested for leaks at 250 psig and evacuated pressure test at 500 microns at the factory. The refrigeration system shall be shipped with a 55 psig charge of dry nitrogren.

EcoNet® Enabled Unit Coolers

Efficient & Intelligent Control

EcoNet® Enabled Unit Coolers are electronically controlled evaporators designed for energy efficiency and easier installation. Developed in conjunction with Rheem Manufacturing specifically for commercial refrigeration applications, it builds on the success, reliability and efficiency of Rheem's EcoNet technology.

- Saves energy by reducing fan speed to 50% during off cycle
- Maximizes energy efficiency with less compressor runtime
- Eliminates icing issues and unnecessary defrosts
- Improves product quality by reducing temperature fluctuations
- Can be used with a condensing unit with single and multiple evaporators as a group
- Available factory-installed on Next-Gen All-Temp Low Profile, Center Mount, Low Velocity Center Mount, Medium Profile, Heavy Duty, and Warehouse Unit Coolers for quick shipment directly from finished goods warehouses

Optional EcoNet Command Center

- Intuitive graphical touchscreen interface controls up to 32 devices (including the Command Center) through one display
- Provides continuous communication between system components
- Remote mount display allows for EcoNet Enabled Unit Coolers to be programmed, monitored, and troubleshot outside of the space being cooled

FS-L
Left Corner Floor Sink/Utility Sink

General Information

Project Name: _____

Consultant: _____

Item #: _____

Model #: _____

Quantity: _____

Specifications

FS-L Model is a standard duty "left corner" utility sink with a 18" x 24" x 7" deep bowl & angled corner.

Utility Sinks are constructed of 16GA type 300 series stainless steel, with integrated full-height apron and built in pitch to 4" OD waste outlet with strainer.

Product Guide

IMC Utility Sinks are easily cleanable without the use of tools. All corners are coved, and all seams are fully welded and polished.

Rugged type 304, 18-8 stainless steel construction, engineered to stand up under day-in and day-out abuse.

Options

- **SSF** - Wall Faucet
- **HA** - 36" Hose
- **MH3** - Mop Holder (3)
- **MH4** - Mop Holder (4)
- **MH5** - Mop Holder (5)
- **LH6** - 6" High Legs
- **IPS2** - 2" IPS Drain
- **BW-36** - Custom Bowl up to 36" x 36"
- **FL48** - 48" High Flashing at Rear or Side
- **FL48-W** - Welded 48" High Flashing on 3 Sides
- **RSS8** - Rear & Side Splash 8" High
- **USH24** - 24" Utility Shelf
- **USH36** - 36" Utility Shelf
- **MSR** - Lint Bucket (Mesh Strainer)
- **FF-50** - S/S Flanged Feet (Each)
- **SEC** - Correctional Package

Specifications

MH Model Mop Holder is constructed of 18GA type 300 stainless steel. Unit includes mounting flanges & closed ends for black rubber tension grip holder with chrome plated steel base.

MH3 Model is 20" long x 4" high x $1^{3}/_{4}$" deep & features (3) grip holders.

MH4 Model is $26^{3}/_{4}$" long x 4" high x $1^{3}/_{4}$" deep & features (4) grip holders.

MH5 Model is 33½" long x 4" high x $1^{3}/_{4}$" deep & features (5) grip holders.

Product Guide

IMC Mop Holders are simply the best way to hold your mops. Mount over an IMC Utility Sink or any other desirable space. Spring-activated rubber grips grasp mops securely, making storing & removing easy.

Neatly arrange your mops to maximize & keep your space tidy, an essential item for any commercial facility.

MOP HOLDER

Model	Size (L x H x D)
☐ MH3	20" x 4" x $1^{3}/_{4}$"
☐ MH4	$26^{3}/_{4}$" x 4" x $1^{3}/_{4}$"
☐ MH5	33½" x 4" x $1^{3}/_{4}$"

For Vanguard specifications, see page 36.

Penco has been manufacturing lockers for decades that last for decades, and the Vanguard line is the embodiment of what it takes to withstand the daily use and abuse typically dealt to a locker.

The powder coat baked enamel finish is available in many standard colors, with body parts finished the same color as the doors, as standard.

For quieter operation, each latch hook features a noise reducing rubber bumper.

The welded door frames have mortise and tenon construction and are spot welded for lifetime rigidity. Every door has a continuous door strike. All hinges are full loop, 5-knuckle design.

Vanguard™
Specialty Lockers

Dual Lockers

A dual locker is a single tier locker with a vertical partition separating the area beneath the shelf into two compartments. It is ideally suited for situations where street clothes and work clothes are to be kept apart. It is generally used with lockers 15” or 18” wide and 18” or 21” deep. Guardian and Invincible II lockers can also be supplied as dual lockers.

Box Over Lockers

Provides a compact independent lockable door above a 60” high standard Vanguard Door. If a shelf is required in the lower compartment, it must be ordered separately.

Box Over Lockers - 72” High		
Unit Width	Unit Depth	Cat. No.
12”	12”	6439V
12”	15”	6441V
12”	18”	6443V
15”	15”	6436V
18”	18”	6445V
18”	21”	6447V

16 Person Locker

Accommodates 16 users in only 69” of floor space. Includes a 45” wide coat rod. Ideal for employee lockers. Accepts built-in locks or padlocks.

69”W x 18” D x 72”H. Cat. No. 6579V

Wall Mounted Locker with Coat Rod

A practical storage unit where space is at a premium. Four private compartments with a hanging area for 16 coats. When wall mounted, the floor below is kept clear for easy cleaning (wall anchors are not included). Can also be set on counters or cabinets (without coat rod).
45”W x 18”D x 13-5/8” H.
Cat. No. 68242

The Executive

The Executive is a custom-outfitted 24” wide double door locker which offers such optional personal amenities as multiple storage shelves, lockable inner storage compartment, and combination comb & brush tray with towel bar. Shown here with available Classic III stainless steel recessed handle and optional front and end bases.

It is especially appropriate for golf clubs. Other accessories available include golf ball tray, acrylic mirror and name card holder. For ordering information contact your Penco representative.

Half Height Locker, 1 Tier

Available in 30-1/2”, 36-1/2” and 48-1/2” heights; Available in 12”, 15” and 18” depths; 12” wide. Only 48-1/2” high lockers include a shelf for storage of books and small articles.

One High Box Locker

This 12” wide individual one high box locker provides storage for personal items and features standard box locker construction with friction catch door pull. Actual overall height is 13-5/8”.

7 and 8 Person Lockers

These efficient lockers are ideal for multiple user situations such as school gymnasium locker rooms. The box compartments (18”W x 12”H) are for permanent storage of athletic gear. When a user is present, the large locker (18”W x 60”H) is used for street clothes.

ADA / Environmental

Americans with Disabilities Act Information (ADA)

Penco lockers commonly accepted for ADA or barrier-free assignments are single tier and double-tier (lower tier only) when equipped with the Classic III recessed handle with multi-point latching: Vanguard, Guardian, Invincible II, All-Welded and Angle Iron (with available modifications). Also, consider the SmartLocker® electronic system which features touchless entry. Other handle types and certain lock selections may not be recognized as ADA compliant without modification.

Single tier 60" or 72" high lockers with the Classic III recessed multi-point latch handles must have shelves relocated and/or added to accommodate ADAAG mandated reach ranges. Two tier 36" high openings with the Classic III recessed handle may be used by designating the lower tier for ADA compliance. An extra shelf should be ordered to bring the lowest reach point within the prescribed ADAAG range based upon side or forward reach. We recommend field drilling for these shelf locations on smaller requirements. The owner or architect may also require a handicapped access sign be placed on the door.

Other handles and configurations may sometimes be specified, but those above are the most appropriate based upon a literal interpretation. Attention should also be paid to the clear area in front of the lockers to meet other separate but related guidelines. Contact your factory representative for assistance, or go to www.access-board.gov/adaag/html/adaag.htm for a complete text of the ADA Accessibility guidelines.

Environmental Information

- Based upon the most recent information from our source mills, the recycled content of our steel lockers can range from 25% to over 50%. Because the percentage of recycled content may vary from project to project based on a number of variables, please contact our offices for detailed information on your specific requirement.

- Powder coating drastically reduces waste through high efficiency application & recovery methods.

- Penco's powder coat paint contains no solvents and as a result releases no Volatile Organic Compounds (VOC's) normally associated with wet paint processes.

- Our packaging contain at least 20% post-consumer recycled content.

- Approximately 34% of the U.S. population lives within a 500 mile radius of our manufacturing facility, requiring less fuel to ship our products to many destinations.

Made in USA

Penco Products, Inc. continues to manufacture every locker featured in this catalog in the United States. We believe that by capitalizing on the efficiency of our North Carolina plant as well as our experienced workforce and formidable buying power, we can remain the industry leader from right here at home.

With 475,000 square feet of manufacturing space and over 150,000 square feet at multiple QuickShip distribution centers throughout the United States, Penco is also able to deliver the industry's shortest lead times while reducing shipping time and mileage. This is the result of one company's ongoing commitment to delivering America's best storage solutions to both domestic and global marketplaces.

Locking System Options

Built-in Key Locks. Available in flat key or grooved key models. Dead bolt and spring bolt construction. Reversible for LH & RH applications.

Built-in Combination Locks. Available with five combination changes for security year to year. Master key controlled. Stainless steel escutcheon plate. Use dead bolt models for all but box lockers, which use spring bolt. Available in LH & RH.

Combination Padlocks. Available with and without master keying. 3 number dialing. Rust resistant. Fits box lockers, Die-Cast Handles, recessed handles, cremone handles and basket racks.

Note: For proper fit and security, padlock shackle must have a diameter of 9/32" or 5/16" and a distance of .75" to .81" between the top of the case and the underside of the shackle when in the locked position.

Coin Operated. Ideal for public or private applications that require security with the assurance that keys will be returned, or as a revenue producer. Fits most Penco lockers. Available in 3 types: coin return, coin collect and token operation. Not available for Defiant lockers.

ADA Compliant Locks

Key Lock Model No. 9707. Just insert key (turning not required) and lift latch pull to open door.

Key Lock Model No. 9676A. Has an oversized keyhead to facilitate turning.

Battery Powered Lock. ADA compliant lock that opens by touching a Button Key to the lock. When opened, an LED light flashes and audio indicator sounds. Lock uses programming key to set user access and a master key for administrative or management use.

Benches and Pedestals

A natural accessory for any locker room. Benches add permanent comfort and order to the floor plan arrangement.

Penco offers a choice of bench pedestal styles. Order two pedestals for standard benches 96" long or less; order three pedestals for benches over 96" long. The seat portion of ADA benches require a minimum of 4 pedestals, placed as shown in the photo of the Bench Bracket.

Bench Tops

Exceptionally strong. Made from selected hardwood and finished with clear lacquer.

For ADA (Americans With Disabilities Act) compliant benches, use 16" or 18" deep bench backs and 20" or 24" deep seats plus Bench Brackets to support the backs. Order Pedestals separately.

A. Heavy Duty Bench Pedestal

16-1/4" high pedestal consists of a heavy duty steel tube welded to top and bottom flanges. Hardware for fastening to the bench only is included. Pedestal must be anchored to the floor. Order two or more per standard bench; four or more for ADA compliant bench. Available for quick shipment in 028 Gray and 073 Champagne. Available on production schedules in all standard colors. Cat. No. 60822H

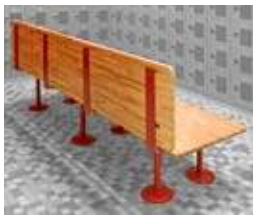
B. Stainless Steel Free Standing Pedestal

This pedestal has a 14" wide base which allows for moveable free standing use. Holes in the bottom are provided for optional floor anchoring or for attachment of non-skid bumpers (see below). Hardware is supplied for fastening to the bench top. Height is 16-1/4". Cat. No. 60827H

Non-Skid Pedestal Kit for Stainless Steel Pedestal

Rubber non-skid bumpers to prevent damage to floors. Consists of set of 4 non marking rubber feet and fastening hardware. Order 1 kit per pedestal. Cat. No. 68420

Bench Bracket for Back of ADA Benches



For attaching 16" or 18" backrest to 20" or 24" deep benches for ADA use. Sturdy steel construction. Order a minimum of 2 per back. Size is 19" x 19" x 2". Hardware included. Cat. No. 6ACXHP61H

Mirror

Made of acrylic plastic that will not break in normal usage. Mirror has an adhesive backing for easy installation. Size is 6" wide x 8" high. Cat. No. 96370

Specifications
Vanguard™ Lockers (KD)

Materials
Sheet Steel: All parts made from prime grade mild cold rolled sheet stell from surface imperfection, and capable of taking a high grade enamel finish.
Hinges: .074" thick, 2" high, double spun, full loop, tight pin, five-knuckle butt hinges, projection welded to door frame and securely fastened to the door with 2 steel rivets. Doors over 48" high shall have three hinges, all other doors shall have two hinges.
Finishing: Chemically pretreat metal with a multiple stage cleaning and metal preparation process. Finish coat shall be electrostatically applied powder coat enamel properly cured to paint manufacturer specifications to achieve optimum performance. All lockers shall be painted inside and outside with the same color.
Equipment: Coat hooks and coat rods are zinc plated. Truss fin head bolts and hex nuts are zinc plated.

Fabrication General
Construction: Built on the unit principle - each locker shall have an individual door and frame, individual top, bottom, back and shelves with common intermediate uprights separating compartments. Lockers shall be fabricated square, rigid and without warp. Doors shall be flat and free of distortion.
Door Frame: All door frame members to be not less than 16 gauge formed to a channel shape. Vertical members to have an additional flange to provide a continuous door strike. Intermembering parts to be mortised and tenoned and electrically welded together in a rigid assembly capable of resisting strains.
Cross frame members of 16 gauge channel shapes including intermediate cross frame on double and triple tier lockers shall be securely welded to vertical framing members to ensure rigidity.
Body: Bolt spacing in locker body construction not to exceed 9" o.c. All locker body components shall be made of cold rolled steel specially formed for added strength and rigidity and to ensure tight joints at fastening points. Tops & bottoms shall be 24 gauge with three sides formed 90° and the front offset formed to be flush with the horizontal frame member. Shelves shall be 24 gauge with four sides formed to 90°, the front edge shall have a second bend. Backs & sides shall be 24 gauge.

Doors: Doors 30" or higher shall be formed from one piece 16 gauge cold rolled sheet steel. Doors less than 12" wide shall be minimum of 18 gauge. Formations shall consist of a full channel shape on the lock side of adequate depth to fully conceal the lock bar, channel formation on the hinge side, and right angle formations across the top and bottom. Doors over 15" wide x 60" & 72" high shall have a 3" wide 20 gauge full height reinforcing pan welded to the inside face of the door on 6" centers.
Doors for box lockers 3, 4, 5, and 6 tier high shall have channel formations on lock and hinge side and have right angle flanges on the top and bottom. Doors less than 15" wide shall be 18 gauge, 15" wide or wider shall be 16 gauge. Box locker door for 3, 4, 5, and 6 openings high shall be pre-punched for padlock latch and friction catch and built-in combination and key locks.
Door Handle 1 & 2 Tier, 2 Person & Duplex: Handle to consist of zinc alloy die-cast case and handle. 40,000 PSI maximum tensile strength, chrome plated. Handle to be pulled out to move up latch bar and open door in one motion. Padlock eye for use with 9/32" diameter padlock shackle to be an integral part of handle and to be so located that extension of handle forms a padlock strike. Attachment to latch bar shall be tamper-proof and concealed inside the door. The case shall be kick proof type, shielding the movable part and provide a padlock strike to prevent scratching and marring the door. A lock hole cover plate shall be provided for use with padlocks.
Door Latching 1 & 2 Tier, 2 Person & Duplex: Doors to have latch clip engaging the door frame at three points on doors over 42" high and two points on all other doors. Locking device to be positive, automatic type, whereby locker door may be locked when open, then closed without unlocking. One rubber silencer shall be firmly secured in the frame at each heavy gauge latch hook. Latch clips shall be glass filled nylon for long life and low friction and shall hold doors shut by engaging the latch hooks.
Door Handle & Latching 3 to 6 Tier Box Lockers: Doors shall be punched for use with padlocks or built-in locks. Doors for use with padlocks shall be equipped with an 18 gauge combination door pull, staple and lock hole cover plate with integral friction catch.
Ventilation: Lockers with doors 36" to 72" high shall have two sets of louvers, one set near the top of the door and another set near the bottom of the door. Lockers with doors 30" or less in height, shall have a minimum of one set of louvers.
Number Plates: Each locker to be supplied with a polished aluminum number plate, 2-1/4" wide x 1" high, with black numerals not less than 3/8" high. Number plates shall be attached to the face of the door with two aluminum rivets.
Interior Equipment: Single-tier lockers 48-1/2" or higher shall have a hat shelf located approximately 9" below the top of locker; if less than 18" deep, locker shall have three single prong hooks and one double-prong ceiling hook on 9" and 12" wide lockers. Four single prong hooks are supplied on wider models. Single tier lockers 18" or more in depth shall have a coat rod instead of a ceiling hook. 30" & 36" high lockers shall have three single-prong wall hooks and one double-prong ceiling hook through 12" wide and four wall hooks for 15" or wider. 24" wide will have two double prong ceiling hooks. 20" & 24" high openings to have three wall hooks through 12" wide, and four wall hooks for 15" wide and wider. Hooks to be attached with two bolts per hook.

Locker Accessories
See locker Accessory Specifications.

Options
Body: Locker shall be assembled using rivets.
Recessed Handle 1, 2 & 3 Tier Latching: Delete the standard handle and provide handle recessed in the door with finger lift control. 20 gauge drawn pocket shall be brushed stainless steel securely fastened to the door with two tabs plus a positive tamper resistant decorative fastener. The pocket shall be of sufficient depth to prevent a combination padlock, built-in combination lock or key lock from protruding beyond the face of the door. A lock hole cover plate shall be provided for use with padlocks.
The lifting piece shall be 14 gauge formed steel, attached to the latching channel with one concealed retaining lug and one rivet assuring a positive two point connection. Handle finger lift shall have a padlock eye for use with a 9/32" diameter padlock shackle. It shall have a sound deadening molded comfortable finger lift. Note: adding a recessed handle changes the lower louver pattern.
Hush Tone Sound-Dampening Panels: Panels are designed to reduce sound levels when doors are slammed. They are 22 gauge and are die formed and have a full perimeter flange spot welded flush to the inside door surface. Louvers are not used when sound-dampening panels are provided.
Side and Back Ventilation: Sides and/or backs shall be perforated with 1/2" diameter holes in patterns of 42 holes per group.
Door Ventilation: Visual perforations shall consist of 5/8" wide x 1-1/8" high rectangular perforations in the door in standard manufacturer's patterns. Doors with visual perforations shall not have louvers.
Mini louvers shall be 5/8" wide x 1/4" high and be placed in doors in manufacturer's standard pattern. Doors with mini louvers shall not have standard louvers.
ADA Compliant Lockers: Handicap lockers shall have recessed handles and shall be single tier or the lower opening of a double tier locker. Locker bottom shall be a minimum of 15" off the floor, or an extra shelf placed 15" off the floor. Single tier lockers shall have a shelf 48" off the floor. Doors assigned for handicapped use shall have an appropriate symbol sign.

Execution:
Installation: Install metal lockers at location shown in accordance with manufacturers instructions for plumb, level, and flush installation.
Anchor Lockers to the floor and wall 36" on center or less as recommended by the manufacturer.
Install Sloping Hoods and Metal Fillers using concealed fasteners. Provide flush hairline joints against adjacent surfaces.
Install Benches by fastening bench tops to pedestals and securely anchoring to the floor using appropriate anchors for the floor material.
Adjust & Clean: Adjust doors and latches to operate without binding. Verify that latches are operating satisfactorily.
Touch Up marred finishes with factory supplied paint.

Penco Products, Inc. reserves the right to vary specifications consistent with a policy of continuous product improvement.

Indigo NXT Series iF0500N
Ice Machine on D570 Bin
*Ice machine and Bin sold separately

Designed for operators who know that ice is critical to their business, the Indigo NXT Series ice machine's preventative diagnostics continually monitor itself for reliable ice production. Improvements in cleanability and programmability make your ice machine easy to own and less expensive to operate.

- **New levels of Performance** – Showcasing an average of 12% lower energy consumption and a 23% reduction in condenser water usage. This translates into lower cost of ownership over the life of your machine.
- **easyTouch® Display** - New icon based touch screen takes the guess work out of owning and operating an ice machine.
- **Programmable Ice Production** – Now its super easy to program your ice machine to be off at certain times of the day to save money with fluctuating electrical rates. Also programmable by daily ice production volume and night time programming.
- **Easy to Clean Foodzone** – Hinge front door swing out for easy access. Removable water-trough, distribution tube, curtain, water probe and water pump for fast and efficient cleaning. Selected components are made with AlphaSan® antimicrobial.
- **Intelligent Diagnostics** – Provides 24 hour preventative maintenance and diagnostic feedback for trouble free operation.
- **Acoustical Ice Sensing Probe** – Unique patented technology allows for reliable operation in challenging water conditions and environments
- **DuraTech® Exterior** – Provides superior corrosion resistant above stainless steel. Innovative clear-coat resists fingerprints and dirt making it easier to keep clean.
- Available **LuminIce® II Virus and Bacteria Inhibitor** – Controls viruses, bacteria, mold and yeast within the food zone to keep the ice machine clean longer. A new sanitation icon lets you know the operational status.
- **Active Sense** – Insures consistent ice harvest in all environmental conditions. This software solution works in conjunction with the acoutiscal ice sensing probe improving reliability and performance.

ICE MACHINE WARRANTY

Manitowoc Ice, Inc. (hereinafter referred to as the "COMPANY") warrants for a period of thirty-six months from the installation date (except as limited below) that new ice machines manufactured by the COMPANY shall be free of defects in material or workmanship under normal and proper use and maintenance as specified by the COMPANY and upon proper installation and start-up in accordance with the instruction manual supplied with the ice machine. The COMPANY'S warranty hereunder with respect to the compressor shall apply for an additional twenty-four months, excluding all labor charges, and with respect to the evaporator for an additional twenty-four months, including labor charges.

The obligation of the COMPANY under this warranty is limited to the repair or replacement of parts, components, or assemblies that in the opinion of the COMPANY are defective. This warranty is further limited to the cost of parts, components or assemblies and standard straight time labor charges at the servicing location.

Time and hourly rate schedules, as published from time to time by the COMPANY, apply to all service procedures. Additional expenses including without limitation, travel time, overtime premium, material cost, accessing or removal of the ice machine, or shipping are the responsibility of the owner, along with all maintenance, adjustments, cleaning, and ice purchases. Labor covered under this warranty must be performed by a COMPANY Contracted Service Representative or a refrigeration service agency as qualified and authorized by the COMPANY'S local Distributor. The COMPANY'S liability under this warranty shall in no event be greater than the actual purchase price paid by customer for the ice machine.

The foregoing warranty shall not apply to (1) any part or assembly that has been altered, modified, or changed; (2) any part or assembly that has been subjected to misuse, abuse, neglect, or accidents; (3) any ice machine that has been installed and/or maintained inconsistent with the technical instructions provided by the COMPANY; or (4) any ice machine initially installed more than five years from the serial number production date. This warranty shall not apply if the Ice Machine's refrigeration system is modified with a condenser, heat reclaim device, or parts and assemblies other than those manufactured by the COMPANY, unless the COMPANY approves these modifications for specific locations in writing.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OR GUARANTEES OF ANY KIND, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

In no event shall the COMPANY be liable for any special, indirect, incidental or consequential damages. Upon the expiration of the warranty period, the COMPANY'S liability under this warranty shall terminate.

The foregoing warranty shall constitute the sole liability of the COMPANY and the exclusive remedy of the customer or user. To secure prompt and continuing warranty service, the warranty registration card or register on line within five (5) days from the installation date.

D Bin Features

New Sanitary Scoop Ergonomic NSF approved sanitary ice scoop included with each bin. Built-in knuckle and thumb guard. Unique molded retaining lip allows maximum scooping every time. Per scoop capacity approximately 5.3/ lbs (2.4 kg)

Scoop Holder options New built-in scoop holder, keeps the ice scoop handle above the ice, or purchases the optional NSF approved External Scoop Holder Kit # K00461.

New Door design Clever built in side grips allow you to lift the bin door from anywhere you are standing (left, right or center) even when you have just one hand free.

Foamed Insulated Door Insulates the ice bin, reduces sweat on the door, helps keep ice lasting longer.

Stay up door Unique cammed bin door self-latch keeps the door in the open position and keeps the employee safe when scooping ice.

Ergonomic Door design Door is angled 53 degrees to allow for easier access to the ice in the bin especially when scooping from the bottom.

Duratech Metal Finish Manitowoc exterior material has better corrosion resistance than stainless steel, is smudge resistant and easy to keep clean.

New Bin liner Polyurethane Artic Blue bin liner accentuates the crisp clear ice from a Manitowoc Ice Machine.

K00146 Convenient Ice Bagger

Includes bagger, D-bin adapter, and 250 bags and ties (Not for D320 or D400) Order K00068 replacement bags

K00461 External Scoop Holder

NSF approved. Can be mounted on the left or right side of bins, horizontally or vertically or on a wall.

K00463 Metal Scoop

Indestructible NFS approved aluminum alloy with sanitary knuckle and thumb guard. Works with K00461external scoop holder or hangs inside the D-Bin series. Limited life time guarantee.

K00462 Secure Fastening Kit

Securely fast the Indigo NXT ice machine head to the pre-drilled inserts on the back of the D-bin series. Stainless steel flanged feet attach to bin and can be screwed to the floor

Manitowoc Ice reserves the right to make changes to the design or specifications without prior notice.

Manitowoc

LIMITED WARRANTY FOR ICE STORAGE BIN & DISPENSERS

LIMITED WARRANTY

Manitowoc Ice a division of Manitowoc FSG Operations, LLC, ("Company") warrants that new Ice Storage Bins or Dispensers sold by Company shall be free of defects in material or workmanship under normal and proper use and maintenance as specified by the Company and upon proper installation and start-up in accordance with the instruction manual supplied.

WHAT IS COVERED

- Parts and Labor for a period of three (3) years.
- Accessory Ice Transport Carts for two (2) years parts and labor.

The Ice Storage Bin / Dispenser warranty begins on the date of the original installation. This warranty shall not apply to any Ice Storage Bin or Dispenser initially installed more than five (5) years from the serial number production date.

The obligation of the Company under this warranty is limited to the repair or replacement of parts, components, or assemblies that in the sole opinion of the Company are defective. This warranty is further limited to the cost of parts, components or assemblies and standard straight time labor charges at the servicing location.

Time and hourly rate schedules, as published from time to time by the Company, apply to all service procedures. Additional expenses including without limitation, travel time, overtime premium, material cost, accessing or removal of the Ice Storage Bin / Dispenser, or shipping are the responsibility of the purchaser, along with all maintenance, adjustments, cleaning, and ice purchases. Labor covered under this warranty must be performed by an approved Company contracted Service Representative or a refrigeration service agency as qualified and authorized by the Company's local Distributor. The Company's liability under this warranty shall in no event be greater than the actual purchase price paid by purchaser for the Ice Storage Bin or Dispenser.

EXCLUSIONS FROM COVERAGE

- Repair or replacement of parts required because of misuse, improper care or storage, negligence, alteration, use of incompatible supplies or lack of specified maintenance shall be excluded.
- Normal maintenance items.
  Failures caused by adverse environmental, water conditions, or improper drainage.
- Improper or unauthorized repair.
- Any Ice Storage Bin / Dispenser that has been installed and/or maintained inconsistent with the instructions provided by the Company.
- Parts subject to damage beyond the control of Company, or to Ice Storage Bin's / Dispenser's which have been subject to accidents, damage in shipment, fire, floods, other hazards or acts of God that are beyond the control of the Company.
- This Limited Warranty shall not apply if the Ice Storage Bin / Dispenser is modified with parts and assemblies other than those manufactured by the Company, unless the Company approves these modifications for specific locations in writing prior to the commencement of such modification.

LIMITATIONS OF LIABILITY

The preceding paragraphs set forth the exclusive remedy for all claims based on failure of, or defect in, Ice Storage Bins or Dispensers sold hereunder, whether the failure or defect arises before or during the warranty period, and whether a claim, however instituted, is based on contract, indemnity, warranty, tort (including negligence), strict liability, implied by statute, common-law or otherwise , and Company and agents shall not be liable for any claims for personal injuries or consequential damages or loss, howsoever caused. Upon the expiration of the warranty period, all such liability shall terminate. THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, IMPLIED OR STATUTORY NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE SHALL APPLY, COMPANY DOES NOT WARRANT ANY PRODUCTS OR SERVICES OF OTHERS

REMEDIES

The liability of Company for breach of any warranty obligation hereunder is limited to: (i) the repair or replacement of the Ice Storage Bin or Dispenser on which the liability is based, or with respect to services, re-performance of the services; or (ii) at Company's option, the refund of the amount paid for said equipment or services. Any breach by Company with respect to any item or unit of equipment or services shall be deemed a breach with respect to that item or unit or service only

WARRANTY CLAIM PROCEDURE

Customer shall be responsible to:

- Complete and return warranty registration card or register on line within five (5) days from the installation date.
- All warranty service must be preformed by an approved Manitowoc contracted or authorized Service Representative. To schedule a service appointment contact your local Manitowoc Service Representative or visit us at www.manitowocice.com to find a Service Representative near you.

GOVERNING LAW

This Limited Warranty shall be governed by the laws of the state of Wisconsin, USA, excluding their conflicts of law principles. The United Nations Convention on Contracts for the International Sale of Goods is hereby excluded in its entirety from application to this Limited Warranty

K00463 - Metal Scoop

When using the Manitowoc metal scoop, users are presented with improved sanitation and a ergonomic grip when scooping ice. With the lifetime warranty offered, it'll be the last ice scoop you'll ever have to buy!

Standard Features

- Best scoop you'll ever own. Comes with a limited life time warranty.
- Indestructible NSF Certified cast aluminum.
- Knuckle guard improves sanitation—prevents hand from contacting the ice.
- Rubber handle prevents hand from getting cold when the scoop is left in the bin.
- Can be hung inside D-bins and fits in the optional Multi-Mount External scoop holder.
- Large 5.3 lbs /85 oz scooping capacity

Warranty

The limited lifetime warranty on the metal scoop allows for free replacement for as long as you own your scoop under normal and proper use

Multi-Mount Accessory (sold separately)

Multi-Mount External Scoop Holder (K00461) protects ice scoop with NSF approved versatile scoop holder. (For use with D-Bins, B-Bins and most competitive bins).

For Manitowoc LB bins: order hanger **K00482 kit along with K00461.**

** For assembly Video, Scan or Click "QR" Code.*

Multi-Mount External Scoop Holder

K00461 Multi-Mount External Scoop Holder

The multi-mount external scoop holder improves overall sanitation. With the addition of the holder, it makes daily operations much quicker and easier. Keep your scoop protected and never lose your scoop AGAIN!

For and assembly video visit manitowocice.com/video or the Manitowoc YouTube channel.

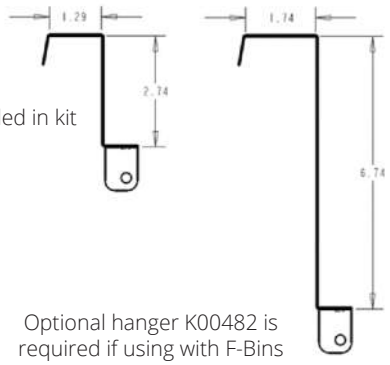
(Wall Mount Video QR)

Standard Features

- NSF Approved. Commercial grade, metal frame with ABS plastic shield.
- Can be mounted 7 different ways (right or left side of bin, horizontal or vertical on bin, or on the wall either direction).
- Easy assemble. No tools required.
- Fits Manitowoc's new plastic and metal scoops. (plastic #0000015595 and metal #K00463)
- Use on Manitowoc / Koolaire ice storage bins, any wall, or competitor bins.

Hanger Dimensions

Bin hanger included in kit K00461.



Optional hanger K00482 is required if using with F-Bins or LB-Style Bins.

Manitowoc

Vertical Discharge Remote Condenser

for Indigo® NXT™ Series Ice Cube Machines with R404A refrigerant

Models ☐ JCF0500 ☐ JCF0500Q(Coated Coil) ☐ JCF0900 ☐ JCF0900Q(Coated Coil)

JCF900
Remote Condenser

Standard Features

Vertical discharge remote condenser is available for Indigo NXT Series iF0500N, iF0600N and iF0900N ice machines. Refer to ice machine specification sheet for equipment dimensions, production capacities, electrical requirements, and ice storage bin compatibility.

Condenser operation range from -20°F (-29°C) to 120°F (49°C). Can be installed with up to 20" (50.8 cm) of bottom clearance.

Remote system consists of a remote condenser and interconnecting refrigerant lines. All components are pre-charged with refrigerant and have quick-connect fittings for convenient installation. Order ice cube machine, ice storage bin, vertical discharge remote condenser and line set separately.

Warranty

- 3-year parts and labor. See warranty statement for complete details.

Remote, air-cooled condenser system improves efficiency and ice production, conserving energy.

Manitowoc remote condenser systems effectively dissipate heat at a convenient location, indoors or outdoors, away from the ice machine. This maximizes ice-making capability and minimizes air conditioning loads by lowering the ambient air temperature at the ice machine. **For locations close to salt spray environments use coated coil model ("Q")**

Single Indigo Series Ice Machine	Remote Condenser
iF0500N	JCF0500 & Q
iF0600N	JCF0900 & Q
iF0900N	JCF0900 & Q

Installation Information and Dimensions

Maximum Location Distance - combined vertical and horizontal distances from ice machine to condenser must comply with guidelines.

Maximum Line Length: 100' (30 m)*

Maximum Vertical Rise: 35' (10.5 m) above ice machine.

Maximum Vertical Drop: 15' (4.5 m) below ice machine.

To calculate other acceptable horizontal and vertical combinations, refer to remote condenser installation instructions.

** Remote condenser has refrigerant charge for up to 50' (15 m) line length. Over 50' (15 m) requires additional refrigerant charge at time of installation.*

Vertical Discharge Remote Condenser

Vertical Discharge Remote Condenser

for Indigo® NXT™ Series Ice Cube Machines with R404A refrigerant

Electric

Electrical power to the remote condenser is intended to be supplied from the ice machine; however, if necessary, a separate electrical power source can be used.

Remote Indigo NXT Series Ice Machine

Indigo Model	Electrical Service*	Minimum Circuit Ampacity		Maximum Fuse size	
IT0500N	115/60/1	14.8		20	
iF0600N	208-230/60/1	10.7		15	
iF0900N	208-230/60/1	12.2	9.7	20	15

** Shaded box indicates 3 phase. Consult factory.*
HACR circuit breakers can be used in place of fuses.

Indigo NXT Series Remote Condensers with R404A Refrigerant

Condenser Indigo Model	Matching Ice Machine	Condenser			
		Electrical Service*	Amperage	Weight	
				lbs.	kgs.
JCF0500	IF0500N	115v/60/1	1.82	76	34
JCF0900	iF0600N, iF0900N	208-230/60/1	1.0	78	35

** Consult factory. HACR circuit breakers can be used in place of fuses.*

Both models available with coated coils ("Q") for extra corrosion protection in salt spray environments. Recommend for use within 5 miles of the coast.

Standard Interconnecting Refrigerant Lines

Model	Line Length		Weight	
	ft.	m.	lbs.	kgs
RT-20-R404A	20	6.07	10	4.54
RT-35-R404A	35	10.67	15	6.8
RT-50-R404A	50	15.24	22	9.98

Order "RT" line sets separately for iF0500N, iF0600N and iF0900N

The line sets above are pre-charged and come with quick connect fittings.

Premium Water Filters for Ice Machines

Models

☐ AR-PRE-P ☐ AR-10000-P ☐ AR-20000-P ☐ AR-40000-P

AR-PRE-P

- Pre-filter, removes hard sediments, sand, dirt and rust from water, and protects solenoids, valves and inlets to the ice maker
- Compatible with **all** models

AR-10000-P

- Chlorine Reduction
- SLOW PHOS scale inhibitor
- 0.5 Microns filtration
- 15,000 gallon capacity
- Models 0-600 lbs/day

AR-20000-P

- Chlorine Reduction
- SLOW PHOS scale inhibitor
- 0.5 Microns filtration
- 20,000 gallon capacity
- Models 601-1000 lbs/day

AR-40000-P

- Chlorine Reduction
- SLOW PHOS scale inhibitor
- 0.5 Microns filtration
- 40,000 gallon capacity
- Models 1001-2500 lbs/day

Standard Features and Benefits

• 95% average reduction of chlorine from incoming water supply assures the ice tastes and smells fresher, clearer and more enjoyable

• Silver impregnated carbon block provides antimicrobial protection against potential bacteria microorganisms, algae, mold and slime on ice machine surfaces

• Engineered with SLOW PHOS (slowly soluble polyphosphate) to inhibit scale formation and corrosion

• Reduces dirt, submicron particles (down to 0.5 microns) and eliminates contaminates such as cryptosporidium and giardia cysts.

• Ultra-fine filtration (0.5 Microns) with silver impregnated carbon block and slowly soluble polyphosphates provides triple protection from harmful contaminates that can affect your ice machine's performance

• Reduces ice machine cost and maintenance frequency by reducing scale, impurities, and contaminates that can enter the machine.

• Extends the life of the ice machine, when the filters are changed every 6 months or when water pressure is below 20 psi.

• Optimizes the daily performance of the machine, allowing it run at full capacity producing the freshest and purist ice possible

• Cartridges are easy to install, safe, sanitary and can be changed out rapidly, "on the fly" without turning off the water supply

• **Certified to NSF/ANSI Standard 42, 53, 372, and CSA B483.1** by IAPMO and meets CUPC requirements.

IAPMO R&T Certifications

System Model #	Replace. Cartridge	Std. 42 Claims	Std. 53 Claims	Chlorine Red. Cap
AR-PRE-P	K00496	Part. Class 3	None	None
AR-10000-P	K00493	Chlorine & Part. Class 1	Cyst	15,000 gal
AR-20000-P	K00494	Chlorine & Part. Class 1	Cyst	20,000 gal
AR-40000-P	K00495	Chlorine & Part. Class 1	Cyst	40,000 gal

- CSAB483.1:For Canadian water standards
- *NSF/ANSI 53 cyst claim only valid at or below rated flow rate
- Warning : Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfections before or after the unit. For cold water use only. Not for residential use.

Note on Pre-filter: A pre-filter is recommended for all applications to achieve maximum filtration efficiency and cartridge life.

Warranty

3-Year parts and labor warranty on head, shroud, hardware, and mounting assembly.
(water filter cartridge not included).
Residential Warranty - 1 Year

Installation Tips

- Install vertically with cartridge hanging down
- Allow 2.5" (6.35cm) clearance below the cartridge for easy replacement
- Flush cartridge by running water through filter for ten (10) minutes
- Use copper or polyethylene 3/8" hose for Quick Connect fitting
- Always follow local plumping codes

Operation Tips

- Change cartridge every 6 months or when pressure gauge indicates below 35 psi (which ever comes first)
- Twist 1/4 turn to left to remove cartridge. Twist 1/4 turn to the right to install cartridge (Water can be left on)
- Protect from freezing—Failure to do so may result in cracking of the filter housing and cause water leakage
- When using non-Manitowoc ice makers, consult the ice machine's manufactures for water supply usage requirements.
- It is recommended to have your water supply tested by a professional to determine your water treatment needs.

Manitowoc Ice reserves the right to make changes to the design or specifications without prior notice.

SUPER ADJUSTABLE™ SUPER ERECTA SHELF®
WIRE SHELVING

Super Adjustable™ Super Erecta Wire Shelving is the most advanced and innovative wire storage system available.

- **Maximum Space Utilization:** The Corner Release System encourages repositioning of shelves during initial assembly to reclaim wasted vertical space. In some cases, reclaimed vertical space will allow an extra shelving tier to be added to the storage unit resulting in a 25% increase in storage capacity!
- **Easily Assembled:** The unique Corner Release System enables quick and easy repositioning of shelves during the initial set up to accommodate different package or container sizes. "Total Assembly" is complete only after the shelves are properly spaced to maximize storage. SiteSelect™ Posts, with the double-groove visual guide feature, have circular grooves at 1" (25mm) increments and are numbered at 2" (51mm) intervals to easily identify proper shelf locations.
- **Easily Adjustable:** The unique shelf design and SiteSelect™ Posts enable "tool-free", quick adjustment at 1" (25mm) increments along the entire height of the post.
- **Improved Rigidity:** An enhanced Corner Release System has made Super Adjustable™ the most rigid, easily adjustable shelving system ever.
- **Strong:** Super Adjustable™ shelves hold as much weight as traditional Super Erecta wire shelving. Stationary units hold a maximum of 2,000 lb. (910kg). Maximum weight capacity per shelf (48" [1219mm] or shorter = 800 lb. [364kg]; longer than 48" [1219mm] = 600 lb. [273kg])
- **Choice of Finishes:** Super Adjustable™ Super Erecta shelving is available in a variety of finishes: chrome-plated for dry storage; Metroseal 3™ with antimicrobial product protection and Type 304 stainless steel for corrosive environments.
- **Accessories:** Compatible with the entire system of Super Erecta shelves and accessories. See Catalog Sheets 10.04, 10.05, 10.06 for more information.

Dry Storage — Chrome

NSF

Corner Release System

Super Adjustable™ Advantage . . .

Easy "no tool" shelf adjustment

1" 25mm spacing minimizes dead space

Efficient use of space allows more storage levels to be added.

Storage efficiency can increase by 25% or more!

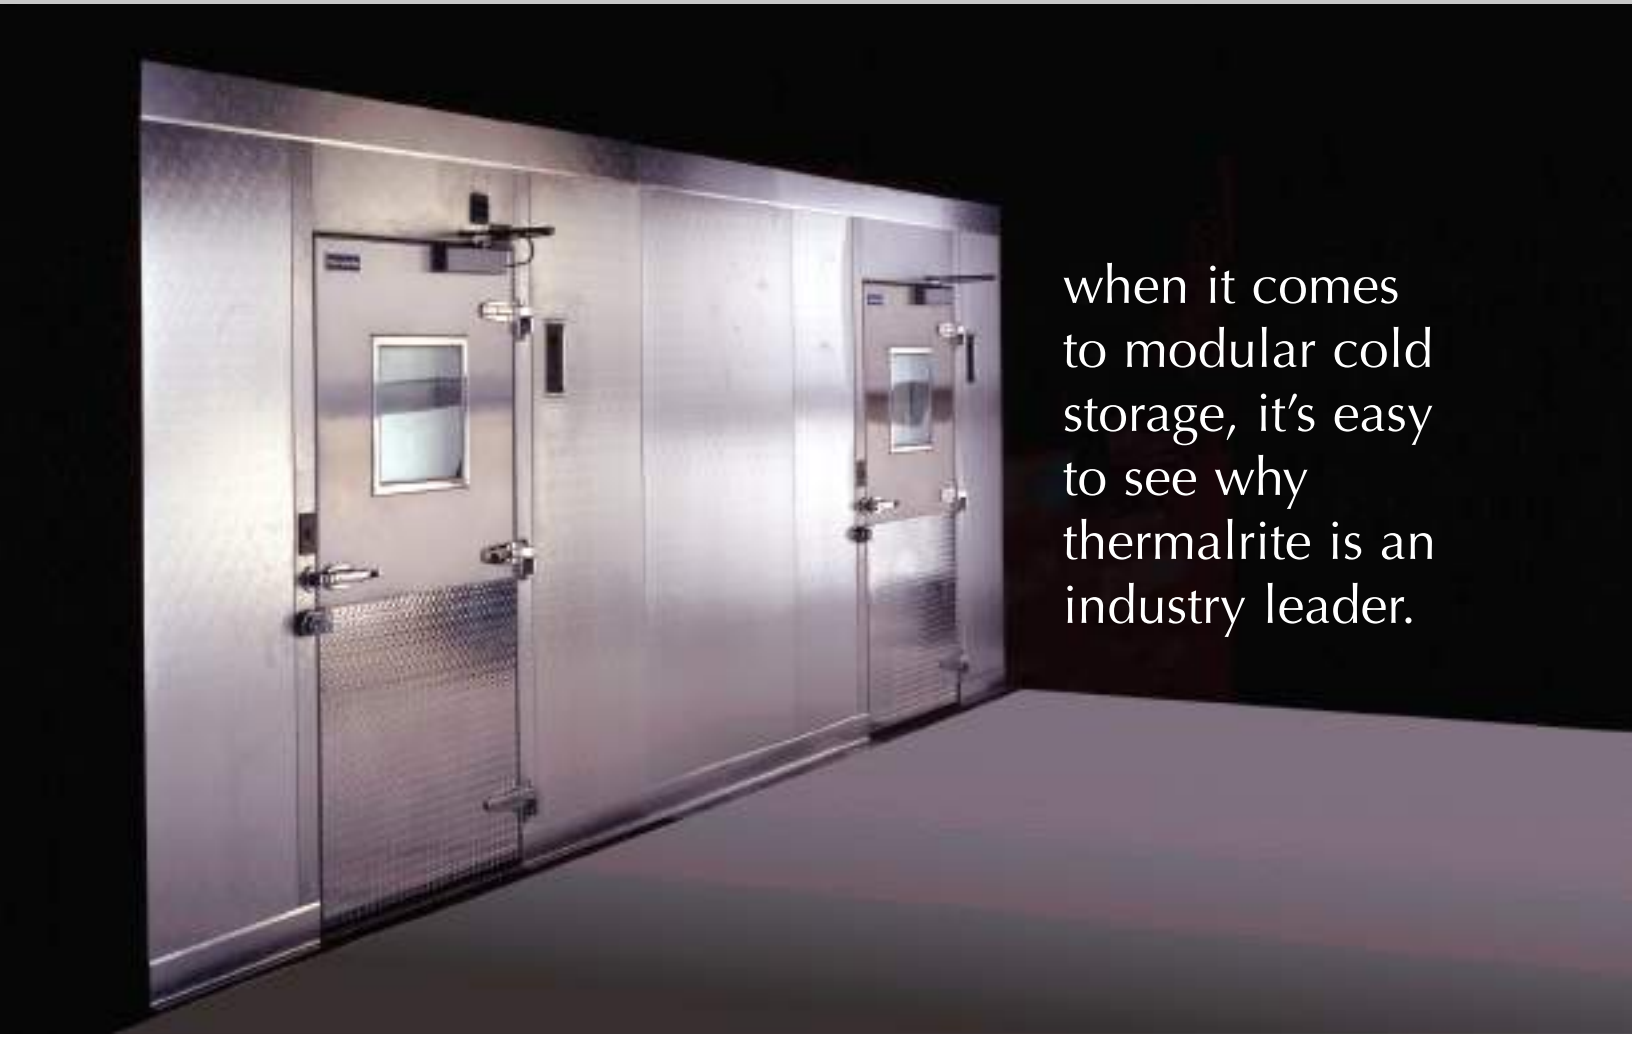
service

design

warehouse systems • food service • environmental enclosures



quality

Thermalrite® has been manufacturing Walk-in Coolers and Freezers for the food service industry since 1988. Our goal is to manufacture the finest quality walk-ins available and provide you with an unsurpassed level of service. All of our walk-ins are CAD designed to your exact specifications. Our panels are engineered and built for easy installation. During each phase of the manufacturing process we scrutinize quality, fit and finish to ensure that you get the best possible product.

service

From Quotations to Engineering, from Manufacturing to Delivery and Installation, we offer you outstanding service. Our trained, experienced Inside Sales Team, provides helpful, knowledgeable service from inquiry to delivery. Our plants in California, Minnesota, and Tennessee provide close proximity to all markets.

value

We use only the best U. L. Class 1 Non-CFC Urethane insulation available. Thermalrite® and its suppliers have incurred considerable expense in the development of ENVIROFOAM, an environmentally sensitive urethane foam. Our insulation is designed to bond with our panels to give strength and durability.

All of this translates into superior insulating properties which keep your operating costs at a minimum.

design flexibility

Custom designs – indoor, outdoor, angular, rectangular or any combination are all available in a variety of finishes and in varying thickness of four, five or six inches. We serve the warehouse, food service, institutional and environmental industries with walk-in coolers and freezers. With seamless panels up to 30 feet in length, we are ideal for warehouse applications and long spans. Our modular construction allows for easy remodeling, relocation or expansion.

why thermalrite?

- Custom Designs at Standard Prices. You get the exact size and shape you need.
- In-house design and engineering. We can help you to determine what design or configuration will best fit your unique requirements.
- Strongest all-foam panels on the market. High density foam rail with metal facing and foam-in place bonding equals strong long lasting panels.
- Doors and frames that are second to none. Doors are a full four inches thick and frames are reinforced for strength.
- Highest insulation values and best fire rating add up to the best insulating material available. UL, class 1, Non CFC ENVIROFOAM saves energy costs and meets building code requirements.
- Environmentally Friendly ENVIROFOAM.
- NSF Certified, UL Listed, USDA Approved panels.
- Engineered and Built for ease of installation.
- Experience. Thermalrite® has been manufacturing walk-in coolers and freezers since 1988.
- Foaming conducted in temperature-controlled area and controlled by the latest computerized equipment to insure proper mix density and fill resulting in the finest insulated panel available.

- The best walk-in value on the market.
- Parts department to supply your needs correctly and quickly (usually within 24 hours).
- Three strategically located manufacturing plants for quick and cost-effective delivery throughout North America.
- One-stop-shop for your complete walk-in package; refrigeration, shelving, and installation – hassle-free convenience.
- We stand behind our product – we honor our obligations. Check out our record.

classifications*

- NSF Certified
- U.L., Class 1 listed Urethane foam insulation in all Thermalrite® walk-ins.
- USDA Approved Materials
- UL Electric
- State of New York, MEA
- California Bureau of Home Furnishings and Thermal Insulation License
- State of Oregon
- Wisconsin (DHILR)
- City of Houston

*Thermalrite® insulated panels are manufactured to meet local codes in most cities. It is incumbent upon the customer to consult with the local inspector to assure compliance.

architectural specifications

metal and finishes

Standard interior and exterior metal finish:

- 26 Ga. Bright stucco embossed galvanized steel

Optional finishes available

- 26 Ga. Painted stucco embossed galvanized steel. Standard colors available are white, black and almond. Optional colors are available by request.
- .032 Stucco embossed aluminum
- .040 Smooth white aluminum
- .040 Stucco embossed aluminum
- 22 Ga. Type 304 stainless steel #4 finish

Interior floor finishes

- .050 Smooth aluminum
- 24 Ga. Type 304 stainless steel with #2B finish
- .100 aluminum diamond thermalrite

Other gauges and finishes are available upon request.

insulation

Standard insulation is foamed-in-place Non-CFC U.L. Class 1 rated urethane foam. It has a thermal conductivity (K Factor) of .120* BTU/Hr/Sq. ft/Degrees/F/in. and overall heat transfer coefficient (U Factor) of not more than .030 BTU/Hr.Sq.Ft.

Class 1 urethane foam has a flame spread of 25 or less overall and smoke developed of less than 450. Recommended wall thickness is nominal 4″. Foam rail panels also available in 4″ - 6″ thickness.

panel construction

Walk-ins are all custom designed to fit the individual customers' needs. Each panel consists of an interior and exterior metal pan with structural, high density foam rail frame. These pans are separated by rigid foam-in place self-extinguishing urethane insulation which adheres to the interior of the pans providing increased structural strength. All panels have tongue and groove construction and gasket is applied to all joints forming an air-tight seal.

panel fasteners

All panels are joined together using a cam-locking fastener, operated with a hex wrench. Access holes are sealed with vinyl snap-in caps. Standard construction is cam-locking ceilings to walls; lag-down ceilings are also available.

floorless models

Alignment screed is furnished for all floorless models. Screeds are designed to be anchored to masonry floors to provide an accurate template for the erection of wall panels.

floor panels

Floors are built with metal bonded to exterior grade underlayment and foamed-inplace. Floors are capable of maintaining a load maximum of 1000lbs./sq/ft. when uniformly distributed, and are NSF certified.

walk-in accessories and features

Standard:

- 2 1/2″ Dial Thermometer
- 100 Watt incandescent light fixture with vapor proof globe
- Flush Mount OSHA press switch factory installed and wired to outside ceiling
- NSF Certified Construction
- UL Listed Class 1 Non-CFC Urethane Foam
- USDA Approved Materials

Optional

- Refrigeration Systems
- Roof Systems for outdoor applications
- Display Doors
- Double Acting Doors
- Strip Curtains
- Alarm Systems
- Digital Thermometers
- Storage Shelving
- Built in Wall Supports
- Heavy Duty Floor Plates
- Foamed in Place Electrical Boxes

door, jamb and hardware

Standard Thermalrite walk-in doors are self-closing, flush mount type.

Standard features:

- High quality heavy duty hardware with safety release
- Magnetic door gasket
- Heated jamb (freezer only)
- Heated threshold (freezer only)
- Heated pressure relief vent (freezer only)
- Doors up to 48″ width are pre-hung
- Heavy duty door frame

Optional Door Features and Accessories:

- Bi-parting doors
- Reach-in Service Doors
- Sliding Doors
- Heavy Duty Impact Plate
- View Ports

0027C DEADBOLT LOCKING HANDLE

- Deadbolt security for walk-ins at the economy of a locking pull handle
- Deadbolt is secured using cylinder lock or padlock, or both
- Deadbolt can be locked in open position
- Self-adjusts to wall thickness variations
- Standard, twist-off glow in the dark inside release knob prevents lock-ins
- Two 1/4 turn inside release options meet ADA requirements for fast exit
  - 1/4 turn Inside Release, shown above with handle
  - 27c 1/4 Turn Low Conduction Inside Release, shown to the right
- Locking mechanism located outside resists freeze-up

Flush offset and 4" thick wall standard. Other wall thicknesses available. Consult factory.
1-5/8" offset option listed in model number table; Available down to 1/2"

U.S. Patent No.: 6,526,788
1/4 Turn Inside Release Patent No.: 9,068,376 & 6,526,788

Specifications

LATCH

MATERIAL:

Die-cast Zamak handle housing, tongue and strike.

FINISHES:

Polished chrome and brushed chrome.

PACKAGING

6 per carton

LATCH

LOCKING MECHANISMS:

Cylinder lock (may be keyed alike or randomly). Accepts 5/16" (7.9mm) dia. shank padlock (customer supplied).

MOUNTING:

Drilled and countersunk for 1/4" (6.4mm) fillister head screws.

STRIKE

MATERIAL:

Die-cast Zamak housing, brass rod, glow-in-the-dark polycarbonate turn-knob.

FINISHES:

Housing same as latch.

1248 SPRING ASSISTED HINGE

- Spring mechanism adds extra closing force to overcome air resistance on heavy walk-in doors
- Special high-lift cam system outperforms similar spring hinges
- Cam-rise action reduces gasket wear, even with irregular floors
- Built-in dwell holds door open beyond 130°
- Simple manual operation reverses hinges for use on right or left-opening door

U.S. Trademark: 2,415,070

Specifications

MATERIAL

High pressure die-cast zinc with self-lubricating nylon cam.

MOUNTING

WEIGHT

Approx. 19.5 lb (8.85 kg) per carton

6 each

1094 SURECLOSE™ HYDRAULIC DOOR CLOSERS

- Powerful gas-loaded hydraulic cylinder guarantees controlled closure
- Exposed and concealed mounting models
- Solid steel enclosed housing and bend-resistant hook assure long wear in heavy use
- Extra-wide hook ensures roller pick-up and overcomes alignment problems
- Life-cycle tested to operate reliably even after a half-million closures
- Perfect complement for Kason Walk-in hinges and latches where self-closing doors with controlled closure are needed
- Mounting slots on hook allow for easy adjustment to compensate for door sag, keeping roller aligned with hook for proper function

U.S. Trademarks: 3,212,100 & 5,809,887

MATERIAL
Heavy gauge steel. Housing and hook also available in stainless steel
FINISH
Polished or brushed chrome, stainless steel, or powder coat
MOUNTING
Holes drilled for No. 10 (5.0 mm) screws (included).

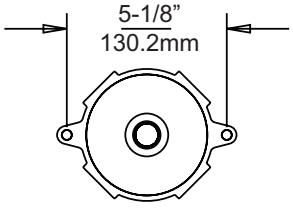
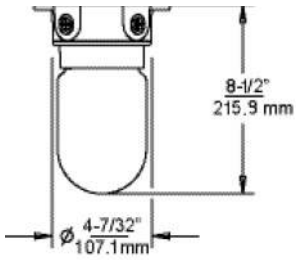
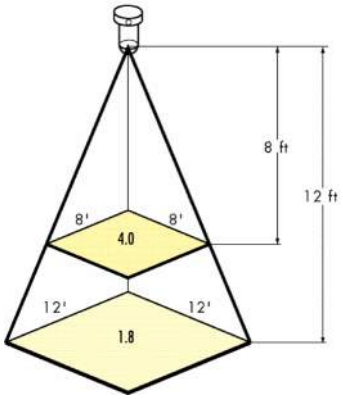
LIGHT FIXTURE AND OPTIC GLOBE, LED

1806 LED FIXTURE





SAVES MONEY AND ENERGY



FEATURES AND SPECIFICATIONS

- Lumanaire: Rating IP-65 for wet and cold environments
- Light Output: 980 lumens
- 85 lumens/watt- exceeds Federal Energy Act requirements
- Bright 5000K color temperature
- Rated 50,000 hour life
- No Ultraviolet Emission: Does Not Attact Insects
- Ideal operating temperature range from -40F to 70F (-40C to 21C)
- Power: 120 VAC at 60 Htz (line voltage)
- Rating: 11.5 watt, 120 V
- Five 1/2 NPT conduit connections
- GU24 socket
- Globe: Lexan with Light Intensifying Focused Optics (LIFO)
- Housing: Aluminum
- 5 year limited warranty on fixture
- 3 year limited warranty on lamp
- RoHS compliant and NSF listed
- Lamps and fixture cULus listed
- U.S. Patent Pending

LED VAPOR TIGHT LINEAR FIXTURE
AL SERIES

48"45W LED Vapor Tight

FEATURES:

- Built-in aluminum heat sink, with V0 Fire-Rated PC housing and improved safety factor of Hi-pot>5000V
- Unique design and appearance
- Meets wide beam lighting demands
- IP65 Rated
- Surface mount standard with optional suspension kit
- White Finish standard
- CRI>82
- Delivered Lumens: 5400
- Efficacy less than 120(LM/W)
- Designed for cold, wet environments
- Qualified for utility rebates
- Instant on lighting in cold environments

PRODUCT DESCRIPTION:

A cost effective LED Vapor Tight Fixture that features full length polycarbonate (PC) lens and one piece white Polycarbonate body. Used for utility lighting in walk in coolers,freezers and beer caves.

CONSTRUCTION:

- Integral design and fully compact structure
- Frosted Lens
- Universal voltage 100V-277V
- Non-Dimming standard
- Class II Fixtures

MODULARM 75LC multi-monitor

FOR WALK-IN COOLERS AND FREEZERS

"A New Industry Standard in Walk-In Monitoring"

TEMPERATURE ALARM

- Protects against product loss
- Patented **Autoset™** Technology automatically adjusts alarm setpoints for a cooler or a freezer (Eliminates manual programming in most applications)

DOOR AJAR ALARM

- Saves Energy
- Improves efficiency
- Reduces coil icing
- Lowers maintenance costs
- Helps maintain product integrity & prevent loss

AC FAILURE ALARM

- Protects against product loss in AC Failure
- Built-In Battery Back-up with recharging circuitry maintains operation in AC Failure

PANIC ALARM

- Increases operator safety
- **Manual** & **Automatic** Panic Alarms Provide Maximum Protection
- Low voltage ***IP-1*** Illuminated Push Button for panic alarm activation

IP-1

PATENTED AUTOMATIC LIGHT CONTROL

- Saves Energy
- Eliminates Conventional Light Switches
- ***IP-1*** Illuminated Push Button provides light control inside the box
- Motion sensor compatible for light activation
- Energy Act Compliant

- ◆ SAVES ENERGY
- ◆ INCREASES OPERATOR SAFETY
- ◆ PROTECTS PERISHABLES
- ◆ LOWERS MAINTENANCE COSTS

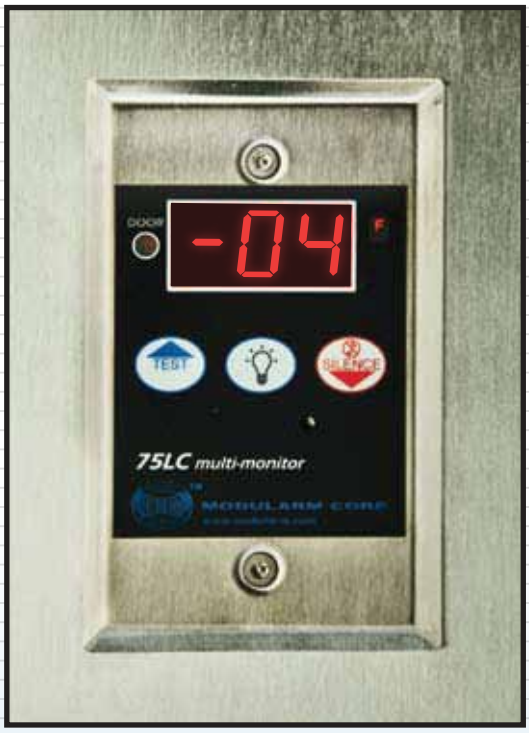
MODULARM 75LC multi-monitor

FOR WALK-IN COOLERS AND FREEZERS

FEATURES

- COMPACT DESIGN FOR FLUSH OR SURFACE MOUNTING IN A SINGLE GANG WEATHERPROOF ENCLOSURE
- SIMPLE 3 BUTTON USER INTERFACE
- PAS-PRO™ PROGRAMMING IS SIMPLE AND SECURE
- BUILT-IN POWER SUPPLY (NO REMOTE TRANSFORMER)
- BUILT-IN RECHARGEABLE BATTERY WITH RECHARGING CIRCUITRY
- BUILT-IN AUDIBLE & VISUAL ALARM ANNUNCIATION
- BUILT-IN PROGRAMMABLE DRY CONTACTS (N/O & N/C) FOR REMOTE NOTIFICATION
- HI & LO ALARM TEMP SETPOINTS
- RINGBACK FEATURE PROVIDES TIMED REPEAT AUDIBLE ALARMS DURING AN ALARM CONDITION
- READOUT IN ºF OR ºC WITH AUTOMATIC SCALE CONVERSION
- ADJUSTABLE ALARM DELAYS
- OPTIONAL LOW VOLTAGE IP-1 ILLUMINATED PUSH BUTTON REMAINS LIT IN A POWER FAILURE TO HELP FIND THE DOOR
- 3 & 4 WAY LIGHT SWITCHING CAPABLE
- BUILT-IN DATA PORT FOR REMOTE COMMUNICATION & SYSTEM EXPANSION
- ONE OR TWO COMPARTMENT MONITORING CAPABLE
- ALL 75LC FUNCTIONS ARE AVAILABLE SIMULTANEOUSLY
- PRIVATE LABELING IS AVAILABLE



FLUSH MOUNT

SPECIFICATIONS

- DIMENSIONS: SURFACE: 4.5” L x 2.75” W x 2.25” D, FLUSH: ENCLOSURE RECESS - 1.9” D
- TEMPERATURE RANGE: -40°F TO 125°F (-40°C TO 52°C) STANDARD 25’ SENSOR LINE. OTHER LENGTHS AVAILABLE.
- ACCURACY: ± 1°F FROM -25°F TO 70°F (-32°C TO 21°C), ± 2°F FULL RANGE
- ALARM RELAY: N/O & N/C DRY CONTACTS, 1A @ 28VDC, Class 2
- LIGHT RELAY: 8.3A@120VAC, 1000W
- POWER REQUIREMENTS: 120VAC, 30MA

ANOTHER BRIGHT GREEN IDEA FROM MODULARM CORPORATION

WARRANTY STATEMENT

Modularm warrants its products to be free from defects in material and workmanship under normal use and service for a period of one year from the date of the original installation. Any products found to Modularm’s satisfaction to be defective upon examination at Modularm’s factory will at Modularm’s option, be repaired or replaced and returned to purchaser via lowest common carrier. Return of the defective product to Modularm’s plant, freight prepaid, by purchaser, correction of such defect by repair or replacement, and return freight via lowest common carrier, shall constitute full performance by Modularm of its obligations hereunder. Modularm shall have no liability for expenses incurred for repairs made by purchaser except by prior, written authorization. Every claim on account of a breach of warranty shall be made to Modularm in writing within the warranty period specified above – otherwise such claim shall be deemed waived. Modularm shall have no warranty obligation whatsoever if the product has been subjected to alteration, misuse, negligence, corrosive atmosphere, accident, or if operation is contrary to Modularm’s instructions or applicable laws, regulations, code or industry practice. NO OTHER WARRANTY EXPRESSED OR IMPLIED, WHETHER OF FITNESS OR MERCHANTABILITY OR OF ANY OTHER KIND SHALL EXIST IN RESPECT TO MODULARM’S PRODUCTS. Under no circumstances shall Modularm be liable for any loss, damage, cost of repair, installation or reinstallation, or consequential damages of any kind in connection with the use, sale or repair of any products purchased from Modularm.

MODEL 75 LC MULTI-MONITOR FEATURE DETAILS

This document is provided to offer more detailed information on certain features of the Model 75LC:

- **Patented Autoset Technology – Autoset** lets the 75LC select the correct alarm temperature setpoints for a cooler or a freezer **automatically**, virtually eliminating the need for manual programming. Common **cooler** and **freezer** setpoints are pre-loaded into the 75LC. The cooler setpoints are the default settings, used if the monitored compartment is a cooler. If the compartment is a freezer, **Autoset** detects the lower compartment temperature and the 75LC **automatically** changes to the freezer setpoints. (Freezer setpoints won't revert to cooler setpoints if the temperature rises.) Cooler defaults can be easily restored manually when necessary, and a faceplate accessible password protected programming menu allows for customized settings.

- **Timed Light Control, including Auto Panic** - The 75LC offers both timed lighting and timed lighting with Auto Panic. Timed lighting with Auto Panic is the chosen default because we believe it is **the safest mode of operation**. The comparison chart below is provided to better understand the difference between timed lighting operation and timed lighting operation with Auto Panic. Timed lighting operation by a competitor product is also provided for comparison.

Competitor Timed Lighting: (Typically utilizes magnetic contacts to sense door status with 15 minute Energy Act Compliant Timing.)

Open Door - Lights turn on, light timer starts. Lights stay on until timer expires, then lights turn off.

Comments: Possibly not Energy Act compliant. Personnel in the box with the door closed may be "left in the dark" when the timer expires.

Patented 75LC Timed Lighting:(Requires magnetic contacts to sense door status, and IP-1 button **inside** of walk-in.) The light timer is preset for 15 minute Energy Act compliant timing.

Open Door - Lights turn on.

Close Door - Light timer starts, lights stay on while light timer is running. 40 seconds before light timer expires, the IP-1 starts to "beep and blink" to warn personnel that lights will be turning off. Pressing the IP-1 resets and restarts the light timer and keeps lights on. This happens repeatedly. If no one is in the box to press the IP-1, lights turn off when the light timer expires. (**Note 1**: If lights are off, the IP-1 always works as a **"lights on" switch inside of the walk-in**.) (**Note 2**: Press and hold the IP-1 for 2 seconds at any time to generate a manual panic alarm.) (**Note 3**: In coolers, The MD-1 motion detector may be used instead of or in addition to the IP-1. MD-1 activation duplicates an IP-1 press and automates the process.)

Comments: Compliant. Safer than competitor timed lighting because the IP-1 or the MD-1 provides light control, light timer reset and warning that lights will be turning off inside the walk-in.

MODULARM CORPORATION
61 Mall Drive, Commack, NY 11725, Tel 631.864.3860 Fax 631.864.3863
Web: www.modularm.com Email: sales@modularm.com

Patented 75LC Timed Lighting with "Auto Panic": (Requires magnetic contacts to sense door status and IP-1 button **inside** of walk-in.) The light timer is preset for 15 minute Energy Act compliant timing.

Open Door - Lights turn on.

Close Door - Light timer starts, lights stay on while light timer is running. IP-1 starts to beep and blink **immediately** when the door is closed to prompt a button press. Pressing the IP-1 does the following:

1) Stops the light timer and makes lights stay on **indefinitely for as long as the door is closed**.
2) Starts a **built-in 20 minute auto panic timer**.
3) "Locks out" the Light Switch on the 75LC so that someone outside the walk-in can't turn off lights while the box is occupied.

After 20 minutes, the IP-1 starts to beep and blink again for 40 seconds to prompt a "check in" button press. Pressing the IP-1 resets and restarts the Auto Panic timer. This happens repeatedly for as long as someone remains in the box with the door closed. If the IP-1 isn't pressed within 40 seconds, the 75LC **automatically generates a panic alarm ("HLP"** appears on the 75LC display) to let personnel outside the box know that someone may be injured or disabled inside of the walk-in. Opening and closing the door resets all functions. If no one is in the box to press the IP-1, lights turn off when the light timer expires. (**Note 1**: If door is closed and lights are off, the IP-1 always works as a **"lights on" switch inside of the walk-in** and always activates the auto panic timer when pressed.) (**Note 2**: Press and hold the IP-1 for 2 seconds at any time to generate a manual panic alarm.) (**Note 3**: In coolers, The MD-1 motion detector may be used instead of or in addition to the IP-1. MD-1 activation duplicates an IP-1 press and automates the process.)

Comments: Compliant. Our default selected safest mode of operation.

- **Manual Lighting Control** - As an easily selectable alternate mode of operation, the 75LC may be utilized as an **untimed, standard on-off light switch** for applications where timed lighting is not required, thus replacing standard light switches.

- **AC Power Failure Alarm** – The 75LC includes a built-in rechargeable battery with built-in recharging circuitry for on premise and remote notification power failure alarm. The battery backup keeps the system completely operational for up to 10 hours in a power failure, and the **battery backup also keeps the low voltage IP-1 Illuminated Push Button lit so that personnel can find the door if they are inside the walk-in when a power failure occurs.**

Russell

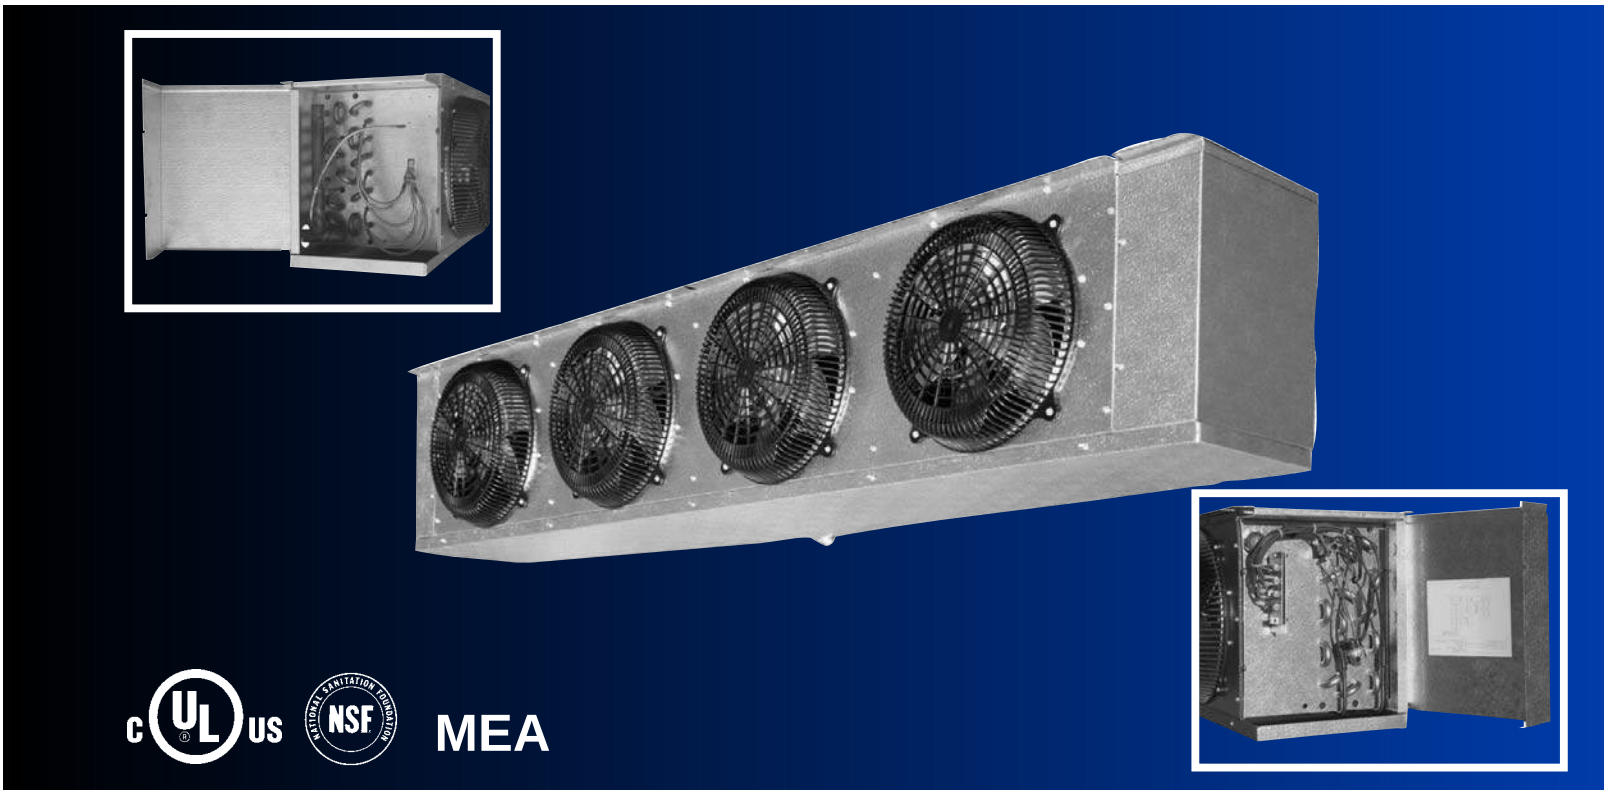
All-Temp²B

Now available with optional ECM Motors

High Efficiency / High Reliability

Low Profile Unit Cooler

Publication No. 100.14
January, 2008



Air Defrost - 3,900 to 39,000 BTUH

Russell All-Temp²B

Features

The Russell All-Temp²B is the original low profile unit cooler that has established an industry standard as being the all purpose design for walk-in coolers, freezers and other applications. They feature an air draw-through design offering air, electric and hot gas defrost models.

Sizes

There are 35 sizes available with 3,700 to 39,000 BTUH at a 10° TD ranging from 740 to 4,980 cfm. One through six fan models are available.

Housing

Rust-free, heavy gauge, textured Aluminum casing is light weight yet durable. Each fan section is baffled to prevent short cycling of the air. The unit is designed to mount flush to the ceiling and meets all NSF requirements. Slotted hangers are provided for easy installation. Drain fittings are installed in the horizontal position to gain more usable head-room in low ceiling applications. The end panels now are hinged to open up out for easy access to both the piping and electrical ends. Optional expansion valves can be conveniently installed inside the cabinet.

Coil

Seamless Copper tubes are staggered and mechanically expanded into corrugated Aluminum fins and heavy gauge tube sheets to achieve maximum heat transfer and strength. Die formed fin collars provide even fin spacing. Fin spacings available are 4, 6, and 8 fins per inch. Sweat connections are standard on all models and optional field installed flare connection kits are available at no extra charge.

Motors

Standard motors are 1/20 HP, permanently lubricated, ball bearing, with thermal overload protection. Available in 115V, 208/230V and 460V, single phase. Optional high efficiency PSC and ECM motors are available in 115V and 230V.

Fans

Heavy duty 12” Aluminum fans are balanced to provide vibration-free operation. Our new low throw black plastic fan guards have an improved air pattern. The optional epoxy resin high throw fan guard moves air up to 50 feet.

Air Defrost

All models with the prefix “AA” are designed for use in coolers of 35°F and warmer. Complete air defrost systems for off-cycle or timed air defrost are available from Russell.

Electrical

Available in 115V, 208/230V, and 460V (see pages 4 & 5). All components are factory wired to convenient screw-type terminal strips. A large compartment is supplied internal to the unit for all electrical components and is easily accessible by removing the end panel. All models are UL & cUL listed.

Electric Defrost

Available on all models with the prefix “AE”. Designed for use where electric heat is used to defrost. Placement of the heaters internal to the coil allows for an extremely rapid and efficient defrost. This arrangement enables the heat to be conducted through the fins from the center out for an even defrost pattern. All heaters are wired to a terminal strip to allow a quick field change-over from single phase to three phase, 230V to 460V and vice versa. A lower heater is installed close to the drain pan for fast, reliable drainage. A defrost termination thermostat (DT) terminates the defrost cycle when the temperature is satisfied. A heater safety thermostat is installed to prevent heaters from overheating above 75° in case of DT failure. All heaters are flexible and can be easily replaced within 12 inches of the end of the units. A fan delay thermostat is supplied to allow the warm coil to cool after a defrost cycle prior to the fans turning on. Complete electric defrost refrigeration systems are available from Russell.

Hot Gas Defrost

Two types available - Re-Evap models with the prefix “AH” and reverse cycle with the prefix “AG”. All models include a fixed DTFD factory wired and a hot gas drain pan circuit to defrost the drain pan. On all Hot Gas models, the drain fitting is located on the left-hand rear of the unit when facing the fan guards. Re-evap models include a Heat Exchanger-Re-Evaporator shipped together with the unit for field installation. Complete Re-Evap Refrigeration Systems are available from Russell. Contact factory for piping information.

Optional Features

- High efficiency PSC or ECM fan motors
- Coated Aluminum fins or Copper Fins
- Baked white enamel housing
- Epoxy resin high throw guards for up to 50 ft.
- Reheat kits (not UL listed)
- Factory mounted expansion valves

All-Temp²B

RUSSELL's optional **ECM motors**
bring the benefits inherent to unit bearing motor design
to the refrigeration Unit Cooler market.

- **Large oil resevoir**
- Totally enclosed construction
- **Journal bearing machined into the cast iron endbell**
- Spiral grooved shaft pump **guarantees** positive oil circulation
- **Threaded shaft uses hubless fan blade.**

Energy Savings per Motor

by Changing to More Efficient Unit Cooler Motors (baseded on Energy Cost of $0.10 per kWh)

Motor Change	Std Motor Power Watts/Mtr	Change to Motor Power Watts/Mtr	Reduced Power Watts/Mtr	Run Time Hrs/ Day	Motor Energy Savings kWh/Yr	Motor Energy Savings $/Yr	Reduced Box Load MBTU/Yr	Cond. Unit Energy Savings $/Yr	Yearly Saving $ **Per MTR**	Pay back in Yrs
SP to PSC	120	85	35	22	281	28	959	18	**47**	0.6
PSC to EC	85	47	38	22	305	31	1041	20	**51**	2
SP to EC	**120**	**47**	**73**	**22**	**586**	**59**	**2000**	**38**	**97**	**1.3**

Subtract 6% from total savings for medium temperature air defrost units that run 24 hours per day.
SP = 1/20 HP Shaded pole motor (Standard motors)
PSC = 1/20 HP PSC motor (Optional motors available at additional cost)
ECM = 50 Watt Electronically Commutated motor (Optional motors available at additional cost)

(1) All fan motors are wired for single phase. Standard motors are shaded pole. High efficiency PSC motors (Permanent Split Capacitor) and ECM (Electronically Commutated) motors are optional.

Ordering Information Required

It is vital that the information listed below is given with each evaporator order. Orders without this information may be delayed. Evaporators with options such as solenoid and expansion valves will not be processed until all the required information is given.

(1) Model Number

(2) Type of Motor

(3) Voltage, frequency and phase of motors and heaters (when applicable)

(4) Refrigerant type

(5) Evaporator temperature

(6) Evaporator T.D.

† Optional Extended Flare Kit available upon request for field installation.
‡ Hot Gas connections only apply to the AH models.

Installation Notes:
(1) Install 12” away from back wall.
(2) Drain connection on AA and AE units are centered on drain pan; and on the left end (facing air discharge) on AH and AG units.
(3) For long air throw requirements, specify high throw fan guard.
(4) Unit height at drain end of hot gas models is as follows: 1,2, and 3 fan models = 15-7/8”, 4,5, and 6 fan models = 16-1/4”.

Electric defrost kits consist of components that are necessary to control the defrost cycle. The optional kits are available as a factory installed option when ordered with a condensing unit. Not all Ed-Kits are available for all condensing unit models. The contents of each kit is described below, along with the function of each component.

* - 1/2 through 3 HP models require ED-210 or ED-213.

ED35-230/3	1	1	—	3-33A	—	3

Timer: Initiates the defrost cycle. Also used as a override protection for defrost termination.

Auxiliary Switch: Is mounted on the compressor contactor and prevents the defrost contactor from operating whenever the compressor is energized.

Block-Out Relay: Serves the same function as auxiliary switch. Used when defrost contactor is not required (lower wattage single phase only).

Defrost Contactor: Carries amperage load for heaters.

Fan Contactor: Used with 460V motors or when 230V motors are wired 3 phase.

Sequencing Relays: Provides interconnection of multiple unit coolers on a single system so that each unit cooler is allowed to individually terminate defrost on temperature.

[1] For use with 2 evaporators , 1/2 through 3 HP R-series systems ONLY!

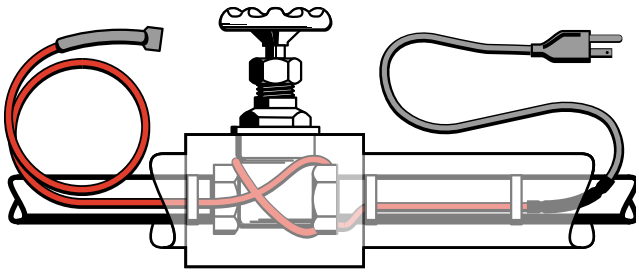
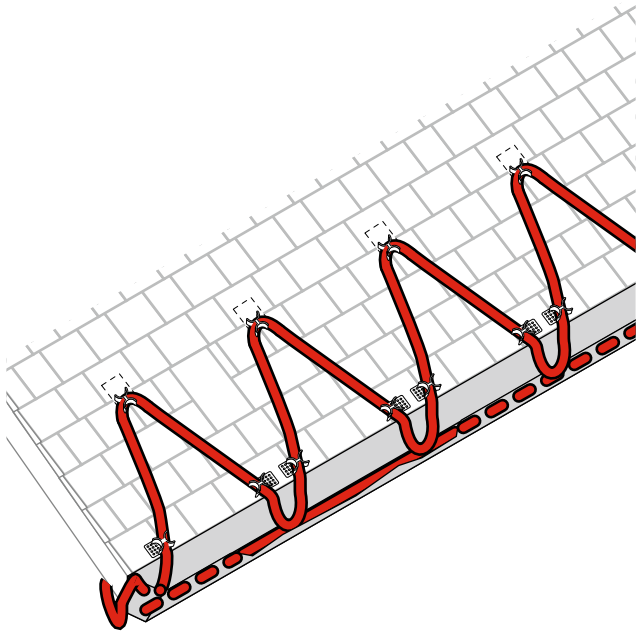
PENTAIR

Raychem GARDIAN
PREASSEMBLED HEATING CABLE





PRODUCT OVERVIEW

Raychem Gardian pre-assembled self-regulating heating cables are designed for residential and commercial metal and plastic pipe freeze protection and roof and gutter de-icing applications. 120 V Gardian cables are available in 6, 12, 18, 24, 50, 75 and 100 foot lengths, and each comes assembled with a 30-inch power cord and plug. 120 V Gardian cables are ideal for smaller jobs such as roof and gutter de-icing on porches and overhangs, as well as for pipe freeze protection on pipes up to 2-½ inches in diameter.

240 V Gardian cables are available in 6, 12, 18, and 24 foot lengths and each come assembled with a 30-inch power cord for terminating in a junction box. Due to their short lengths, 240 V Gardian cables are designed only for pipe freeze protection applications on pipes up to 2-½ inches in diameter.

Maximum exposure temperature (°F)	150	150
Maximum bend radius	5/8 in (16 mm)	5/8 in (16 mm)

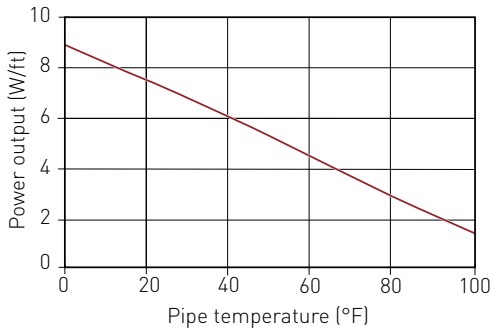
APPROVALS

-WS -W

GROUND-FAULT PROTECTION

To minimize the danger of fire from sustained electrical arcing if the heating cable is damaged or improperly installed, and to comply with the requirements of Pentair Thermal Management, agency certifications, and national electrical codes, 30-mA equipment or 5-mA personnel ground-fault protection must be used on each Gardian heating cable branch circuit. Arcing may not be stopped by conventional circuit protection.

NOMINAL POWER TEMPERATURE CURVE FOR PIPES



PRODUCT SELECTION

Pipe freeze protection

Use the tables to the right to select the correct heating cable length. Add 1 foot to the pipe length for each valve or spigot in the pipe system.

Table 1 Metal Pipes

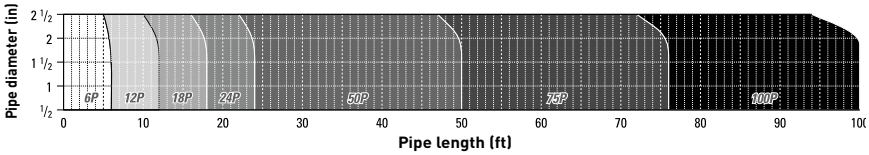


Table 2 Plastic Pipes

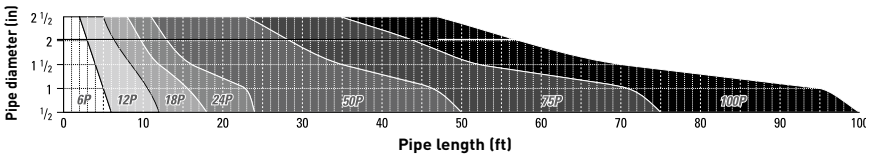

Add 1 foot to the pipe length for each valve or spigot in the pipe system.

ROOF AND GUTTER DE-ICING

Find the number of feet of heating cable needed per foot of roof edge in table to the right. Then, calculate the amount of total heating cable length you need using the following formula:

Length = **A + B + C + D**

A Roof edge length (ft) x Feet of heating cable per foot of roof edge

B Roof edge (ft) x 0.5*

C Total gutter length (ft)

D Total downspout length (ft) + 1 (ft)

= Total heating cable length (ft)

*Roof extension: This length allows the heating cable to extend into the gutter to provide a continuous drain path, or where no gutters are present, extends beyond the roof edge to form a drip loop.

Length of Cable Per Foot of Roof Edge (ft)

		Standing Seam Metal Roof	
Overhang (in)	**Standard Roof**	**18 inch Seam**	**24 inch Seam**
None*	2	2.5	2
12 in	2.8	2.8	2.4
24 in	3.8	3.6	2.9
36 in	4.8	4.3	3.6

* Gutter required

Note: Pentair Thermal Management recommends a gutter and downspouts to provide a continuous path for melted water.

- If downspout is in the middle of the run, loop the Gardian down and back up. Double the length of the downspout for determining the length of Gardian to install.
- For valleys, run the heating cable two thirds of the way up and down the valley.
- For gutters 5-6 inches wide use 2 runs of heating cable.
- For gutters wider than 6 inches contact Pentair Thermal Management, (800) 545-6258.

SUPER ADJUSTABLE™ SUPER ERECTA SHELF®
WIRE SHELVING

Super Adjustable™ Super Erecta Wire Shelving is the most advanced and innovative wire storage system available.

- **Maximum Space Utilization:** The Corner Release System encourages repositioning of shelves during initial assembly to reclaim wasted vertical space. In some cases, reclaimed vertical space will allow an extra shelving tier to be added to the storage unit resulting in a 25% increase in storage capacity!
- **Easily Assembled:** The unique Corner Release System enables quick and easy repositioning of shelves during the initial set up to accommodate different package or container sizes. "Total Assembly" is complete only after the shelves are properly spaced to maximize storage. SiteSelect™ Posts, with the double-groove visual guide feature, have circular grooves at 1" (25mm) increments and are numbered at 2" (51mm) intervals to easily identify proper shelf locations.
- **Easily Adjustable:** The unique shelf design and SiteSelect™ Posts enable "tool-free", quick adjustment at 1" (25mm) increments along the entire height of the post.
- **Improved Rigidity:** An enhanced Corner Release System has made Super Adjustable™ the most rigid, easily adjustable shelving system ever.
- **Strong:** Super Adjustable™ shelves hold as much weight as traditional Super Erecta wire shelving. Stationary units hold a maximum of 2,000 lb. (910kg). Maximum weight capacity per shelf (48" [1219mm] or shorter = 800 lb. [364kg]; longer than 48" [1219mm] = 600 lb. [273kg])
- **Choice of Finishes:** Super Adjustable™ Super Erecta shelving is available in a variety of finishes: chrome-plated for dry storage; Metroseal 3™ with antimicrobial product protection and Type 304 stainless steel for corrosive environments.
- **Accessories:** Compatible with the entire system of Super Erecta shelves and accessories. See Catalog Sheets 10.04, 10.05, 10.06 for more information.

Dry Storage — Chrome

NSF

Corner Release System

Super Adjustable™ Advantage . . .

Easy "no tool" shelf adjustment

1" 25mm spacing minimizes dead space

Efficient use of space allows more storage levels to be added.

Storage efficiency can increase by 25% or more!

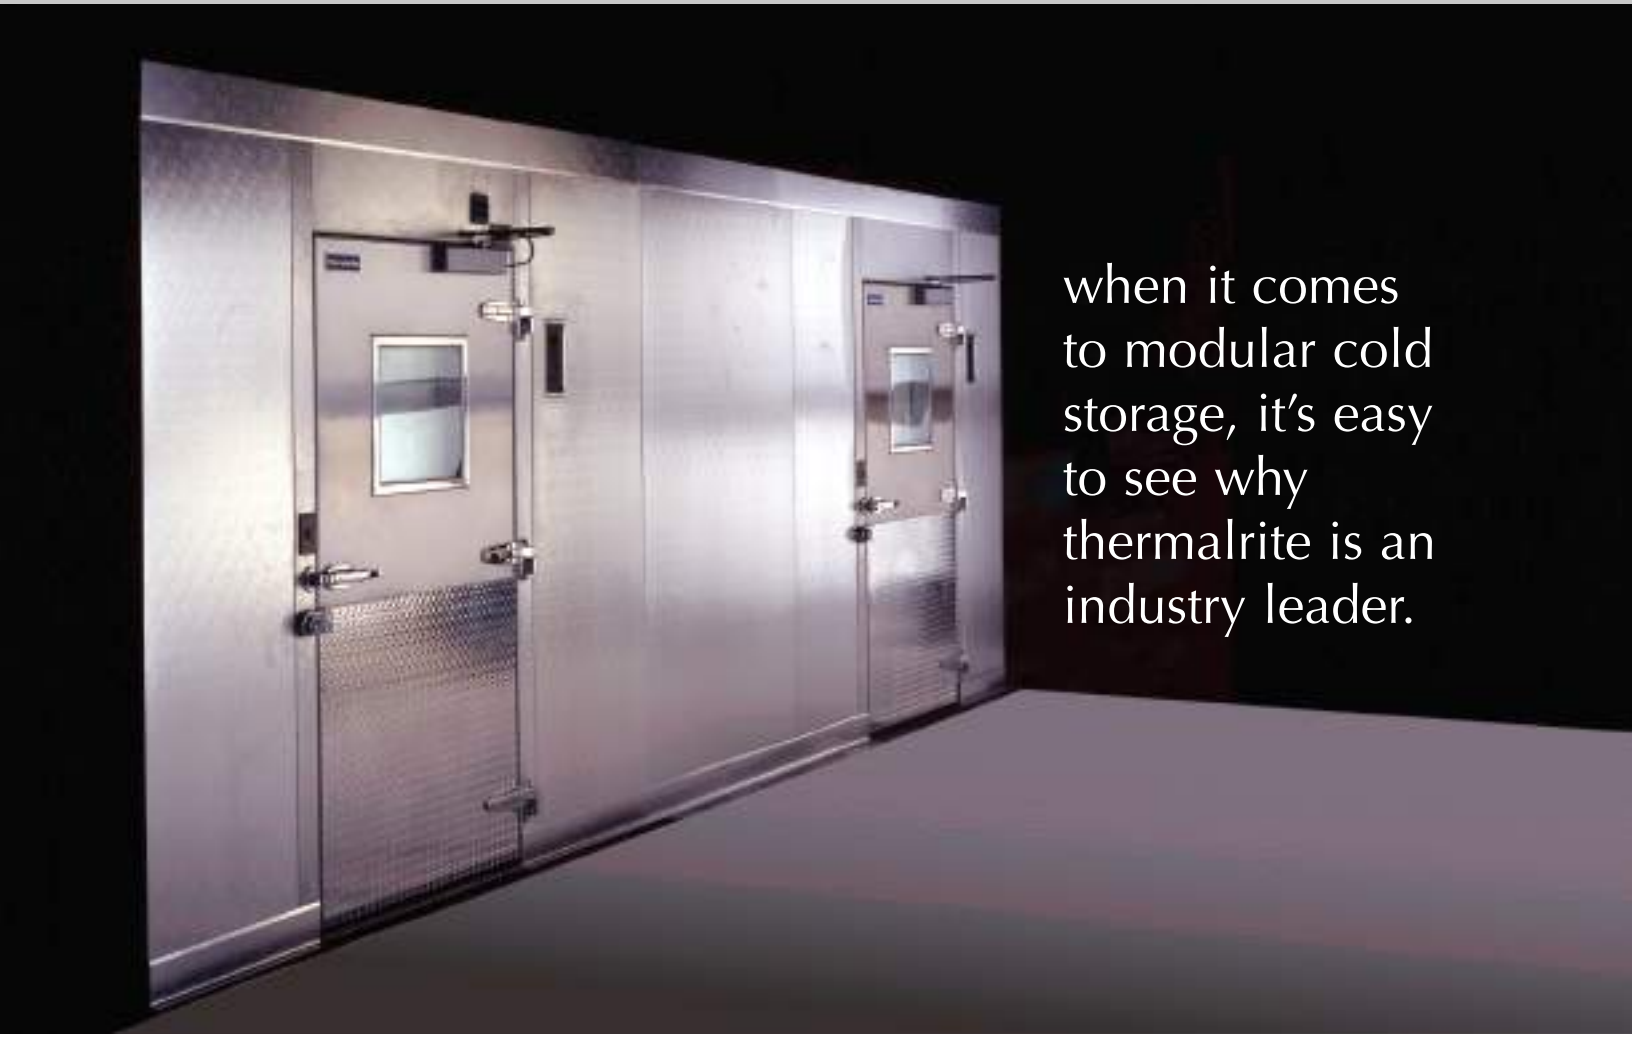
warehouse systems • food service • environmental enclosures



quality

Thermalrite® has been manufacturing Walk-in Coolers and Freezers for the food service industry since 1988. Our goal is to manufacture the finest quality walk-ins available and provide you with an unsurpassed level of service. All of our walk-ins are CAD designed to your exact specifications. Our panels are engineered and built for easy installation. During each phase of the manufacturing process we scrutinize quality, fit and finish to ensure that you get the best possible product.

service

From Quotations to Engineering, from Manufacturing to Delivery and Installation, we offer you outstanding service. Our trained, experienced Inside Sales Team, provides helpful, knowledgeable service from inquiry to delivery. Our plants in California, Minnesota, and Tennessee provide close proximity to all markets.

value

We use only the best U. L. Class 1 Non-CFC Urethane insulation available. Thermalrite® and its suppliers have incurred considerable expense in the development of ENVIROFOAM, an environmentally sensitive urethane foam. Our insulation is designed to bond with our panels to give strength and durability.

All of this translates into superior insulating properties which keep your operating costs at a minimum.

design flexibility

Custom designs – indoor, outdoor, angular, rectangular or any combination are all available in a variety of finishes and in varying thickness of four, five or six inches. We serve the warehouse, food service, institutional and environmental industries with walk-in coolers and freezers. With seamless panels up to 30 feet in length, we are ideal for warehouse applications and long spans. Our modular construction allows for easy remodeling, relocation or expansion.

why thermalrite?

- Custom Designs at Standard Prices. You get the exact size and shape you need.
- In-house design and engineering. We can help you to determine what design or configuration will best fit your unique requirements.
- Strongest all-foam panels on the market. High density foam rail with metal facing and foam-in place bonding equals strong long lasting panels.
- Doors and frames that are second to none. Doors are a full four inches thick and frames are reinforced for strength.
- Highest insulation values and best fire rating add up to the best insulating material available. UL, class 1, Non CFC ENVIROFOAM saves energy costs and meets building code requirements.
- Environmentally Friendly ENVIROFOAM.
- NSF Certified, UL Listed, USDA Approved panels.
- Engineered and Built for ease of installation.
- Experience. Thermalrite® has been manufacturing walk-in coolers and freezers since 1988.
- Foaming conducted in temperature-controlled area and controlled by the latest computerized equipment to insure proper mix density and fill resulting in the finest insulated panel available.

- The best walk-in value on the market.
- Parts department to supply your needs correctly and quickly (usually within 24 hours).
- Three strategically located manufacturing plants for quick and cost-effective delivery throughout North America.
- One-stop-shop for your complete walk-in package; refrigeration, shelving, and installation – hassle-free convenience.
- We stand behind our product – we honor our obligations. Check out our record.

classifications*

- NSF Certified
- U.L., Class 1 listed Urethane foam insulation in all Thermalrite® walk-ins.
- USDA Approved Materials
- UL Electric
- State of New York, MEA
- California Bureau of Home Furnishings and Thermal Insulation License
- State of Oregon
- Wisconsin (DHILR)
- City of Houston

*Thermalrite® insulated panels are manufactured to meet local codes in most cities. It is incumbent upon the customer to consult with the local inspector to assure compliance.

architectural specifications

metal and finishes

Standard interior and exterior metal finish:

- 26 Ga. Bright stucco embossed galvanized steel

Optional finishes available

- 26 Ga. Painted stucco embossed galvanized steel. Standard colors available are white, black and almond. Optional colors are available by request.
- .032 Stucco embossed aluminum
- .040 Smooth white aluminum
- .040 Stucco embossed aluminum
- 22 Ga. Type 304 stainless steel #4 finish

Interior floor finishes

- .050 Smooth aluminum
- 24 Ga. Type 304 stainless steel with #2B finish
- .100 aluminum diamond thermalrite

Other gauges and finishes are available upon request.

insulation

Standard insulation is foamed-in-place Non-CFC U.L. Class 1 rated urethane foam. It has a thermal conductivity (K Factor) of .120* BTU/Hr/Sq. ft/Degrees/F/in. and overall heat transfer coefficient (U Factor) of not more than .030 BTU/Hr.Sq.Ft.

Class 1 urethane foam has a flame spread of 25 or less overall and smoke developed of less than 450. Recommended wall thickness is nominal 4″. Foam rail panels also available in 4″ - 6″ thickness.

panel construction

Walk-ins are all custom designed to fit the individual customers' needs. Each panel consists of an interior and exterior metal pan with structural, high density foam rail frame. These pans are separated by rigid foam-in place self-extinguishing urethane insulation which adheres to the interior of the pans providing increased structural strength. All panels have tongue and groove construction and gasket is applied to all joints forming an air-tight seal.

panel fasteners

All panels are joined together using a cam-locking fastener, operated with a hex wrench. Access holes are sealed with vinyl snap-in caps. Standard construction is cam-locking ceilings to walls; lag-down ceilings are also available.

floorless models

Alignment screed is furnished for all floorless models. Screeds are designed to be anchored to masonry floors to provide an accurate template for the erection of wall panels.

floor panels

Floors are built with metal bonded to exterior grade underlayment and foamed-inplace. Floors are capable of maintaining a load maximum of 1000lbs./sq/ft. when uniformly distributed, and are NSF certified.

walk-in accessories and features

Standard:

- 2 1/2″ Dial Thermometer
- 100 Watt incandescent light fixture with vapor proof globe
- Flush Mount OSHA press switch factory installed and wired to outside ceiling
- NSF Certified Construction
- UL Listed Class 1 Non-CFC Urethane Foam
- USDA Approved Materials

Optional

- Refrigeration Systems
- Roof Systems for outdoor applications
- Display Doors
- Double Acting Doors
- Strip Curtains
- Alarm Systems
- Digital Thermometers
- Storage Shelving
- Built in Wall Supports
- Heavy Duty Floor Plates
- Foamed in Place Electrical Boxes

door, jamb and hardware

Standard Thermalrite walk-in doors are self-closing, flush mount type.

Standard features:

- High quality heavy duty hardware with safety release
- Magnetic door gasket
- Heated jamb (freezer only)
- Heated threshold (freezer only)
- Heated pressure relief vent (freezer only)
- Doors up to 48″ width are pre-hung
- Heavy duty door frame

Optional Door Features and Accessories:

- Bi-parting doors
- Reach-in Service Doors
- Sliding Doors
- Heavy Duty Impact Plate
- View Ports

0027C DEADBOLT LOCKING HANDLE

- Deadbolt security for walk-ins at the economy of a locking pull handle
- Deadbolt is secured using cylinder lock or padlock, or both
- Deadbolt can be locked in open position
- Self-adjusts to wall thickness variations
- Standard, twist-off glow in the dark inside release knob prevents lock-ins
- Two 1/4 turn inside release options meet ADA requirements for fast exit
  - 1/4 turn Inside Release, shown above with handle
  - 27c 1/4 Turn Low Conduction Inside Release, shown to the right
- Locking mechanism located outside resists freeze-up

Flush offset and 4" thick wall standard. Other wall thicknesses available. Consult factory.
1-5/8" offset option listed in model number table; Available down to 1/2"

U.S. Patent No.: 6,526,788
1/4 Turn Inside Release Patent No.: 9,068,376 & 6,526,788

Specifications

LATCH

MATERIAL:

Die-cast Zamak handle housing, tongue and strike.

FINISHES:

Polished chrome and brushed chrome.

PACKAGING

6 per carton

LATCH

LOCKING MECHANISMS:

Cylinder lock (may be keyed alike or randomly). Accepts 5/16" (7.9mm) dia. shank padlock (customer supplied).

MOUNTING:

Drilled and countersunk for 1/4" (6.4mm) fillister head screws.

STRIKE

MATERIAL:

Die-cast Zamak housing, brass rod, glow-in-the-dark polycarbonate turn-knob.

FINISHES:

Housing same as latch.

1248 SPRING ASSISTED HINGE

- Spring mechanism adds extra closing force to overcome air resistance on heavy walk-in doors
- Special high-lift cam system outperforms similar spring hinges
- Cam-rise action reduces gasket wear, even with irregular floors
- Built-in dwell holds door open beyond 130°
- Simple manual operation reverses hinges for use on right or left-opening door

U.S. Trademark: 2,415,070

Specifications

MATERIAL

High pressure die-cast zinc with self-lubricating nylon cam.

MOUNTING

WEIGHT

Approx. 19.5 lb (8.85 kg) per carton

6 each

1094 SURECLOSE™ HYDRAULIC DOOR CLOSERS

- Powerful gas-loaded hydraulic cylinder guarantees controlled closure
- Exposed and concealed mounting models
- Solid steel enclosed housing and bend-resistant hook assure long wear in heavy use
- Extra-wide hook ensures roller pick-up and overcomes alignment problems
- Life-cycle tested to operate reliably even after a half-million closures
- Perfect complement for Kason Walk-in hinges and latches where self-closing doors with controlled closure are needed
- Mounting slots on hook allow for easy adjustment to compensate for door sag, keeping roller aligned with hook for proper function

U.S. Trademarks: 3,212,100 & 5,809,887

MATERIAL
Heavy gauge steel. Housing and hook also available in stainless steel
FINISH
Polished or brushed chrome, stainless steel, or powder coat
MOUNTING
Holes drilled for No. 10 (5.0 mm) screws (included).

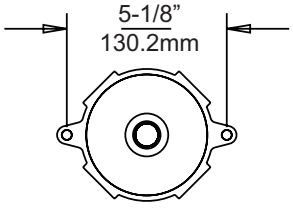
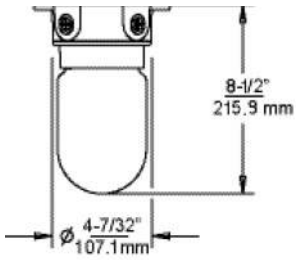
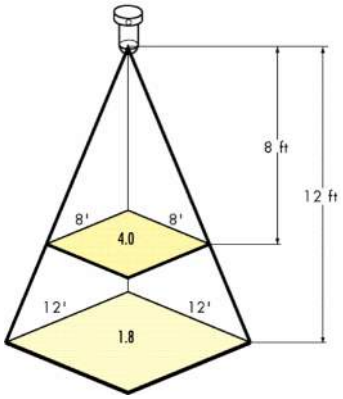
LIGHT FIXTURE AND OPTIC GLOBE, LED

1806 LED FIXTURE





SAVES MONEY AND ENERGY



FEATURES AND SPECIFICATIONS

- Lumanaire: Rating IP-65 for wet and cold environments
- Light Output: 980 lumens
- 85 lumens/watt- exceeds Federal Energy Act requirements
- Bright 5000K color temperature
- Rated 50,000 hour life
- No Ultraviolet Emission: Does Not Attact Insects
- Ideal operating temperature range from -40F to 70F (-40C to 21C)
- Power: 120 VAC at 60 Htz (line voltage)
- Rating: 11.5 watt, 120 V
- Five 1/2 NPT conduit connections
- GU24 socket
- Globe: Lexan with Light Intensifying Focused Optics (LIFO)
- Housing: Aluminum
- 5 year limited warranty on fixture
- 3 year limited warranty on lamp
- RoHS compliant and NSF listed
- Lamps and fixture cULus listed
- U.S. Patent Pending

LED VAPOR TIGHT LINEAR FIXTURE
AL SERIES

48"45W LED Vapor Tight

FEATURES:

- Built-in aluminum heat sink, with V0 Fire-Rated PC housing and improved safety factor of Hi-pot>5000V
- Unique design and appearance
- Meets wide beam lighting demands
- IP65 Rated
- Surface mount standard with optional suspension kit
- White Finish standard
- CRI>82
- Delivered Lumens: 5400
- Efficacy less than 120(LM/W)
- Designed for cold, wet environments
- Qualified for utility rebates
- Instant on lighting in cold environments

PRODUCT DESCRIPTION:

A cost effective LED Vapor Tight Fixture that features full length polycarbonate (PC) lens and one piece white Polycarbonate body. Used for utility lighting in walk in coolers,freezers and beer caves.

CONSTRUCTION:

- Integral design and fully compact structure
- Frosted Lens
- Universal voltage 100V-277V
- Non-Dimming standard
- Class II Fixtures

MODULARM 75LC multi-monitor

FOR WALK-IN COOLERS AND FREEZERS

"A New Industry Standard in Walk-In Monitoring"

TEMPERATURE ALARM

- Protects against product loss
- Patented **Autoset™** Technology automatically adjusts alarm setpoints for a cooler or a freezer (Eliminates manual programming in most applications)

DOOR AJAR ALARM

- Saves Energy
- Improves efficiency
- Reduces coil icing
- Lowers maintenance costs
- Helps maintain product integrity & prevent loss

AC FAILURE ALARM

- Protects against product loss in AC Failure
- Built-In Battery Back-up with recharging circuitry maintains operation in AC Failure

PANIC ALARM

- Increases operator safety
- **Manual** & **Automatic** Panic Alarms Provide Maximum Protection
- Low voltage ***IP-1*** Illuminated Push Button for panic alarm activation

IP-1

PATENTED AUTOMATIC LIGHT CONTROL

- Saves Energy
- Eliminates Conventional Light Switches
- ***IP-1*** Illuminated Push Button provides light control inside the box
- Motion sensor compatible for light activation
- Energy Act Compliant

- ◆ SAVES ENERGY
- ◆ INCREASES OPERATOR SAFETY
- ◆ PROTECTS PERISHABLES
- ◆ LOWERS MAINTENANCE COSTS

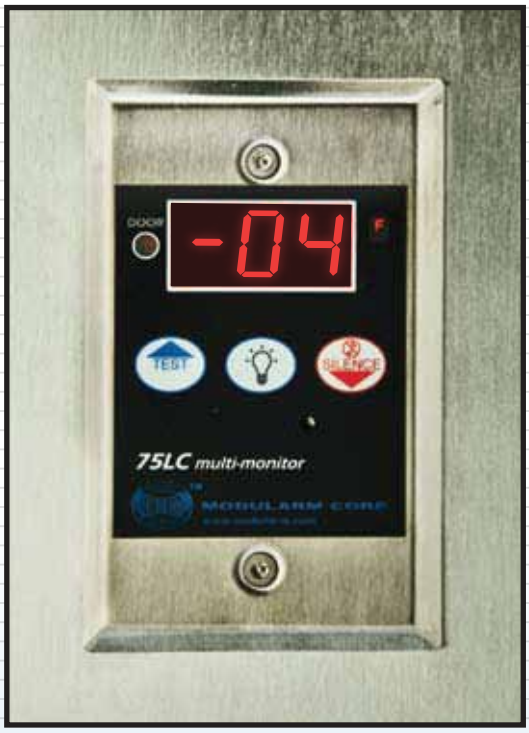
MODULARM 75LC multi-monitor

FOR WALK-IN COOLERS AND FREEZERS

FEATURES

- COMPACT DESIGN FOR FLUSH OR SURFACE MOUNTING IN A SINGLE GANG WEATHERPROOF ENCLOSURE
- SIMPLE 3 BUTTON USER INTERFACE
- PAS-PRO™ PROGRAMMING IS SIMPLE AND SECURE
- BUILT-IN POWER SUPPLY (NO REMOTE TRANSFORMER)
- BUILT-IN RECHARGEABLE BATTERY WITH RECHARGING CIRCUITRY
- BUILT-IN AUDIBLE & VISUAL ALARM ANNUNCIATION
- BUILT-IN PROGRAMMABLE DRY CONTACTS (N/O & N/C) FOR REMOTE NOTIFICATION
- HI & LO ALARM TEMP SETPOINTS
- RINGBACK FEATURE PROVIDES TIMED REPEAT AUDIBLE ALARMS DURING AN ALARM CONDITION
- READOUT IN ºF OR ºC WITH AUTOMATIC SCALE CONVERSION
- ADJUSTABLE ALARM DELAYS
- OPTIONAL LOW VOLTAGE IP-1 ILLUMINATED PUSH BUTTON REMAINS LIT IN A POWER FAILURE TO HELP FIND THE DOOR
- 3 & 4 WAY LIGHT SWITCHING CAPABLE
- BUILT-IN DATA PORT FOR REMOTE COMMUNICATION & SYSTEM EXPANSION
- ONE OR TWO COMPARTMENT MONITORING CAPABLE
- ALL 75LC FUNCTIONS ARE AVAILABLE SIMULTANEOUSLY
- PRIVATE LABELING IS AVAILABLE



FLUSH MOUNT

SPECIFICATIONS

- DIMENSIONS: SURFACE: 4.5” L x 2.75” W x 2.25” D, FLUSH: ENCLOSURE RECESS - 1.9” D
- TEMPERATURE RANGE: -40°F TO 125°F (-40°C TO 52°C) STANDARD 25’ SENSOR LINE. OTHER LENGTHS AVAILABLE.
- ACCURACY: ± 1°F FROM -25°F TO 70°F (-32°C TO 21°C), ± 2°F FULL RANGE
- ALARM RELAY: N/O & N/C DRY CONTACTS, 1A @ 28VDC, Class 2
- LIGHT RELAY: 8.3A@120VAC, 1000W
- POWER REQUIREMENTS: 120VAC, 30MA

ANOTHER BRIGHT GREEN IDEA FROM MODULARM CORPORATION

WARRANTY STATEMENT

Modularm warrants its products to be free from defects in material and workmanship under normal use and service for a period of one year from the date of the original installation. Any products found to Modularm’s satisfaction to be defective upon examination at Modularm’s factory will at Modularm’s option, be repaired or replaced and returned to purchaser via lowest common carrier. Return of the defective product to Modularm’s plant, freight prepaid, by purchaser, correction of such defect by repair or replacement, and return freight via lowest common carrier, shall constitute full performance by Modularm of its obligations hereunder. Modularm shall have no liability for expenses incurred for repairs made by purchaser except by prior, written authorization. Every claim on account of a breach of warranty shall be made to Modularm in writing within the warranty period specified above – otherwise such claim shall be deemed waived. Modularm shall have no warranty obligation whatsoever if the product has been subjected to alteration, misuse, negligence, corrosive atmosphere, accident, or if operation is contrary to Modularm’s instructions or applicable laws, regulations, code or industry practice. NO OTHER WARRANTY EXPRESSED OR IMPLIED, WHETHER OF FITNESS OR MERCHANTABILITY OR OF ANY OTHER KIND SHALL EXIST IN RESPECT TO MODULARM’S PRODUCTS. Under no circumstances shall Modularm be liable for any loss, damage, cost of repair, installation or reinstallation, or consequential damages of any kind in connection with the use, sale or repair of any products purchased from Modularm.

MODEL 75 LC MULTI-MONITOR FEATURE DETAILS

This document is provided to offer more detailed information on certain features of the Model 75LC:

- **Patented Autoset Technology – Autoset** lets the 75LC select the correct alarm temperature setpoints for a cooler or a freezer **automatically**, virtually eliminating the need for manual programming. Common **cooler** and **freezer** setpoints are pre-loaded into the 75LC. The cooler setpoints are the default settings, used if the monitored compartment is a cooler. If the compartment is a freezer, **Autoset** detects the lower compartment temperature and the 75LC **automatically** changes to the freezer setpoints. (Freezer setpoints won't revert to cooler setpoints if the temperature rises.) Cooler defaults can be easily restored manually when necessary, and a faceplate accessible password protected programming menu allows for customized settings.

- **Timed Light Control, including Auto Panic** - The 75LC offers both timed lighting and timed lighting with Auto Panic. Timed lighting with Auto Panic is the chosen default because we believe it is **the safest mode of operation**. The comparison chart below is provided to better understand the difference between timed lighting operation and timed lighting operation with Auto Panic. Timed lighting operation by a competitor product is also provided for comparison.

Competitor Timed Lighting: (Typically utilizes magnetic contacts to sense door status with 15 minute Energy Act Compliant Timing.)

Open Door - Lights turn on, light timer starts. Lights stay on until timer expires, then lights turn off.

Comments: Possibly not Energy Act compliant. Personnel in the box with the door closed may be "left in the dark" when the timer expires.

Patented 75LC Timed Lighting:(Requires magnetic contacts to sense door status, and IP-1 button **inside** of walk-in.) The light timer is preset for 15 minute Energy Act compliant timing.

Open Door - Lights turn on.

Close Door - Light timer starts, lights stay on while light timer is running. 40 seconds before light timer expires, the IP-1 starts to "beep and blink" to warn personnel that lights will be turning off. Pressing the IP-1 resets and restarts the light timer and keeps lights on. This happens repeatedly. If no one is in the box to press the IP-1, lights turn off when the light timer expires. (**Note 1**: If lights are off, the IP-1 always works as a **"lights on" switch inside of the walk-in**.) (**Note 2**: Press and hold the IP-1 for 2 seconds at any time to generate a manual panic alarm.) (**Note 3**: In coolers, The MD-1 motion detector may be used instead of or in addition to the IP-1. MD-1 activation duplicates an IP-1 press and automates the process.)

Comments: Compliant. Safer than competitor timed lighting because the IP-1 or the MD-1 provides light control, light timer reset and warning that lights will be turning off inside the walk-in.

MODULARM CORPORATION
61 Mall Drive, Commack, NY 11725, Tel 631.864.3860 Fax 631.864.3863
Web: www.modularm.com Email: sales@modularm.com

Patented 75LC Timed Lighting with "Auto Panic": (Requires magnetic contacts to sense door status and IP-1 button **inside** of walk-in.) The light timer is preset for 15 minute Energy Act compliant timing.

Open Door - Lights turn on.

Close Door - Light timer starts, lights stay on while light timer is running. IP-1 starts to beep and blink **immediately** when the door is closed to prompt a button press. Pressing the IP-1 does the following:

1) Stops the light timer and makes lights stay on **indefinitely for as long as the door is closed**.
2) Starts a **built-in 20 minute auto panic timer**.
3) "Locks out" the Light Switch on the 75LC so that someone outside the walk-in can't turn off lights while the box is occupied.

After 20 minutes, the IP-1 starts to beep and blink again for 40 seconds to prompt a "check in" button press. Pressing the IP-1 resets and restarts the Auto Panic timer. This happens repeatedly for as long as someone remains in the box with the door closed. If the IP-1 isn't pressed within 40 seconds, the 75LC **automatically generates a panic alarm ("HLP"** appears on the 75LC display) to let personnel outside the box know that someone may be injured or disabled inside of the walk-in. Opening and closing the door resets all functions. If no one is in the box to press the IP-1, lights turn off when the light timer expires. (**Note 1**: If door is closed and lights are off, the IP-1 always works as a **"lights on" switch inside of the walk-in** and always activates the auto panic timer when pressed.) (**Note 2**: Press and hold the IP-1 for 2 seconds at any time to generate a manual panic alarm.) (**Note 3**: In coolers, The MD-1 motion detector may be used instead of or in addition to the IP-1. MD-1 activation duplicates an IP-1 press and automates the process.)

Comments: Compliant. Our default selected safest mode of operation.

- **Manual Lighting Control** - As an easily selectable alternate mode of operation, the 75LC may be utilized as an **untimed, standard on-off light switch** for applications where timed lighting is not required, thus replacing standard light switches.

- **AC Power Failure Alarm** – The 75LC includes a built-in rechargeable battery with built-in recharging circuitry for on premise and remote notification power failure alarm. The battery backup keeps the system completely operational for up to 10 hours in a power failure, and the **battery backup also keeps the low voltage IP-1 Illuminated Push Button lit so that personnel can find the door if they are inside the walk-in when a power failure occurs.**

Russell All-Temp²B

Features

The Russell All-Temp²B is the original low profile unit cooler that has established an industry standard as being the all purpose design for walk-in coolers, freezers and other applications. They feature an air draw-through design offering air, electric and hot gas defrost models.

Sizes

There are 35 sizes available with 3,700 to 39,000 BTUH at a 10° TD ranging from 740 to 4,980 cfm. One through six fan models are available.

Housing

Rust-free, heavy gauge, textured Aluminum casing is light weight yet durable. Each fan section is baffled to prevent short cycling of the air. The unit is designed to mount flush to the ceiling and meets all NSF requirements. Slotted hangers are provided for easy installation. Drain fittings are installed in the horizontal position to gain more usable head-room in low ceiling applications. The end panels now are hinged to open up out for easy access to both the piping and electrical ends. Optional expansion valves can be conveniently installed inside the cabinet.

Coil

Seamless Copper tubes are staggered and mechanically expanded into corrugated Aluminum fins and heavy gauge tube sheets to achieve maximum heat transfer and strength. Die formed fin collars provide even fin spacing. Fin spacings available are 4, 6, and 8 fins per inch. Sweat connections are standard on all models and optional field installed flare connection kits are available at no extra charge.

Motors

Standard motors are 1/20 HP, permanently lubricated, ball bearing, with thermal overload protection. Available in 115V, 208/230V and 460V, single phase. Optional high efficiency PSC and ECM motors are available in 115V and 230V.

Fans

Heavy duty 12” Aluminum fans are balanced to provide vibration-free operation. Our new low throw black plastic fan guards have an improved air pattern. The optional epoxy resin high throw fan guard moves air up to 50 feet.

Air Defrost

All models with the prefix “AA” are designed for use in coolers of 35°F and warmer. Complete air defrost systems for off-cycle or timed air defrost are available from Russell.

Electrical

Available in 115V, 208/230V, and 460V (see pages 4 & 5). All components are factory wired to convenient screw-type terminal strips. A large compartment is supplied internal to the unit for all electrical components and is easily accessible by removing the end panel. All models are UL & cUL listed.

Electric Defrost

Available on all models with the prefix “AE”. Designed for use where electric heat is used to defrost. Placement of the heaters internal to the coil allows for an extremely rapid and efficient defrost. This arrangement enables the heat to be conducted through the fins from the center out for an even defrost pattern. All heaters are wired to a terminal strip to allow a quick field change-over from single phase to three phase, 230V to 460V and vice versa. A lower heater is installed close to the drain pan for fast, reliable drainage. A defrost termination thermostat (DT) terminates the defrost cycle when the temperature is satisfied. A heater safety thermostat is installed to prevent heaters from overheating above 75° in case of DT failure. All heaters are flexible and can be easily replaced within 12 inches of the end of the units. A fan delay thermostat is supplied to allow the warm coil to cool after a defrost cycle prior to the fans turning on. Complete electric defrost refrigeration systems are available from Russell.

Hot Gas Defrost

Two types available - Re-Evap models with the prefix “AH” and reverse cycle with the prefix “AG”. All models include a fixed DTFD factory wired and a hot gas drain pan circuit to defrost the drain pan. On all Hot Gas models, the drain fitting is located on the left-hand rear of the unit when facing the fan guards. Re-evap models include a Heat Exchanger-Re-Evaporator shipped together with the unit for field installation. Complete Re-Evap Refrigeration Systems are available from Russell. Contact factory for piping information.

Optional Features

- High efficiency PSC or ECM fan motors
- Coated Aluminum fins or Copper Fins
- Baked white enamel housing
- Epoxy resin high throw guards for up to 50 ft.
- Reheat kits (not UL listed)
- Factory mounted expansion valves

All-Temp²B

RUSSELL's optional **ECM motors**
bring the benefits inherent to unit bearing motor design
to the refrigeration Unit Cooler market.

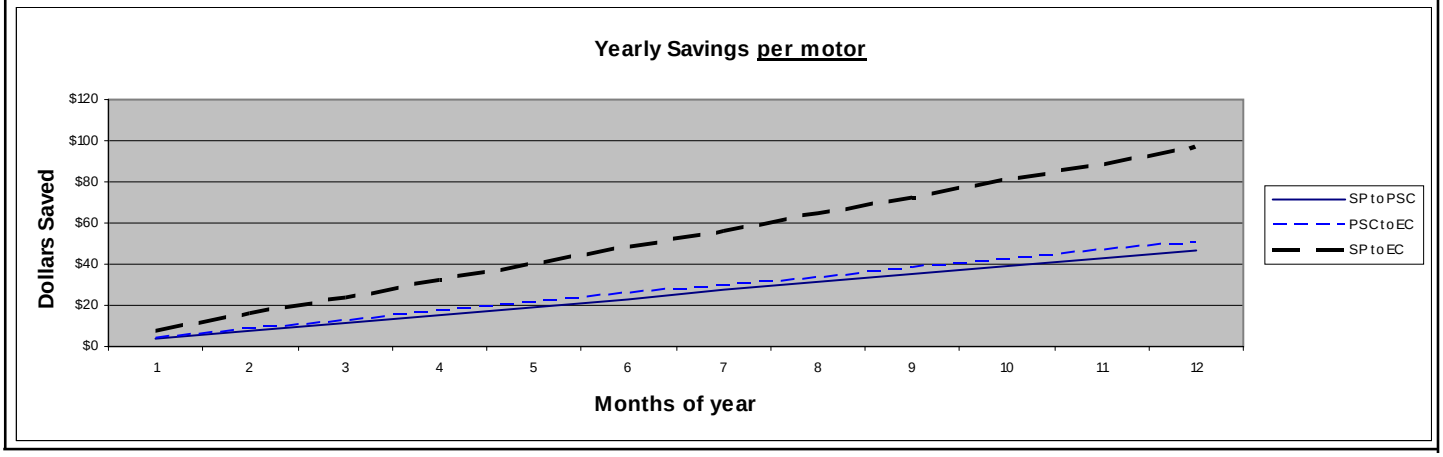
- **Large oil resevoir**
- Totally enclosed construction
- **Journal bearing machined into the cast iron endbell**
- Spiral grooved shaft pump **guarantees** positive oil circulation
- **Threaded shaft uses hubless fan blade.**

Energy Savings per Motor

by Changing to More Efficient Unit Cooler Motors (baseded on Energy Cost of $0.10 per kWh)

Motor Change	Std Motor Power Watts/Mtr	Change to Motor Power Watts/Mtr	Reduced Power Watts/Mtr	Run Time Hrs/ Day	Motor Energy Savings kWh/Yr	Motor Energy Savings $/Yr	Reduced Box Load MBTU/Yr	Cond. Unit Energy Savings $/Yr	Yearly Saving $ **Per MTR**	Pay back in Yrs
SP to PSC	120	85	35	22	281	28	959	18	**47**	0.6
PSC to EC	85	47	38	22	305	31	1041	20	**51**	2
SP to EC	**120**	**47**	**73**	**22**	**586**	**59**	**2000**	**38**	**97**	**1.3**

Subtract 6% from total savings for medium temperature air defrost units that run 24 hours per day.
SP = 1/20 HP Shaded pole motor (Standard motors)
PSC = 1/20 HP PSC motor (Optional motors available at additional cost)
ECM = 50 Watt Electronically Commutated motor (Optional motors available at additional cost)



Nomenclature

A A 1 8 - 41 B - A

- **A** — All-Temp²B
- **A** — Type of Defrost

(1) All fan motors are wired for single phase. Standard motors are shaded pole. High efficiency PSC motors (Permanent Split Capacitor) and ECM (Electronically Commutated) motors are optional.

Ordering Information Required

It is vital that the information listed below is given with each evaporator order. Orders without this information may be delayed. Evaporators with options such as solenoid and expansion valves will not be processed until all the required information is given.

(1) Model Number

(2) Type of Motor

(3) Voltage, frequency and phase of motors and heaters (when applicable)

(4) Refrigerant type

(5) Evaporator temperature

(6) Evaporator T.D.

(1) All fan motors are wired for single phase. Standard motors are shaded pole. High efficiency PSC (Permanent Split Capacitor) & ECM (Electronically commutated) motors are optional.

(2) For 208/230 volt models, heaters are wired as standard for single phase on 1 through 4 fan models. 5 and 6 fan models are wired 3 phase. 460 Volt models are only available in single phase and are compatible with all 3 phase systems.

† Optional Extended Flare Kit available upon request for field installation.
‡ Hot Gas connections only apply to the AH models.

Installation Notes:
(1) Install 12” away from back wall.
(2) Drain connection on AA and AE units are centered on drain pan; and on the left end (facing air discharge) on AH and AG units.
(3) For long air throw requirements, specify high throw fan guard.
(4) Unit height at drain end of hot gas models is as follows: 1,2, and 3 fan models = 15-7/8”, 4,5, and 6 fan models = 16-1/4”.

Electric defrost kits consist of components that are necessary to control the defrost cycle. The optional kits are available as a factory installed option when ordered with a condensing unit. Not all Ed-Kits are available for all condensing unit models. The contents of each kit is described below, along with the function of each component.

* - 1/2 through 3 HP models require ED-210 or ED-213.

Timer: Initiates the defrost cycle. Also used as a override protection for defrost termination.

Auxiliary Switch: Is mounted on the compressor contactor and prevents the defrost contactor from operating whenever the compressor is energized.

Block-Out Relay: Serves the same function as auxiliary switch. Used when defrost contactor is not required (lower wattage single phase only).

Defrost Contactor: Carries amperage load for heaters.

Fan Contactor: Used with 460V motors or when 230V motors are wired 3 phase.

Sequencing Relays: Provides interconnection of multiple unit coolers on a single system so that each unit cooler is allowed to individually terminate defrost on temperature.

[1] For use with 2 evaporators , 1/2 through 3 HP R-series systems ONLY!

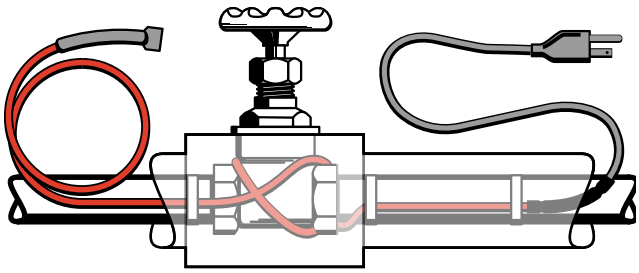
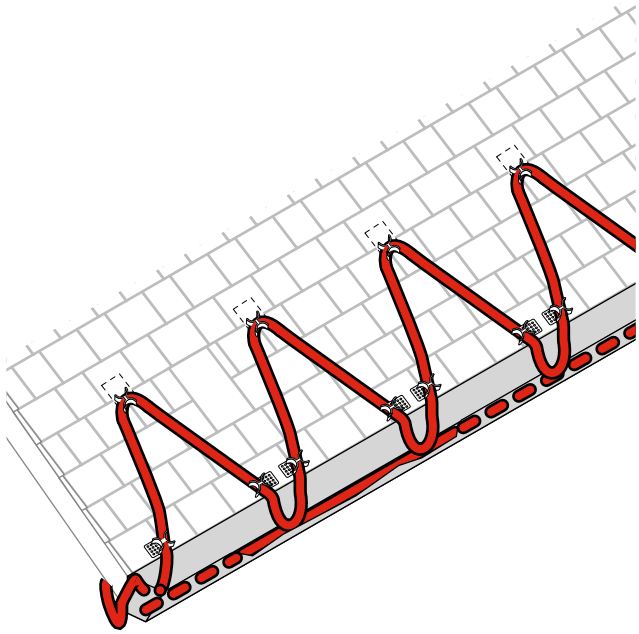
PENTAIR

Raychem GARDIAN
PREASSEMBLED HEATING CABLE





PRODUCT OVERVIEW

Raychem Gardian pre-assembled self-regulating heating cables are designed for residential and commercial metal and plastic pipe freeze protection and roof and gutter de-icing applications. 120 V Gardian cables are available in 6, 12, 18, 24, 50, 75 and 100 foot lengths, and each comes assembled with a 30-inch power cord and plug. 120 V Gardian cables are ideal for smaller jobs such as roof and gutter de-icing on porches and overhangs, as well as for pipe freeze protection on pipes up to 2-½ inches in diameter.

240 V Gardian cables are available in 6, 12, 18, and 24 foot lengths and each come assembled with a 30-inch power cord for terminating in a junction box. Due to their short lengths, 240 V Gardian cables are designed only for pipe freeze protection applications on pipes up to 2-½ inches in diameter.

Maximum exposure temperature (°F)	150	150
Maximum bend radius	5/8 in (16 mm)	5/8 in (16 mm)

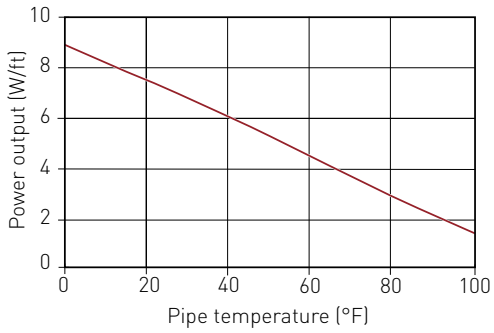
APPROVALS

-WS -W

GROUND-FAULT PROTECTION

To minimize the danger of fire from sustained electrical arcing if the heating cable is damaged or improperly installed, and to comply with the requirements of Pentair Thermal Management, agency certifications, and national electrical codes, 30-mA equipment or 5-mA personnel ground-fault protection must be used on each Gardian heating cable branch circuit. Arcing may not be stopped by conventional circuit protection.

NOMINAL POWER TEMPERATURE CURVE FOR PIPES



PRODUCT SELECTION

Pipe freeze protection

Use the tables to the right to select the correct heating cable length. Add 1 foot to the pipe length for each valve or spigot in the pipe system.

Table 1 Metal Pipes

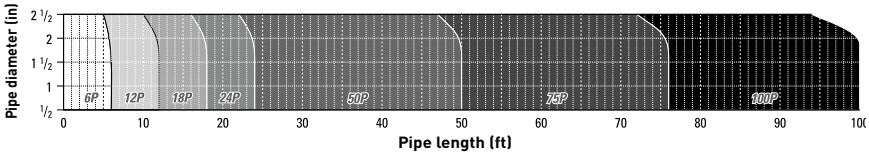


Table 2 Plastic Pipes

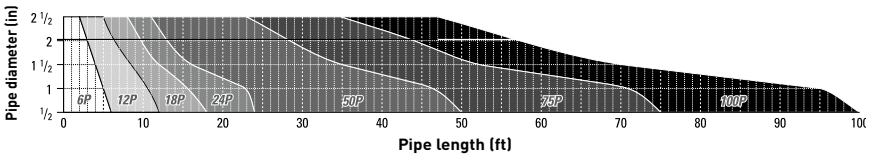

Add 1 foot to the pipe length for each valve or spigot in the pipe system.

ROOF AND GUTTER DE-ICING

Find the number of feet of heating cable needed per foot of roof edge in table to the right. Then, calculate the amount of total heating cable length you need using the following formula:

Length = **A + B + C + D**

A Roof edge length (ft) x Feet of heating cable per foot of roof edge

B Roof edge (ft) x 0.5*

C Total gutter length (ft)

D Total downspout length (ft) + 1 (ft)

= Total heating cable length (ft)

*Roof extension: This length allows the heating cable to extend into the gutter to provide a continuous drain path, or where no gutters are present, extends beyond the roof edge to form a drip loop.

Length of Cable Per Foot of Roof Edge (ft)

		Standing Seam Metal Roof	
Overhang (in)	**Standard Roof**	**18 inch Seam**	**24 inch Seam**
None*	2	2.5	2
12 in	2.8	2.8	2.4
24 in	3.8	3.6	2.9
36 in	4.8	4.3	3.6

* Gutter required

Note: Pentair Thermal Management recommends a gutter and downspouts to provide a continuous path for melted water.

- If downspout is in the middle of the run, loop the Gardian down and back up. Double the length of the downspout for determining the length of Gardian to install.
- For valleys, run the heating cable two thirds of the way up and down the valley.
- For gutters 5-6 inches wide use 2 runs of heating cable.
- For gutters wider than 6 inches contact Pentair Thermal Management, (800) 545-6258.

SUPER ADJUSTABLE™ SUPER ERECTA SHELF®
WIRE SHELVING

Super Adjustable™ Super Erecta Wire Shelving is the most advanced and innovative wire storage system available.

- **Maximum Space Utilization:** The Corner Release System encourages repositioning of shelves during initial assembly to reclaim wasted vertical space. In some cases, reclaimed vertical space will allow an extra shelving tier to be added to the storage unit resulting in a 25% increase in storage capacity!
- **Easily Assembled:** The unique Corner Release System enables quick and easy repositioning of shelves during the initial set up to accommodate different package or container sizes. "Total Assembly" is complete only after the shelves are properly spaced to maximize storage. SiteSelect™ Posts, with the double-groove visual guide feature, have circular grooves at 1" (25mm) increments and are numbered at 2" (51mm) intervals to easily identify proper shelf locations.
- **Easily Adjustable:** The unique shelf design and SiteSelect™ Posts enable "tool-free", quick adjustment at 1" (25mm) increments along the entire height of the post.
- **Improved Rigidity:** An enhanced Corner Release System has made Super Adjustable™ the most rigid, easily adjustable shelving system ever.
- **Strong:** Super Adjustable™ shelves hold as much weight as traditional Super Erecta wire shelving. Stationary units hold a maximum of 2,000 lb. (910kg). Maximum weight capacity per shelf (48" [1219mm] or shorter = 800 lb. [364kg]; longer than 48" [1219mm] = 600 lb. [273kg])
- **Choice of Finishes:** Super Adjustable™ Super Erecta shelving is available in a variety of finishes: chrome-plated for dry storage; Metroseal 3™ with antimicrobial product protection and Type 304 stainless steel for corrosive environments.
- **Accessories:** Compatible with the entire system of Super Erecta shelves and accessories. See Catalog Sheets 10.04, 10.05, 10.06 for more information.

Dry Storage — Chrome

NSF

Corner Release System

Super Adjustable™ Advantage . . .

Easy "no tool" shelf adjustment

1" 25mm spacing minimizes dead space

Efficient use of space allows more storage levels to be added.

Storage efficiency can increase by 25% or more!

SUPER ADJUSTABLE™ SUPER ERECTA SHELF®
Adjustable Wire Shelving

METRO®

We put space to work.

Item # _____

Job _____

MetroMax 4 Drying Racks combine the corrosion protection and strength of MetroMax 4 with the convenience of a drying rack unit that efficiently sorts and holds pots, pans and trays while they dry to prevent wet nesting.

Three Tier Tray Rack:
36" (914mm) and 48" (1219mm) lengths.
Each consists of (3) MetroMax 4 shelf frames, (4) 63" (1600mm) mobile posts, (4) corrosion resistant polymer horn casters (two swivel, two brake), (3) tray racks,

Four Tier Bulk Drying and Tray Rack:
36" (914mm) and 48" (1219mm) lengths.
Each consists of (3) MetroMax 4 shelf frames, (1) MetroMax 4 shelf, (4) 63" (1600mm) mobile posts, (4) corrosion resistant polymer horn casters (two swivel, two brake), (2) stainless steel drop-in racks, (1) tray rack.

Four Tier Tray and Steam Pan Rack:
36" (914mm) and 48" (1219mm) lengths.
Each consists of (4) MetroMax 4 shelf frames, (4) 63" (1600mm) mobile posts, (4) corrosion resistant polymer horn casters (two swivel, two brake), (2) tray racks, (2) steam pan racks.

Key Benefits
- **Promotes food safety** by preventing wet nesting, where two wet/damp items are nested together preventing proper airflow.
- **Superior air circulation:** Fast drying of trays, cutting boards, pans, lids, pots and all sink items.
- **"Hold strong" slots:** Tray and Pan Racks have tall slots to assure trays, cutting boards, steam pans, and other tall items don't tip over while being loaded/unloaded and during use.
- **Wobble Free, Worry Free mobility:** Sturdy carts are easy to maneuver with swivel polymer casters.
- **Easy to Clean:** Shelf mats, posts and epoxy coated drying racks have built-in Microban antimicrobial product protection. It keeps the product "cleaner between cleanings".
- **Superior Organization:** Optional hanging rails and grids help sort and dry utensils and other vessels with long handles.
- **NSF Listed**

MAX4-PR48VX2

MAX4-PR48VX3

MAX4-PR48VX4

PROTECTION THAT LIVES ON MICROBAN

Inhibits the growth of stain and odor causing bacteria. Microban® does not protect users from food borne illness. Normal cleaning practices should be maintained. Microban is a registered trademark of Microban Products Company.

MetroMax 4 Drying Racks

Specifications - Shelving Units, Drop-Ins, Tray Racks, Pan Racks

- **Longitudinal Beams & Posts:** Pultrusions - continuous glass fibers and thermo set resin composite with built-in Microban antimicrobial product protection. Exterior surfaces are high-impact thermoplastic resin.
- **End Beams, Adjustable Foot & Socket:** Injection molded polyester thermoplastic resin with glass reinforcement.
- **Drop In Rack** -Electro-Polished Type 304 Stainless Steel
- **Cutting Board/Tray Drying Rack:** Corrosion resistant taupe epoxy coated steel with built-in Microban product protection and rigid PVC (non phtalate) extrusions.
- **Shelf Mats:** Polypropylene. Mats contain Microban antimicrobial product protection.
- **Load Capacity:** 200 lbs. (91kg) per drop-in rack, tray rack, or pan rack.
- **Stationary Load Capacity:** 2000lbs. (907kg)
- **Mobile Load Capacity:** 750 lbs. (340kg) per unit
- **Polymer Casters:** 2 swivel, 2 swivel with brakes. Corrosion-resistant, polymer horn, stainless steel axle and hardware. 5" (127mm) diameter.

MAX4-PR48VX3	24	610	48	1219	68	1702	76.8	34.8

Two Tray Racks and Two Pan Racks (4-tier)

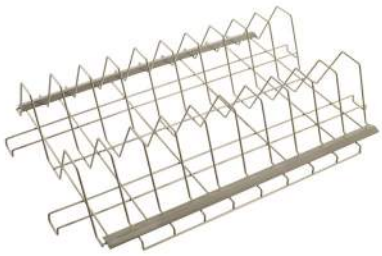
Model No.	Nominal Width (in.)	Nominal Width (mm)	Nominal Length (in.)	Nominal Length (mm)	Nominal Height (in.)	Nominal Height (mm)	Approx. Pkd. Wt. (lbs.)	Approx. Pkd. Wt. (kg)
MAX4-PR36VX4	24	610	36	914	68	1702	80.6	36.5
MAX4-PR48VX4	24	610	48	1219	68	1702	95.3	43.2

Note: For the actual dimensions for mobile units, add 2" (51mm) to the nominal dimension to account for the bumpers.

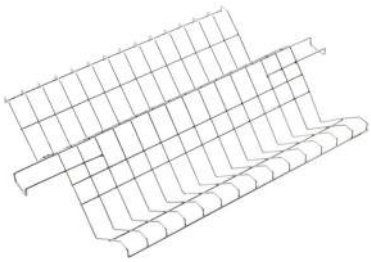
MetroMax 4 Drying Racks

Tip: Convert a MetroMax 4 shelf to an open frame by removing the shelf mat sections.

XTR2436XE



XTR2436XEA



MAX4-DR36S

Cutting Board & Tray Drying Rack Accessories

- Mount to MetroMax 4 open shelf frames (no shelf mats), open grid and solid MetroMax i shelves, MetroMax i open shelf frames, MetroMax Q shelves, Super Erecta Pro, and Super Erecta.
- 1 1/8" (28mm) or 3" (76mm) slot spacing available.
- Polymer glide strips provide an impact resistant surface for long life.

Model No.	Fits Shelf or Frame (in.)	(mm)	Upright Spacing (in.)	(mm)	Upright Height (in.)	(mm)	Tray Capacity	Approx. Pkd. Wt. (lbs.)	(kg)

Type 304 Stainless Drop-In Racks (for MetroMax 4 only)

- Drop-ins (models "MAX4-") require a four-sided MetroMax 4 frame.
- A drop-in rack can be added to a standard MetroMax 4 shelf by removing the shelf mats and using the shelf frame.

Model No.	Fits Shelf (in.)	(mm)	Height (in.)	(mm)	Approx. Pkd. Wt. (lbs.)	(kg)
MAX4-DR36S	24x36	610x914	33 7/8	860		
MAX4-DR48S	24x48	610x1219	45 7/8	1165		

MetroMax 4 open shelf frames

- Open shelf frames accomodate the drop-ins, tray racks, and pan racks.
- Bag of 4 wedges included.
- A standard MetroMax 4 may be converted to a frame by removing all shelf mat sections.

Model No.	Fits Shelf or Frame (in.)	(mm)	Approx. Pkd. Wt. (lbs.)	(kg)
MAX4-4F2436	24x36	610x914	6.9	3.1
MAX4-4F2448	24x48	610x1219	8.6	3.9

Drip Tray - for a MetroMax i frame or shelf.

- Patent pending water collection accessory is compatible with MetroMax i.
- Consult Spec Sheet 9.32b to learn how to integrate this accessory and its related MetroMax i shelf or shelf frame to a MetroMax 4 unit.

Drip Tray Mounted to a MetroMax i 24x36" (610x914mm) Frame. Steam Pan not included.

Hanger Rail with Add-a-Collar Brackets and Accessory Hooks

- Add-a-collars and Hanger Rails combine to form a mounting rail for hooks.
- Easily retrofitable to any MetroMax shelving (2010 to present day).
- Unique design installs easily without tools. No disassembly required.
- 5" hooks manage larger utensils and are designed for use in exposed areas. Designed to mount on a hanger rail only.
- Material: Type 304 Stainless Steel
- Hanger rails are also compatible with SmartWall Hooks. (HK23C, HK25C, HK26C, chrome plated, see spec sheet 10.43)

Model No.	Description	Nominal Width (in.)	Nominal Width (mm)	Nominal Length (in.)	Nominal Length (mm)	Nominal Height (in.)	Nominal Height (mm)	Approx. Pkd. Wt. (lbs.)	Approx. Pkd. Wt. (kg)

SS SERIES FOOD WASTE DISPOSERS

Food waste disposers are a hygienic and environmentally sustainable way to manage pre- and post-consumer scraps in a foodservice establishment. The SS Series disposers are ideal for heavy-duty applications such as restaurants, schools and universities, healthcare facilities and hospitals, and government facilities.

1 YEAR ON-SITE PARTS & LABOR WARRANTY

PRODUCT FEATURES & SPECIFICATIONS

SS-SERIES

- Whether you serve 25 or 2,500 people, there is an InSinkErator disposer that's designed for your operation. From the small-capacity SS-100™ model to our large-capacity SS-1000™ workhorse, InSinkErator disposers deliver superior performance, quiet operation, maximum energy efficiency, and reliable service.

SYSTEM OVERVIEW

- Stainless steel and chrome-plated finish
- Corrosion-resistant, stainless steel grind chamber
- Heavy-duty induction motor with built-in thermal overload protection
- Enclosure provides protection against outside moisture with controlled power air flow to cool motor
- Cast-nickel, chrome-alloy stationary and rotating shredding elements
- Double-tapered Timken roller bearings provide a shock-absorbing cushion
- Triple lip seal protects motor from water damage
- Secondary spring-loaded oil seal provides double protection against water and loss of grease

CLEANING

- Disposers are easy to clean and maintain
- Wipe down exterior surfaces with a wet cloth
- Use warm soapy water on the splashguard

Commercial Disposer Sizing Chart

To determine the proper size disposer, use this recommended sizing chart. Sizing recommendations are given in general terms; actual capacities vary depending on the volume and type of food waste.

Volume Processed / Application	Light Majority Fruits & Vegetables	Medium 50/50 Mixture	Heavy Majority Meats & Seafood
High Buffet/Cafeteria Government	SS-300	SS-300/ SS-500	SS-500	SS-500/ SS-1000	SS-500/ SS-1000
Medium Full Service Restaurant	SS-200	SS-300	SS-300/ SS-500	SS-500	SS-500/ SS-1000
	SS-100	SS-200	SS-300	SS-300/ SS-500	SS-1000
Low Limited Service Restaurant/Café/ Fast Casual	SS-100	SS-100	SS-200	SS-300	SS-300/ SS-500

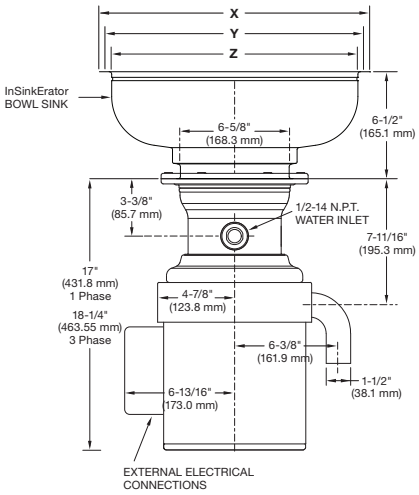
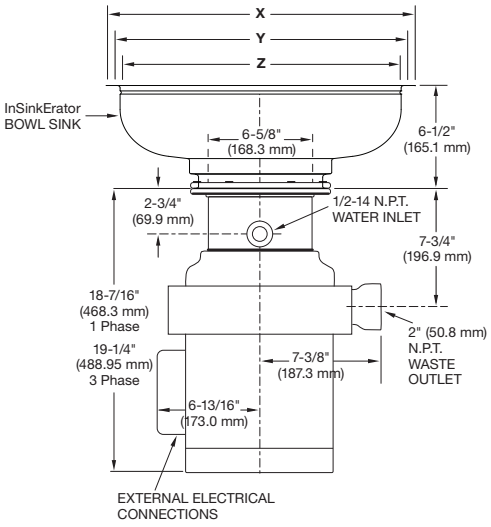
DISPOSER DIMENSIONS

Standard models shown. A short body model is available on medium and large capacity disposers. Short body models reduce overall height by 1" (25.4 mm) on medium capacity disposers and by 3" (76.2 mm) on large capacity disposers.

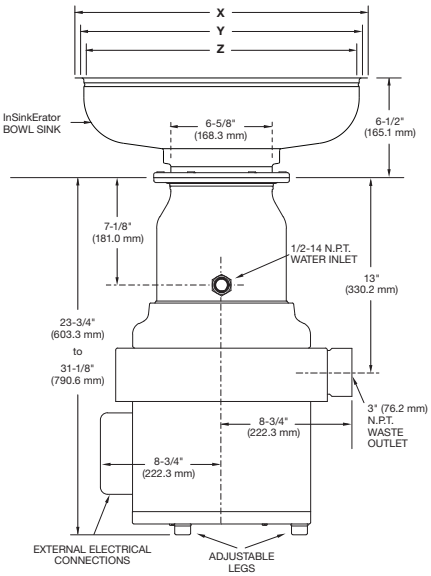
Small Capacity



Medium Capacity



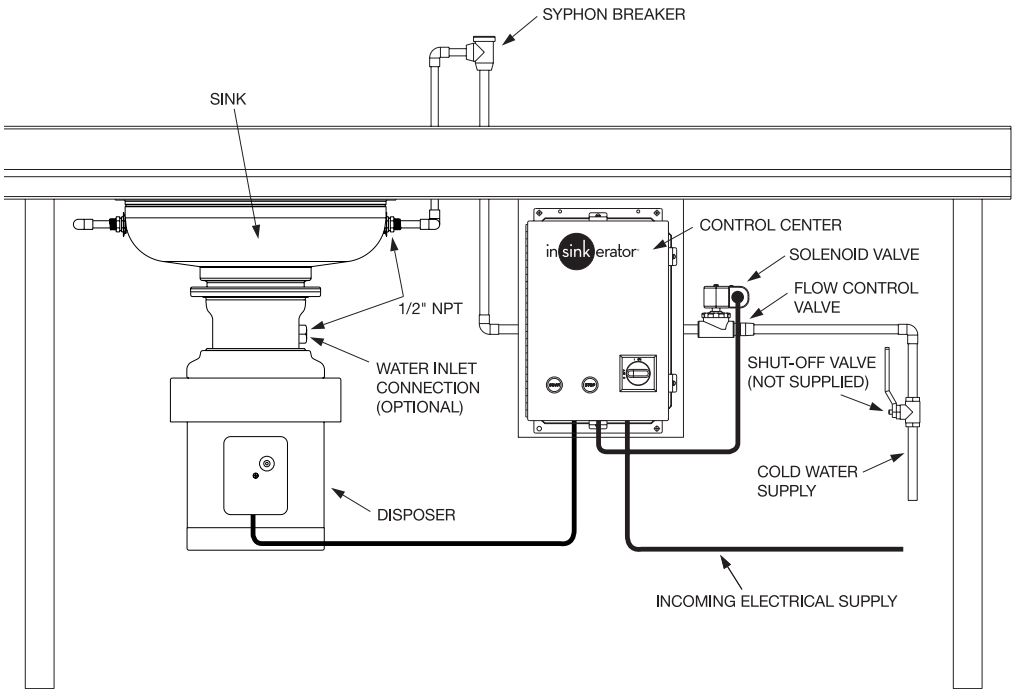
Large Capacity



If mounting directly to a sink, use dimension chart below for adaptor height in place of InSinkErator bowl sink height.
IMPORTANT: #5 adaptors only available on small and medium capacity disposers.

Bowl Mounts	Flange O.D. **X**	Work Table Hole **Y**	Flange I.D. **Z**	**Height**
12" (304.8 mm)	13-1/2" (342.9 mm)	12-1/4" (311.2 mm)	12" (304.8 mm)	6-1/2" (165.1 mm)
15" (381 mm)	16-1/2" (419.1 mm)	15-1/4" (387.4 mm)	15" (381.0 mm)	6-1/2" (165.1 mm)
18" (457.2 mm)	19-1/2" (495.3 mm)	18-1/4" (463.6 mm)	18" (457.2 mm)	6-1/2" (165.1 mm)
Collar Mounts	**X**	**Y**	**Z**	**Height**
#5	Fits Standard Sink Opening: 3-1/2" – 4" (88.9 mm – 101.6 mm)			2-3/4" (69.9 mm)
#6	7-13/16" (198.4 mm)	6-7/8" (174.6 mm)	6-5/8" (168.3 mm)	1-3/16" (30.2 mm)
#7	9-1/8" (231.8 mm)	7-7/8" (200.0 mm)	7-5/8" (193.7 mm)	2-1/16" (52.4 mm)

TYPICAL INSTALLATION - BOWL



REPLACING A COMPETITIVE DISPOSER

- Refer to the Mounting Adaptor Guide or Video for adaptors that fit competitor sink bowls or cones.
- Have sink bowl/cone type with appropriate dimensions available when contacting Customer Service with questions or to place an order.

SAMPLE SPECIFICATION

InSinkErator Food Waste Disposer. Food waste grinding system with _____ HP disposer, _____ control panel. _____ Volts, _____ Hz, _____ Phase operation. _____ disposer mount. Syphon breaker with 1/2" NPT connections; flow control valve; (1) 24V water solenoid.

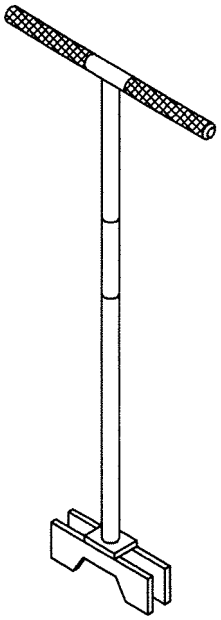
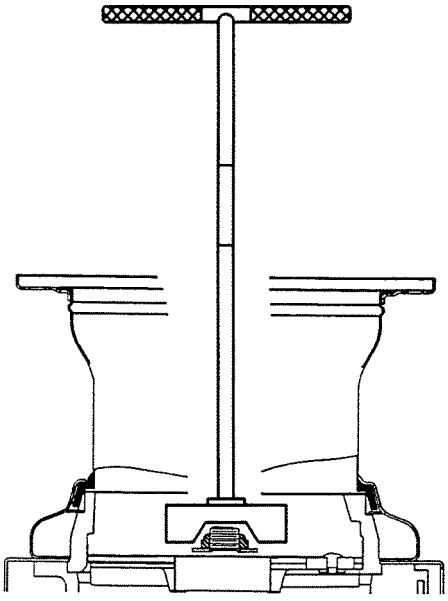
DEJAMMING WRENCH

- Dejamming wrench loosens any lodged object
- Easy to handle
- To order, specify Part #13993



Dejamming Wrench



Dejamming Wrench engaged in unit

Place the wrench over the shredder nut and stationary lugs located on the rotating shredder. Using the handle, rotate the wrench clockwise then counterclockwise to loosen the jam.*

NOTE: After freeing the rotating shredder, remove all loose particles which may have caused the jam.

*Cannot be used with 3½" opening

Electronic Faucet

7-PS-41

Front Loading

7-PS-46

A.D.A. Compliant

FEATURES:

One piece **Deep Drawn** sink bowl design.

"Z" bracket wall mounting plate

Keyhole wall mount bracket.

Stainless steel 1-1/2" IPS basket drain.

C-fold style towel dispenser with hinged towel box.

Specific Unit Features:

7-PS-41:

A.D.A. Compliant

14" x 16" x 5" sink bowl.

K-175 Hands Free AC/DC operated gooseneck faucet.

Deck mount liquid soap dispenser.

Front loading paper towel dispenser.

Stainless Steel Skirt with Removable Access Panel and enclosed bottom for storage.

7-PS-46:

7-PS-41:

14" x 16" x 5" sink bowl.

K-206 6" Extended splash mount gooseneck faucet with wrist handles

Front loading paper towel dispenser.

Deck mount liquid soap dispenser.

Stainless Steel Skirt with Removable Access Panel and enclosed bottom for storage.

7-PS-69:

10" x 14" x 5" sink bowl.

Splash mount liquid Soap Dispenser.

K-69 Heavy Duty Splash Mount Faucet (with Wrist Handles)

Side Support Brackets.

Lever operated drain, built-in overflow with plastic overflow tube and spring clamps.

1 1/2" P-Trap.

7-PS-79:

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser.

7-PS-80:

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser

Includes lever operated drain, built-in overflow with plastic overflow tube and spring clamps.

1 1/2" P-Trap.

7-PS-85

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser.

Chrome plated 1 1/2" P-Trap & apron.

CONSTRUCTION:

All TIG welded.

All sink bowls have a large liberal radii with a minimum dimension of 2" and are rectangular in design for increased capacity.

Welded areas blended to match adjacent surfaces and to a satin finish.

Die formed Countertop Edge with a No-Drip offset.

MATERIAL:

Heavy gauge type 304 series stainless steel.

Wall mounting bracket is Galvanized and of offset design.

All fittings are brass / chrome plated unless otherwise indicated.

MECHANICAL:

Faucet supply is 1/2" IPS male thread hot and cold.

⚠ **WARNING:** Equipment that includes a faucet may expose you to chemicals, including lead, that are known to the State of California to cause cancer or birth defects or other reproductive harm. For more Info., visit www.p65warnings.ca.gov.

16 GAUGE 300 SERIES STAINLESS STEEL

HAND SINK SIDE SPLASHES

WELDED & BOLT-ON

Item #: _____ **Qty #:** _____

Model #: _____

Project #: _____

FEATURES:

Shields surround work area from splashes and prevents cross-contamination.

Available as 7-3/4" and 12" high.

Welded Side Splashes

Available as 7-3/4", 12" & 24" high.

Factory installed only.

Bolt-on Single Panel Side Splash

Available as 7-3/4" and 12" high.

Includes holes only. Hardware not included.

CONSTRUCTION:

Welded Side Splashes (factory installed) are spot welded and polished to a satin finish.

Bolt-on Side Splashes (field installation) require drilling holes in hand sink to match holes in side splash. Mounting hardware is not included.

2-Section Solid Door Model	ARI232LUT-FHS*
3-Section Solid Door Model	ARI332LUT-FHS

The "L-Height" roll-in refrigerator models are all designed to offer convenient interior storage for 66" high racks. Each is supplied standard with such high quality features as easy to operate microprocessor controls, balanced refrigeration systems and stainless steel exteriors. Additionally, they offer the widest range of optional accessories to choose from, and can be specified for use with many different applications, including: Foodservice, Correctional, Institutional, Export, etc.

Standard Product Features

- Traulsen's Smart Control With LED Display
- StayClear™ Condenser
- R-Series: Stainless Steel Exterior & Interior
- A-Series: Stainless Steel Exterior/Anodized Aluminum Interior
- Balanced, Self-Contained Refrigeration System Using R-450A
- Rear Biased Return Air Duct
- Full Length Stainless Steel Doors With Locks
- Self-Closing Doors With Stay Open Feature At 120°F
- Guaranteed For Life Cam-Lift Hinges
- Guaranteed For Life Horizontal Work Flow Door Handle(s)
- Standard Door Hinging: 132L = Right, 232L = Left/Right, 332L = Left/Right/Right (other hingings available)
- Automatically Activated LED Lights
- Stainless Steel Breaker Caps
- Accommodates Roll-In Racks Up To 66" High (provided by others)
- Automatic Non-Electric Condensate Evaporator
- Magnetic Snap-In EZ-Clean Door Gasket(s)
- Gasket-Protecting Metal Door Liner
- Thermostatic Expansion Valve Metering Device
- Stainless Steel One-Piece Louver Assembly
- Stainless Steel Interior Rack Guides & Threshold Ramp(s)
- 9' Cord & Plug Attached
- Three Year Parts And Labor Warranty
- Five Year Compressor Warranty

Options & Accessories

- Stainless Steel Finished Back With Rear Louvers
- Re-Hinging Feature For Door(s)
- Wire Shelf Package For Roll-In Models (includes three wire shelves per section)
- Additional Wire Shelves For Above
- Stainless Steel Shelf Package For Roll-In Models (includes three stainless steel shelves per section)
- Additional Stainless Steel Shelves For Above
- Locking Hasps (padlocks supplied by others)
- Export 220/50/1 Voltage
- Kool Klad Exterior Laminate Decor
- Clear Glass Door(s) In Place Of One Or More Solid Door(s)
- Remote Applications (see form TR35837 for more details)[2]
- Remote For Use With 20°F Glycol System
- Recessed Installation
- Prison/Correctional Facilities Options

Specifications

Construction, Hardware and Insulation

Cabinet exterior front, one piece sides, louver assembly and doors are constructed of 20 gauge stainless steel with #4 finish. Cabinet interior and door liners are constructed of stainless steel (anodized aluminum in the A-Series). The exterior cabinet top, back and bottom are constructed of heavy gauge galvanized steel. The interior floor is constructed of stainless steel and insulated with ¾" of resilient cork. A readily attachable stainless steel ramp is provided to facilitate loading/unloading.

Doors are equipped with a heavy-duty, extruded wiper gasket for sealing to bottom ramp, removable plug cylinder locks and guaranteed for life cam-lift, gravity action, self-closing metal, glide hinges with stay open feature at 120°F. Hinges include a concealed switch to automatically activate the interior LED lighting. Guaranteed for life, work flow door handles are mounted horizontally over recess in door which limits protrusion from door face into aisleways. Doors have seamless, polished metal corners.

Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life.Both the cabinet and door(s) are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

NOTES

NOTE: Figures in parentheses reflect metric equivalents.
1= Based on a 90°F ambient and 20°F evaporator.
2= For approximate remote weights deduct 40 lbs. from respective net or gross weight. For other information on remote models, please refer to form TR35837.
3= 12" Top clearance preferred for optimum performance and service access.

Refrigeration System

A top mounted, self-contained, balanced refrigeration system using environmentally friendly, non-flammable R-450A refrigerant is conveniently located behind the one piece louver assembly. It features a finless StayClear™ condenser, thermostatic expansion valve, air-cooled hermetic compressor, large, high humidity evaporator coil located outside the food zone and a top mounted non-electric condensate evaporator. Biased return air duct protects against introduction of warm kitchen air, promoting even temperature maintenance and efficient operation. A 9' cord and plug is provided. Standard operating temperature is 34 to 38°F.

Controller

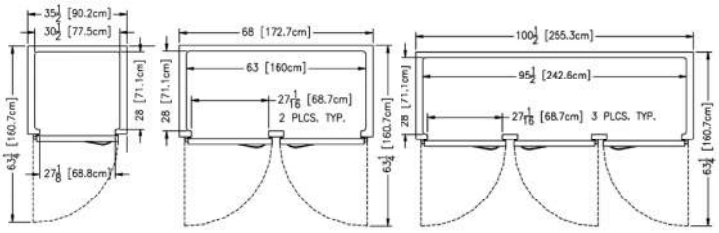
Traulsen's Smart Control features advanced control algorithms and sophisticated diagnostic capabilities. Smart sensors will adapt the operation of the refrigeration system to a variety of environments and usage patterns. The Smart Control offers a complete set of visual alarms designed to alert the user to critical events. In the event of an alarm, a dedicated Alarm LED will illuminate, informing the user of the critical event and describing the event in the large, easy to read full text display.

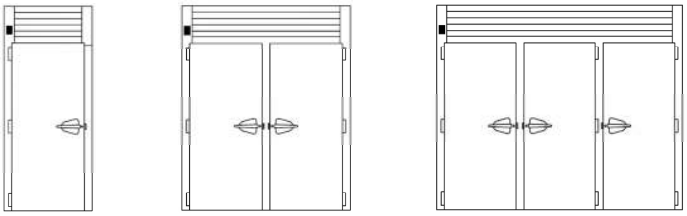
Interior

Readily removable, interior-mounted, stainless steel guides for rack are provided for protection. Maximum rack size with wheels inboard of frame is 27" wide by 29" deep by 66" high. Racks supplied by others.

Warranties

Both a three year parts and labor warranty and a five year compressor warranty (self-contained models only) are provided standard.

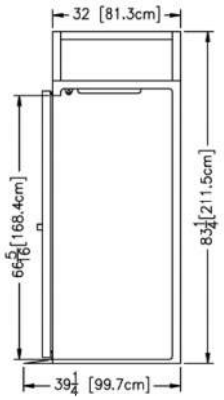




1 & 2 Section Models Equipped With One NEMA 5-15P Plug

3 Section Models Equipped With One NEMA 5-20P Plug

NOTE: Full load amps and plug style may vary depending on electrical options chosen and condensing unit employed.



Section - All Models

NOTE: When ordering please specify: Voltage, Hinging, Door Size, Options and any additional warranties.

Continued product development may necessitate specification changes without notice.

"OTR SERIES"

ALUMINUM

OTR-FUA-05-11
Universal Rack

OTR-OT-06-10
Wide 6-3/8" tray ledge supports oval trays

OTR-UA-13
Universal Adjustable Rack

Economical and functional aluminum racks for transport, bussing and storage.

CHOICE OF THE PROFESSIONALS Since 1953 ™

These sturdy aluminum racks provide an economical solution for your transport and storage needs. Fabricated from high tensile extruded aluminum, the "OTR Rack Series" hold up to the demands in hotels, motels, restaurants, hospitals, bakeries . . . *and rugged enough for even correctional facilities.*

They're heavy-duty, yet light weight and easy to maneuver, even when fully loaded with roasting pans, steam table pans, sheet trays, or oval tray sheet pans.

The extruded aluminum runners are double welded for extra strength.

These racks are easy to clean and can be completely sanitized, washed, or steam cleaned while remaining rust resistant.

FWE...the "Choice of the Professionals."

- ◊ **Heavy-duty aluminum**
- ◊ **All welded construction - no rivets**
- ◊ **Welded tubular construction**
- ◊ **5" polyurethane casters**
- ◊ **Tray guides vary in style and type by model (details on other side)**
- ◊ **Two year limited warranty**

INSULATED HOT CABINET MODEL H-137-UA-12D

FEATURES AND BENEFITS:

- Fully insulated hot cabinet keeps prepared foods at serving temperatures.
- Powerful, yet efficient, 1500 Watt heating system maintains the right temperature to properly hold products. Heats up to 200˚F. (93˚C.).
- Standard solid state electronic control with large, clear, easy-to-read and operate LED digital display to ensure holding at precise food temperature
- Internal frame in body and doors maintains structural rigidity.
- Body constructed of non-corrosive, Hi-Tensile aluminum for strength and ease of mobility. One piece extended base protects cabinet body.
- Smooth interior coved corners prevent food particle/grease buildup.
- Self-closing insulated Dutch doors prevent temperature loss; magnetic door gaskets for proper seal. Field reversible for flexibility.
- Standard with right hand hinging; left hand hinging available upon request.
- Full length anti-microbial extruded door handles for “easy open”; positive catch secures door during transport.
- Recessed push/pull handles on both sides prevents damage to walls; allows easy maneuvering.
- Twelve sets of chrome plated wire universal angles accommodate a large variety of pan sizes on adjustable 1-1/2" centers.
- Heavy duty 5" swivel casters, two with brakes. Provides mobility when fully loaded.

H-137-UA-12D

Standard solid state electronic control with large, clear, easy-to-read and operate LED digital display to ensure holding at precise food temperature

ACCESSORIES and OPTIONS
(Available at extra cost):

- ❑ Tempered Glass Door Windows
- ❑ Extra Universal Angles
- ❑ Change from standard chrome plated wire angles to angles designed for transporting
- ❑ Magnetic Door Latch
- ❑ Corner Bumpers
- ❑ Perimeter Bumper
- ❑ Key Lock Handle
- ❑ Push Handle
- ❑ Bail Handles
- ❑ Floor Lock (for use with 5" casters)
- ❑ Various Caster Options
- ❑ Removable Cord Set
- ❑ 208 or 240 Volt Service
- ❑ Upgrade to 2000 Watt power unit
- ❑ HAACP Documentation (Built-in USB port)

See page B-20 for accessory details

DYNAFLOW HOOD

FN-B-MB

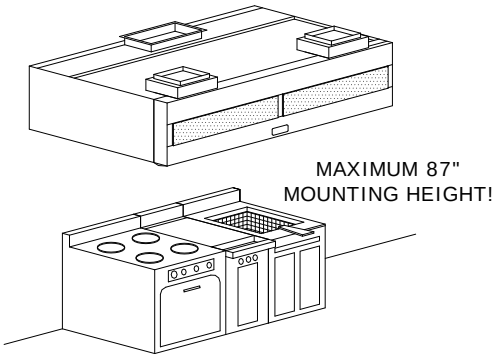
Box Canopy Filter/Cartridge Type

Dynaflow
UL/ULC listed for 87" mounting height

General Description
The hood is NFPA-96 Type 1 listed for use with all temperature ranges on single row, wall mounted cooking equipment lineups. The unit is ceiling hung with a maximum mounting height of 87" (2209 mm) from the lower edge of the canopy to the floor. The box canopy can be tapered to 11" (279 mm) at the front. The hood is finished with a number 4 finish on exposed sides. The *Dynaflow* hood is available with fluorescent, incandescent, or recessed incandescent lights wired to a J-box.

Efficiency
The *Dynaflow* hood is equipped with UL/ULC listed baffle grease filters or cartridges. Five extraction methods are available with *Dynaflow.*
VE – Value Engineered – standard grease extraction efficiency Stainless steel baffles.
CA – Medium grease extraction efficiency cartridges with adjustable flow baffles.
HE – High grease extraction Efficiency Cascade baffles for Enviro applications and reducing grease discharge from buildings.
EC – Easy Clean Teflon, Lower grease extraction efficiency baffles for hot, heavy grease laden appliances.
Spark Arrestor – standard grease extraction efficiency, for solid fuel appliances.

Exhaust and Supply
The *Dynaflow* design provides the lowest minimum exhaust. The *Dynaflow* hood exhaust volume is based on the appliances below the hood. It's a simple adjustment to fine-tune your ventilator to provide excellent smoke capture with maximum grease extraction.
Heated and/or cooled fresh air ducting is connected to the supply duct collar(s) on the top, front of the hood. The fresh air enters the fire damper in each supply duct connection and

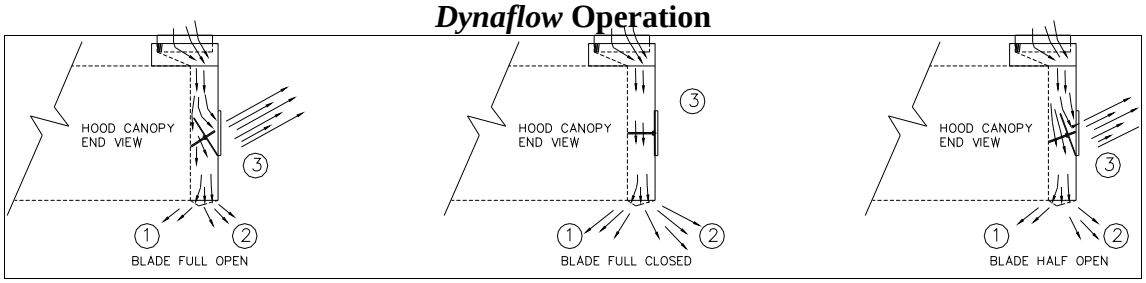


then discharges into the *Dynaflow* plenum. Within the plenum the fresh air is routed to three (3) regions within the boundaries of the appliances.

Three Appliance Boundary Regions

1. **Appliance Region**: Fresh air discharges down through a full length S/S perforated panel toward the kitchen appliances to reduce each appliance net exhaust required.
2. **Chef Region**: Fresh air discharges down through a full length S/S perforated panel towards the chef for a more comfortable work environment in front of the hood.
3. **Kitchen Ambient Region**: The horizontal fresh air discharges through a s/s perforated panel out the front of the hood into the kitchen to provide the exact amount of air to balance the kitchen and ensure optimum capture.

Dynaflow Operation



The internal blade (IB) is adjusted to direct fresh air between the Kitchen Ambient (3) Region, the Appliance (1) Region, and Chef(2) Region. The Comfort Tuning Blade (CTB) is adjusted to direct fresh air between the Appliance (1) Region and the Chef(2) Region. The complete kitchen ventilation system is always balanced. The IB and CTB are adjustable every 24" (610mm) along the length of the Dynaflow hood to match the appliances underneath. Dynaflow operates with the lowest minimum exhaust. After your kitchen is complete, appliances can be Relocated, Added, or Removed from under the hood while maintaining maximum capture and chef comfort within the commercial kitchen.

19. AIR SPACE 3" BEHIND HOOD (OPTIONAL)

Spring Air Systems Model No. FN-B-MB Hood Specification

The *Dynaflow* hood, shall be a Spring Air Systems model no. FN-B-MB, box canopy, baffle extractor hood, with exhaust fire damper, "MB" Dynaflow air plenum, UL/ULC listed, NSF certified and built in accordance with the NFPA-96.

The baffle extractors shall be one of the following:

1. VE –Stainless steel baffles.
2. CA – Cartridges with adjustable flow baffles.
3. HE – High Efficiency Cascade
4. EC – Easy Clean Teflon baffles
5. SA – Spark Arrestor for sold fuel appliances.

The unit casing shall be a minimum 18 GA. stainless steel, with No. 4 finish on all exposed surfaces. The hood shall include UL/ULC listed grease filters mounted in an integral stainless steel rack inclined at 45 degrees. The filter rack shall include a full length stainless steel grease gutter and grease cup.

The Dynaflow plenum provides all the fresh air required for the commercial kitchen. The fresh air is routed to three (3) regions within the boundaries of the appliances. Each region includes an aerodynamically designed s/s perforated discharge panel.

The first (1) region discharges through a full length s/s panel located at the bottom of the Dynaflow plenum. Fresh air is directed through the Comfort Tuning Blade (CTB) towards the appliances providing maximum exhaust air reduction. The second (2) Region discharges through a full length s/s angular panel located at the bottom front of the Dynaflow plenum. The fresh air is directed towards the chef to provide a more comfortable work environment in front of the hood.

The third (3) region provides horizontal discharge of fresh air through a s/s perforated panel out the front of the hood into the kitchen. The third region provides the exact amount of fresh air to balance the kitchen and ensure optimum capture.

The s/s front discharge shall include multiple s/s perforated panels every 24" (610mm) long across the front face of the hood. A manually operated Internal Blade (IB) damper shall be located behind each front s/s discharge panel. The CTB and IB dampers are field adjustable through the lower s/s discharge panel. The hood shall have _____ incandescent/fluorescent/recessed incandescent lights evenly spaced along the length of the hood.

DATA SHEET

R-102 Restaurant Fire Suppression Systems

Features

- Low pH Agent
- Proven Design
- Reliable Gas Cartridge Operation
- Aesthetically Appealing
- UL Listed – Meets Requirements of UL 300
- ULC Listed – Meets Requirements of ULC/ORD-C1254.6
- CE Marked

Application

The ANSUL® R-102 Restaurant Fire Suppression System is an automatic, pre-engineered, fire suppression system designed to protect areas associated with ventilating equipment including hoods, ducts, plenums, and filters. The system also protects auxiliary grease extraction equipment and cooking equipment such as fryers; griddles and range tops; upright, natural charcoal, or chain-type broilers; electric, lava rock, mesquite, or gas-radiant char-broilers; and woks.

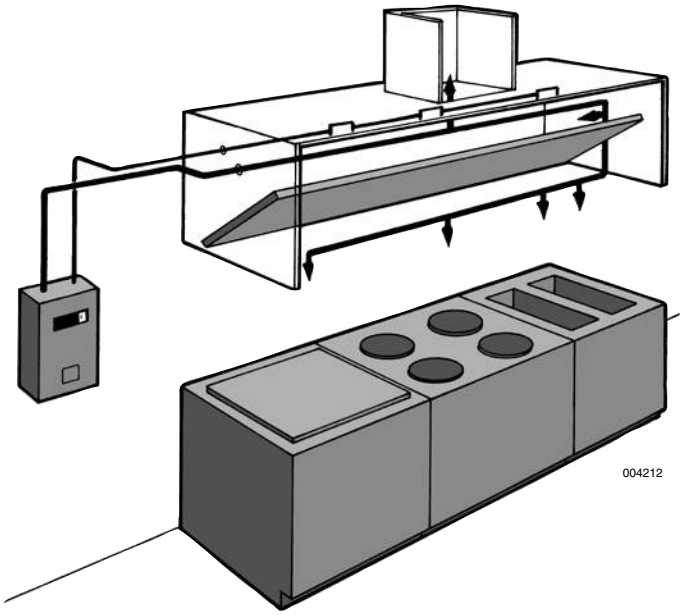
The system is ideally suitable for use in restaurants, hospitals, nursing homes, hotels, schools, airports, and other similar facilities.

Use of the R-102 system is limited to indoor applications or locations that provide weatherproof protection within tested temperature limitations. The regulated release and tank assemblies must be mounted in an area where the air temperature will not fall below 32 °F (0 °C) or exceed 130 °F (54 °C). The system must be designed and installed within the guidelines of the UL/ULC Listed Design, Installation, Recharge, and Maintenance Manual.

System Description

The restaurant fire suppression system is a pre-engineered, wet chemical, cartridge-operated, regulated pressure type with a fixed nozzle agent distribution network. It is listed with Underwriters Laboratories, Inc. (UL/ULC).

004215



004212

The system is capable of automatic detection and actuation as well as remote manual actuation. Additional equipment is available for building fire alarm panel connections, electrical shutdown and/or interface, and mechanical or electrical gas line shut-off applications.

The detection portion of the fire suppression system allows for automatic detection by means of specific temperature-rated alloy type fusible links, which separate when the temperature exceeds the rating of the link, allowing the regulated release to actuate.

A system owner's guide is available containing basic information pertaining to system operation and maintenance. A detailed technical manual, including system description, design, installation, recharge and resetting instructions, and maintenance procedures, is available to qualified individuals.

The system is installed and serviced by authorized distributors that are trained by the manufacturer.

The basic system consists of an AUTOMAN regulated release assembly which includes a regulated release mechanism and a wet chemical storage tank housed within a single enclosure. Nozzles with blow-off caps, detectors, cartridges, agent, fusible links, and pulley elbows are supplied in separate packages in the quantities needed for fire suppression system arrangements.

Additional equipment includes a remote manual pull station(s), mechanical and electrical gas valves, and electrical switches for automatic equipment and gas line shut-off. Accessories can be added such as alarms, warning lights, etc., to installations where required.

Additional tanks and corresponding equipment can be used in multiple arrangements to allow for larger hazard coverage. Each tank is limited to a listed maximum amount of flow numbers.

Copyright © 2013 Tyco Fire Products LP. / All rights reserved. / Form No. F-2004004-08

Component Description

Wet Chemical Agent – The extinguishing agent is a mixture of organic salts designed for rapid flame knockdown and foam securement of grease related fires. It is available in plastic containers with instructions for wet chemical handling and usage.

Agent Tank – The agent tank is installed in a stainless steel enclosure or wall bracket. The tank is constructed of stainless steel.

Tanks are available in two sizes: 1.5 gallon (5.7 L) and 3.0 gallon (11.4 L). The tanks have a working pressure of 110 psi (7.6 bar), a test pressure of 330 psi (22.8 bar), and a minimum burst pressure of 660 psi (45.5 bar).

The tank includes an adaptor/tube assembly. The adaptor assembly includes a chrome-plated steel adaptor with a 1/4 in. NPT female gas inlet, a 3/8 in. NPT female agent outlet, and a stainless steel agent pick-up tube. The adaptor also contains a bursting disc seal which helps to prevent the siphoning of agent up the pipe during extreme temperature variations.

Regulated Release Mechanism – The regulated release mechanism is a spring-loaded, mechanical/pneumatic type capable of providing the expellant gas supply to one, two, or three agent tanks depending on the capacity of the gas cartridge used. It contains a factory installed regulator deadset at 110 psi (7.6 bar) with an external relief of approximately 180 psi (12.4 bar). It has automatic actuation capabilities by a fusible link detection system and remote manual actuation by a mechanical pull station.

The regulated release mechanism contains a release assembly, regulator, expellant gas hose, and agent storage tank housed in a stainless steel enclosure with cover. The enclosure contains knock-outs for 1/2 in. conduit. The cover contains an opening for a visual status indicator.

It is compatible with mechanical gas shut-off devices; or, when equipped with a field or factory-installed switch and manual reset relay, it is compatible with electric gas line or appliance shut-off devices.

Regulated Actuator Assembly – When more than two agent tanks (or three 3.0 gallon (11.4 L) tanks in certain applications) are required, the regulated actuator is available to provide expellant gas for additional tanks. It is connected to the cartridge receiver outlet of the regulated release mechanism providing simultaneous agent discharge. It contains a regulated actuator deadset at 110 psi (7.6 bar) with an external relief of approximately 180 psi (12.4 bar). It has automatic actuation capabilities using pressure from the regulated release mechanism cartridge.

The regulated actuator assembly contains an actuator, regulator, expellant gas hose, and agent tank housed in a stainless steel enclosure with cover. The enclosure contains knockouts to permit installation of the expellant gas line.

Discharge Nozzles – Each discharge nozzle is tested and listed with the R-102 system for a specific application. Nozzle tips are stamped with the flow number designation (1/2, 1, 2, or 3). Each nozzle must have a metal or rubber blow-off cap to keep the nozzle tip orifice free of cooking grease build-up.

Agent Distribution Hose – Kitchen appliances manufactured with or resting on casters (wheels/rollers) may include an agent distribution hose as a component of the suppression system. This allows the appliance to be moved for cleaning purposes without disconnecting the appliance fire suppression protection. The hose assembly includes a restraining cable kit to limit the appliance movement within the range (length) of the flexible hose.

Flexible Conduit – Flexible conduit allows for quicker installations and the convenience of being able to route the cable over, under and around obstacles. Flexible conduit can be used as a substitute for standard EMT conduit or can be used with EMT conduit.

Flexible conduit can be used only with the Molded Remote Manual Pull Station.

Pull Station Assembly – The remote manual pull station is made out of a molded red composite material. The red color makes the pull station more readily identifiable as the manual means for fire suppression system operation.

The pull station is compatible with the ANSUL Flexible Conduit.

Approvals

- UL/ULC Listed
- CE Marked
- New York City Department of Buildings
- LPCB
- TFRI
- Marine Equipment Directive (MED)
- DNV
- ABS
- Lloyd's Register
- Meets requirements of NFPA 96 (Standard for the Installation of Equipment for the Removal of Smoke and Grease-Laden Vapors from Commercial Cooking Equipment)
- Meets requirements of NFPA 17A (Standard on Wet Chemical Extinguishing Systems)

Ordering Information

Order all system components through your local authorized ANSUL Distributor.

Specifications

An ANSUL R-102 Fire Suppression System shall be furnished. The system shall be capable of protecting all hazard areas associated with cooking equipment.

1.0 GENERAL

1.1 References

1.1.1 Underwriters Laboratories, Inc. (UL)
1.1.1.1 UL Standard 1254
1.1.1.2 UL Standard 300

1.1.2 Underwriters Laboratories of Canada (ULC)
1.1.2.1 ULC/ORD-C 1254.6

1.1.3 National Fire Protection Association (NFPA)
1.1.3.1 NFPA 96
1.1.3.2 NFPA 17A

1.2 Submittals

1.2.1 Submit two sets of manufacturer's data sheets

1.2.2 Submit two sets of piping design drawings

1.3 System Description

1.3.1 The system shall be an automatic fire suppression system using a wet chemical agent for cooking grease related fires.

1.3.2 The system shall be capable of suppressing fires in the areas associated with ventilating equipment including hoods, ducts, plenums, and filters as well as auxiliary grease extraction equipment. The system shall also be capable of suppressing fires in areas associated with cooking equipment, such as fryers; griddles and range tops; upright, natural charcoal, or chain-type broilers; electric, lava rock, mesquite or gas-radiant char-broilers; and woks.

1.3.3 The system shall be the pre-engineered type having minimum and maximum guidelines established by the manufacturer and listed by Underwriters Laboratories (UL/ULC).

1.3.4 The system shall be installed and serviced by personnel trained by the manufacturer.

1.3.5 The system shall be capable of protecting cooking appliances by utilizing either dedicated appliance protection and/or overlapping appliance protection.

1.4 Quality Control

1.4.1 Manufacturer: The R-102 Restaurant Fire Suppression System shall be manufactured by a company with at least forty years experience in the design and manufacture of pre-engineered fire suppression systems. The manufacturer shall be ISO 9001 registered.

1.4.2 Certificates: The wet agent shall be a specially formulated, aqueous solution of organic salts with a pH range between 7.7 – 8.7, designed for flame knockdown and foam securement of grease-related fires.

1.5 Warranty, Disclaimer, and Limitations

1.5.1 The pre-engineered restaurant fire suppression system components shall be warranted for five years from date of delivery against defects in workmanship and material.

1.6 Delivery

1.6.1 Packaging: All system components shall be securely packaged to provide protection during shipment.

1.7 Environmental Conditions

1.7.1 The R-102 system shall be capable of operating within a temperature range of 32 °F to 130 °F (0 °C to 54 °C).

2.0 PRODUCT

2.1 Manufacturer

2.1.1 Tyco Fire Protection Products, One Stanton Street, Marinette, Wisconsin 54143-2542, Telephone (715) 735-7411.

2.2 Components

2.2.1 The basic system shall consist of an AUTOMAN regulated release assembly which includes a regulated release mechanism and a wet chemical storage tank housed within a single enclosure. Nozzles, blow-off caps, detectors, cartridges, agent, fusible links, and pulley elbows shall be supplied in separate packages in the quantities needed for fire suppression system arrangements. Additional equipment shall include remote manual pull station, mechanical and electrical gas valves, and electrical switches for automatic equipment and gas line shut-off, and building fire alarm control panel interface.

2.2.2 Wet Chemical Agent: The extinguishing agent shall be a specially formulated, aqueous solution of organic salts with a pH range between 7.7 – 8.7, designed for flame knockdown and foam securement of grease related fires.

2.2.3 Agent Tank: The agent tank shall be installed in a stainless steel enclosure or wall bracket. The tank shall be constructed of stainless steel. Tanks shall be available in two sizes; 1.5 gallon (5.7 L) and 3.0 gal (11.4 L).The tank shall have a working pressure of 110 psi (7.6 bar), a test pressure of 330 psi (22.8 bar), and a minimum burst pressure of 660 psi (45.5 bar). The tank shall include an adaptor/tube assembly containing a burst disc union.

2.2.4 Regulated Release Mechanism: The regulated release mechanism shall be a spring-loaded, mechanical/pneumatic type capable of providing the expellant gas supply to one or two agent tanks depending on the capacity of the gas cartridge used or three 3.0 gallon (11.4 L) agent storage tanks in certain applications. It shall contain a factory installed regulator deadset at 110 psi (7.6 bar) with an external relief of approximately 180 psi (12.4 bar).

It shall have the following actuation capabilities: automatic actuation by a fusible link detection system and remote manual actuation by a mechanical pull station.

The regulated release mechanism shall contain a release assembly, regulator, expellant gas hose, and agent storage tank housed in a stainless steel enclosure with cover. The enclosure shall contain knock-outs for 1/2 in. conduit. The cover shall contain an opening for a visual status indicator.

It shall be compatible with mechanical gas shut-off devices; or, when equipped with a field or factory-installed switch(es), it shall be compatible with electric gas line or appliance shut-off devices, or connections to a building fire alarm control panel.

Specifications (Continued)

2.2.5 Regulated Actuator Assembly: When more than two agent tanks or three agent tanks in certain applications are required, the regulated actuator shall be available to provide expellant gas for additional tanks. It shall be connected to the cartridge receiver outlet of the regulated release mechanism providing simultaneous agent discharge. The regulator shall be deadset at 110 psi (7.6 bar) with an external relief of approximately 180 psi (12.4 bar).The regulated actuator assembly shall contain an actuator, regulator, expellant gas hose, and agent tank housed in a stainless steel enclosure with cover. The enclosure shall contain knockouts to permit installation of the expellant gas line.

2.2.6 Discharge Nozzles: Each discharge nozzle shall be tested and listed with the R-102 system for a specific application. Nozzles tips shall be stamped with the flow number designation (1/2, 1, 2, or 3). Each nozzle shall have a metal or rubber blow-off cap to keep the nozzle tip orifice free of cooking grease build-up.

2.2.7 Distribution Piping: Distribution piping shall be Schedule 40 black iron, chrome-plated, or stainless steel conforming to ASTM A120, A53, or A106.

2.2.8 Detectors: The detectors shall be the fusible link style designed to separate at a specific temperature.

2.2.9 Cartridges: The cartridge shall be a sealed steel pressure vessel containing either carbon dioxide or nitrogen gas. The cartridge seal shall be designed to be punctured by the releasing device supplying the required pressure to expel wet chemical agent from the storage tank.

2.2.10 Agent Distribution Hose: An optional agent distribution hose shall be available for kitchen appliances manufactured with or resting on casters (wheels/rollers). This shall allow the appliance to be moved for cleaning purposes without disconnecting the appliance fire suppression protection. Hose assembly shall include a restraining cable kit to limit the appliance movement within the range (length) of the flexible hose.

2.2.11 Flexible Conduit: The manufacturer supplying the Restaurant Fire Suppression System shall offer flexible conduit as an option to rigid EMT conduit for the installation of pull stations and/or mechanical gas valves. The flexible conduit shall be UL Listed and include all approved components for proper installation.

2.2.12 Pull Station Assembly: The Fire Suppression System shall include a remote pull station for manual system actuation. The pull station shall be designed to include a built-in guard to protect the pull handle. The pull station shall also be designed with a pull handle to allow for three finger operation and shall be red in color for quick visibility.

3.0 IMPLEMENTATION

3.1 Installation

3.1.1 The R-102 fire suppression system shall be designed, installed, inspected, maintained, and recharged in accordance with the manufacturer's listed instruction manual.

3.2 Training

3.2.1 Training shall be conducted by representatives of the manufacturer.

ANSUL, R-102, and the product names listed in this material are marks and/or registered marks. Unauthorized use is strictly prohibited.

BLODGETT

DFG-100

Full-Size, Standard Depth Dual Flow Gas Convection Oven

Project _____

Item No. _____

Quantity _____

DFG-100

Standard depth baking compartment - accepts five 18" x 26" standard full-size baking pans in left-to-right positions.

All data is shown per oven section, unless otherwise indicated.

Refer to operator manual specification chart for listed model names.

EXTERIOR CONSTRUCTION

- Stainless steel front, top, and sides
- Dual pane thermal glass windows encased in stainless steel door frames
- Powder coated door handle with simultaneous door operation
- Triple-mounted pressure lock door design with turnbuckle assembly
- Modular slide out front control panel for easy cleaning
- Solid mineral fiber insulation at top, back, sides and bottom

INTERIOR CONSTRUCTION

- Full angle-iron frame
- Double-sided porcelainized baking compartment liner (14 gauge)
- Aluminized steel combustion chamber
- Dual inlet blower wheel
- Five chrome-plated racks, eleven rack positions with a minimum of 1-5/8" (41mm) spacing

OPERATION

- Dual Flow Gas system combines direct and indirect heat
- Electronic spark ignition control system
- Removable dual tube burners
- Pressure regulator
- Manual gas service cut-off switch located on the front of the control panel
- Air mixers with adjustable air shutters
- Solid state thermostat with temperature control range of 200°F (93°C) to 500°F (260°C)
- Two speed fan motor
- 1/2 horsepower blower motor with automatic thermal overload protection
- Control area cooling fan
- Interior oven lights

STANDARD FEATURES

- SSD - Solid state digital control with LED display, Cook & Hold and Pulse Plus®
- 25" (635mm) adjustable stainless steel legs (for single units)
- 6" (152mm) adjustable stainless steel legs (for double sections)
- Draft diverter or draft hood for venting (select one)
- Three year parts and two year labor warranty
- Five year limited oven door warranty*
- * For all international markets, contact your

** For all international markets, contact your local distributor.*

NOTE: The company reserves the right to make substitutions of components without prior notice

OPTIONS AND ACCESSORIES

(AT ADDITIONAL CHARGE)

- **Legs, casters & stands**
  - ❑ 6" (152mm) seismic legs
  - ❑ 6" (152mm) casters
  - ❑ 4" (102mm) low profile casters (double only)
  - ❑ 25" (635mm) stainless steel stand w/rack guides
  - ❑ 29" (737mm) stainless steel, fully welded open stand with pan supports
- **Gas hose w/quick disconnect restraining device**
  - ❑ 48" (1219mm) hose
  - ❑ 36" (914mm) hose
- ❑ SSI-M - Solid state infinite control w/manual timer
- ❑ Stainless steel oven liner
- ❑ Extra oven racks
- ❑ Stainless steel solid back panel
- ❑ Gas manifold (for double sections)
- ❑ Prison package (includes security control panel and stainless steel back)
- ❑ Flue connector

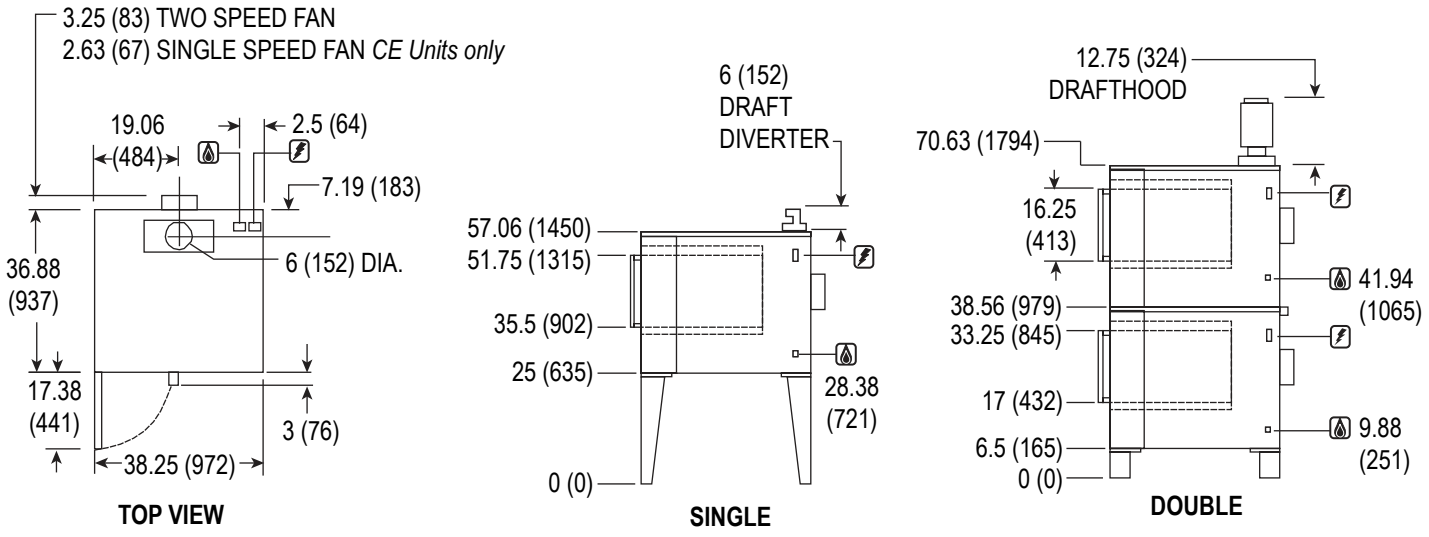
APPROVAL/STAMP



DIMENSIONS ARE IN INCHES (MM)

SHORT FORM SPECIFICATIONS Provide Blodgett full-size convection oven model DFG-100, (single/double) compartment. Each compartment shall have (porcelainized/stainless) steel liner and shall accept five I8" x 26" standard full-size bake pans. Stainless steel front, top and sides. Doors shall be (solid stainless steel/have dual pane thermal glass windows) with single powder coated handle and simultaneous operation. Unit shall be gas heated with electronic spark ignition and shall cook by means of a dual-flow system combining direct and indirect heat with a gas shutoff switch on the front of the control panel. Air in baking chamber distributed by dual inlet blower wheel powered by a two-speed, 1/2 HP motor with thermal overload protection. Each chamber shall be fitted with two commerical oven lamps, and five chrome-plated removable racks. Control panel shall be recessed with solid state digital control with LED display, Cook & Hold and Pulse Plus. Provide three years parts, two year labor and five year door warranty. Provide options and accessories as indicated.

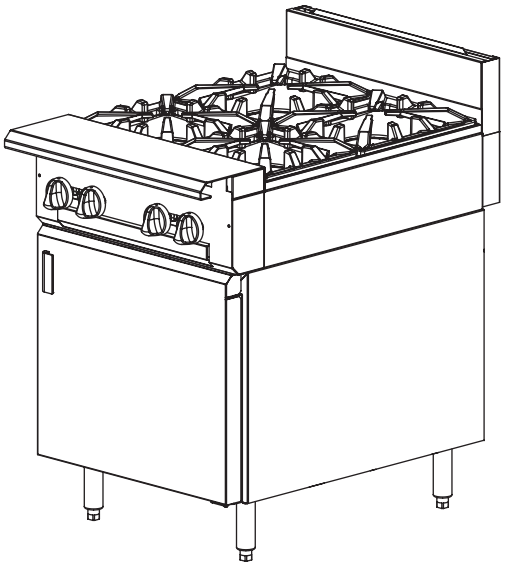
HEAVY DUTY GAS RANGE
4-BURNERS / 24" WIDE GAS RANGE



Model V2B24B
(shown on cabinet base)

- ☐ **V4B24** 4-Burners / Modular
- ☐ **V4B24B** 4-Burners / Cabinet Base
- ☐ **V4BU24** 4-Burners Set-Up / Modular
- ☐ **V4BU24B** 4-Burners Set-Up / Cabinet Base

STANDARD FEATURES

- Stainless steel front, front top ledge, burner box, sides, base, and stub back
- 1¼" diameter front gas manifold with 1¼" rear gas connection (capped)
- 35,000 BTU/hr. open top burners with lift off heads
- Individual pilots and controls for each burner
- Heavy-duty cast grates
- 4" stainless steel stub riser
- 6" adjustable stainless steel legs for cabinet base units (no legs for modular model)
- Stainless steel cabinet base door
- Universal rack guides, with one removable shelf (cabinet base)
- One year limited parts and labor warranty

SPECIFICATIONS

24" wide heavy duty gas range, Vulcan Model No. V4B24 (modular) and V4B24B (cabinet base) or V4BU24 (modular) and V4BU24B (cabinet base). Stainless steel front, plate ledge, front top ledge with pull-out condiment rails, sides, base, stub back and 6" adjustable legs. 1¼" diameter front gas manifold and 1¼" rear gas connection, capped. Heavy cast aeration bowls with removable cast top grates. Front grate: 11½" x 11½", rear grate: 11½" x 14". Four 35,000 BTU/hr. heavy cast, two-piece open burners with individual pilots and controls for each burner. Total input 140,000 BTU/hr.

Exterior Dimensions:

36¾"d x 24"w x 36"h on 6" adjustable legs

OPTIONAL FEATURES (Factory Installed)

- ☐ Cap and cover front manifold
- ☐ 4" adjustable flanged feet for modular models
- ☐ Less legs for dolly mounting of cabinet base models
- ☐ 3" high toe base for curb mounting

ACCESSORIES (Packaged & Sold Separately)

- ☐ ¾", 1", or 1¼" gas pressure regulator (specify gas type – pack loose)
- ☐ Set of 4 casters, 6" high (two locking)
- ☐ 6" adjustable flanged feet for cabinet base models
- ☐ Extra removable shelves for use with Universal rack guides (cabinet base)
- ☐ "S" Grates
- ☐ Banking strip
- ☐ 10", 22", or 34" high back risers (no shelf)
- ☐ 22" single deck solid or flo-thru high shelf risers
- ☐ 34" double deck solid or flo-thru high shelf risers
- ☐ Flexible gas hose with quick disconnect and restraining device
- ☐ Common condiment type, telescoping plate rail (starting at 24" length)

HEAVY DUTY COOKING

HEAVY DUTY GAS RANGE
4-BURNERS / 24" WIDE GAS RANGE

INSTALLATION INSTRUCTIONS

1. A properly sized gas pressure regulator suitable for battery or single unit application must be furnished and installed. Natural gas 6.0" W.C., propane gas 10.0" W.C.
2. An adequate ventilation system is required for commercial cooking equipment. Information may be obtained by writing to the National Fire Protection Association, 1 Batterymarch Park, Quincy, MA 02269, www.NFPA.org. When writing, refer to NFPA No. 96.
3. These units are manufactured for installation in accordance with ANSZ223.1A (latest edition), National Fuel Gas Code. Copies may be obtained from The American Gas Association, 400 N Capitol St. NW, Washington, DC 20001, www.AGA.org.
4. **Clearances**

	Rear	Sides
Combustible	10"	10"
Non-combustible	0"	0"

5. For proper combustion, install equipment on adjustable legs or casters. On curb or platform, allow 3½" front overhang. Toe base with leveling bolts are required for curb installation. Specify when ordering.
6. Cannot be batteried with GH series equipment.
7. This appliance is manufactured for commercial installation only and is not intended for home use.

NOTE: In line with its policy to continually improve its product, Vulcan reserves the right to change materials and specifications without notice.

Specify type of gas when ordering.
Specify altitude when above 2,000 feet.

HEAVY DUTY COOKING

HEAVY DUTY GAS RANGE
REFRIGERATED EQUIPMENT STANDS

Model VSC84

NSF c UL us LISTED

SPECIFICATIONS

Vulcan VSC Series refrigerated equipment stands are designed for use along the cookline where cabinet strength and system performance really matter. Their rear mounted evaporators keep food cold in very warm kitchen environments despite frequent drawer openings. They also offer greater capacity, as each drawer accommodates 6" deep pans, and a variety of other features making them ideal for the equipment stand application. Drawers include a stay open and self-closing feature, as well as a guard to protect the gasket from damage. Grease accumulation on the condenser is prevented by an easy to remove and clean filter. Even installation is facilitated through use of factory installed casters mounted on an adjustable rail, making it easy to position these around such common floor obsructions as drains, junction boxes, and gas connections.

- ☐ **VSC36, VSC48, VSC60** 2 Drawer Models
- ☐ **VSC72, VSC84** 4 Drawer Models
- ☐ **VSC96** 6 Drawer Model

STANDARD FEATURES

- Stainless steel exterior and interior
- Custom stainless steel top for unitized assembly with V Series range components only
- Microprocessor control system
- Balanced, self-contained refrigeration system using R-404A
- Front-breathing design for “zero-clearance” installation
- Non-electric automatic condensate evaporator
- Condenser filter
- Off-cycle evaporator defrost
- Controllable anti-condensate drawer perimeter heaters
- Full length drawer handle with gasket guard
- Magnetic snap-in door gaskets
- Drawers accommodate 12" x 20" x 6" pans (pans by others)
- Self-closing drawers with stay open feature
- 14-gauge stainless steel drawer slide
- Side, front and rear access panel for ease of service and maintenance
- NEMA 5-15P plug with 9' cord and cord retainer
- 3" casters on adjustable channel moving system
- Three year parts & labor warranty
- Two years additional compressor parts warranty

OPTIONS

- ☐ Set of 6" high stainless steel legs in lieu of casters
- ☐ 6" cabinet length extension
- ☐ Stainless steel exterior finished back
- ☐ Remote applications
- ☐ System relocated to right

HEAVY DUTY COOKING

VULCAN

HEAVY DUTY GAS RANGE
REFRIGERATED EQUIPMENT STANDS

INSTALLATION INSTRUCTIONS

Construction, Hardware and Insulation
Cabinet exterior front, sides, louver assembly and drawers are constructed of 20-gauge 430 stainless steel, exterior back and bottom are constructed of heavy gauge galvanized steel. Cabinet interior sides are constructed of 22-gauge 400 series stainless steel, top and bottom are constructed of 22-gauge 300 series stainless steel. A set of 3" high casters are included standard. Vinyl magnetic snap-in drawer gasket assures tight drawer seal. Both the cabinet and drawers are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

Controller
The easy to use water resistant microprocessor control system is supplied standard. Unit is NAFEM Data Protocol communication (NDP) ready. Optional hardware required to be NDP compliant (3rd party software required for network connection). It includes a 3-Digit LED Display, °F or °C Temperature Scale Display Capability, and an RS485 data port. In addition it includes audio/visual alarms for: Hi/Lo Cabinet Temp, Clean Condenser, Evaporator Coil and Discharge Line Sensor Failures, and Power Supply Interruption.

Refrigeration System
The left side mounted, self-contained, balanced refrigeration system using R-404A refrigerant features an off-cycle defrost, capillary tube, air-cooled hermetic compressor, automatic condensate evaporator, and a dedicated rear-mounted evaporator design which distributes cold air through each drawer section. A 9' cord and retainer is provided. Standard operating temperature is 34 to 38°F.

Drawers
Each heavy-duty drawer is designed to accommodate 12" x 20" x 6" deep pans. They are constructed using 14-gauge stainless steel drawer slides and 2" diameter stainless steel rollers. Drawers include both a self-closing and stay-open feature.

Warranties
Both a one year parts and labor warranty and a five year compressor warranty (self-contained models only) are provided standard. An optional 2nd year extended parts and labor warranty is also available. In addition the control is warranted by a two year parts and labor warranty, and the drawers are covered by a three years parts only warranty (excluding gaskets).

HEAVY DUTY GAS RANGE
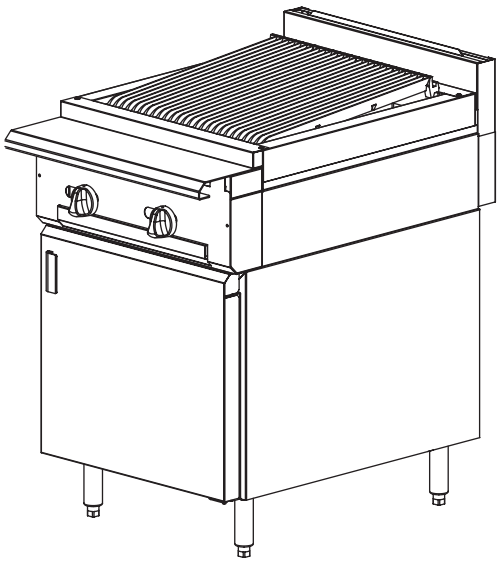
24" WIDE CHARBROILER GAS RANGE



Model VCBB24B
(shown on cabinet base)

☐ **VCBB24** 24" Charbroiler / Modular
☐ **VCBB24B** 24" Charbroiler / Cabinet Base

STANDARD FEATURES

- Stainless steel front, front top ledge, burner box, sides, base, and stub back
- 1¼" diameter front gas manifold with ¾" rear gas connection (capped)
- 65,000 BTU/hr. (4 burners)
- Individual pilots for each burner
- Heavy-duty slant cast grates and char-radiants
- Stainless steel supercharger burner dividers
- 4" stainless steel stub riser
- 6" adjustable stainless steel legs for "B" models (no legs for modular model)
- Stainless steel cabinet base door
- Universal rack guides, with one removable shelf (cabinet base)
- One year limited parts and labor warranty

OPTIONAL FEATURES (Factory Installed)

☐ Cap and cover front manifold
☐ 4" adjustable flanged feet for modular models
☐ Less legs for dolly mounting of cabinet base models
☐ 3" high toe base for curb mounting for "S", "C", & "B" models

ACCESSORIES (Packaged & Sold Separately)

☐ ¾", 1", or 1¼" gas pressure regulator (specify gas type – pack loose)
☐ Set of 4 casters, 6" high (two locking)
☐ 6" adjustable flanged feet for cabinet base models
☐ Extra removable shelves for use with Universal rack guides (cabinet base)
☐ Banking strip
☐ 10", 22", or 34" high back risers (no shelf)
☐ 22" single deck solid or flo-thru high shelf risers
☐ 34" double deck solid or flo-thru high shelf risers
☐ Flexible gas hose with quick disconnect and restraining device
☐ Common condiment type, telescoping plate rail (starting at 24" length)

SPECIFICATIONS

24" wide heavy duty gas range, Vulcan Model No. VCBB24 (modular) or VCBB24B (cabinet base). Stainless steel front, plate ledge, front top ledge with pull-out condiment rails, sides, base, stub back and 6" adjustable legs. 1¼" diameter front gas manifold. Four burners, totaling 65,000 BTU/hr. Cast burners and char-radiants with stainless steel super-charger burner dividers. Individual pilots and controls for each burner. Heavy duty cast slant grates, easy lift-off of 4 each for 24" wide units. Total input 65,000 BTU/hr.

Datasheet

iCombi® Pro 20-full size E/G

Description

Intelligent, connectable cooking system with the operating modes poultry, meat, fish, egg dishes/desserts, side dishes/vegetables, baked goods and finishing as well as the cooking methods roasting, cooking, baking and grilling.

> Combi steamer as per DIN 18866 (in manual mode).
> For most cooking processes used in commercial kitchens.
> For using steam and convection, individually, one after the other, or combined.

Ventilation approvals: The electrical appliance conforms to the EPA 202 test in accordance with ANSI/NFPA 96 "Ventilation Control and Fire Protection of Commercial Cooking Operations" Refer to UL Listing KNLZ.E148536 (America) or KNLZ7.E148536 (Canada).
The following intelligent assistants are available:

Intelligent assistant

iDensityControl iProductionManager iCookingSuite iCareSystem

iDensityControl
iDensityControl is the iCombi Pro's intelligent climate management. The interaction among intelligent sensors, a high-performance heating system and fresh steam generator, and active dehumidification ensures that the right cooking cabinet climate is always available. Intelligent air circulation ensures the best possible energy input into the food. Consequently, this ensures extraordinary productivity while maintaining high levels of food quality, even cooking and minimum energy consumption.

iCookingSuite
The iCookingSuite is the iCombi Pro's cooking intelligence. The user starts by selecting the right cooking path for the food, choosing from among 6 operating modes and / or 5 cooking methods. Users also specify the desired cooking result. The unit suggests settings for browning and degree of doneness. Intelligent sensors detect the size, quantity and condition of the food. While the cooking path is in progress, the system adjusts key parameters like cooking cabinet temperature, airspeed, and cooking time accurately to the second. The selected desired results are achieved, yielding the best possible quality in the shortest possible time. It is possible to optionally influence the cooking sequence and adapt the cooking result. Users can change to iProductionManager or manual mode at any time. Thanks to iCookingSuite you can simply save time, raw materials, and energy while maintaining a standardized food quality without having to check the procedure.

iProductionManager
iProductionManager intelligently and flexibly organizes the production process. This includes which products can be prepared together on different trays, the ideal sequence of dishes, and monitoring the cooking sequence. iProductionManager supports users with prompts to load or unload dishes. Depending on kitchen processes you can freely position orders (up to two per level) or schedule them on the basis of a certain target time. iProductionManager arranges the sequence of dishes accordingly and automatically specifies the correct settings. Users decide whether dishes are cooked based on optimum energy consumption or a certain target time. Simple monitoring activities are no longer required, saving you working time and energy.

iCareSystem
The iCareSystem is the intelligent iCombi Pro cleaning and descaling system. It recommends the amount of chemicals and ideal cleaning stage from the nine available programs based on usage and any limescale in the steam generator. Ultra-fast interim cleaning cleans iCombi Pro in only 12 minutes, all cleaning programs can also run overnight without the need for supervision. The iCareSystem is particularly efficient and environmentally friendly, consuming small quantities of phosphate-free care products, water, and energy. This means that the iCombi Pro is always hygienically clean without manual work and at minimal costs.

Capacity
> Twenty (20) Full-size sheet pans or Fourty (40) Steam table pans or Twenty (20) 2/1 GN accessories
> Mobile oven rack with 2 1/2" inch rack spacing and tandem casters (63 mm)
> Handle holder for mobile rack
> Large selection of accessories for various cooking procedures, such as grilling, braising or baking
> For use with 2/1, 1/1, 2/4 GN accessories

Combi-steamer mode
> Steaming 86 °F - 266 °F
> Convection 86 °F – 572 °F
> Combination of steam and convection 86 °F – 572 °F

Datenblatt, Version 21 - 11/30/2020 1:20 PM - We reserve the right to make technical changes.

Unit description and functions

Intelligent functions
> Intelligent climate management that measures, adjusts and controls the humidity down to the exact percentage
> The actual measured humidity in the cooking cabinet can be adjusted and viewed
> Dynamic air turbulence in the cooking cabinet thanks to three intelligent, reversible, high-performance fan wheels with five fan wheel speeds, intelligently actuated and manually programmable
> Intelligent cooking path regulation and automatic adjustment of cooking steps in order to achieve the target results, e.g., browning and degree of doneness, safely and efficiently - regardless of product size, load quantity, or who is using the unit
> Monitoring accurate to the second and calculation of browning on the basis of the Maillard reaction to reproduce ideal cooking results
> Adjust intelligent cooking methods or switch between iCookingSuite and iProductionManager for maximum flexibility
> Intelligent cooking step to proof baked goods
> Individual, intuitive programming of up to 1,200 cooking programs with up to 12 steps using drag-and-drop.
> Easy transfer of cooking programs to other cooking systems through secure cloud connection with ConnectedCooking or via USB stick
> iProductionManager, the automated, intelligent planning and controlling tool, organizes multiple cooking processes and mixed loads perfectly. Automatic closing of planning gaps. Automatically optimize schedules and energy consumption in planning and target time preparation to start or end cooking dishes at the same time.
> Automatically resumes and optimally completes cooking processes following power outages lasting less than 15 minutes
> Intelligent cleaning system suggests cleaning programs and the required amount of care products based on the degree of soiling within the cooking system
> Display of the current cleaning and descaling status

Cooking functions
> High-performance steam generator for optimal steaming performance even at low temperatures below 212°F
> Power-steam function: increased steaming power available for Asian applications
> Integrated, maintenance-free grease separation system without an additional grease filter
> Cool-down function to quickly cool down the cooking cabinet; additional fast cooling using internal water nozzle
> Core temperature probe with six measuring points and automatic error correction in the event of incorrect positioning. Optional positioning tool for soft or very small cooking products (accessory)
> Delta-T cooking for extremely gentle preparation with minimal cooking losses
> Precise burst-steam injection; water quantities can be set to 4 different levels within a temperature range of 85°F – 500°F for convection or steam-convection combination modes
> Digital temperature display, can be set to °C or °F, displays target and actual values
> Cooking cabinet humidity and time displayed digitally; displays target and actual values
> Time can be set to display in 12- or 24-hour format
> 24-hour real-time clock with automatic adjustment for daylight savings time when connected to ConnectedCooking
> Automatic pre-selected starting time with variable date and time
> Integrated hand shower with automatic retraction and switchable spray/jet function
> Energy-saving, long-lasting LED lighting in the cooking cabinet, with excellent color fidelity to allow quick determination of cooking progress
> No-charge 4-hour RATIONAL certified chef assistance program

Occupational and operating safety
> Electronic safety temperature limiter for steam generator and convection heating
> Integrated fan wheel brake
> Contact temperature of the cooking cabinet door max. 163 °F
> Use of Active Green cleaning tabs and Care tabs (solid cleaning agent) for ideal occupational safety levels
> HACCP data storage and output via USB or optional storage and management in the cloud-based networking solution ConnectedCooking
> Tested according to national and international standards for unsupervised operation
> Maximum tray height 63 inch when using RATIONAL mobile oven rack with 20 trays, 2 4/8 inch rack spacing (loss of USPHS certification)

Networking
> Integrated, IP-protected Ethernet interface for wired connection to the cloud-based ConnectedCooking networking solution
> Integrated Wi-Fi interface for wireless connection to the cloud-based networking solution ConnectedCooking
> Integrated USB interface for local data exchange
> Cloud-based ConnectedCooking solution allows central unit management; recipe, shopping cart and program management; HACCP data management; maintenance management

Cleaning and care
> Automatic, water pressure-independent cleaning and maintenance system for cooking cabinet and steam generator
> Nine cleaning programs for unsupervised cleaning, also overnight, with automatic cleaning and removal of limescale deposits within the steam generator
> Ultrafast cleaning in only 12 minutes for practically uninterrupted, hygienic production
> Automatic cleaning routine following power outages, ensuring that cooking cabinet remains free of cleaning agents even after the cleaning process has been canceled
> Use of phosphate and phosphorus-free Active-Green cleaning agent tabs and Care tabs
> Triple glass pane cooking cabinet door with rear ventilation, thermally reflecting special coating and swiveling glass panes for easy cleaning
> Inside and outside material: stainless steel DIN 1.4301 / ASTM 304, seamless hygienic cooking cabinet with rounded corners and optimized air flow
> Glass and stainless steel surfaces allow easy, safe external cleaning; IPX5-class protection against spraying water in all directions
> Monitoring option for automatic cleaning using the cloud-based ConnectedCooking networking solution

Datenblatt, Version 21 - 11/30/2020 1:20 PM - We reserve the right to make technical changes.

Operation
> High-resolution 10.1 inch TFT color display and capacitative touchscreen with self-explanatory icons for simple, intuitive operation with gestures like swiping and dragging
> Acoustic prompts and visual messages when user action is required
> Central dial with Push function for intuitive selection and confirmation of entries
> User interface and help function can be set to over 55 languages
> Basic national cuisine preferences can be selected regardless of language settings. Possible to select additional, local cuisine
> Specially adapted cooking parameters for international or country-specific dishes can be selected and started regardless of unit language settings
> Extensive search function including all cooking paths, application examples and settings
> Context-sensitive support that always shows the current help content for the displayed screen content
> Start application examples from help file
> Simple selection of cooking paths using six operating modes and/or five cooking methods
> Cockpit function to display information about the processes within a cooking path
> Customization and control of user profiles to prevent operator errors
> Interactive notifications regarding cooking paths, requested actions, intelligent functions and warnings thanks to Messenger

Installation, maintenance and environment
> Professional installation by RATIONAL-certified technicians recommended
> Fixed waste water connection conforming to SVGW requirements is permitted
> Adaptation to the installation site (height above sea level) through automatic calibration
> Operation without water softener and without additional manual descaling possible
> Flush-mounted installation *
> Service diagnostic system with automatic service message display, self-test function for active testing of unit functions
> Remote diagnosis via ConnectedCooking by certified RATIONAL service partners
> 2-year RATIONAL warranty including parts, labor, and travel and 5-year steam generator warranty**
> Regular maintenance is recommended. Servicing by RATIONAL service partner according to manufacturer recommendations

* See the installation or planner manual for details
** Terms and conditions apply, see manufacturer warranty statement at www.rational-online.com

Options
> MarineLine - marine version
> SecurityLine – prison / security version
> MobilityLine – mobile variant
> HeavyDutyLine – particularly heavy-duty version
> Integrated fat drain
> Protection for control panel
> Safety door lock
> Lockable control panel

Datenblatt, Version 21 - 11/30/2020 1:20 PM - We reserve the right to make technical changes.

Technical specifications

Dimensions and weights

Dimensions (W x H x D)	
Cooking system (body)	42 5/8 x 71 1/8 x 41 3/8 inches
Cooking system (total)	42 3/5 x 73 3/4 x 44 inches
Cooking system with packaging	46 7/8 x 80 3/8 x 48 inches
Maximum working height of top level*	≤ 5 ft. 2 7/8 inches

* when using a RATIONAL mobile rack, Size 20-full size with 20 levels, level spacing 62 mm

Weights	
Maximum load size per level	66 lb
Maximum total load capacity	396 lb
Weight - electric unit without packaging	740 lb
Weight - electric unit with packaging	842 lb
Weight - gas unit without packaging	835 lb
Weight - gas unit with packaging	936 lb

Electrical connection conditions

Voltage 3 AC 208 V /240V	
Connected loads - electric	67.9 kW
Steam power	54 kW
Convection power	66 kW
Breaker	200 A
Connection impedance	0.09 Ω
RCD type	B
Cable diameter	AWG 3/0 194°F
Voltage 3 AC 440 V / 480 V	
Connected loads - electric	67.9 kW
Steam power	54 kW
Convection power	66 kW
Breaker	100 A
Connection impedance	0.09 Ω
RCD type	B
Cable diameter	AWG 2 194°F

Not supplied with cable connection

Connected loads - gas

Natural gas G20	
Nominal heat load, total	303500 BTU
Nominal heat load, Steam mode	193500 BTU
Nominal heat load, Hot Air mode	303500 BTU
Required connection flow pressure	6.5 – 10 inch w.c.
Liquid gas	
Nominal heat load, total	296500 BTU
Nominal heat load, Steam mode	189000 BTU
Nominal heat load, Hot Air mode	296500 BTU
Required connection flow pressure	10 – 15 inch w.c.

1" NPT with 1" gas shut off
Additional gas types and voltages available on request

Connected loads - gas

Voltage 2 AC 208 V	
Connected loads - gas	2.2 kW
Breaker	15 A
RCD Type	B

All gas units are supplied with cord.

Connection conditions water

Water inlet (pressure hose), each	3/4"
Water pressure (flow pressure), each	14.5-87.0 psi
Water drain, each	2" OD
Maximum flow rate per cooking system	3.17 gal/min

Water quality requirements

Untreated water can be 0 to 24.5 gr/gal (0 to 420ppm) hardness. We do not recommend treated water hardness < 5 gr/gal (86ppm) because the water could be corrosive. Sodium ion exchangers are not recommended; H+ Ion exchange systems are recommended. Water that does not meet the following minimum standards will require the proper conditioning

Contaminant	Water Requirements	If > than recommended
Sand / Particles	< 15 µm	Particle filter
Chlorine (Cl2)	< 0.12 gr/gal (0.2 ppm)	Active carbon filter
Chloride (Cl-)	< 4.68 gr/gal (80 ppm)	RO

Connected loads - exhaust air and thermal load

Latent heat load	10331 BTU
Sensible heat emission	13667 BTU
Sound level (electric)	60 dBA
Sound level (gas)	65 dBA

Connection loads - data

LAN data interface	RJ45
WiFi data interface	IEEE 802.11 a/g/n

Minimum distances at installation

Clearance Requirements
To facilitate servicing, we recommend leaving a 20" (500 mm) gap on the left-hand side of the unit. If there is not 20" (500 mm) left side clearance available, provisions for moving the unit to the left for service access must be made. Such provisions include, but are not limited to, having quick connections (water, gas, etc.) and lengthened electrical connections with flexible cords.
If there are no external heat sources acting on the unit, there should be at least 2" (50 mm) of clearance on either side of the unit. The back of the unit can be mounted flush with the wall.
If a high temperature heat source is on the left side of the unit, clearance of at least 14" (350 mm) must be maintained on the left-hand side. This clearance may be reduced to 2" (50 mm) if a heat shield is used (see accessories).
Recommended clearance from unobstructed rear exhaust pipes and any surface collecting grease or flammable material; 16" (400 mm) gas, 10" (254 mm) electric. It is recommended to have a hood overhang of 6" (150 mm) to 18" (450 mm) at the front of the unit and 6" (150 mm) on the sides if installed at the end of the cooking line. Please refer to the Installation Manual for additional technical data and for instructions on installation and setup.

Datenblatt, Version 21 - 11/30/2020 1:20 PM - We reserve the right to make technical changes.

Terms and conditions of installation

> Observe all local and country-specific standards and regulations regarding the installation and operation of industrial cooking appliances. The local standards and regulations for interior ventilation systems must also be taken into account.
> To use ConnectedCooking, an RJ45 network socket or a WLAN connection option (IEEE 802.11 a/g/n) must be in place on-site. For optimal performance, a data rate of at least 100 MB/s is required.

Accessories

> 10 full size stainless steel grids included with delivery of the cooking system

Accessories	Item number
RATIONAL Active Green cleaning agent tabs – guarantee the best cleaning performance	Item no. 56.01.535
RATIONAL Care tabs – effectively prevent limescale deposits	Item no. 56.00.562
Condensation breaker – diverts steam and vapors to an existing exhaust air system Sizes 20-half size and 20-full size	Item no. 60.75.326
RATIONAL USB stick – to securely transfer cooking programs and HACCP data	Item no. 42.00.162
Ramp - evens out inclines (up to 3%) allowing mobile rack to be rolled in smoothly Size 20-full size	Item no. 60.22.380
Full size sheet pan adapter	Item no. Top 60.22.392 Item no. Below 60.22.393
Heat shield – for installing a unit near a heat source, e.g. a grill - Size 20-full size	Item no. 60.75.826
Mobile catering stand - especially for heavy mobile catering usage	Item no. 60.22.496
Mobile oven rack and mobile plate oven rack – for simple loading outside the cooking system	See Cooking Systems and Accessories catalog
RATIONAL Double Water Filter - for Combi Duo 6-full size/6-full size and 6-full size/10-full size or if used for more than 2 units	Item no. 1900.1150US

We offer a wide range of cooking accessories to help you achieve ideal cooking results; for more information, please consult our accessories brochure, ask your dealer, or visit www.rational-online.com

Water Filtration Products.

R195-CL

R195-CL

RATIONAL Water Filtration Products Model R195-CL single cartridge water filtration system helps provide consistent high quality water for your RATIONAL combi by reducing the effects of sediment, chloramines, chlorine, taste & odor while providing the required flow rates for any single Combi model or Combi-Duo models 6-half size/6-half size or 6-half size/10-half size or XS/XS.

Product Benefits

- Carbon block technology effectively reduces chloramines, chlorine, taste, and odor for better equipment protection.
- NSF Standard 42 and FDA CFR-21 compliant materials.
- Sanitary Quick Change (SQC) encapsulated cartridge design allows for fast and easy cartridge change-outs with ¼" turn.
- ½" FNPT horizontal inlet and outlet ports allow direct or easily adaptable connections to existing plumbing lines.

Model Number	Article No.	Reduction Claims	Nominal Micron Rating	Capacity	Service Flow Rate	Replacement Cartridge
R195-CL	1900.1154US	Sediment, Chloramines [1], Chlorine, Taste and Odor	5.0 [2]	30,000 gallons (113,550 liters)	2.5 gpm (9.5 lpm)	R95-CL 1900.1155US

1 As tested and certified by independent third party laboratory
2 NSF Certified for Particulate Reduction

Visit www.nsf.org for the claims associated with products that are NSF listed.

Application Guide

› Any single RATIONAL combi
› XS/XS Combi-Duo
› 6-half size/6-half size Combi-Duo
› 6-half size/10-half size Combi-Duo

Important: Installation Tips

These installation tips are for informational purposes only and are not intended to be used as actual installation instructions. Caution: To reduce the risk associated with property damage due to water leakage:

› Read and follow Use Instructions before installation and use of this system.
› Installation and use must comply with all state and local plumbing codes.
› Protect from freezing, remove filter cartridge when temperatures are expected to drop below 40°F (4.4°C).
› Do not install on hot water supply lines. The maximum operating water temperature of this filter system is 100°F (37.8°C).
› Do not install if water pressure exceeds 125 psi (862 kPa). If your water pressure exceeds 80 psi (552 kPa), you must install a pressure limiting valve. Contact a plumbing professional if you are uncertain how to check your water pressure.
› Do not install where water hammer conditions may occur. If water hammer conditions exist you must install a water hammer arrester. Contact a plumbing professional if you are uncertain how to check for this condition.
> The disposable filter cartridge must be replaced every 12 months, at the rated capacity or sooner if a noticeable reduction in flow rate occurs.

Warning

To reduce the risk associated with the ingestion of contaminants:
Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

RATIONAL recommends regularly scheduled maintenance and replacement of the filter cartridge(s) in order for the product to perform as advertised/sold. RATIONAL shall not be liable for system failures due to improper maintenance.

Limited Warranty
RATIONAL warrants this Product will be free from defects in material and manufacture for five (5) years from the date of purchase: The filter cartridge or filter membrane is warranted to be free from defects in material and manufacture for one (1) year. This warranty does not cover failures resulting from abuse, misuse, alteration or damage not caused by RATIONAL Water Filters or failure to follow installation and use instructions. No warranty is given as to the service life of any filter cartridge or membrane as it will vary with local water conditions and water consumption. RATIONAL MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOMER OR USAGE OF TRADE. If the Product fails to satisfy this Limited Warranty during the warranty period, RATIONAL will replace the Product or refund your Product purchase price. This warranty does not cover labor. The remedy stated in this paragraph is Customer's sole remedy and RATIONAL exclusive obligation. For additional information, see the entire Limited Warranty located in the product Installation and Operating Instruction Manual.
Limitation of Liability. RATIONAL will not be liable for any loss or damage arising from this RATIONAL product, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability. Some states and countries do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Location Contact Email (required)

RATIONAL PO Number

Please select one of the options below.

- ☐ This PO includes a Pre-Installation Site Consultation and/or RATIONAL Certified Installation(RCI). Commissioning is included with RCI. Commissioning that can not be completed at the time of installation can incur additional costs.
- ☐ This PO includes Commissioning. RSP information will be emailed to Signee & Location Contact. They are responsible to contact RSP to schedule the Commissioning visit after the installation is completed. Commissioning that can not be completed due to improper installations can incur additional costs
- ☐ Installation and/or Commissioning will be purchased directly from a RATIONAL Service Partner.
- ☐ Installation and/or Commissioning by a RATIONAL Service Partner is **declined**. An Installation Manual is delivered with every RATIONAL unit. RATIONAL will not warranty service calls related to improper installation. All gas units must be calibrated via a flue gas analysis.

List your preferred RATIONAL Service Provider, or RATIONAL will select an RSP based on location.

RATIONAL Water Filter.

The RATIONAL Water Filtration Systems helps provide consistent high quality water to your RATIONAL SelfCooking Center® or CombiMaster® Plus. The patented carbon block technology reduces the effects of sediment, chloramines, and chlorine while providing the required flow rates.

Item	Necessary if	Article No.	
Single Cartridge* For all models and Combi-Duo model XS/XS, 61/61 and 61/101	Chlorine / Chloramine > 0.2 ppm Particle > 15 microns	1900.1154US	
Double Cartridge* For Combi-Duo model 62/62 and 62/102 or if used for more than 2 units. For each additional unit add 1 head and cartridge.	Chlorine / Chloramine > 0.2 ppm Particle > 15 microns	1900.1150US	
Water Filtration Modular Head For adding on additional Cartridge(s) to Double Cartridge System (Maximum 4 cartridges)	If more than 2 units will be connected in combination with Double Cartridge (1900.1150US)	1900.1152US	
Water Filtration Cartridge Replacement or add on	For replacement or if more than 2 units will be connected in combination with Double Cartridge (1900.1150US)	1900.1155US	
Certified Installation of RATIONAL Water Filter Systems is available when purchased with Certified Installation of RATIONAL unit.		9999.8448	

*Includes Filter System Installation Kit. This ensures that the installer has all of the essential connection materials on hand at the time of the installation. It is a hassle-free one-stop shop.

Water Conditioning.
RATIONAL Specifications.

Water Conditioning Technologies.

Particle Filter.
We recommend a particle filter with fineness of 5–15 µm for filtering water containing sand, iron particles or suspended matter.

Active Carbon Filter.
We recommend an active carbon filter, if the water contains high levels of chlorine (Cl_2) / Chloramine (NH2Cl) over 0.2 ppm (0.2 mg/l). This information can be provided by water supply company.*

Reverse Osmosis
Due to corrosion risks, a reverse osmosis system must be used if and only if chloride (Cl–) concentrations are above 80 ppm (80 mg/l). This information can be provided by water supply company.
Note: Ensure that the minimum conductivity value of 50 µS/cm (Micro Siemens) is being maintained.

Water Softener
Valid for the SelfCookingCenter®: these models will remove scale all by themselves providing that the units are used and cleaned as prescribed. This means a water softener typically is not needed for scale. New line: Valid for CombiMaster® Plus: Recommended for treating water if severe calcification occurs without high chloride contamination.

Recommend System: Weak acid decarbonization (H^+ ion exchange).
Systems not recommended: Sodium Ion Exchangers (salt based water softeners) and Phosphate feeder filters.
New Line: Treater Water Softening must maintain a minimum 5 gr/gal hardness.

Supply Requirements.

Water Filter Connection
½" ID cold water line with a water shut off with ¾" connection. (GHT) new Line Water pressure to filtration system needs a to maintain a minimum 35 psi. (Max 80 psi) new Line RATIONAL units require flow rate of 3 gallons per minute and water pressure of 21–87 psi. (43 psi is recommended)

*All public water systems using surface water and most ground water systems treat water with either chlorine/ chloramine or chlorine dioxide.
Note: EPA will allow levels as high as 4 ppm safe for drinking water, exceeding our maximum level of 2 ppm.

Hazard statements

Causes skin irritation
Causes serious eye irritation

Precautionary statements

Keep out of reach of children.
If medical advice is needed, have product container or label at hand.
Wear protective gloves/protective clothing/eye protection/face protection.
If on skin: Wash with plenty of water.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
If exposed or concerned: Get medical advice/attention.

Hazards not otherwise classified

Not known.

3. Composition/information on ingredients

Mixtures

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Hazardous components

CAS No	Components	Quantity
77-92-9	Citric acid	> 20 %
617-48-1	Malic acid	> 20 %
124-04-9	Adipic acid	1 - 5 %

4. First-aid measures

Description of first aid measures

General information

If you feel unwell, seek medical advice.

After inhalation

Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion.

After contact with skin

In case of contact with skin wash off immediately with soap and water.
Consult a doctor if skin irritation persists.

After contact with eyes

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
Seek medical treatment by eye specialist.

After ingestion

Rinse out mouth thoroughly with water.
Do not induce vomiting.
Never give anything by mouth to an unconscious person.
Summon a doctor immediately.

Most important symptoms and effects, both acute and delayed

WARNING !
Causes serious eye irritation.
Causes skin irritation.

OSHA Hazard Communication: This material is considered hazardous by the OSHA Hazard Communication Standard 29CFR 1910.1200.

Indication of any immediate medical attention and special treatment needed

Treat symptoms.

5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media

Product does not burn, fire-extinguishing activities according to surrounding.

Unsuitable extinguishing media

Full water jet.

Specific hazards arising from the chemical

Fire may produce:
Irritant/corrosive, flammable as well as toxic distillation gases (carbonization gases).

Special protective equipment and precautions for fire-fighters

Use breathing apparatus with independent air supply.
Protective suit.

Additional information

Cool containers at risk with water spray jet.
Fire residues and contaminated firefighting water must be disposed of in accordance with the local regulations.

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Oven Delimer Tablets for RATIONAL SelfCookingCenter®, Art. Nr. 56.00.560, 56.00.562

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

No special precautions required.

Environmental precautions

Do not discharge into the drains/surface waters/groundwater.

Methods and material for containment and cleaning up

Pick up mechanically, avoiding dust, and provide disposal in suitable recipients.
Flush rests with sufficient amount of water.

Reference to other sections

Observe protective instructions (see Sections 7 and 8).
Information for disposal look up chapter 13.

7. Handling and storage

Precautions for safe handling

Advice on safe handling

Avoid the formation of dust.
Avoid contact with eyes, skin or mucous membrane.

Advice on protection against fire and explosion

No special protective measures against fire required.

Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels

Keep in the original sealed container.
Keep containers tightly closed in a dry, well-ventilated place.

Further information on storage conditions

Keep away from food, drink and animal feeding stuffs.

8. Exposure controls/personal protection

Control parameters

Exposure controls

Appropriate engineering controls

Provide appropriate exhaust ventilation at machinery and at places where dust can be generated.

Protective and hygiene measures

Avoid contact with eyes and skin.
Wash hands before breaks and at the end of workday.
When using do not eat, drink or smoke.
Remove and wash contaminated clothing before re-use.

Eye/face protection

Tightly fitting goggles.
Eye wash bottle with pure water.

Hand protection

Protective gloves resistant to chemicals made off natural-rubber latex, Minimum coat thickness 0.6 mm, Permeation resistance (wear duration) approx. 480 minutes, i.e. protective glove <Lapren 706> made by www.kcl.de.
This recommendation refers exclusively to the chemical compatibility and the lab test conforming to EN 374 carried out under lab conditions.
Requirements can vary as a function of the use. Therefore it is necessary to adhere additionally to the recommendations given by the manufacturer of protective gloves.

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Respiratory protection

No personal respiratory protective equipment normally required.
Breathing apparatus (particle filter) only if dust is formed.

9. Physical and chemical properties

Information on basic physical and chemical properties

Physical state:	Tablet
Color:	White
Odor:	Characteristic

		Test method
pH-Value:	2,5	(1%)

Changes in the physical state

Flash point:	n.a.
Lower explosion limits:	n.a.
Upper explosion limits:	
Ignition temperature:	n.a.

Oxidizing properties
n.a.

Vapor pressure: (at 20 °C)	n.a.
Water solubility: (at 20 °C)	Soluble
Partition coefficient:	n.d.

Other information

Bulk density: approx. 800 g/L

10. Stability and reactivity

Reactivity

No decomposition if stored and applied as directed.

Chemical stability

Stability: Stable

Stable under normal conditions.

Possibility of hazardous reactions

Hazardous reactions: Will not occur

No hazardous reactions known.

Conditions to avoid

Protect from moisture.

Incompatible materials

No materials to be especially mentioned.

Hazardous decomposition products

No hazardous decomposition products known.

11. Toxicological information

Information on toxicological effects

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Oven Delimer Tablets for RATIONAL SelfCookingCenter®, Art. Nr. 56.00.560, 56.00.562

Route(s) of Entry

Skin and eye contact, inhalation and ingestion.

Acute toxicity

Based on available data, the classification criteria are not met.
Citric acid
LD50/oral/rat: 6730 mg/kg
Adipic acid
LD50/oral/rat: 11000 mg/kg
Malic acid
LD50/oral/rat: >3200 mg/kg

CAS No	Components				
	Exposure routes	Method	Dose	Species	Source
77-92-9	Citric acid				
	oral	LD50	11700 mg/kg	Rat	
	dermal	LD50	> 2000 mg/kg	Rat	

Irritation and corrosivity

Causes skin irritation
Causes serious eye irritation
Skin irritation: Irritant
Eye irritation: Irritant

Sensitizing effects

Based on available data, the classification criteria are not met.
Irritant

Specific target organ toxicity (STOT) - single exposure

Based on available data, the classification criteria are not met.

Severe effects after repeated or prolonged exposure

Based on available data, the classification criteria are not met.
STOT - Single exposure: Not classified.
STOT - Repeated exposure: Not classified.
Aspiration hazard: Not classified.

Carcinogenic/mutagenic/toxic effects for reproduction

Based on available data, the classification criteria are not met.
Carcinogenicity: Not classified.
Mutagenicity: Not classified.
Teratogenicity: Not classified.

Carcinogenicity (NTP): Not listed
Carcinogenicity (IARC): Not listed
Carcinogenicity (OSHA): Not listed

Aspiration hazard

Based on available data, the classification criteria are not met.

Practical experience

Other observations

Ingestion causes irritation of upper respiratory system and gastrointestinal disturbance.
Inhalation of dust may cause shortness of breath, tightness of the chest, a sore throat and cough.

12. Ecological information

Ecotoxicity

Citric acid :
LC50/Leuciscus idus/96 h: 440 - 706 mg/l

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Oven Delimer Tablets for RATIONAL SelfCookingCenter®, Art. Nr. 56.00.560, 56.00.562

EC50/Daphnia magna: 85 mg/l
Adipic acid:
LC50/Pimephales promelas/96 h: 97 mg/l

Persistence and degradability

Product is biodegradable.

Bioaccumulative potential

No data available.

Mobility in soil

The product is soluble in water.

Other adverse effects

No data available.

13. Disposal considerations

Waste treatment methods

Advice on disposal

Remove in accordance with local official regulations.

Contaminated packaging

Empty containers should be taken for local recycling, recovery or waste disposal.
Contaminated packaging should be emptied as far as possible and after appropriate cleansing may be taken for reuse.
Packaging that cannot be cleaned should be disposed of like the product.

14. Transport information

US DOT 49 CFR 172.101

Proper shipping name: Not regulated.

Other applicable information

Non hazardous material as defined by the transport regulations.

15. Regulatory information

U.S. Regulations

National Inventory TSCA

All of the components are listed on the TSCA inventory.

National regulatory information

SARA Section 304 CERCLA:
Adipic acid (124-04-9): Reportable quantity = 5,000 (2270) lbs. (kg)
SARA Section 311/312 Hazards:
Citric acid (77-92-9): Immediate (acute) health hazard
Malic acid (617-48-1): Immediate (acute) health hazard
Adipic acid (124-04-9): Immediate (acute) health hazard

SARA

To the best of our knowledge this product contains no toxic chemicals subject to the supplier notification requirements of Section 313 of the Superfund Amendments and Reauthorization Act (SARA/EPCRA) and the requirements of 40 CFR Part 372.

State Regulations

Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65, State of California)

This product contains no chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

Rational AG

Safety Data Sheet

according to 29 CFR 1910.1200(g)

Other data

The information in this document is based on the present state of knowledge and is applicable to the product with regard to appropriate safety precautions.
The information describes exclusively the safety requirements for the product (s) and is based on the present level of our knowledge.
The delivery specifications are contained in the corresponding product sheet.
This data does not constitute a guarantee for the characteristics of the product(s) as defined by the legal warranty regulations.
(n.a. = not applicable; n.d. = not determined)

(The data for the hazardous ingredients were taken respectively from the last version of the sub-contractor's safety data sheet.)

"PBHS-ADA" PRO-BOWL HAND SINKS

FEATURES:

- ONE PIECE DEEP DRAWN BOWL
- ALL SINK BOWLS HAVE LARGE LIBERAL RADII CORNERS
- INCLUDES BASKET DRAIN
- SPLASH MOUNT FAUCET HOLES 4" ON-CENTER
- 1-1/2" DRAIN PLUMBING CONNECTION

PBHS-ADA-P-STD

CONSTRUCTION:

- BOWL: STAINLESS STEEL TOPS ARE TIG WELDED, EXPOSED WELDS ARE POLISHED TO MATCH ADJACENT SURFACE.

MATERIAL:

- BOWL: TYPE 300 STAINLESS STEEL POLISH, SATIN FINISH
- BRACKET: TYPE 300 STAINLESS STEEL POLISH, SATIN FINISH

BRUTE® CONTAINERS

BRUTE® containers are guaranteed to never fade, warp, crack, or crush, with a proprietary design constructed with the highest quality material.

Features and Benefits:

- Venting channels make removing liners up to 50% easier, improving productivity and reducing the risk of injury
- Commercial-grade construction guaranteed to never fade, warp, crack, or crush
- Bag cinches secure liners, allowing for knot-free liner changes. Tested to 200,000 cycles
- Contoured base handles improve grip and ergonomics, reducing strain and improving efficiency
- Rim with rib-strengthened design increases strength and resists crushing
- Rounded handles make lifting and moving easier
- Reinforced base is specifically engineered to be dragged over rough surfaces in tough environments

2 & 21 Compliant

BRUTE® LIDS

BRUTE® lids are constructed with the highest quality material; a UV inhibitor ensures long life in even the most extreme commercial environments. Lids come in a variety of different styles, including self-draining lids, dome top lids, and funnel lids to meet any commercial need.

Features and Benefits:

- Self-draining lids have channels that prevent water from pooling, reducing still water buildup, and include ridges that enable stacking to provide space-efficient storage
- Dome top lids have a spring action door that allows for easy trash disposal while keeping odors and insects out
- Self-draining lids and dome top lids both have a snap-lock feature that ensures a secure fit
- Funnel top lids have a cut-out top that enables hands-free refuse disposal and a funnel design that conceals waste from public view

Roll-Thru Hot Food Holding Cabinets To Accommodate 66" High Racks

Model Shown One Section

One, Two & Three Section Models, 32" Deep

R SERIES — Stainless Exterior & Interior

1-Section Roll-Thru Model	RIH132LP-FHS*
2-Section Roll-Thru Model	RIH232LP-FHS*
3-Section Roll-Thru Model	RIH332LP-FHS

A SERIES — Stainless Exterior, Anodized Aluminum Interior

1-Section Roll-Thru Model	AIH132LP-FHS*
2-Section Roll-Thru Model	AIH232LP-FHS*
3-Section Roll-Thru Model	AIH332LP-FHS

In addition to the already outstanding cabinet construction you have come to expect from Traulsen, these dependable roll-thru hot food holding cabinets are built using our high performance ducted fan air distribution system. Unlike designs which simply radiate heat, this minimizes temperature stratification inside the cabinet, while providing for quicker daily start-up, lower energy usage, and reduced lifetime service costs. Each is supplied standard with easy to operate microprocessor controls and stainless steel exteriors.

Standard Product Features

- R-Series: Stainless Steel Exterior & Interior
- A-Series: Stainless Steel Exterior/Anodized Aluminum Interior
- INTELA-TRAUL® Microprocessor Control System
- Ducted Fan Air Distribution System
- Standard Operating Temperature Range 140 to 180°F
- One-Time Start-Up Temperature Adjustment Feature
- ON/OFF Switch Located On Control Face
- Full Length Stainless Steel Doors With Locks
- Self-Closing Doors With Stay Open Feature At 120°
- Guaranteed For Life Cam-Lift Hinges
- Guaranteed For Life Horizontal Work Flow Door Handles
- Standard Door Hinging F & R: 132LP = Right, 232LP = Left/Right, 332LP = Left/Right/Right (other hingings available)
- Automatically Activated Incandescent Lights
- Stainless Steel Breaker Caps
- Accommodates Roll-In Racks Up To 66" High (provided by others)
- Magnetic Snap-In EZ-Clean Door Gasket(s)
- Stainless Steel Door Liner
- Stainless Steel Interior Rack Guides
- Stainless Steel Threshold Ramps
- Stainless Steel One-Piece Louver Assembly - Front & Rear
- 9' Cord & Plug Attached (one section models only)
- Three Year Parts And Labor Warranty

Options & Accessories

- Re-Hinging Feature For Doors
- Wire Shelf Package For Roll-In Models (includes three wire shelves per section)
- Additional Wire Shelves For Above
- Stainless Steel Shelf Package For Roll-In Models (includes three stainless steel shelves per section)
- Additional Stainless Steel Shelves For Above
- Locking Hasps (padlocks supplied by others)
- 115/60/1 Voltage (single section models only)
- Export 220/50/1 Voltage
- Kool Klad Exterior Laminate Decor
- Clear Glass Door(s) In Place Of One Or More Solid Door(s)
- Fluorescent Lights
- Prison/Correctional Facilities Options

Specifications

Construction, Hardware and Insulation

Cabinet exterior front, one piece sides, louver assembly and doors are constructed of 20 gauge stainless steel with #4 finish. Cabinet interior and door liners are constructed of stainless steel (anodized aluminum in the A-Series). The exterior cabinet top is constructed of heavy gauge galvanized steel. The interior floor and exterior bottom are constructed of stainless steel and insulated with ¾" of resilient cork. A readily attachable stainless steel ramp is provided.

Doors are equipped with a heavy-duty, extruded wiper gasket for sealing to bottom ramp, removable plug cylinder locks and guaranteed for life cam-lift, gravity action, self-closing metal, glide hinges with stay open feature at 120°. Hinges include a concealed switch to automatically activate the interior incandescent lighting. Guaranteed for life, work flow door handles are mounted horizontally over recess in door which limits protrusion from door face into aisleways. Doors have seamless, polished metal corners.

Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life.

Both the cabinet and doors are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

NOTES

NOTE: Figures in parentheses reflect metric equivalents.

1= Please note that the available cabinet width narrows for 6" from the top of the door frame to 25-7/8" in order to allow for the heater fans.

2= For shipping weights and dimensions please refer to form TR35875.

3= Heater is capable of operation from 208V to 240V as supplied standard. Actual amp figure will change at any voltage other than 208.

4= Figure shown for optional 115V.

Equipped With One NEMA L14-20P Plug
(1 section models @208V only)

Equipped With One NEMA 5-20P Plug
(1 section models @115V only)

NOTE: When ordering please specify: Voltage, Hinging, Door Size, Options and any additional warranties.

Continued product development may necessitate specification changes without notice.
Part No. TR35794 (REVISED 01-14-19)

Heating System

A low watt density, serpentine style, heater is employed for the generation of electric heat. Low velocity air is forced across its large surface area to efficiently move heat radiating away from these through a down-air distribution duct, where it is then evenly distributed throughout the cabinet, assuring the proper holding environment for hot food product, without drying. A vent, located at the top of the cabinet, is included for positive humidity control.

Controller

Traulsen's Smart Control features advanced control algorithms and sophisticated diagnostic capabilities. Smart sensors will adapt the operation of the system to a variety of environments and usage patterns. The Smart Control offers a complete set of visual alarms designed to alert the user to critical events. In the event of an alarm, a dedicated Alarm LED will illuminate, informing the user of the critical event and describing the event in the large, easy to read full text display.

Interior

Readily removable, interior-mounted, stainless steel guides for rack are provided for protection. Maximum rack size with wheels inboard of frame is 27" wide by 29" deep by 66" high. Racks supplied by others.

Warranties

A three year parts and labor warranty is provided standard.

OTR-UA-13
Universal Adjustable Rack

Economical and functional aluminum racks for transport, bussing and storage.

CHOICE OF THE PROFESSIONALS Since 1953 ™

These sturdy aluminum racks provide an economical solution for your transport and storage needs. Fabricated from high tensile extruded aluminum, the "OTR Rack Series" hold up to the demands in hotels, motels, restaurants, hospitals, bakeries . . . *and rugged enough for even correctional facilities.*

They're heavy-duty, yet light weight and easy to maneuver, even when fully loaded with roasting pans, steam table pans, sheet trays, or oval tray sheet pans.

The extruded aluminum runners are double welded for extra strength.

These racks are easy to clean and can be completely sanitized, washed, or steam cleaned while remaining rust resistant.

FWE...the "Choice of the Professionals."

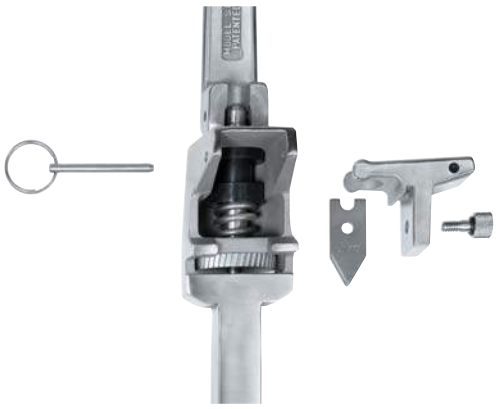
S-11 NSF Manual Can Openers

For the very highest standard in food safety and sanitation, the S-11 manual can opener has over 17 years of success in foodservice worldwide utilizing proprietary can opening technology. The patented S-11 has successfully opened nearly one billion cans without a single complaint – giving it a stainless reputation. Add in the industry's longest warranty and you've got an opener that's a cut above any other.

- 5-year warranty
- NSF Certified
- Dishwasher safe
- Made in U.S.A.
- Rustproof stainless steel construction
- Parts remove easily for replacement
- Tamper proof model also available
- Available with screw down base or clamp on model
- Standard size or with long bar for taller cans
- Patented

Open up to a higher standard in food safety.

Dishwasher Safe
Toss in the dishwasher for easy cleaning. The industry's first all-stainless can opener, the S-11 resists rust and stays looking new, no matter how many times it's washed.



Fewer Parts
The S-11's advanced design means fewer parts than most other openers, and its patented Quick Change Mechanism makes knife and gear replacement fast and easy.

Quick Change Mechanism
Makes gear replacement fast and easy.

S-11 with clamp base

Tamper proof S-11 opener with tamper proof base

ST-93 Rustproof can opener cleaning tool

A tamper proof version of the S-11 is now available equipped with locking hardware.

Specifications

Construction, Hardware and Insulation

Cabinet exterior front, one piece sides, louver assembly and doors are constructed of 20 gauge stainless steel with #4 finish. Cabinet interior and door liners are constructed of stainless steel (anodized aluminum in the A-Series). The exterior cabinet top and bottom are constructed of heavy gauge aluminized steel. The interior floor is constructed of stainless steel and insulated with ¾" of resilient cork. Readily attachable stainless steel ramps are provided to facilitate loading/unloading.

Doors are equipped with a heavy-duty, extruded wiper gasket for sealing to bottom ramp, removable plug cylinder locks and guaranteed for life cam-lift, gravity action, self-closing metal, glide hinges with stay open feature at 120 degrees. Hinges include a concealed switch to automatically activate the interior LED lighting. Guaranteed for life, work flow door handles are mounted horizontally over recess in door which limits protrusion from door face into aisleways. Doors have seamless, polished metal corners.

Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life. Both the cabinet and door(s) are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

NOTES

NOTE: Figures in parentheses reflect metric equivalents.
1= Based on a 90 degree F ambient and 20 degree F evaporator.
2= For approximate remote weights deduct 40 lbs. from respective net or gross weight. For other information on remote models, please refer to form TR35837.
3= 12" Top clearance preferred for optimum performance and service access.

Refrigeration System

A top mounted, self-contained, balanced refrigeration system using environmentally friendly, R-450A refrigerant is conveniently located behind the one piece louver assembly. It features an easy to clean front facing condenser, thermostatic expansion valve, air-cooled hermetic compressor, large, high humidity evaporator coil located outside the food zone and a top mounte d non-electric condensate evaporator. Biased return air duct protects against introduction of warm kitchen air, promoting even temperature maintenance and efficient operation. A 9' cord and plug is provided. Standard operating temperature is 34 to 38°F.

Controller

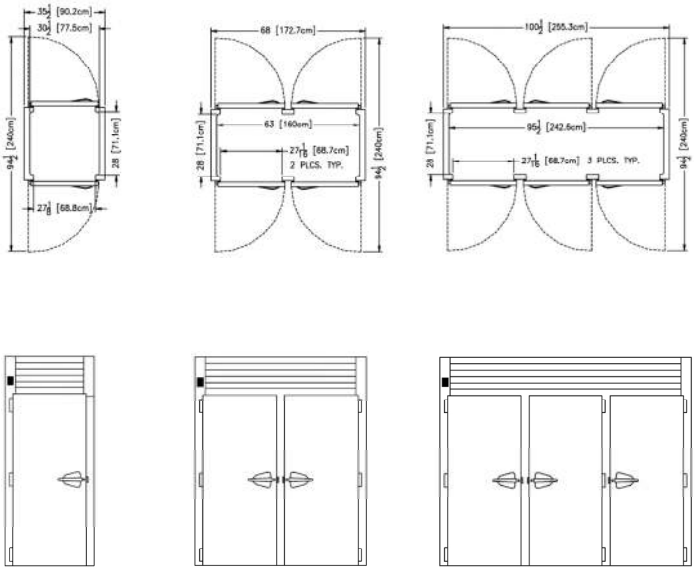
Traulsen's Smart Control features advanced control algorithms and sophisticated diagnostic capabilities. Smart sensors will adapt the operation of the refrigeration system to a variety of environments and usage patterns. The Smart Control offers a complete set of visual alarms designed to alert the user to critical events. In the event of an alarm, a dedicated Alarm LED will illuminate, informing the user of the critical event and describing the event in the large, easy to read full text display.

Interior

Readily removable, interior-mounted, stainless steel guides for rack are provided for protection. Maximum rack size with wheels inboard of frame is 27" wide by 29" deep by 66" high. Racks supplied by others.

Warranties

Both a three year parts and labor warranty and a five year compressor warranty (self-contained models only) are provided standard.



One Section Models Equipped With One NEMA 5-15P Plug

Two & Three Section Models Equipped With One NEMA 5-20P Plug

CHOICE OF THE PROFESSIONALS Since 1953 ™

These sturdy aluminum racks provide an economical solution for your transport and storage needs. Fabricated from high tensile extruded aluminum, the "OTR Rack Series" hold up to the demands in hotels, motels, restaurants, hospitals, bakeries . . . *and rugged enough for even correctional facilities.*

They're heavy-duty, yet light weight and easy to maneuver, even when fully loaded with roasting pans, steam table pans, sheet trays, or oval tray sheet pans.

The extruded aluminum runners are double welded for extra strength.

These racks are easy to clean and can be completely sanitized, washed, or steam cleaned while remaining rust resistant.

FWE...the "Choice of the Professionals."

- ◊ **Heavy-duty aluminum**
- ◊ **All welded construction - no rivets**
- ◊ **Welded tubular construction**
- ◊ **5" polyurethane casters**
- ◊ **Tray guides vary in style and type by model (details on other side)**
- ◊ **Two year limited warranty**

INSULATED HOT CABINET MODEL H-138-1834D

FEATURES AND BENEFITS:

- Fully insulated hot cabinet keeps prepared foods at serving temperatures.
- Powerful, yet efficient, 1500 Watt heating system maintains the right temperature to properly hold products. Heats up to 200˚F (93˚C).
- Standard solid state electronic control with large, clear, easy-to-read and operate LED digital display to ensure holding at precise food temperature.
- Internal frame in body maintains structural rigidity.
- Body constructed of non-corrosive, Hi-Tensile aluminum for strength and ease of mobility. One piece extended base protects cabinet body.
- Smooth interior coved corners prevent food particle/grease buildup.
- Self-closing insulated Dutch doors prevent temperature loss; magnetic door gaskets for proper seal. Field reversible for flexibility.
- Standard with right hand hinging; left hand hinging available upon request.
- Full length anti-microbial extruded door handles for “easy open”; positive catch secures door during transport.
- Recessed push/pull handles on both sides prevents damage to walls; allows easy maneuvering.
- Channel pan slides securely hold 18" x 26" pans on 1-1/2" centers without tipping.
- Heavy duty 5" swivel casters, two with brakes. Provides mobility when fully loaded.

H-138-1834D

Standard solid state electronic control with large, clear, easy-to-read and operate LED digital display to ensure holding at precise food temperature

ACCESSORIES and OPTIONS (Available at extra cost):

- ❑ Tempered Glass Door Windows
- ❑ Corner Bumpers
- ❑ Perimeter Bumper
- ❑ Floor Lock (for use with 5" casters)
- ❑ Various Caster Options
- ❑ Removable Cord Set
- ❑ 208 or 240 Volt Service
- ❑ Magnetic Door Latch
- ❑ Upgrade to 2000 Watt Power Unit

See page B-20 for accessory details.

GOLD

Gold indicates our Best Insulated Hot Cabinets with the best warranty in the industry.
3-Year Parts / 1-Year Labor.

CABINET:
- Body: .063 aluminum.
- Reinforcement: Internal framework of 18 ga. stainless steel.
- Insulation: Fiberglass, thermal conductivity (K factor) is .23 at 75˚F. 1-1/2" in doors, top, base; 2" in sidewalls.
- Air tunnels: 22ga. stainless steel; lift-out type, mounted on sides.
- Push/pull handles (2): 5” vertical; recessed.
- Interior coved corners.

BASE:
- One piece construction, .125 aluminum.
- Casters: 5" dia., swivel, modulus tires, 1-1/4 wide, load cap. 250 lbs. each, temp. range -45˚/+180˚F. Delrin bearings. Front casters equipped with brakes.

DUTCH DOORS:
- Field reversible.
- Inner and outer: .063 aluminum.
- Extruded handles.
- Hinges: Self-closing, stays open past 90°.
- Gaskets: Perimeter type, magnetic santoprene.
- Pan stop: Embossed.
- Latches: Positive transport type with lock hasp.

PAN SLIDES:
- Channels: Extruded aluminum, 11/16 x 1-1/2 x .100, riveted on 1-1/2" centers.

If you need a QR reader visit your App Store on your Smartphone or Tablet.

HOT UNIT COMPONENTS:
- Thermostat: Solid state digital display control, room ambient to 200˚F (93˚C).
- Switch: ON-OFF push button type.
- Power cord: Permanent, 10 ft., 14/3 ga.
- Heater: 1470 Watts.
- Blower motor.
- Vent fan.
- Thermometer: Digital.

POWER REQUIREMENTS:
- 1500 Watts, 120 Volts, 60 Hz., single phase, 12 Amps., 15 Amp. service.

SHORT FORM SPECIFICATIONS

Cres Cor Insulated Hot Cabinet Model H-138-1834C. Solid state electronic controlled times and temperatures. Inner, outer and top liners of .063 aluminum; stainless steel internal frame. No-tip .100 aluminum channel slides for (32) 18"x 26" pans on 1-1/2" centers. Field reversible Dutch doors, made from .063 aluminum. Fiberglass insulation in sides 2"; doors, top, base 1-1/2". Interior coved corners. 1500 Watt, 120 Volt power unit. One piece base, .125 aluminum. 5" swivel modulus casters, Delrin bearings. Load capacity 250 lbs. each. 3-Year Parts / 1-Year Labor warranty. PROOF HOT CABINETS **D**

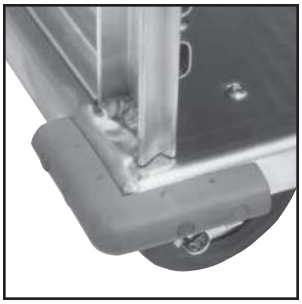
ACCESSORIES

PERIMETER BUMPER
#1405-000

Non-marking reinforced gray rubber strip mounts to base of cabinet for protection. Adds 2" to depth and width.



CORNER BUMPERS
#1056-002

Non-marking gray rubber strips mount to corners of cabinet base for protection. Adds 2" to depth and width.

PUSH HANDLE
#1087-000

Stainless steel rod with donut bumper on each end mounts 40" from floor to back or side of cabinet (specify location). Provides maneuverability.

BAIL HANDLE KIT
#1265-000

Two grip handles mounted to each side of cabinet 30" from floor for lifting and maneuvering. Drop to sides when not in use.

CASTER OPTIONS

Standard 5" dia. modulus casters can be substituted with polyurethane wheels or wheels of various diameters. Contact factory for casters available for your application.

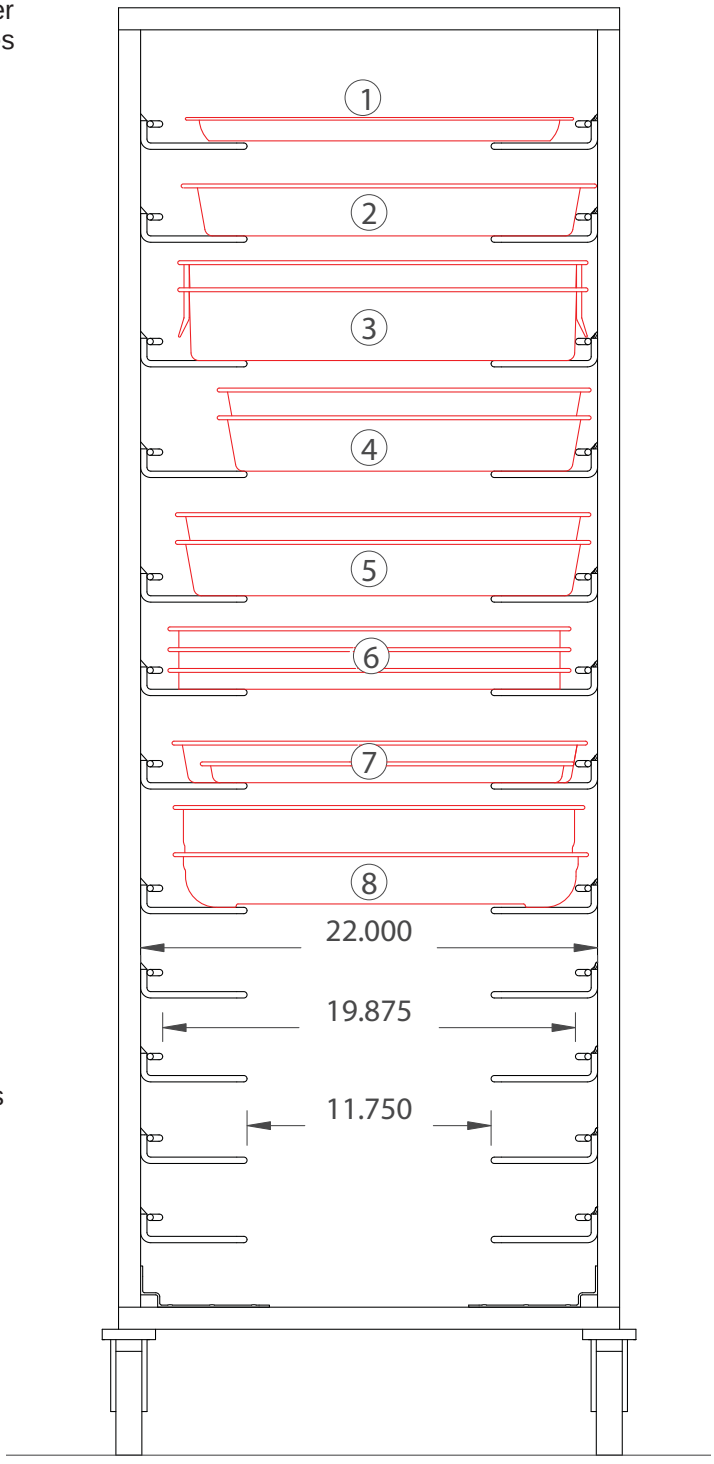
PAN SIZE CHART
for Universal Angle Models (-UA)

Cres Cor adjustable universal angles are designed to hold trays and pans shown below and in illustration on right.

Quantity of angles and adjustment increments are found on the product catalog page.

PAN TYPES AND SIZES

		Capacity per set of angles
1	Maxi Pan (20-3/4" x 25-1/2" x 1-1/8")	1
	European Standard Gastro-Norm Pan (20-3/4" x 25-1/2" x 3/4")	1
2	Steam Table Pan (12" x 20" x 2-1/2")	2
	Steam Table Pan (12" x 20" x 4")	2
3	Roast Pan (10-7/8" x 19-3/4" x 3-1/2")	2
	Roast Pan (10-7/8" x 19-3/4" x 2-1/4")	2
4	Roasting Pan (18" x 26" x 4")	1
	Deep Roasting Pan (22-1/2" x 20-1/2" x 6-1/2")	1
	Baking Pan (18" x 26" x 2")	1
5	Steam Table Pan (12" x 20" x 4")	2
	Steam Table Pan (12" x 20" x 2")	2
6	Baking Pan (20" x 22" x 4")	1
	Baking Pan (20" x 22" x 2")	1
	Baking Pan (20" x 22" x 1")	1
7	Steam Table Pan (12" x 20" x 2")	2
	Steam Table Pan (12" x 18" x 6")	2
	Bun Pan (18" x 26" x 1")	1
	Half Size Bun Pan (18" x 13" x 1")	2
8	Steam Table Pan (12" x 20" x 4")	2
	Steam Table Pan (12" x 20" x 2")	2
	Cup and Glass Rack (20" x 20")	1
	Service Tray (14" x 18")	2
	Half Size Wire Basket (18" x 13" x 4")	2



Listed are popular pan sizes in nominal and actual dimensions as identified in the trades:

PANS

Nominal Dimensions	Actual Dimensions
18" x 26"	17-3/4" x 25-3/4"
18" x 24"	17-3/4" x 24"
16" x 22"	16-9/16" x 22-1/2"
15" x 20"	15-1/4" x 20-1/2"
14" x 18"	13-15/16" x 17-13/16"
12" x 16"	12" x 16-3/8"
10" x 14"	10-5/8" x 13-3/4"
9" x 26"	8-3/4" x 25-1/2"
15" x 21" (Canada)	15-1/2" x 21-3/8"

FEATURES:

One piece **Deep Drawn** sink bowl design.

"Z" bracket wall mounting plate

Keyhole wall mount bracket.

Stainless steel 1-1/2" IPS basket drain.

C-fold style towel dispenser with hinged towel box.

Specific Unit Features:

7-PS-41:

A.D.A. Compliant

14" x 16" x 5" sink bowl.

K-175 Hands Free AC/DC operated gooseneck faucet.

Deck mount liquid soap dispenser.

Front loading paper towel dispenser.

Stainless Steel Skirt with Removable Access Panel and enclosed bottom for storage.

7-PS-46:

7-PS-41:

14" x 16" x 5" sink bowl.

K-206 6" Extended splash mount gooseneck faucet with wrist handles

Front loading paper towel dispenser.

Deck mount liquid soap dispenser.

Stainless Steel Skirt with Removable Access Panel and enclosed bottom for storage.

7-PS-69:

10" x 14" x 5" sink bowl.

Splash mount liquid Soap Dispenser.

K-69 Heavy Duty Splash Mount Faucet (with Wrist Handles)

Side Support Brackets.

Lever operated drain, built-in overflow with plastic overflow tube and spring clamps.

1 1/2" P-Trap.

7-PS-79:

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser.

7-PS-80:

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser

Includes lever operated drain, built-in overflow with plastic overflow tube and spring clamps.

1 1/2" P-Trap.

7-PS-85

10" x 14" x 5" sink bowl.

K-59 gooseneck faucet.

Splash mount liquid Soap Dispenser.

Chrome plated 1 1/2" P-Trap & apron.

CONSTRUCTION:

All TIG welded.

All sink bowls have a large liberal radii with a minimum dimension of 2" and are rectangular in design for increased capacity.

Welded areas blended to match adjacent surfaces and to a satin finish.

Die formed Countertop Edge with a No-Drip offset.

MATERIAL:

Heavy gauge type 304 series stainless steel.

Wall mounting bracket is Galvanized and of offset design.

All fittings are brass / chrome plated unless otherwise indicated.

MECHANICAL:

Faucet supply is 1/2" IPS male thread hot and cold.

WARNING: Equipment that includes a faucet may expose you to chemicals, including lead, that are known to the State of California to cause cancer or birth defects or other reproductive harm. For more Info., visit www.p65warnings.ca.gov.

G.A. SYSTEMS, Inc.

SPECIALIZING IN CAFETERIA SERVING LINES

SPEC SHEET

Cashier Stand ADA

PROJECT: _____

ITEM #: _____

MODEL: _____

Specifications

Top is 16 gauge 304 stainless steel #4 finish. Front and back edges are turned down 102° and turned back 90° eliminating the gap between the top and the base of the cabinet. The ends are turned down 90° flush with cabinet base, this eliminates any open space between G.A. Systems cabinets. The top is secured to the base with 4 stainless steel flush head screws. One 3/4" diameter pin is welded at one end of the top. The pin has two 5/16" diameter holes. The lower hole is used to join adjacent G.A. Systems cabinets.

Body of cabinet is fabricated of 1" square 18 gauge stainless steel and cold rolled tubing to form the top and bottom frames. Each is welded to 1-1/2" square 18 gauge stainless steel corner posts. Each corner post is capped. All joints are welded with all exposed welds being ground and polished. 20 gauge galvanized body panels are welded to tubing super structure.

Exterior front, back and one end are trimmed with 22 gauge stainless steel #4 finish trim to accept laminated color panels. Laminate is applied to 1/8" board for additional strength.

There is a 3-3/4" clearance from the bottom of the cabinet to the floor. Plate type 3" swivel non-marking casters with brakes. Cabinet heights are ADA compliant.

Standard Features

- ☐ Locking pin, 1
- ☐ 1-3/4" grommet on top
- ☐ Plate type 3" swivel non-marking casters with brakes

Options

- ☐ No Pin
- ☐ No Grommet
- ☐ Solid Surface Top (in lieu of stainless steel top)

Accessories

- ☐ Tray Slide Stainless Steel 8-5/8" / C0108
- ☐ Tray Slide Stainless Steel 12" / C1017
- ☐ Tray Slide Stainless Steel 7" / C0294
- ☐ Tray Slide Solid Surface 8-5/8" / C0857
- ☐ Condiment Insert / C0139
- ☐ Toe Kicks
- ☐ Overshelf (stainless steel)
- ☐ Counter display Rack / C0392
- ☐ Premium High Pressure Laminate
- ☐ Graphics Panels Stand-offs
- ☐ Graphic Vinyl Decals

Condiment Top Insert
Holds 4 - 1/4 Size Pan

Intertek
4003279
Conforms to NSF Std. #2

Limited Warranty

G.A. Systems, Inc. warrants to the original purchase all equipment manufactured and/or sold to be free from all defects in material and workmanship under normal use and service. Its obligations under this warranty shall be limited to repairing or replacing any part of the said product. F.O.B. factory, which proves thus defective within one (1) year from date of sale, and which upon G.A. Systems, Inc.'s examination, discloses to its satisfaction to be thus defective. No claims will be accepted for any part becoming defective from damage in transit, improper installation, misuse, neglect, abnormal use, alteration, accident, fire or other casualty, or act of God. We will not assume any responsibility for labor chargers, travel, refrigerant, replacement parts purchased, or other expenses incurred outside of our factory. Neither will we be liable for food spoilage, loss of use of the equipment, inconvenience, or other consequential damage of any kind.

SCHOOL MILK FORCED AIR COOLER

STF58HC Dual Access Cooler

Hydrocarbon Series

MODEL: STF58HC-1-S

3 Year Parts/Labor Warranty

Additional 4 Year Compressor Warranty

CABINET CONSTRUCTION

- Stainless steel exterior and interior
- Stainless steel lids, hinged doors and door latches
- Full electronic control
- Dual sided access
- Heavy-duty epoxy coated steel wire floor racks standard
- Floor drain is centrally located for easy cleaning and connecting to drain hose with hose adapter
- Flexible compression door gaskets, ensures a tight seal
- Self-latching doors/lids with safety bumpers
- Exterior thermometer
- Cylinder locks
- 5” Heavy-duty plate casters (2 with locks)
- Balanced, forced-air refrigeration system provides rapid chilling of product

OPTIONS & ACCESSORIES

- Corner bumpers
- Cafeteria tray slides
- Graphics

REFRIGERATION SYSTEM

- Uses environmentally friendly, energy efficient R290 refrigerant, and meets all regulatory requirements for CARB, SNAP, DOE & more
- Maintains product temperature between 36ºF- 40ºF

❒	HCF-5	5 Wells

BODY:
- Top Mount with flush mount pans
- Stainless Steel - formed, welded, and polished to high finish
- Sealing gasket
- Drains at each well

CAPACITIES:
- Standard 12" x 20" steam table pans
- 2-1/2", 4" and 6" deep

CONTROLS:
- Intuitive, easy to use touch screen control changes mode of operation
- 3 wet heat, 3 dry heat, 3 refrigerated and 1 freeze mode.
- 1 control per food well
- Controls have a built-in Wifi modem and redundant controls capabilities for future activation.
- Six foot cord supplied between control and touchscreen
- Complies with part 15 of the FCC rules.

Refrigeration:
- 5 Year compressor replacement
- R448a Refrigerant
- Compressor slides out 15.375" for easy service.

Serviceability:
- Unit can be serviced in counter, no need to remove.
- Six foot Cord and plug supplied

General Specifications

Caddy Magic self-leveling dispenser to be Caddy Corporation model CM-_____.

Self-leveling mechanism to be cantilevered suspension type. Removable panel to be provided to permit easy calibration without the use of tools, for full load factors from 20 to 182 pounds and without prior identification of wares, irrespective of weight, height, or brand. Mechanism to be free of cables, chains, pulleys, sprockets, gears, levers, crank handles or components requiring periodic maintenance and lubrication.

Removable load platform to be 18 gauge stainless steel and secured to 16 gauge stainless steel angle support frame and a pair of cantilevered suspension arms. Suspension arms to be of rust-resistant 1/4" steel and to be securely guided by ball bearing rollers. Total stacking height to edge of top frame to be not less than 22".

Cabinet models specifications:
Unit to have 16 gauge stainless steel top with 2" turned down channel edge on 4 sides and welded finished corners. Exterior of cabinet to be stainless steel. Cabinet corners to be reinforced with 16 gauge stainless steel channels and to have full height extruded plastic vertical bumpers.

Bottom of cabinet to be 12 gauge stainless steel, rust resistant metal and to have 2-1/2" diameter center clean-out hole with a removable plug. Unit to be mounted on four 4" diameter swivel type casters with polyurethane tires.

Cantilever models specifications:
The lower rack storage platform to be formed of 16 gauge stainless steel, channeled down on all four sides with two stainless steel reinforce members underneath. Unit to be mounted on four 4" diameter swivel type casters with polyurethane tires.

Unit to be provided with the following accessories:

Accessories

- ☐ **ACC-63** - 5" diameter swivel casters with polyurethane tires in lieu of 4" diameter swivel casters. (Add 1-1/8" to height)
- ☐ **ACC-41** - Caster brakes on two diagonal casters.
- ☐ **ACC-50** - Perimeter bumpers with replaceable corner bumpers. (Add 1-1/4" to length and width)
- ☐ **ACC-51** - Guides for automatic tray stacking.
- ☐ **ACC-52** - Vertical corner bumpers only. Easy to replace. (Add 1-1/4" to length and width)

CRES COR®

JOB: _____

ITEM NO: _____

INSULATED EXTRUDED SIDEWALL UTILITY CABINET MODEL 109-1840

FEATURES AND BENEFITS:

- All purpose cabinet for transport and storage. Load with plastic food boxes filled with product to create your own food file.
- Insulated side and back walls prevent temperature loss.
- Same size top and base extend past sidewalls to act as natural bumpers for protection. Extruded frame fully welded.
- Body constructed of non-corrosive, Hi-Tensile aluminum for strength and ease of mobility.
- Reinforced, full length door swings 270˚ Card clip included.
- Gravity type latch secures door during transport.
- Interlocking extruded sidewalls hold 18" x 26" pans and plastic food boxes on 1-1/2" centers. Easy to clean.
- Interior pan stops on door allow proper air flow.
- Heavy duty 5" swivel casters, two with brakes. Provides mobility when fully loaded.

Note: Designed to hold standard 18 x 26" pans by the lip. Due to the variability of pan manufacturers/quality of pans being held/pan sizes, please contact manufacturer or provide a sample pan to ensure a proper fit.

109-1840

ACCESSORIES and OPTIONS (Available at extra cost):

- ❑ Lock Hasp
- ❑ Various Caster Options
- ❑ Corner Bumpers
- ❑ Perimeter Bumper
- ❑ Plexiglas Door
- ❑ Push Handle
- ❑ Left-Hand Hinged Door
- ❑ Kold Keepers

See page A-20 for accessory details.

When ordering bumpers, add 2" to overall dimensions.

ALL ALUMINUM CONSTRUCTION IS RIVETED, WELDED AND FINISHED.

CABINET:

- Posts: Extruded channels, 7/8 x 2-1/4 x .102, welded to top and base, form a solid frame.
- Sides: Interlocking extruded 6" panels, smooth outer sides. Double wall with 1" insulation.
- Back panel: Fitted into posts, riveted to top and reinforced. Double wall with 1" insulation.
- Tie rod: Applied at front.
- Top: One piece .100 aluminum.
- Bail Handles (2): Mounted on each side.

BASE:

- One piece construction, .190 aluminum.
- Casters: 5" dia., swivel, modulus tires, 2" wide, load cap. 375 lbs. each, temp. range -45˚/+180˚F. Delrin bearings. Front casters equipped with brakes.

DOOR:

- Panel: Formed .100 aluminum.
- Reinforcement: 1/4 x 1-1/2 extruded bars riveted horizontally to top, center and bottom.
- Latch: Gravity type, nickel plated steel.
- Swings 270˚ on 3 butt hinges, riveted to posts and door.
- Pan stop channel.

PAN SLIDES:

- Extruded interlocking side walls act as pan slides on 1-1/2" centers.

Note: Designed to hold standard 18 x 26" pans by the lip. Due to the variability of pan manufacturers/quality of pans being held/pan sizes, please contact manufacturer or provide a sample pan to ensure a proper fit.

SHORT FORM SPECIFICATIONS

Cres Cor Insulated Utility Cabinet Model 109-1840. Formed and welded .100 aluminum top, .190 aluminum base. Interlocking extruded aluminum sidewalls for (40) 18" x 26" pans and plastic food boxes on 1-1/2" centers. Insulated side and back walls. Formed .100 aluminum reinforced door. 5" swivel modulus casters, Delrin bearings. Load capacity 375 lbs. each. 2-Year Parts / 1-Year Labor warranty. Provide the following accessories:

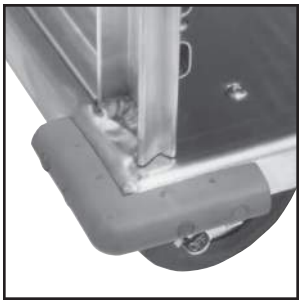
PROOF HOT CABINETS **D**

ACCESSORIES

PERIMETER BUMPER
#1405-000

Non-marking reinforced gray rubber strip mounts to base of cabinet for protection. Adds 2" to depth and width.



CORNER BUMPERS
#1056-002

Non-marking gray rubber strips mount to corners of cabinet base for protection. Adds 2" to depth and width.

PUSH HANDLE
#1087-000

Stainless steel rod with donut bumper on each end mounts 40" from floor to back or side of cabinet (specify location). Provides maneuverability.

BAIL HANDLE KIT
#1265-000

Two grip handles mounted to each side of cabinet 30" from floor for lifting and maneuvering. Drop to sides when not in use.

CASTER OPTIONS

Standard 5" dia. modulus casters can be substituted with polyurethane wheels or wheels of various diameters. Contact factory for casters available for your application.

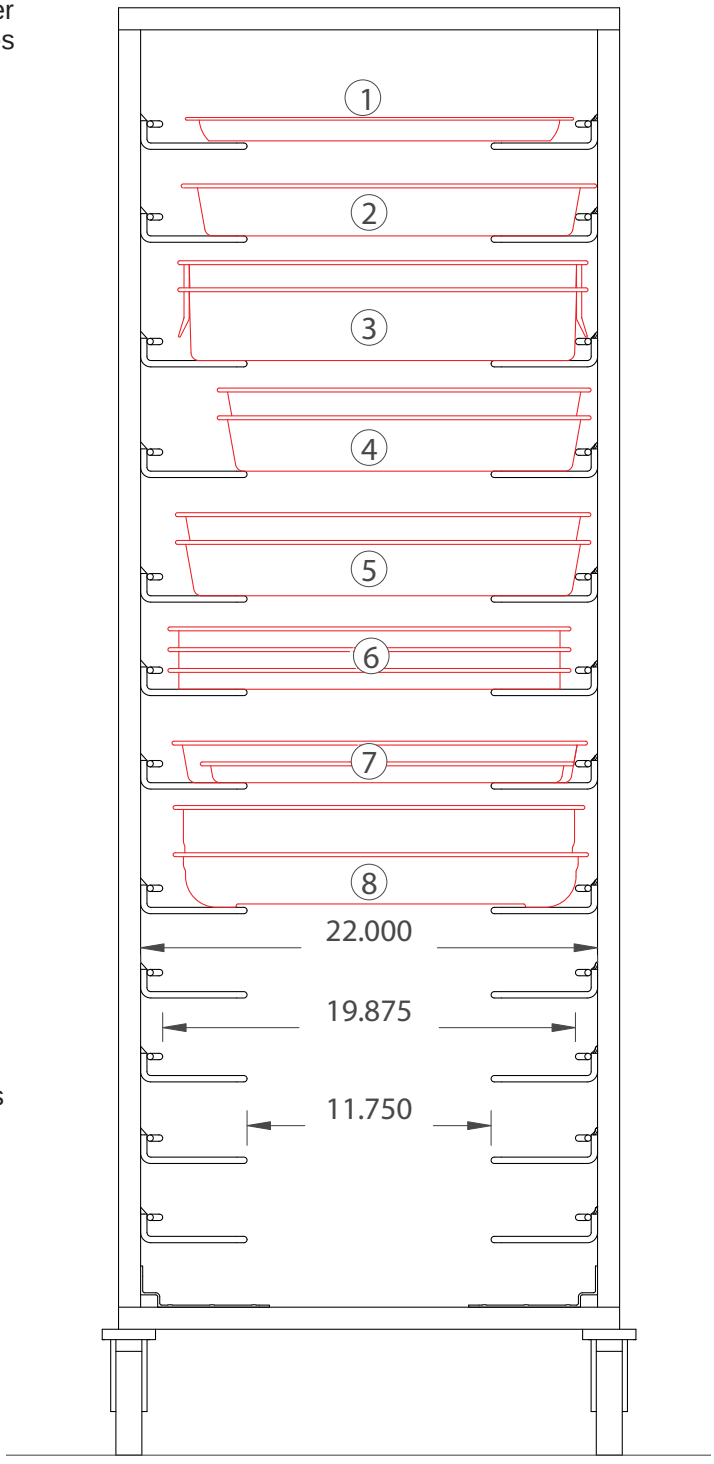
PAN SIZE CHART
for Universal Angle Models (-UA)

Cres Cor adjustable universal angles are designed to hold trays and pans shown below and in illustration on right.

Quantity of angles and adjustment increments are found on the product catalog page.

PAN TYPES AND SIZES

		Capacity per set of angles
1	Maxi Pan (20-3/4" x 25-1/2" x 1-1/8")	1
	European Standard Gastro-Norm Pan (20-3/4" x 25-1/2" x 3/4")	1
2	Steam Table Pan (12" x 20" x 2-1/2")	2
	Steam Table Pan (12" x 20" x 4")	2
3	Roast Pan (10-7/8" x 19-3/4" x 3-1/2")	2
	Roast Pan (10-7/8" x 19-3/4" x 2-1/4")	2
4	Roasting Pan (18" x 26" x 4")	1
	Deep Roasting Pan (22-1/2" x 20-1/2" x 6-1/2")	1
	Baking Pan (18" x 26" x 2")	1
5	Steam Table Pan (12" x 20" x 4")	2
	Steam Table Pan (12" x 20" x 2")	2
6	Baking Pan (20" x 22" x 4")	1
	Baking Pan (20" x 22" x 2")	1
	Baking Pan (20" x 22" x 1")	1
7	Steam Table Pan (12" x 20" x 2")	2
	Steam Table Pan (12" x 18" x 6")	2
	Bun Pan (18" x 26" x 1")	1
	Half Size Bun Pan (18" x 13" x 1")	2
8	Steam Table Pan (12" x 20" x 4")	2
	Steam Table Pan (12" x 20" x 2")	2
	Cup and Glass Rack (20" x 20")	1
	Service Tray (14" x 18")	2
	Half Size Wire Basket (18" x 13" x 4")	2



Listed are popular pan sizes in nominal and actual dimensions as identified in the trades:

PANS

Nominal Dimensions	Actual Dimensions
18" x 26"	17-3/4" x 25-3/4"
18" x 24"	17-3/4" x 24"
16" x 22"	16-9/16" x 22-1/2"
15" x 20"	15-1/4" x 20-1/2"
14" x 18"	13-15/16" x 17-13/16"
12" x 16"	12" x 16-3/8"
10" x 14"	10-5/8" x 13-3/4"
9" x 26"	8-3/4" x 25-1/2"
15" x 21" (Canada)	15-1/2" x 21-3/8"

SHALLOW DEPTH WORKTOP REFRIGERATOR

WTR27HC Solid Door With Flat Top
Hydrocarbon Series

MODEL: WTR27HC-FLT

3 Year Parts/Labor Warranty

Additional 4 Year Compressor Warranty

CABINET CONSTRUCTION

- Stainless steel front, sides, door and grille (galvanized back & bottom)
- Interior liner is made of corrosion resistant aluminum
- Stainless steel top for added durability
- Flat top
- Full electronic control
- Interior thermometer is standard
- Self-closing door with 120˚ stay-open feature, on lift-off hinges
- Magnetic gasket attached to each door for positive seal
- 6” Casters, two (2) with brakes standard
- Two (2) epoxy-coated steel wire shelves
- Field-reversible door (hinge kit not included)

OPTIONS & ACCESSORIES

- Stainless steel back
- Stainless steel interior
- 16 Gauge stainless steel top
- Additional shelves
- Shelf clips
- Glass door option
- Right or left hinged door
- Locks (solid doors only)
- Wire shelf divider
- Cutting board
- 3” Casters
- 6” Legs (stainless steel, black or seismic/flange)
- Low profile casters
- Roller kit
- Remote option* (see note on back on page)

REFRIGERATION SYSTEM

- Uses environmentally friendly, energy efficient R290 refrigerant, and meets all regulatory requirements for CARB, SNAP, DOE & more
- Adaptive defrost
- Epoxy coated evaporator coil
- Refrigerators capable of maintaining product temperature between 36ºF and 38ºF

STAINLESS STEEL

DROP-IN SINKS

Two Compartments - FOR GENERAL PURPOSE USE

NOTE: Multi-Compartment Drop-In Sinks ARE NSF Approved when used in Mobile Food Carts and Kiosks only.

Item #: _____ Qty #: _____

Model #: _____

Project #: _____

FEATURES:

One piece seamless **Deep Drawn** sink bowl design.

All sink bowls have a large liberal radii with a minimum dimension of 2" and are rectangular in design for increased capacity.

Self-Rim Design. Mounting clips provided accommodates all thicknesses of counter. (Quantity supplied varies based on drop in sink ordered).

Includes 4" O.C. **K-50** faucet & basket drain.

CONSTRUCTION:

Bowls fabricated from one sheet of stainless steel.

All bowls are Sound Deadened.

Units feature Advance Tabco's **Smart Finish™**.

MECHANICAL:

Faucet supply is 1/2" IPS male thread.

Deck mounted faucets are furnished with aerator.

MATERIAL:

18 gauge type 304 series stainless steel.

Faucets are brass-nickel plated.

Stainless Steel 1-1/2" IPS basket drain.

STANDARD MOUNTING CLIPS

For countertops over 7/8" and up to 2" thick.

Replacement # K-28 (Per Sink)

SUBJECT: ***GEOTECHNICAL INVESTIGATION***
FERNLEY DEPOT RESTROOM FACILITIES
675 EAST MAIN STREET
GEOTECHNICAL INVESTIGATION REPORT

Dear Mr. Starkey:

In accordance with your request, we are submitting our Geotechnical Investigation for the restroom facilities of the Fernley Depot at 675 East Main Street in Fernley. Our work is intended for the sole and exclusive use of the City of Fernley Public Works Department, their agents, or designated representatives.

In our opinion, there are no significant geotechnical constraints, which would preclude the proposed construction of the project, provided the recommendations of this report are incorporated by design into the final plans and specifications.

We appreciate the opportunity to work with you on this project. Should you have questions concerning the contents of this report, or if we may be of further service, please contact the undersigned at your convenience.

Sincerely,

RESOURCE CONCEPTS, INC.

1.0 INTRODUCTION

This report presents the findings and conclusions of our geotechnical investigation for the proposed restroom facilities of the Fernley Depot at 675 East Main Street in Fernley. The "Site" is located adjacent to the existing Fernley Depot at 675 East Main Street, Fernley, Nevada. The Site location is shown on the project Vicinity Map, Figure 1. It is our understanding that the client is considering pre-manufactured building options at the time of this report.

2.0 SCOPE OF SERVICES

Our scope of services for our geotechnical investigation included:

- Performed site reconnaissance and marked the proposed exploratory test pit locations in the field with white paint for underground utility location purposes.
- Reviewed in house files of prior geotechnical work in the area.
- Observed the excavation of three exploratory test pits (TP-1 through TP-3) at the Site. The test pits were excavated with a rubber-tired backhoe equipped with an 18-inch bucket to depths ranging from approximately nine to ten feet below the existing ground surface (bgs).
- Logged the test pits in general accordance with the Unified Soil Classification System (USCS).
- Obtained bulk samples from the test pits.
- Transported soil samples to our Carson City geotechnical laboratory for testing and additional analyses.

Logs of the exploratory test pits and other details of the field investigation are included in Appendix A. Details of the laboratory testing program including test results are included in Appendix B.

To aid in preparing this report, we reviewed the following documents:

- *U.S. Geological Survey, Geologic Map of Lyon, Douglas, and Ormsby Counties, Nevada 1969,* Nevada Bureau of Mines and Geology.
- *Site Location Layout,* City of Fernley Public works, December 2018.
- *Flood Insurance Rate Map Fernley, Nevada* FEMA, October 2017.
- *Soil Survey of Fernley Area, Nevada,* Natural Resources Conservation Service Website (http://websoilsurvey.sc.egov.usda.gov/App/HomePage.htm).
- *Quaternary fault and fold database for the United States,* accessed February 2018 from USGS web site: http://earthquake.usgs.gov/hazards/qfaults/map/#qfaults/.

3.0 PROJECT DESCRIPTION

3.1 Project Overview

The location of the project is 675 East Main Street in Fernley, Nevada at the historic Fernley and Lassen Railway Depot. The restroom project as currently proposed includes the construction of ADA compliant

restrooms, an asphalt concrete paved path connecting to the existing building and associated landscaping.

Underground utilities serving the site area include power, gas, water and sewer. Main lines are located along East Main Street to the North of the Site and along Lois Lane to the east of the Site.

The topography of the Site is generally flat lying. Topography consists of a gentle slope to the southeast (1%-2%). Vegetation on the Site consists of tumbleweeds and native grasses in the southern portion of the Site with landscaped grass and trees on the north side of the existing building. The average elevation of the Site is 4,161 feet.

The purpose of our investigation was to characterize subsurface conditions within the project area as they relate to the proposed construction. The recommendations presented herein are based on the analyses of the data obtained from exploratory samples, laboratory tests, engineering analyses, and our local experience with similar soil and geologic conditions. Based on our investigation and analyses we provide recommendations for: site grading, building foundation construction, seismic design parameters, underground utility installation, flexible pavement driveway and parking lot sections, concrete flatwork placement recommendations, and erosion control criteria.

4.0 GEOLOGY

4.1 Regional and Site Geology

The geology of the Site is referenced from the 1969 U.S. Geological Survey, Geologic Map of Lyon, Douglas, and Ormsby Counties, Nevada, Figure 3. The City of Fernley area in Lyon county is a large valley typical of the western edge of the Basin and Range geomorphic province. The Basin and Range topography is the result of extension of the crust over approximately the past 10 million years. The geologic map indicates the project Site is predominantly underlain by older Quaternary lake deposits of glacial Lake Lahontan. These deposits are described as stratified layers of silty sands, silts and clays.

5.0 SOIL AND GROUNDWATER CONDITIONS

5.1 General

The following soil descriptions include the USCS symbol where applicable. Appendix A contains the test pit logs for reference to the vertical extents of the materials encountered at each location. Figure 2, the Site Plan shows the locations of our test pit explorations.

5.2 Soil Conditions

According to data from the soil survey of the Fernley Area, Nevada accessed in December 2018, the Site soils to five feet below the surface are partially mapped as “Lahontan silty clay loam (Unit 103),” and “Saralegui loamy sand (Unit 209).” The Unified Soils Classification System (USCS) rating from the survey website classified these native soils as silty sand (SM). The soil unit distribution and description of the Site is illustrated on the Soils Map, Figure 4.

Test pit soil descriptions show the majority of site surface soils are granular varieties dominated by silty sand (SM). In test pits TP-2 and TP-3 at depths of approximately 2.5 feet to 5.5 feet the silt contents were very high bordering on their classification as sandy silts (ML).

5.3 Groundwater

No groundwater or indications of high groundwater or perched groundwater were observed in the borings. Groundwater in the area of the Site is likely to be in the range of fifty to a hundred feet or more below the natural grade.

5.4 Laboratory Test Results

Laboratory tests are in general conformance with accepted test methods of the American Society for Testing and Materials (ASTM). Appendix B presents moisture content and grain-size distribution results. Moisture and fines content (percent passing #200 sieve) are also shown on the test pits logs.

The types and numbers of the tests performed are summarized in Table 5.4:

Table 5.4
Summary of Laboratory Tests

Test	Procedure	Number of Tests
Moisture Content	ASTM D 2216	5
Grain Size Analysis	ASTM D 422	5
pH	SW-846 9045D	1
Resistivity	ASTM G57	1
Sulfate	ASTM 1580C	1

6.0 GEOLOGIC HAZARDS

6.1 Faulting

The city of Fernley is located near active faults, which are capable of producing significant ground motions due to seismic events. Figure 5, the Fault Map for the site vicinity shows the distribution of active faults in the area. Based on the U.S. Geological Survey, 2008 Quaternary fault and fold database for the United States, faults considered active for the type of development planned are located near but not on the project site. The USGS shows that the nearest active faults to the Site are located approximately 1.2-miles west of the Site. These faults are a part of the Walker Lane seismic belt. Locally this portion of the seismic belt is referred to as the Pyramid Lake fault zone. Faults along this zone are estimated to be capable of earthquake of Richter magnitude 7.0. These values are equivalent to Modified Mercalli Intensities of X (ten) or greater.

The seismic risk at the Site is not significantly greater than that of the surrounding developments and the Fernley area in general. We recommend that seismic design of the structures be in accordance with the latest version of the International Building Code (IBC) and the American Society of Civil Engineers (ASCE) Standard 7-10. Site-specific acceleration information presented in Table 6.1 below is from the OSHPD Earthquake Hazards Program (https://seismicmaps.org/) which reflects the 2012 version of the IBC as well as the ASCE Standard. Input coordinates of (39.6054918, -199.2376362) were used for the seismic design.

Information derived from the USGS website is shown in Table 6.1 below**.**

Table 6.1 Reference
2012 IBC Seismic Design Parameters

Parameter	Factors	IBC Reference
Site Class	D	Table 20.3-1
Spectral Acceleration	S_s = 1.322 S_1= 0.496	Figure 1613.3.1 (1) Figure 1613.3.1 (2)

Adjusted Spectral Response, S_{MS}, S_{MI}	S_{MS} = 1.322 S_{MI} = 0.746	Equation 16-37 Equation 16-38
Design Spectral Acceleration, S_{DS}, S_{D1}	S_{DS} = 0.881 S_{D1} = 0.497	Equation 16-39 Equation 16-40

6.2 Liquefaction

Strong vibratory motions such as those generated by earthquakes may cause liquefaction of granular soils. Soils that are highly susceptible to liquefaction are loose, granular and saturated. Liquefaction of soils may cause surface distress, loss of bearing capacity, and settlement of structures. Liquefaction is generally accepted to be restricted to within 50 feet of the surface due to confining pressures. The subject property does not exhibit subsurface geologic conditions that indicate susceptibility to liquefaction.

Lateral spreading is a ground-failure phenomenon that can also occur in association with liquefaction, whereby lateral displacements occur at the ground surface. Conditions required for lateral spreading include gently sloping terrain, and in particular, where a “free-face” (such as a creek bank) is nearby. Based on our review of the site topography and depth to the liquefiable layers, the potential for lateral spreading to occur is low.

6.3 Landslides and Slope Stability

Topographically, the Site is relatively flat. No landslides features are present at the Site or on adjacent properties that may affect the Site, and we do not consider the potential for land sliding to be a hazard to this project.

6.4 Expansive and Collapsible Soils

No expansive or collapsible soils were identified on the Site during our investigation.

6.5 Flood and Debris Flow Hazards

Review of the FIRM flood maps issued in October 2017 for the City of Fernley indicates that the Site is located in Flood Zone X or areas of minimal flooding. The Site is not located within areas within the 1.0 percent annual chance of flooding as shown on the Flood Hazards Map, Figure 6. Therefore, concerns for flooding or debris flows at the Site are considered very low.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Our conclusions and recommendations, based on our investigation conducted in November and December of 2018 follow:

7.1 General

7.1.1 Based upon the results of this investigation, the Site is suitable for the proposed development, provided the recommendations presented herein are implemented in the design and construction of the project.

7.1.2 Our field investigation indicates that the Site is primarily underlain by native aeolian and alluvial deposits of sand and silt. The deposits are dominantly silty sand to sandy silt with or without gravel extending to the total depth explored. In test pit TP-1, a thin layer of clayey sand (SC) was encountered.

7.1.3 Soil Conservation Service data and our local experience indicate that site soils are not aggressive for either Type II or Type IP concrete. However, site soils are moderately aggressive (corrosive) to very aggressive for uncoated steel. The project structural engineer should consider the use of coatings or other cathodic protection where uncoated steel may be in contact with saturated or very moist soils.

7.2 Seismic Design Criteria

7.2.1 The Site is located near faults capable of generating strong seismic shaking during the life of the project.

7.2.2 The Site is Site Class D or “very stiff soil profile” as defined by the 2012 IBC and as indicated by samples obtained during our investigation.

7.2.3 Structures should be designed in accordance with 2012 IBC Seismic requirements. Seismic design criteria obtained in accordance with the 2012 IBC/ASCE 7-10 are presented in Section 6.1 of this report.

7.2.4 Conformance to the criteria presented in Table 6.2 for seismic design does not constitute a guarantee or assurance that significant structural damage or ground failure will not occur if a maximum level earthquake occurs. The primary goal of seismic design is to protect life by avoiding building collapse and not to avoid structural damage entirely.

7.3 Soil Handling, Excavation and Grading

7.3.1 A preconstruction conference should be held at the Site prior to the beginning of grading operations with the owner, contractor, civil engineer and geotechnical engineer in attendance. Soil handling and grading requirements can be discussed at that time.

7.3.2 Site preparation should begin with the removal of brush, organic matter and debris spoils scattered throughout the Site. Prior to the commencement of grading, all domestic debris and refuse should be removed from the Site and disposed of as appropriate. The depth of removal should be such that material exposed in the cut areas or soils to be used as fill is relatively free of organic matter. It is estimated that grubbing depths will range from two to four inches in depth. Material generated during stripping is not suitable for use in structural areas but may be placed in landscaped or other non-structural areas if deemed suitable for the specific application.

7.3.3 All references to relative compaction and optimum moisture content in this report are based on the ASTM D1557 Test Procedure (Modified Proctor test).

7.3.4 Earthwork operations should be observed, and compacted fill tested by an RCI representative.

7.3.5 In our opinion, grading and excavations may be accomplished with light to moderate effort with conventional heavy-duty grading/excavation equipment. Excavations in native soils are not anticipated to generate significant quantities of oversized material (greater than six inches in dimension) that will require special handling or exporting from the Site.

7.3.6 Most near surface native soils are anticipated to be suitable for re-use as engineered. Soils with high silt contents below approximately two feet are not suitable as structural fill due to the high fines contents. Blending of the high silt content soils may be possible in order to meet structural fill requirements but is not considered practical due to the small scale of the project.

7.3.7 Imported structural fill material should meet the Standard Specifications for Public Works specifications (304.03). Structural fill is defined herein as all fill placed within three feet of foundations and all fill placed beneath pavement and flatwork sections. Import structural fill material should be sampled and approved by RCI prior to its transportation to the Site.

7.3.8 Temporary excavations, such as utility trench sidewalls excavated within undisturbed, unsaturated native soils or structural fill should remain near-vertical to depths of four feet. Some minor sloughing should be expected within some of the cleaner sand lenses or during periods of high precipitation. On-site imported or native soils and structural fill soils should be considered Type C by OSHA Standards in light of their sandy, locally cohesionless nature. It is the contractor's responsibility to provide sufficient and safe excavation support per OSHA Standards as well as protecting nearby utilities, structures, and other improvements, which may be damaged by earth movements.

7.3.9 During or immediately following wet weather, the near-surface soil or the bottom of overexcavated areas if left unprotected may deflect or pump under heavy equipment loads. Yielding soil conditions can typically be stabilized using one of the methods listed below. However, soil conditions and mitigation methods should be reviewed and approved by RCI when encountered.

- **Option 1.** Deeply scarify (10 to 12 inches) allow to air dry to near optimum moisture content and re-compact.
- **Option 2**. Remove unstable (wet) soils to a firm base and allow the wet subgrade soil to dry to near optimum moisture content and re-compact. Replace the removed soils with drier soil meeting the structural fill specifications.

Other stabilization alternatives may be appropriate depending on the situation. Consultation with RCI is crucial for expedient and appropriate mitigation.

7.4 Building Pad, Parking Lot Preparation and Fill Placement

7.4.1 For the purposes of this report, the structural building pad area should extend a minimum of four feet beyond the outside dimensions of the building.

7.4.2 Prior to fill placement, exposed surfaces should be scarified at least eight inches, moisture-conditioned to near optimum moisture content, and compacted to at least 90% relative compaction.

7.4.3 Structural fill should be placed in thin lifts (un-compacted thickness of eight inches or less), moisture-conditioned to near optimum moisture content, and compacted to at least 90% relative compaction prior to placement of the next lift. Depending on the type of equipment utilized by the contractor thicker lifts may be approved by the project geotechnical engineer upon request.

7.4.4 Soils utilized as fill within the building, flatwork, and parking areas should meet the *Standard Specifications for Public Works Construction(SSPWC)* minimum requirements for structural fill.

Table 7.4.4
SSPWC Structural Fill Requirements

Sieve	Percent Passing
4-inch	100
3/4-inch	70-100
No. 40	15-65
No. 200	5-20
Liquid Limit	35 Max.
Plasticity Index	12 Max.
R-value	30 Min.

7.5 Foundation Design Criteria

At the time of this report, no information on structural systems or details were available and therefore these recommendations should be considered preliminary.

7.5.1 Conventional foundations should consist of continuous perimeter strip (or spread) footings and isolated interior spread footings.

7.5.2 Where curtain walls (or frost walls) are employed they should be a minimum of six inches wide and extend to a minimum of 18 inches below exterior grade for frost protection.

7.5.3 Perimeter continuous footings should extend at least 18 inches below lowest adjacent exterior grade bearing on compacted native soils or structural fill. These embedment recommendations are crucial for frost protection, minimizing surface water intrusion, to develop bearing capacity, and to provide lateral force resistance. Final surface grading should provide for positive drainage away from the structure per the 2012 IBC. Footing and retaining wall foundation backfill should be compacted to at least 90% relative compaction.

7.5.4 Shallow perimeter foundations or column footings proportioned as recommended above may be designed for allowable soil bearing pressures of 2,500 pounds per square foot (psf) when founded on compacted native sandy soils or structural fill.

7.5.5 All allowable bearing values may be increased by one-third when considering transient loading due to wind or seismic forces.

7.5.6 Adjacent utilities should not be constructed in the zone of influence parallel to footings. The zone of influence may be taken to be the area beneath the footing and within a 1:1 plane

extending out and down from the bottom of the footing. Utility penetrations into the building envelope should be made perpendicular to the building stem wall (or curtain wall) if possible.

7.5.7 Post-construction total and differential settlements under static loading conditions are estimated to be less than 1 inch and 3/4 inch respectively.

7.5.8 The passive pressure used to resist lateral movement of conventional footings may be assumed to be equal to a fluid weighing 250 pounds per cubic foot (pcf). The coefficient of friction to resist sliding is 0.35 for concrete against native or structural fill soils. Combined passive resistance and friction may be utilized for design provided that the frictional resistance is reduced by 50%. For shallow footings near the ground surface (if any), the upper six inches of exterior embedment should not be included in calculations for resistance to lateral loads.

7.5.9 Foundation reinforcement should be designed by the project structural engineer.

7.6 Grading – Underground Utilities

7.6.1 Underground utility trenches within structural areas (building pads, parking lots, and streets) should be backfilled with properly compacted qualified material for use as bedding or backfill.

7.6.2 The majority of native soils have excessive amounts of fines to qualify for use as utility trench bedding. Importation of Class A bedding for utilities should be anticipated. Most material excavated from the trenches is anticipated to be adequate for on-site use as Class E backfill provided it does not contain clay, deleterious matter, vegetation or rock larger than six inches in maximum dimension.

7.6.3 Trench backfill should be placed in loose lifts not exceeding eight inches. The lifts should be compacted to a minimum of 90% relative compaction at or near optimum moisture content.

7.6.4 Bedding and pipe zone backfill should extend from the bottom of the trench excavation to a minimum of six inches above the crown of the pipe. Pipe bedding material should consist of Class A backfill material as defined by the Standard Specifications for Public Works. Bedding and pipe zone material should be hand compacted in 6-inch maximum lifts.

7.7 Grading – Pavement and Flatwork Areas

7.7.1 Both pavements and flatwork should be underlain by a minimum of six inches of aggregate base or structural fill to provide support and frost protection.

7.7.2 Soils exposed at the bottom of the excavation should be scarified six inches and compacted to a minimum of 90% relative compaction at or near optimum moisture content. If the surface has become dry and loose, it should be moisture conditioned and lightly compacted to a firm surface prior to the placement of additional fill or aggregate base.

7.7.3 The subgrade soils for pavements should be finished to a compacted smooth unyielding surface. We recommend proof-rolling the subgrade with a loaded water truck (or similar equipment) to verify the stability of the subgrade prior to placing aggregate base.

7.7.4 Aggregate base used to support pedestrian and vehicular pavements should be compacted to a minimum of 95% relative compaction.

7.8 Slabs-on-Grade

Conventional concrete slab-on-grade recommendations presented herein are intended to reduce the potential for cracking of slabs as a result of differential movement. However, even with the incorporation of the recommendations presented herein, slabs-on-grade will still exhibit some cracking. The occurrence of concrete shrinkage cracks is independent of the soil supporting characteristics. Their occurrence may be reduced and/or controlled by limiting the slump of concrete, the use of crack control joints and proper concrete placing and curing. Adherence to ACI and Portland Concrete Association (PCA) recommendations including those for low humidity and wind, if applicable, should be incorporated into project construction practices.

7.8.1 Slab floors are suitable for the buildings if prepared as recommended in Section 7.7. A minimum 10-mil-thick vapor retarder meeting ASTM E1745-97 Class C requirement shall be placed below the slab where interior moisture is considered undesirable. At a minimum, one-inch (minimum) layers of clean sand should be provided above and below the vapor barrier material so as to protect it from puncture or damage. To reduce the potential for punctures, a higher quality vapor retarder (15 mil. Class A or B) may be used. The vapor retarder, if used, should extend to the edges of the slab, and should be sealed at all seams and penetrations. In any case, care should be taken to avoid any disturbance or rupture to the water-proofing measures throughout the construction process.

7.8.2 Slab floors should be underlain by a minimum of six inches of compacted (95% minimum relative density) aggregate base. Slab thickness and reinforcement should be determined by the structural engineer based on the anticipated loading.

7.8.3 If a significant amount of time has passed since building pad grading and the soil surface of the building pad has become dry, then it should be re-moistened prior to placing the moisture retarding system. The building pad should be moistened by soaking or sprinkling such that the upper 12 inches of soil is near optimum moisture, as determined by an RCI representative at least 48 hours before concrete placement.

7.8.4 Some floor coverings, such as tile or linoleum, are sensitive to moisture that can be transmitted from and through the slab. Slab floors should be moist cured for a minimum of seven days prior to placing any floor coverings. Floor coverings should be installed in accordance with the manufacturer's recommendations including any moisture transmissivity testing requirements.

7.8.5 A modulus of subgrade reaction (k) of 250 pounds per cubic inch (pci) is recommended for the structural design of slabs. This value assumes contact with the sand or aggregate base materials.

7.8.6 Crack control spacing should be determined by the project structural engineer based on slab thickness and intended usage.

7.8.7 All exterior concrete should be air entrained with from 4.5% to 7.0% air content. The water cement ratio for all exterior concrete should be 0.45 or less. The use of mid-range plasticizer is recommended to facilitate the finishing process while maintaining the desired water cement ratio.

7.8.8 Exterior concrete should be placed and finished in accordance with American Concrete Institute (ACI) recommendations for concrete placed in areas subject to freeze-thaw environments.

7.9 Pavement

7.9.1 Pavement sections are intended for on-site use only. Pavement sections are based on Asphalt Institute recommendations for parking areas subject to automobile and truck traffic.

7.9.2 The following preliminary asphalt concrete pavement section is recommended for design to establish subgrade elevations for pedestrian walkways parking areas and driveways.

Table 7.9.2
Preliminary Flexible Pavement Sections*

	AC Thickness (inches)	AB Thickness (inches)
Pedestrian Walkways, Automobile Parking and Driveway Areas	3.0	6.0
Driveways Subject to Truck Traffic and Dumpster Areas	4.0	8.0

***No automobile parking or driveway areas are envisioned for the current project however it is our understanding that they may be added at a future date.**

The preliminary pavement section is based on the following assumptions:

- The subgrade soil has an R-Value of 30 or higher.
- The Type 2, Class B Aggregate Base (AB) has a minimum R-Value of 70 and meets the requirements of the *Standard Specifications for Public Works Construction*.
- The aggregate base is compacted to 95% or higher relative compaction at or near optimum moisture content.
- Soil subgrade has been prepared as previously recommended.
- Asphalt concrete should conform to Section 320.02 of the *Standard Specifications for Public Works Construction*.

It is recommended that the use of 64PG-NV (polymerized asphalt oil or equivalent) be considered as we have found that it substantially reduces cracking due to thermal stresses prevalent in the freeze thaw environment of this area. The savings in long-term maintenance of the pavement, including crack sealing, is in our opinion worth the extra expense. However, this recommendation is optional in that it is relative to frequency of maintenance only and does not affect structural calculations.

7.9.3 If Portland Concrete Cement (PCC) driveways or pedestrian walkways are required, they should be constructed as shown in Table 7.9.3 below.

Table 7.9.3
PCC Pavement Sections

Location	PCC Thickness (inches)	AB Thickness (inches)
Automobile Parking Areas and Driveways	5.0	6.0
Pedestrian Walkways	4.0	6.0

- Subgrade soils should be compacted to a minimum of 90% of maximum dry density. Aggregate base should be compacted to at least 95% of maximum dry density.
- The minimum compressive strength (28-day) should be at least 4,000 psi and meet the requirements stated in Section 7.8 of this report as appropriate. Traffic on the slab should be avoided until at least 80% of the design strength has been verified by testing. Reinforcement of the PCC driveways should be specified by the project structural (or civil) engineer.
- Construction (or crack control) joints should also be as recommended by the project structural (or civil) engineer.

7.10 Site Drainage

7.10.1 Adequate drainage is crucial to reduce the potential for differential soil movement, erosion and subsurface seepage. Under no circumstances should water be allowed to pond adjacent to footings. The Site should be graded and maintained such that surface drainage is directed away from structures and the top of slopes into swales or other controlled drainage devices. The percent fall of slopes around structures should be as per the most current version of the IBC as adopted by the local governing agency.

7.10.2 Roof and pavement drainage should be directed into conduits to carry runoff away from the structures. Landscape irrigation should be kept at least three feet away from all foundations. We recommended that drip irrigation be installed within six feet of foundations wherever feasible.

8.0 FURTHER GEOTECHNICAL SERVICES

8.1 Plan and Specification Review

We should review the improvement plans, foundation plans, and specifications prior to final design submittal to assess whether our recommendations have been properly implemented and evaluate if additional analysis and/or recommendations are required.

8.2 Testing and Observation Services

The recommendations provided in this report are based on the assumption that we will continue as Geotechnical Engineer-of-Record throughout each construction phase. It is important to maintain continuity of geotechnical interpretation and confirm that field conditions encountered are similar to those anticipated during design. In accordance with 2012 IBC, testing and observation services by the Geotechnical Engineer-of-Record are required to verify that construction has been performed in accordance with this report, approved plans and specifications. If we are not retained for these services, we cannot assume any responsibility for other's interpretation of our recommendations or the future performance of the project.

9.0 LIMITATIONS AND UNIFORMITY OF CONDITIONS

The recommendations of this report pertain only to the site investigated and are based upon the assumption that the soil conditions do not deviate from those disclosed in the investigation. If any variations or undesirable conditions are encountered during construction, or if the proposed construction will differ from that anticipated herein, we should be notified so that supplemental

recommendations can be given. The evaluation or identification of the potential presence of hazardous materials or environmental contamination was not part of our scope of services.

This report is issued with the understanding that it is the responsibility of the owner or their representative to ensure that the information and recommendations contained herein are brought to the attention of the design team for the project and incorporated into the plans and specifications, and the necessary steps are taken to see that the contractor and subcontractors carry out such recommendations in the field.

The recommendations contained in this report are preliminary until verified during construction by representatives of RCI. Changes in the conditions of a property can occur with the passage of time, whether they are due to natural processes or the works of man on this or adjacent properties. Additionally, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated partially or wholly by changes outside our control. Therefore, this report is subject to review and should not be relied upon after a period of three years.

Our professional services were performed, our findings obtained, and our recommendations prepared in accordance with generally accepted geotechnical engineering principles and practices used in the City of Fernley at this time. No warranty is expressed or implied.

GENERAL NOTES

1 PER 2019 CBC SECTION 703.7: FIRE WALLS, FIRE BARRIERS, AND SMOKE PARTITIONS OR ANY OTHER WAL REQUIRED TO HAVE PROTECTED OPENINGS OR PENETRATIONS SHALL BE EFFECTIVELY AND PERMANENTLY IDENTIFIED WITH SIGNS OR STENCILING. SUCH IDENTIFICATION SHALL: (1) BE LOCATED WITHIN 15' OF THE END OF EACH WALL AND AT INTERVALS NOT EXCEEDING 30' MEASURED HORIZONTALLY ALONG THE WALL OR PARTITION; AND (3) INCLUDE LETTERING NOT LESS THAN 3" IN HEIGHT WITH A MINIMUM 3/8" STROKE IN A CONTRASTING COLOR INCORPORATING THE SUGGESTED WORKING: "FIRE AND/OR SMOKE BARRIER - PROTECT ALL OPENINGS" OR OTHER WORDING.

BASIS OF BEARING

THE BASIS OF BEARINGS FOR THIS SURVEY IS THE NEVADA STATE PLANE COORDINATE SYSTEM, WEST ZONE NAD83(94), AS DETERMINED FROM REAL TIME KINEMATIC GPS OBSERVATIONS, OBSERVED MARCH 25, 2022 USING A SURVEY GRADE DUAL FREQUENCY GPS RECEIVER WITH TRIMBLE VRS CORRECTIONS FROM CONTINUOUSLY OPERATING REFERENCE STATION (CORS) "FERNLEY" MODIFIED BY A COMBINED FACTOR OF 1.000245, SCALED FROM 0.00N ,0.00E AND CONVERTED TO U.S. SURVEY FEET. ALL DIMENSIONS ON THIS MAP ARE GROUND DISTANCES.

BASIS OF ELEVATION

DATUM: NAVD 88
PROJECT BENCHMARK = CORS) FERNLEY
HAVING AN ELEVATION OF 4188.84

NOTES:

GENERAL

1. ALL WORK SHALL CONFORM TO THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (ORANGE BOOK), LATEST EDITION.
2. THE CONTRACTOR SHALL REFER TO THE STANDARD DETAILS FOR PUBLIC WORKS CONSTRUCTION, AS ADOPTED BY THE PERMITTING ENTITY, FOR ALL DETAILING NOT SHOWN ON THESE PLANS.
3. CONSTRUCTION SHALL COMPLY WITH THESE PLANS AND CURRENT CITY OF FERNLEY AND NDOT STANDARD PLANS/SPECIFICATIONS (STANDARD SPECIFICATIONS) AND MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD).
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ARRANGING A PRE-CONSTRUCTION JOB SITE CONFERENCE WITH GOVERNING AGENCIES INCLUDING THE CITY OF FERNLEY, ALL UTILITY COMPANIES, OWNER'S REPRESENTATIVES, AND THE PROJECT ENGINEER PRIOR TO COMMENCING WORK. THIS MEETING SHALL BE HELD AT LEAST FORTY-EIGHT (48) HOURS, OR TWO (2) BUSINESS DAYS, PRIOR TO THE START OF CONSTRUCTION AND SHALL COMMUNICATE SCHEDULES, CONTRACTORS MEAN AND METHODS, MATERIALS TO BE USED, AND OTHER RELEVANT MATTERS ASSOCIATED WITH THE CONSTRUCTION OF THE PROJECT.
5. AT THE COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL SCHEDULE A FINAL WALK-THROUGH INSPECTION WITH THE PROJECT ENGINEER AND THE CITY OF FERNLEY. ALL CONSTRUCTION WILL BE SUBJECT TO FINAL APPROVAL BY THE PROJECT ENGINEER AND CITY OF FERNLEY. AT THE DISCRETION OF THE PROJECT ENGINEER, ALL IMPROVED AREAS SHALL BE SUBJECT TO A FLOW TEST TO ENSURE CONSTRUCTED GRADES MEET THE INTENT OF THE PLANS. IMPROVED AREAS DEVIATING FROM THESE PLANS THAT DO NOT ADEQUATELY DRAIN WILL BE REMOVED AND RECONSTRUCTED AT THE CONTRACTOR'S EXPENSE.
6. ALL WORK EITHER DIRECTLY OR INDIRECTLY RELATED TO THE PROJECT SHALL BE COORDINATED WITH THE APPROPRIATE UTILITY SYSTEM MANAGER.
7. THE CONTRACTOR SHALL MAINTAIN AN ONSITE RECORD COPY OF ALL DRAWINGS, SPECIFICATIONS, ADDENDA, CHANGE ORDERS, WORK CHANGE DIRECTIVES, FIELD ORDERS, FIELD CHANGES, AND WRITTEN INTERPRETATIONS AND CLARIFICATIONS. RECORDS SHALL BE IN GOOD ORDER AND ANNOTATED TO SHOW CHANGES MADE DURING CONSTRUCTION.
8. CONTRACTOR SHALL PROVIDE MATERIALS AND EQUIPMENT SUBMITTALS AND/OR SHOP DRAWINGS TO THE PROJECT ENGINEER FOR REVIEW PRIOR TO ORDERING OR INSTALLATION. A SIGNED SET OF REVIEWED SUBMITTALS MUST ALWAYS BE AVAILABLE ONSITE DURING CONSTRUCTION.
9. DETAILS NOT SHOWN ON THESE PLANS ARE PER ORANGE BOOK AND CITY OF FERNLEY STANDARDS.
10. THE CONTRACTOR SHALL CALL UNDERGROUND SERVICE ALERT AT 1-800-642-2444 TO PROVIDE FIELD LOCATIONS OF UNDERGROUND UTILITIES PRIOR TO THE START OF CONSTRUCTION.
11. THE LOCATION OF EXISTING UTILITIES SHOWN ON THESE PLANS ARE BASED ON THE BEST INFORMATION AVAILABLE TO THE ENGINEER. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY PROPOSED POINTS OF CONNECTION AND IN AREAS OF POSSIBLE CONFLICT WITH NEW UTILITY INSTALLATION PRIOR TO BEGINNING CONSTRUCTION. SHOULD THE CONTRACTOR FIND ANY DISCREPANCIES BETWEEN THE CONDITIONS EXISTING IN THE FIELD AND THE INFORMATION SHOWN ON THESE DRAWINGS, THE CONTRACTOR SHALL NOTIFY THE ENGINEER BEFORE PROCEEDING WITH CONSTRUCTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO PROTECT AND MAINTAIN ALL EXISTING UTILITIES WHETHER OR NOT SHOWN ON THE PLAN.
12. THE CONTRACTOR SHALL BE RESPONSIBLE TO PROCURE ALL NECESSARY PERMITS, LICENSES, INSURANCE POLICIES, ETC. AS MAY BE NECESSARY TO COMPLY WITH LOCAL, COUNTY, STATE, AND FEDERAL LAWS ASSOCIATED WITH THE PERFORMANCE OF THE WORK; UNLESS OTHERWISE OBTAINED BY THE OWNER.
13. THE CONTRACTOR SHALL PREPARE A TRAFFIC CONTROL PLAN AND PROVIDE, PLACE, AND MAINTAIN ALL LIGHTS, SIGNS, BARRICADES, FLAG PERSONS, PILOT CAR, OR OTHER DEVICES NECESSARY TO CONTROL TRAFFIC THROUGH THE CONSTRUCTION AREA AND FOR PUBLIC SAFETY. ALL TRAFFIC CONTROL OPERATIONS SHALL COMPLY WITH THE LATEST MUTCD AND CONFORM TO THE NEVADA WORK ZONE TRAFFIC CONTROL HANDBOOK AND CITY OF FERNLEY REQUIREMENTS. AT NO TIME WILL OBSTRUCTIONS BE LEFT IN THE ROADWAY DURING NIGHT HOURS. ALL TRAFFIC CONTROL PLANS SHALL BE PREPARED BY A REGISTERED CIVIL ENGINEER OR ATTSA CERTIFIED PERSONNEL.
14. THE CONTRACTOR AGREES TO ASSUME SOLE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY, AND FURTHER AGREES THAT THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS IN ACCORDANCE WITH THE PROVISIONS OUTLINED BY THE PROJECT CONTROL AND THE STANDARD SPECIFICATIONS.
15. THE CONTRACTOR SHALL BE SOLELY AND COMPLETELY RESPONSIBLE FOR COMPLIANCE WITH ALL APPLICABLE PROVISIONS OF OSHA AND NRS CHAPTER 618.
16. THE CONTRACTOR SHALL PURSUE THE WORK IN A CONTINUOUS AND DILIGENT MANNER, CONFORMING TO ALL THE PERTINENT SAFETY REGULATIONS TO ENSURE A TIMELY COMPLETION OF THE PROJECT.
17. THE CONTRACTOR SHALL MAINTAIN A CLEAN PROJECT SITE, REMOVING CONSTRUCTION DEBRIS AT THE END OF EACH ACTIVITY DAY. THE CONTRACTOR SHALL MAINTAIN DEBRIS FREE CONSTRUCTION ROUTES, ADJACENT STREETS AND STORM DRAIN SYSTEMS.
18. TEMPORARY CONSTRUCTION FENCING SHALL BE PROVIDED AND MAINTAINED BY THE CONTRACTOR THROUGHOUT THE DURATION OF THE PROJECT IN AREAS AS DELINEATED ON THE PLANS OR AS DIRECTED BY THE PROJECT ENGINEER. THE TEMPORARY FENCING SHALL PREVENT CHILDREN AND PETS FROM ENTERING THE CONSTRUCTION AREA, CREATE A VISUAL BARRIER OF THE CONSTRUCTION ACTIVITIES FROM THE ADJACENT RESIDENCE AND YARDS, AND PROTECT VEGETATION FROM CONSTRUCTION EQUIPMENT.
19. THE CONTRACTOR SHALL USE ONLY AUTHORIZED SITES FOR STORAGE OF EQUIPMENT AND MATERIALS AND OBTAIN PROPER APPROVALS FROM THE LAND OWNER AND LOCAL GOVERNING AUTHORITY TO DO SO. CONTRACTOR SHALL BE RESPONSIBLE FOR THE SECURITY OF ALL EQUIPMENT AND MATERIALS.
20. CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL EXISTING SURVEY MONUMENTS AND OTHER SURVEY MARKERS DURING CONSTRUCTION. IN THE EVENT A MONUMENT IS DISTURBED, THE CONTRACTOR SHALL HAVE THE MONUMENT REPLACED, AT HIS OWN EXPENSE, BY A LICENSED SURVEYOR IN THE STATE OF THE PROJECT SITE.
21. CONSTRUCTION HOURS SHALL BE WEEKDAYS BETWEEN 7:00 AM AND 6:00 PM UNLESS OTHERWISE DICTATED BY LOCAL ORDINANCE. CONTRACTOR SHALL OBTAIN APPROVAL FROM THE PROJECT ENGINEER TO MODIFY WORK HOURS.
22. ALL FIELD CHANGES MUST BE PRE-APPROVED BY THE PROJECT ENGINEER.
23. SHOULD IT APPEAR THAT THE WORK TO BE DONE, OR ANY MATTER RELATIVE THERETO, IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
24. ALL SALVAGED MATERIALS ARE THE PROPERTY OF THE OWNER AND SHALL BE PALLETIZED ONSITE UNLESS OTHERWISE ARRANGED WITH THE OWNER AND/OR PROJECT ENGINEER.
25. ALL WORK SHALL BE COORDINATED WITH THE PROJECT ENGINEER AND CITY OF FERNLEY. NO ADDITIONAL PAYMENTS FOR EXTRA WORK WILL BE MADE TO THE CONTRACTOR WITHOUT PRIOR WRITTEN AUTHORIZATION BY THE PROJECT ENGINEER OR CITY OF FERNLEY.
26. THE OWNER IS RESPONSIBLE FOR FURNISHING QUALIFIED SITE INSPECTIONS AS REQUIRED TO COMPLY WITH LOCAL ORDINANCES.
27. A GEOTECHNICAL INVESTIGATION WAS PERFORMED ON THIS PROJECT. ALL RECOMMENDATIONS INCLUDED IN THE REPORT ARE HEREBY MADE A PART OF THE CONSTRUCTION DOCUMENTS UNLESS MODIFIED WITHIN THESE PLANS. INSPECTION AND TESTING DURING CONSTRUCTION SHALL BE REQUIRED IN ACCORDANCE WITH THE RECOMMENDATIONS CONTAINED WITHIN THE REPORT.
    TITLE: GEOTECHNCIAL INVESTIGATION REPORT, FERNLEY COMMUNITY CENTER COMPLEX, APRIL, 2022 BY LUMOS & ASSOCIATES

UNDERGROUND UTILITIES

28. THE CONTRACTOR SHALL FIELD VERIFY UTILITY LOCATIONS NEAR OR WITHIN THE CONSTRUCTION LIMITS WITH THE RESPECTIVE UTILITY COMPANIES PRIOR TO BEGINNING CONSTRUCTION. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO ARRANGE FOR THE NECESSARY RELOCATION OF ANY UTILITY. THE CONTRACTOR SHALL NOTIFY ALL UTILITY COMPANIES INVOLVED AT LEAST FORTY-EIGHT (48) HOURS PRIOR TO BEGINNING WORK.
29. NO OTHER UTILITIES MAY BE PLACED IN A WATER OR SEWER TRENCH.
30. ALL VALVE BOXES, MANHOLE STRUCTURES, AND CLEAN OUTS SHALL BE MARKED AND ACCESSIBLE AT ALL TIMES.
31. CONTRACTOR SHALL SUPPORT TRENCH SIDEWALLS IN ACCORDANCE WITH ALL APPLICABLE LAWS AND GOVERNING SAFETY REGULATIONS. SHEETING OR SHORING SHALL CONFORM TO LOCAL REGULATIONS AND OSHA STANDARDS.
32. ENDS OF UNFINISHED PIPE SHALL BE SEALED AT THE END OF EACH DAY.
33. PIPE SHALL BE LAID IN THE UPHILL DIRECTION, WITH BELL ENDS UPHILL.
34. THE CONTRACTOR SHALL COORDINATE ALL WATER MAIN SHUT DOWNS AND TIE-INS WITH THE WATER UTILITY A MINIMUM OF FORTY-EIGHT (48) HOURS OR TWO (2) BUSINESS DAYS IN ADVANCE.
35. ALL UNDERGROUND VALVES, TEES, FITTINGS, ETC. LARGER THAN 2" SHALL BE COATED TO PROTECT AGAINST CORROSION.
36. ALL WATER PROJECT MATERIAL (PIPES, VALVES, LATERALS AND APPURTENANCES) SHALL BE LEAD FREE AND MEET THE MINIMUM REQUIREMENTS OF THE NEVADA ADMINISTRATIVE CODE AND NSF/ANSI 61.
37. ALL THRUST BLOCKS SHALL BE INSPECTED PRIOR TO BACK-FILL.
38. ALL BOLTS AT THRUST BLOCKS AND VALVE SADDLES SHALL BE COVERED WITH VISQUEEN AND TAPED PRIOR TO CONCRETE PLACEMENT.
39. THE WATER MAINS SHALL NOT BE PLACED INTO SERVICE UNTIL:
    a. THE WATER MAIN HAS BEEN DISINFECTED IN ACCORDANCE WITH AWWA, NEVADA DEPARTMENT OF ENVIRONMENTAL PROTECTION (NDEP), THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTIONS STANDARDS.
    b. THE DISPOSAL OF ANY SPENT CHLORINE SOLUTIONS MUST BE COORDINATED WITH NDEP'S BUREAU OF WATER POLLUTION CONTROL.
    c. ANALYSIS OF THE WATER MAIN WHICH INDICATE THAT THE WATER MEETS PRIMARY DRINKING WATER STANDARDS FOR COLIFORM BACTERIA (ABSENT FOR COLIFORM BACTERIA) HAVE BEEN OBTAINED AND REPORTED TO NDEP'S BUREAU OF SAFE DRINKING WATER. SAMPLING SHALL BE IN ACCORDANCE WITH NDEP REGULATIONS.
37. PVC PIPE SHALL BE TESTED PER AWWA C605 AND DUCTILE IRON PIPE SHALL BE TESTED FOR AWWA C600. OTHER MATERIALS SHALL BE TESTED PER REQUIREMENTS IN THE STANDARD SPECIFICATION FOR PUBLIC WORKS CONSTRUCTION SECTION 336.
38. CONTRACTOR SHALL CONDUCT PIPING TESTS BEFORE JOINTS ARE COVERED AND AFTER THRUST BLOCKS HAVE HARDENED SUFFICIENTLY. FILL PIPELINE 24 HOURS BEFORE TESTING AND APPLY TEST PRESSURE TO STABILIZE SYSTEM. USE ONLY POTABLE WATER.
39. CONTRACTOR SHALL PERFORM PLASTIC PIPE BALL AND MANDREL TEST ON NEWLY INSTALLED SEWER PIPE IN ACCORDANCE WITH THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION.
40. CONTRACTOR SHALL PERFORM AIR PRESSURE TESTING ON NEWLY INSTALLED SEWER PIPE IN ACCORDANCE WITH THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTIONS.

GRADING, EXCAVATION & SURFACE IMPROVEMENTS

41. THE CONTRACTOR IS RESPONSIBLE FOR PERFORMING THEIR OWN QUANTITY TAKE-OFF AND SHALL BUDGET THE PROJECT ACCORDINGLY. ALL EXCESS GRADING MATERIALS SHALL BE DISPOSED OF OFFSITE.
42. ALL EARTHWORK ACTIVITIES SHALL BE IN ACCORDANCE WITH THE PROJECT'S GEOTECHNICAL REPORT.
43. THE SOILS ENGINEER SHALL APPROVE ALL EARTHWORK AND GRADING TO CONFIRM COMPACTION REQUIREMENTS ARE MET.
44. CONTRACTOR SHALL PROTECT EXISTING PAVING, CONCRETE, LANDSCAPING, FENCING, MAILBOXES, SIGNS AND ANY OTHER IMPROVEMENTS NOT SPECIFICALLY CALLED OUT FOR REPLACEMENT. CONTRACTOR SHALL REPAIR/REPLACE ANYTHING DAMAGED BY FORCES UNDER THEIR EMPLOY OR CONTRACT.
45. ALL ASPHALT CONCRETE SURFACES SHALL BE SAWCUT THREE FEET MINIMUM INSIDE THE EDGE OF PAVEMENT TO A NEAT, STRAIGHT LINE AND REMOVED. THE EXPOSED PAVEMENT TIE-IN EDGES SHALL BE METICULOUSLY CLEANED OF ALL LOOSE MATERIAL AND THEN TREATED WITH BITUMINOUS EMULSION PRIOR TO PAVING. THE EXPOSED BASE MATERIALS SHALL BE GRADED AND RECOMPACTED PRIOR TO PAVING.

ENVIRONMENTAL

46. ALL CONSTRUCTION SHALL BE PERFORMED IN COMPLIANCE WITH THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES). CONTRACTOR IS RESPONSIBLE FOR ACQUIRING AND MAINTAINING A SWPPP.
47. INSTALLATION AND MAINTENANCE OF EROSION CONTROL MEASURES ARE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PREVENTION OF EROSION AND SILTATION FROM ENTERING THE STORM DRAIN SYSTEM, NATURAL DRAINAGE COURSES, AND/OR INTRUDING UPON ADJACENT ROADWAYS AND PROPERTIES. EROSION CONTROL MEASURES SHOWN ON THESE PLANS ARE INTENDED AS A GUIDE. ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED AS DETERMINED IN THE FIELD. THIS RESPONSIBILITY SHALL APPLY THROUGHOUT THE COURSE OF CONSTRUCTION AND UNTIL ALL DISTURBED AREAS HAVE BECOME STABILIZED AND SHALL NOT BE LIMITED TO WET WEATHER PERIODS. THE CONTRACTOR IS RESPONSIBLE FOR SWPPP UPDATES.
48. THE CONTRACTOR SHALL MAINTAIN AN ON-GOING DUST CONTROL PROGRAM INCLUDING WATERING OF OPEN AREAS, TO CONFORM WITH THE LATEST FEDERAL, STATE, AND COUNTY AIR POLLUTION REGULATIONS. CONTRACTOR IS RESPONSIBLE FOR OBTAINING AND UPDATING DUST CONTROL PERMITS FOR THE PROJECT.
49. ALL AREAS DISTURBED AND LEFT UNDEVELOPED FOR A PERIOD OF MORE THAN 30 DAYS SHALL BE STABILIZED BY THE APPLICATION OF AN APPROVED DUST PALLIATIVE OR HYDROMULCH.
50. THE CONTRACTOR SHALL IDENTIFY A STANDBY CREW FOR EMERGENCY WORK AND THEY SHALL BE AVAILABLE AT ALL TIMES. MATERIAL NECESSARY TO FACILITATE RAPID CONSTRUCTION OF TEMPORARY DEVICES OR TO REPAIR DAMAGED EROSION CONTROL MEASURES SHALL BE AVAILABLE ON-SITE AND STOCKPILED AT APPROVED LOCATIONS.
51. PROTECTIVE MEASURES AND TEMPORARY DRAINAGE PROVISIONS SHALL BE USED TO PROTECT ADJOINING PROPERTIES DURING CONSTRUCTION OF IMPROVEMENTS.
52. AFTER A RAINSTORM, ALL SILT AND DEBRIS SHALL BE REMOVED FROM CHECK BERMS AND DESILTING FACILITIES. GRADED SLOPE SURFACE PROTECTION MEASURES DAMAGED DURING THE RAINSTORM SHALL ALSO BE REPAIRED.
53. FILL SLOPES AT THE PROJECT PERIMETER MUST DRAIN AWAY FROM THE TOP OF THE SLOPE AT THE END OF EACH WORKING DAY.
54. ALL DISTURBED AREAS ARE REQUIRED TO HAVE A PALLIATIVE APPLIED FOR DUST CONTROL. ALL GRADING SHALL COMPLY WITH STATE AND COUNTY REGULATIONS.
55. A SIX-FOOT HIGH PERIMETER FENCE OR A 24-HOUR GUARD SHALL BE POSTED ON THE SITE WHENEVER THE DEPTH OF WATER IN A FACILITY EXCEEDS 18".
56. ALL AREAS DISTURBED BECAUSE OF THE WORK SHALL BE REVEGETATED IN ACCORDANCE WITH INDUSTRY BEST MANAGEMENT PRACTICES.
57. NO CONSTRUCTION MATERIALS SHALL BE STORED IN A STREAM ENVIRONMENT ZONES (SEZ) AT ANY TIME.
58. IF GROUNDWATER IS ENCOUNTERED, THE CONTRACTOR SHALL STOP WORK IMMEDIATELY, PREPARE A DEWATERING PLAN, AND OBTAIN APPROVAL FROM THE PROJECT ENGINEER BEFORE PROCEEDING WITH WORK. DEWATERING ACTIVITIES MAY REQUIRE THE CONTRACTOR TO OBTAIN A DISCHARGE/PUMPING PERMIT FROM THE STATE. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN SUCH PERMITS.
59. ALL STREETS SHALL BE MAINTAINED FREE OF DUST AND MUD CAUSED BY GRADING OPERATIONS.

Date: MARCH 21, 2023

Sheet No:

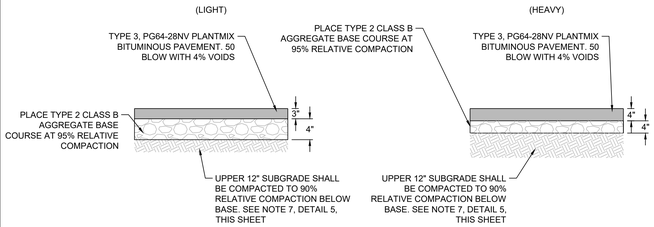
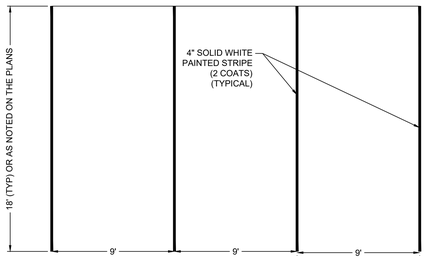
C4.00



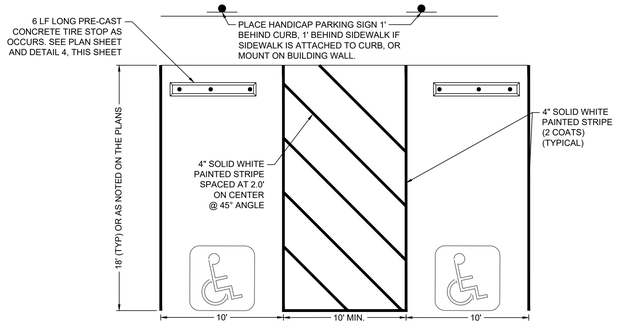
NOTE:
REFERENCE GEOTECHNICAL INVESTIGATION BY LUMOS & ASSOCIATES

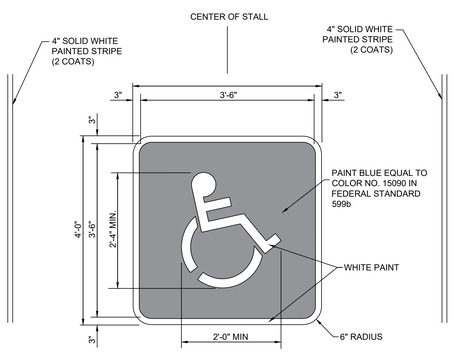
1 C5.00 PAVEMENT SECTION
SCALE: NTS



NOTE:
ALL PRIVATE PAVEMENT MARKING AND STRIPING SHALL MEET THE STANDARDS FOR TRAFFIC PAINT AND BE INSTALLED IN ACCORDANCE WITH SPECIFICATIONS 214.00 AND 324.00 OF THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (LATEST EDITION).

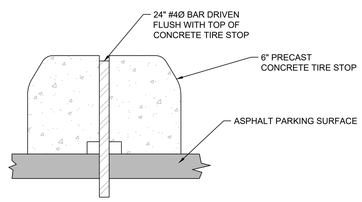
2 C5.00 STANDARD PARKING DETAIL
SCALE: NTS





*SYMBOL AND BORDER TO HAVE 3" WIDE STROKE

3 C5.00 ADA PARKING DETAIL
SCALE: NTS



4 C5.00 PRECAST P.C.C. WHEEL STOP
SCALE: NTS

NOTES:

1. ALL BITUMINOUS PLANTMIX PAVEMENT SHALL CONFORM TO THE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION (SSPWC), LATEST EDITION.
2. BITUMINOUS PLANTMIX SHALL BE COMPACTED TO 92% THEORETICAL MAXIMUM RICE SPECIFIC GRAVITY (MINIMUM) IN ALL PLACEMENT LOCATIONS.
3. AGGREGATE BASE MATERIAL SHALL BE TYPE 2, CLASS B CRUSHED AGGREGATE BASE COMPACTED TO 95% RELATIVE COMPACTION. MATERIALS SHALL CONFORM TO SSPWC SECTION 200. AGGREGATE BASE SHALL BE COMPACTED BY A MINIMUM OF FIVE PASSES WITH A MINIMUM 10-TON DRUM ROLLER.
4. NO PAVING OPERATIONS SHALL OCCUR UNTIL A TEMPERATURE OF 40 DEGREES FAHRENHEIT AND RISING IS OBTAINED. NO PAVING OPERATIONS SHALL OCCUR ON FROZEN SUBGRADE.
5. MISCELLANEOUS PAVEMENT AREAS INCLUDING UTILITY ACCESS ROADS MAY BE 50 BLOW TYPE 2 OR TYPE 3 ASPHALT WITH 3% AIR VOIDS.
6. ASPHALT AND BASE THICKNESS SHALL BE THICKENED FOR PAVEMENT CUTS IN PUBLIC RIGHT-OF-WAY PURSUANT TO CITY STANDARDS.
7. THE UPPER 12" OF SUBGRADE BELOW ALL ASPHALT PAVING AND CONCRETE FLATWORK SHALL BE SUITABLE STRUCTURAL GRADE MATERIAL OR IT SHALL BE REMOVED AND REPLACED WITH STRUCTURAL FILL OR CLASS E MATERIAL MEETING STRUCTURAL FILL REQUIREMENTS PURSUANT TO THE GEOTECHNICAL REPORT.
8. A TACK COAT OF SS-1h ASPHALT EMULSION, DILUTED WITH 50-50 WATER, SHALL BE APPLIED TO ALL VERTICAL ASPHALT OR CONCRETE JOINT SURFACES PRIOR TO PLACEMENT OF PLANTMIX BITUMINOUS PAVEMENT. THE APPLICATION RATE SHALL BE 0.10 TO 0.15 GALLONS PER SQUARE YARD.
9. WHEN MORE THAN ONE COURSE OF ASPHALT CONCRETE IS PLACED, THE SURFACE OF THE FIRST COURSE SHALL BE TREATED WITH A TACK COAT OF SS-1h ASPHALT EMULSION, DILUTED 50-50 WITH WATER, APPLIED AT THE RATE OF 0.05 TO 0.10 GALLONS PER SQUARE YARD.
10. A FOG SEAL COAT OF SS-1h ASPHALT EMULSION, DILUTED 50-50 WITH WATER SHALL BE APPLIED TO ALL COMPLETED ASPHALT SURFACES IN ACCORDANCE WITH SSPWC 317.03.05. THE FOG SEAL SHALL BE APPLIED AT THE RATE OF 0.07-0.12 GALLONS PER SQUARE YARD. APPLICATION SHALL NOT COMMENCE UNTIL AT LEAST TWENTY-FOUR (24) HOURS AFTER FINAL ROLLING. THE PAVEMENT TEMPERATURE SHALL BE AT LEAST 65 DEGREES FAHRENHEIT AT THE TIME OF APPLICATION, AND THE AMBIENT TEMPERATURE SHALL BE AT LEAST 50 DEGREES FAHRENHEIT.
11. USE OF RECYCLED AGGREGATE BASE ON PRIVATE IMPROVEMENTS SHALL BE SUBJECT TO THE DISCRETION OF THE GEOTECHNICAL ENGINEER AND MAY BE SUBJECT TO ADDITIONAL TESTING REQUIREMENTS.

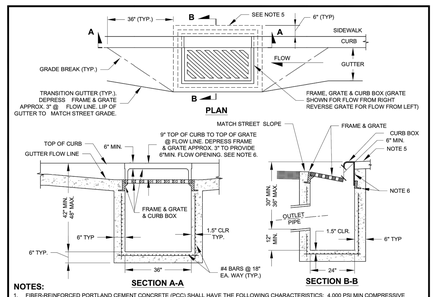
MANHOLE FRAME AND COVER

Detail No. 90 — SEWER

DATE	REVISIONS	BY
12/03	ADD MANHOLE FRAME AND COVER	MJ
12-04	RENUMBER	MJ



NOTES:
1. FIBER-REINFORCED PORTLAND CEMENT CONCRETE (PCC) SHALL HAVE THE FOLLOWING CHARACTERISTICS: 4,000 PSI MIN COMPRESSIVE STRENGTH AT 28 DAYS, MINIMUM 6 SACKS OF CEMENT PER CUBIC YARD WITH A MAX. WATER / CEMENT RATIO OF 0.45 AIR ENTRAINMENT 4%+1.5% SLUMP AT 1-4 INCHES. ALL MATERIALS SHALL CONFORM TO SSPWC SECTION 202.
2. REINFORCED STEEL SHALL BE GRADE 40 AND HAVE 1.5" MINIMUM CLEAR COVER.
3. CONCRETE STRUCTURE MAY BE A PRE-CAST CONCRETE UNIT UPON APPROVAL OF THE COUNTY ENGINEER. BASE OF PRE-CAST CONCRETE UNIT SHALL BE PLACED ON 6" COMPACTED DRAIN ROCK.
4. FRAME, GRATE & CURB BOX SHALL BE NEENAH R-3067 OR APPROVED EQUAL (WITH EQUAL FLOW CAPACITY AND WEIGHT.)
5. CONCRETE SHALL BE PLACED AS SHOWN WHEN NOT LOCATED IN A SIDEWALK.
6. TILT FRAME & GRATE AS REQUIRED TO ATTAIN 6" MIN FLOW OPENING & SHIM BETWEEN CURB BOX & FRAME AS REQUIRED TO MATCH CURB BOX TO TOP OFF CURB AND FACE OF CURB (SEE SECTION B-B.)
7. CATCH BASINS SHALL ONLY BE CONNECTED TO MANHOLES OR CONNECTED TO STORM DRAIN MAINS BY LATERALS.
8. INSTALL "SUR-TRAP" GREASE TRAP PER DETAIL #188.

NOTES:

1. ALL CONNECTIONS SHALL BE MUELLER COMPRESSION COUPLINGS (OR APPROVED EQUAL) OR INSTATITE TAPED WITH 6 WRAPS OF GUILT TAPE AFTER PIPE INSERTED.
2. ALL VALVES SHALL BE RING TIGHT (RT) OR RESILIENT SEAL VALVES.
3. WATER SERVICE LINES SHALL BE 3/4" SDR 7 CLASS 200 (ASTM D2239) OR APPROVED EQUAL.
4. ALL SERVICE LINES SHALL HAVE A MINIMUM TEST PRESSURE RATING OF 200 PSI.
5. LOCATE FRONT OF METER BOX NO CLOSER THAN 1' AND NO FURTHER THAN 4' BEHIND SIDEWALK. WHERE CURB OR SIDEWALK DOES NOT EXIST, LOCATE METER BOX AS DIRECTED BY CITY OF FERNLEY.
6. SERVICE CLAMPS SHALL BE 316 STAINLESS STEEL DOUBLE-STRAP EPOXY-COATED (OR APPROVED EQUAL), O.D. CONTROLLED RADIUS FOR PROPER DISTRIBUTION WASHER.
7. ALL SERVICE LINES AND METER BOXES SHALL HAVE A REMOTE READER CABLE PROVISION IN LID (SEE WATER METER DETAILS #17 & #18).
8. MINIMUM DISTANCE BETWEEN TAPS AND COUPLINGS 18".
9. CORPORATION STOP, CURB STOP, AND SERVICE LINE TO BE THE SAME SIZE.
10. COUPLINGS 3/4" AND 1" SHALL BE COMPRESSION OR INSTATITE COUPLINGS. 1 1/2" & 2" SHALL BE BRASS COMPRESSION COUPLING WITH SLEEVE.
11. CUSTOMERS ARE REQUIRED TO HAVE A SHUTOFF DEVICE ON THEIR SIDE OF THE WATER METER FOR EMERGENCY
12. ALL POLYETHYLENE TUBING SHALL CONFORM TO AWWA STANDARD C901 "POLYETHYLENE (PE) PRESSURE PIPE AND TUBING, ¾ INCH THROUGH 3 INCH FOR WATER SERVICE" AND ASTM D2737 SPECIFICATION FOR POLYETHYLENE (PE) PLASTIC TUBING.

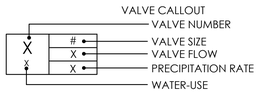
= = = = = = = =	PIPE SLEEVE: PVC SCHEDULE 40		



IRRIGATION NOTES

1. SPECIFICATIONS: SEE IRRIGATION SPECIFICATIONS FOR ADDITIONAL INFORMATION.
2. VERIFICATION: SYSTEM DESIGN IS BASED ON (80) P.S.I. AND (80) G.P.M. AVAILABLE AT DISCHARGE OUTLET OF METER OR OTHER POINT OF CONNECTION. CONTRACTOR SHALL VERIFY SAME AND NOTIFY LANDSCAPE ARCHITECT IF SUCH DATA ADVERSELY AFFECTS THE OPERATION OF THE SYSTEM. SUCH NOTICE SHALL BE MADE IN WRITING AND PRIOR TO COMMENCING ANY IRRIGATION WORK.
3. UTILITIES: CONTRACTOR SHALL VERIFY LOCATION OF ALL ON-SITE UTILITIES. RESTORATION OF DAMAGED UTILITIES SHALL BE MADE AT THE CONTRACTOR'S EXPENSE TO THE SATISFACTION OF THE OWNER.
4. SCHEMATIC: SYSTEM FEATURES ARE SHOWN SCHEMATICALLY FOR GRAPHIC CLARITY. INSTALL ALL PIPING AND VALVES IN COMMON TRENCHES WHERE FEASIBLE AND INSIDE PLANTING AREAS WHENEVER POSSIBLE. ALL VALVES SHALL BE LOCATED IN GROUNDCOVER OR SHRUB AREAS WHENEVER POSSIBLE.
5. CODES: IRRIGATION SYSTEM SHALL BE INSTALLED IN ACCORDANCE WITH ALL LOCAL CODES AND MANUFACTURER'S SPECIFICATIONS. NOTIFY LANDSCAPE ARCHITECT BY TELEPHONE AND IN WRITING OF ANY CONFLICTS PRIOR TO INSTALLATION.
6. SLEEVING: CONTRACTOR SHALL SIZE ALL SLEEVES TO BE A MINIMUM TWO TIMES THE SIZE OF THE INTERIOR PIPE. SLEEVES SHALL BE INSTALLED AT THE NECESSARY DEPTHS PRIOR TO PAVEMENT CONSTRUCTION. SLEEVING SHALL EXTEND 1'-0" FROM EDGE OF PAVEMENT INTO LAWN OR PLANTING AREA, AND SHALL HAVE ENDS CLEARLY MARKED ABOVE GRADE.
7. BACKFLOW DEVICES: LOCATE BACKFLOW DEVICES AS SHOWN ON PLAN. LOCATION SHALL BE APPROVED BY THE OWNER'S REPRESENTATIVE PRIOR TO INSTALLATION BY THE CONTRACTOR.
8. QUICK COUPLING VALVES: INSTALL ON TRIPLE SWING JOINT, LOCATE 12" AWAY FROM EDGE OF WALKS, WALLS, CURBS, AND HEADERBOARDS WITHIN PLANTING AREAS. PROVIDE OWNER WITH ONE OPERATING KEY, TWO SETS OF LOCKING COVER KEYS, AND ONE SWIVEL HOSE ELL.
9. HEAD ALLOWANCE: CONTRACTOR SHALL ALLOW IN BID PRICE AN AMOUNT SUFFICIENT TO PROVIDE AND INSTALL AN ADDITIONAL (5%) OF DRIPLINE AND SPRINKLER HEADS OF EACH TYPE SPECIFIED ON PLAN TO ACCOMMODATE FIELD CHANGES. THESE HEADS SHALL BE LOCATED AS DIRECTED BY THE LANDSCAPE ARCHITECT. CONTRACTOR SHALL DELIVER TO THE OWNER ANY UN-USED ADDITIONAL HEADS AND DRIPLINE AT THE END OF THE MAINTENANCE PERIOD.
10. CONTROLLER: ALL ABOVE-GRADE CONDUIT EITHER 24V. OR 110V. SHALL BE RIGID STEEL AND SECURELY FASTENED TO STRUCTURE AND TO CONTROLLER.
11. CHECK VALVES: INSTALL PLASTIC CHECK VALVE AT BASE OF HEADS ON LOW ENDS OF SYSTEMS AS REQUIRED TO MINIMIZE LINE DRAINAGE. CONTRACTOR SHALL ALLOW IN BID PRICE AN AMOUNT SUFFICIENT TO PROVIDE AND INSTALL AN ADDITIONAL (5) CHECK VALVES TO ACCOMMODATE ANY NECESSARY FIELD CHANGES.
12. PRESSURE REDUCER: TO BE PLACED UPSTREAM AND ADJACENT TO BACKFLOW DEVICE.
13. SURGE PROTECTION: 2 WIRE DECODER SYSTEM MUST BE PROPERLY GROUNDING IN ORDER TO PROTECT AGAINST LIGHTNING SURGES. THE MINIMUM DISTANCE BETWEEN THE SURGE ARRESTOR AND THE GROUND ROD SHOULD B 3'-0". PROVIDE A SPLIT BOLT CONNECTION TO BE USED TO CONNECT THE SURGE DEVICE TO THE GROUND WIRE WITH A DBR/Y WATERPROOF CONNECTOR. PROVIDE LINE SURGE PROTECTION A MINIMUM OF EVERY 500' AND/OR EVERY 8 VALVES, WHICHEVER COMES FIRST. FOR BIDDING PURPOSES, ASSUME 6 SURGE PROTECTORS/ GROUND RODS. SEE DETAIL 12/L3.00.
14. DECODERS: PROVIDE 2-WIRE DECODER ADDRESSES FOR EACH VALVE. LIMIT THE NUMBER OF DECODERS WHERE VALVES ARE GROUPED SO THAT IF THERE ARE 2 VALVES, THERE IS A 2 ADDRESS DECODER.

A. GENERAL

1. ALL WORK SHALL CONFORM TO THE MINIMUM STANDARDS OF THE FOLLOWING CODE: THE INTERNATIONAL BUILDING CODE, 2018 EDITION. OTHER REGULATING AGENCIES WHICH HAVE AUTHORITY OVER ANY PORTION OF THE WORK, AND THOSE CODES AND STANDARDS LISTED IN THESE NOTES AND SPECIFICATIONS.
2. THE STRUCTURAL DRAWINGS AND SPECIFICATIONS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT NOT BE LIMITED TO, BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC. OBSERVATION VISITS TO THE SITE BY THE STRUCTURAL ENGINEER SHALL NOT INCLUDE INSPECTIONS OF THE ABOVE ITEMS.
3. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS PRIOR TO STARTING CONSTRUCTION. THE ARCHITECT SHALL BE NOTIFIED OF ANY DISCREPANCIES OR INCONSISTENCIES.
4. DIMENSIONS SHALL TAKE PRECEDENCE OVER THE SCALE SHOWN ON DRAWINGS.
5. NOTES AND DETAILS ON PLANS SHALL TAKE PRECEDENCE OVER GENERAL NOTES AND TYPICAL DETAILS.
6. SEE ARCHITECTURAL PLANS FOR THE FOLLOWING:
   A. SIZE AND LOCATION OF ALL DOOR AND WINDOW OPENINGS, EXCEPT AS NOTED.
   B. SIZE AND LOCATION OF ALL INTERIOR AND EXTERIOR NON-BEARING PARTITIONS.
   C. SIZE AND LOCATION OF ALL CONCRETE CURBS, FLOOR DRAINS, SLOPES, DEPRESSED AREAS, CHANGES IN LEVEL, CHAMFER, GROOVES, INSERTS, ETC.
   D. SIZE AND LOCATION OF FLOOR AND ROOF OPENINGS, (EXCEPT AS SHOWN).
   E. FLOOR AND ROOF FINISHES.
   F. STAIR FRAMING AND DETAILS, (EXCEPT AS SHOWN).
   G. DIMENSIONS NOT SHOWN ON STRUCTURAL PLANS.
7. COORDINATE OR VERIFY WITH MECHANICAL PLANS, PLUMBING, AND ELECTRICAL PLANS FOR THE FOLLOWING:
   A. PIPE RUNS, SLEEVES, HANGERS, TRENCHES, WALL AND SLAB OPENINGS, ETC., (EXCEPT AS SHOWN OR NOTED).
   B. ELECTRICAL CONDUIT RUNS, BOXES, OUTLETS IN WALLS AND SLABS.
   C. CONCRETE INSERTS FOR ELECTRICAL, MECHANICAL, OR PLUMBING FIXTURES.
   D. SIZE AND LOCATION OF MACHINE EQUIPMENT BASES, OR ANCHOR BOLTS FOR MOUNTS.
   E. SIZE AND LOCATION OF ALL MECHANICAL UNITS.
8. OPENINGS, POCKETS, ETC. LARGER THAN 6 INCHES SHALL NOT BE PLACED IN SLABS, DECKS, BEAMS, JOISTS, COLUMNS, WALLS, ETC. UNLESS SPECIFICALLY DETAILED ON THE STRUCTURAL PLANS. CONTRACTOR TO SHOW ALL 6" OR GREATER OPENINGS ON STRUCTURAL MASONRY ELEVATION SHEETS TO SUBMIT TO ENGINEER FOR APPROVAL. CONTACT THE STRUCTURAL ENGINEER IF ANY STRUCTURAL ELEMENTS REQUIRE OPENINGS NOT SHOWN ON THESE PLANS AND ARE LARGER THAN 6" PRIOR TO MAKING MODIFICATIONS.
9. ASTM SPECIFICATIONS NOTED SHALL BE THE LATEST REVISION.
10. THE CONTRACTOR SHALL INVESTIGATE THE SITE DURING CLEARING AND EARTHWORK OPERATIONS FOR FILLED EXCAVATIONS OR BURIED STRUCTURES SUCH AS CESSPOOLS, CISTERNS, FOUNDATIONS, ETC. IF ANY SUCH STRUCTURES ARE FOUND, THE STRUCTURAL ENGINEER SHALL BE NOTIFIED IMMEDIATELY.
11. CONSTRUCTION MATERIALS SHALL BE SPREAD OUT IF PLACED ON FLOORS OR ROOF. LOAD SHALL NOT EXCEED THE DESIGN LIVE LOAD PER SQUARE FOOT. PROVIDE ADEQUATE SHORING AND/OR BRACING WHERE STRUCTURE HAS NOT ATTAINED DESIGN STRENGTH.
12. WHERE THE LONGEST HORIZONTAL CELLING DIMENSION IS EQUAL TO OR GREATER THAN 20'-0", IT IS RECOMMENDED THAT RESILIENT CHANNEL BE USED TO HELP LIMIT DRYWALL CRACKING.
13. THE FOLLOWING ITEMS ARE CONSIDERED TO BE DEFERRED SUBMITTALS PER SECTION 107.3.4.1 OF THE INTERNATIONAL BUILDING CODE, 2018 EDITION AND SHALL BE SUBMITTED TO THE REGISTERED DESIGN PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW, WHO SHALL REVIEW THEM, AND FORWARD THEM TO THE BUILDING OFFICIAL WITH A NOTIFICATION INDICATING THAT THE DEFERRED SUBMITTAL DOCUMENTS HAVE BEEN REVIEWED AND FOUND TO BE IN GENERAL CONFORMANCE TO THE DESIGN OF THE BUILDING. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE DEFERRED SUBMITTAL DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.
   A. OPEN WEB STEEL JOISTS

B. DESIGN CRITERIA

GRAVITY LOAD	LIVE LOAD	DEAD LOAD
ROOF LOAD	20 PSF	20 PSF
ROOF SNOW LOAD	8 PSF	

* SEE FRAMING NOTES FOR SPECIAL LOADING CONDITIONS

WIND	
BASIC WIND SPEED	135 MPH
WIND RISK CATEGORY	IV
WIND EXPOSURE CATEGORY	C
INTERNAL PRESSURE COEFFICIENT	+/-0.18
COMPONENT & CLADDING	
ROOF	SEE ROOF UPLIFT DIAGRAMS
WALL	+43.0 PSF OR -47.0 PSF

* HIGHER LOADING USED AT CORNERS AND EDGES

SEISMIC	
SEISMIC RISK CATEGORY	IV
SEISMIC IMPORTANCE, I_E	1.5
MAPPED SPECTRAL RESPONSE ACCELERATIONS	S_S=1.539 & S_1=0.522
SPECTRAL RESPONSE COEFFICIENTS	S_{DS}=1.076 & S_{D1}=0.592
SITE CLASS	D
LATERAL FORCE RESISTING SYSTEM, NORTH/SOUTH	SPECIAL REINFORCED MASONRY SHEAR WALLS, R=5
LATERAL FORCE RESISTING SYSTEM, EAST/WEST	SPECIAL REINFORCED MASONRY SHEAR WALLS, R=5
SEISMIC RESPONSE COEFFICIENT, C_S	0.323
LATERAL FORCE RESISTING SYSTEM, NORTH/SOUTH (GYMNASIUM)	SPECIAL REINFORCED MASONRY SHEAR WALLS, R=5
SEISMIC RESPONSE COEFFICIENT, C_S	0.323
LATERAL FORCE RESISTING SYSTEM, EAST/WEST (GYMNASIUM)	STEEL SPECIAL MOMENT FRAMES, R=8
SEISMIC RESPONSE COEFFICIENT, C_S	0.202
DESIGN BASE SHEAR	C_S x DEAD WEIGHT (W)
ANALYSIS PROCEDURE	EQUIVALENT LATERAL FORCE
SEISMIC DESIGN CATEGORY	D

C. FOUNDATION

1. THE FOUNDATION DEPICTED HEREIN HAS BEEN DESIGNED IN ACCORDANCE WITH RECOGNIZED ENGINEERING PRACTICE FOR SOIL CONDITIONS AS CLASSIFIED BY THE PROJECT GEOTECHNICAL REPORT. (THE GEOTECHNICAL REPORT):
   - CONSULTANT: LUMOS & ASSOCIATES, INC.
   - FILE: 10683.000
   - DATED: APRIL 2022
2. FOOTINGS ARE DESIGNED BASED ON AN ALLOWABLE SOIL PRESSURE OF 1500 PSF PER THE GEOTECHNICAL REPORT. ALLOWABLE SOIL PRESSURE MAY BE INCREASED BY 1/3 FOR TOTAL LOADS INCLUDING WIND OR SEISMIC. FRICTION COEFFICIENT = 0.35. AT REST AND PASSIVE EQUIVALENT FLUID PRESSURES ARE 60 AND 300 PCF, RESPECTIVELY.
3. SITE PREPARATION SHALL CONFORM TO THE REQUIREMENTS IN THE GEOTECHNICAL REPORT.
4. SOILS PREPARATION AND FOUNDATION CONSTRUCTION SHALL CONFORM TO THE REQUIREMENTS OF THE GEOTECHNICAL REPORT. ALL FOUNDATIONS SHALL BE PLACED ON A MINIMUM OF 24 INCHES OF PROPERLY MOISTURE CONDITIONED AND COMPACTED SUITABLE NATIVE SOILS OR PROPERLY PREPARED STRUCTURAL FILL. ALL INTERIOR SLABS ON GRADE SHALL BE PLACED ON A MINIMUM TYPE II, CLASS B AGGREGATE BASE COMPACTED TO A MINIMUM OF 95% AND PLACED ON 24 INCHES OF PROPERLY MOISTURE CONDITIONED AND COMPACTED SUITABLE NATIVE SOILS OR PROPERLY PREPARED STRUCTURAL FILL.
5. SEE ARCHITECTURAL AND STRUCTURAL DRAWINGS FOR EXACT LOCATION OF BULKHEADS AND OPENINGS, ETC. ARCHITECTURAL AND STRUCTURAL DRAWINGS FOR EXACT LOCATION OF BULKHEADS AND OPENINGS, ETC.
6. THE CONTRACTOR SHALL PROVIDE FOR PROPER DE-WATERING OF EXCAVATIONS FROM SURFACE WATER, GROUND WATER, SEEPAGE, ETC. (FOOTINGS SHALL NOT BE PLACED UNDER WATER).
7. FOOTINGS SHALL BE PLACED ACCORDING TO DEPTHS SHOWN ON THE STRUCTURAL PLANS. ALL ABANDONED FOOTINGS, UTILITIES, ETC. THAT INTERFERE WITH NEW CONSTRUCTION SHALL BE REMOVED.
8. CONCRETE PLACEMENT SHALL BE IN ONE CONTINUOUS OPERATION UNLESS OTHERWISE SPECIFIED AND SLAB SURFACE SHALL BE CURED WITH HUNTS COMPOUND OR EQUAL.
9. FOOTING BACKFILL AND UTILITY TRENCH BACKFILL WITHIN BUILDING AREA SHALL BE PER THE REQUIREMENTS OF THE GEOTECHNICAL REPORT. FLOODING WILL NOT BE PERMITTED.
10. STOOPS, PORCHES, OR OTHER ATTACHMENT SHALL BE CAST INDEPENDENT OF THE CONCRETE FOUNDATION SLAB, UNO. PROVIDE CONSTRUCTION JOINTS WHERE SHOWN ON THE DRAWINGS.

D. CONCRETE

1. ALL PHASES OF WORK PERTAINING TO THE CONCRETE CONSTRUCTION SHALL CONFORM TO THE "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE" (ACI 318 LATEST ADOPTED EDITION), WITH MODIFICATIONS AS NOTED IN THE DRAWINGS AND SPECIFICATIONS.
2. REINFORCED CONCRETE DESIGN IS BY THE "ULTIMATE STRENGTH DESIGN METHOD", ACI 318-14. SCHEDULE OF STRUCTURAL CONCRETE 28-DAY COMPRESSIVE STRENGTH AND TYPES:

LOCATION IN STRUCTURE	STRENGTH	AGGREGATE	ENTRAINED AIR %
SLAB ON GRADE	3500 PSI	3/4" STONE	NONE
FOOTINGS*	3500 PSI	3/4" STONE	5% +/- 1 1/2%
FOUNDATION WALLS	4500 PSI	3/4" STONE	6% +/- 1 1/2%
EXTERIOR CONCRETE**	4500 PSI	3/4" STONE*	6% +/- 1 1/2%

* FOUNDATION WALLS CONCRETE MIXTURE CAN BE USED FOR FOOTINGS AT CONTRACTOR'S OPTION
**INCLUDE 1.5 LB/CY OF FIBERMESH 150 POLYPROPYLENE FIBERS OR APPROVED EQUAL.

3. A MINIMUM OF THREE (3) CYLINDERS FOR EVERY 100 YARDS OF CONCRETE SHALL BE TAKEN TO DETERMINE CONCRETE STRENGTH.
4. CONCRETE MIX DESIGN SHALL BE SUBMITTED TO THE STRUCTURAL ENGINEER FOR APPROVAL WITH THE FOLLOWING REQUIREMENTS:
   A. COMPRESSIVE STRENGTH AT AGE 28 DAYS AS SPECIFIED ABOVE.
   B. AGGREGATE SUBMITTAL: 3/4" MAXIMUM SIZE CONFORMING TO ASTM C-33.
   C. CEMENT: ASTM C-150, TYPE II PORTLAND CEMENT.
   D. MAXIMUM SLUMP: 3 INCHES, ADDITIONAL WORKABILITY MAY BE ACHIEVED WITH AN APPROVED ADMIXTURE THAT DOES NOT PROMOTE SHRINKAGE OF THE CONCRETE.
   E. NO ADDITIONAL ADMIXTURES, EXCEPT FOR ENTRAINED AIR, OR AS SPECIFIED OR APPROVED BY THE STRUCTURAL ENGINEER.
   F. MAXIMUM WATER/CEMENT RATIO SHALL BE 0.45, U.N.O.
      a. FOR SLAB ON GRADE AND SLAB ON METAL DECK ONLY, MAXIMUM WATER/CEMENT RATIO SHALL BE 0.50.
   G. CONCRETE SHALL BE 142 +/- 7 LBS/CU. FT.
5. CONCRETE MIXING OPERATIONS, ETC. SHALL CONFORM TO ASTM C-94.
6. PLACEMENT OF CONCRETE SHALL CONFORM TO ACI STANDARD 614.
7. CLEAR COVERAGE OF CONCRETE OVER OUTER REINFORCING BARS SHALL BE AS FOLLOWS, UNO:
   A. CONCRETE POURED DIRECTLY AGAINST EARTH: 3 INCHES CLEAR
   B. STRUCTURAL SLABS: 3/4 INCHES CLEAR (TOP AND BOTTOM)
   C. FORMED CONCRETE WITH EARTH BACKFILL: 2 INCHES CLEAR
8. ALL REINFORCING BARS, HOLD DOWN BOLTS AND STRAPS, AND OTHER CONCRETE INSERTS SHALL BE WELL SECURED IN POSITION PRIOR TO PLACING CONCRETE.
9. PROVIDE SLEEVES FOR PLUMBING AND ELECTRICAL OPENINGS IN CONCRETE BEFORE PLACING. DO NOT CUT ANY REINFORCING WHICH MAY CONFLICT. CORING IN CONCRETE IS NOT PERMITTED EXCEPT AS SHOWN. NOTIFY THE STRUCTURAL ENGINEER IN ADVANCE OF CONDITIONS NOT SHOWN ON THE DRAWINGS.
10. CONDUIT OR PIPE SIZE (O.D.) SHALL NOT EXCEED 30% OF SLAB THICKNESS AND SHALL BE PLACED UNDER CONCRETE, UNLESS SPECIFICALLY DETAILED OTHERWISE. CONCENTRATIONS OF CONDUITS OR PIPES SHALL BE AVOIDED EXCEPT WHERE DETAILED OPENINGS ARE PROVIDED.
11. MODULUS OF ELASTICITY OF CONCRETE, WHEN TESTED IN ACCORDANCE WITH ASTM C-460, SHALL BE AT LEAST THE VALUE GIVEN BY THE EQUATIONS IN SECTION 19.2.2.1 OF ACI 318 FOR THE SPECIFIED 28-DAY STRENGTH.
12. ALL CONCRETE SLABS SHALL USE VC-5 CURING COMPOUND MANUFACTURED BY SINAK, BLANKET CURED WITH MOISTURE-RETAINING SHEET, OR AN APPROVED EQUAL.
13. SPECIAL INSPECTOR TO VERIFY AND SIGN ALL BATCH TICKETS AND PRODUCE A POUR MAP INDICATING PLACEMENT OF EACH BATCH FOR SLAB ON GRADE AND SLAB ON METAL DECK PRIOR TO PLACEMENT.

E. REINFORCING STEEL

1. REINFORCING BARS SHALL CONFORM TO THE REQUIREMENTS OF ASTM A-615 GRADE 60.
2. WELDED REINFORCING BARS SHALL CONFORM TO THE REQUIREMENTS OF ASTM A-706 GRADE 60.
3. ALL REINFORCING BARS SHALL BE MADE COLD.
4. MINIMUM LAP OF THE WELDED WIRE FABRIC SHALL BE 6 INCHES OR ONE AND ONE HALF SQUARES WHICHEVER IS GREATER.
5. ALL BARS SHALL BE MARKED SO THEIR IDENTIFICATION CAN BE MADE WHEN THE FINAL IN-PLACE INSPECTION IS MADE.
6. REBAR SPLICES ARE TO BE CLASS "B" (UNO). MAINTAIN 2 BAR DIA CLEAR SPACE BETWEEN ADJACENT SPLICES

REBAR SIZE	#3	#4	#5	#6	#7	#8	#9	#10
MINIMUM LAP LENGTH, INCHES, CONCRETE	22	29	36	43	68	78	88	98
MINIMUM LAP LENGTH, INCHES, MASONRY	13	22	35	64	87	131	NA	NA
STD. HOOK LENGTH, INCHES	4 1/2	6	7 1/2	9	10 1/2	12	13 1/2	15 1/2

7. REINFORCING SPLICES SHALL BE MADE ONLY WHERE INDICATED ON THE DRAWINGS.
8. DOWELS BETWEEN FOOTINGS AND WALLS OR COLUMNS SHALL BE THE SAME GRADE, SIZE AND SPACING OR NUMBER AS THE VERTICAL REINFORCING, RESPECTIVELY.

F. CONCRETE MASONRY (CONCRETE BLOCK)

1. MASONRY UNITS SHALL BE MEDIUM WEIGHT UNITS CONFORMING TO THE LATEST ASTM DESIGNATION C-90 AND THE QUALITY CONTROL STANDARDS OF THE CONCRETE MASONRY ASSOCIATION OF CALIFORNIA AND NEVADA.
   A. CMU BLOCK STRENGTH SHALL BE:
      a. 8" BLOCK: 2000 PSI
      b. 12" BLOCK: 3250 PSI
2. MASONRY STRENGTH SHALL BE:
   A. 8" BLOCK: f'm = 2000 PSI
   B. 12" BLOCK: f'm = 2500 PSI
3. MASONRY UNITS SHALL BE CONSTRUCTED USING TYPE II CEMENT.
4. PORTLAND CEMENT SHALL CONFORM TO ASTM DESIGNATION C-150 AND BE AS SPECIFIED FOR CONCRETE.
5. MORTAR SHALL CONFORM TO THE REQUIREMENTS OF TMS-602 TABLE SC-1. TYPE M OR S.
6. GROUT SHALL CONFORM TO REQUIREMENTS OF ASTM C476 FOR COARSE GROUT. USE SUFFICIENT WATER FOR GROUT TO FLOW INTO ALL VOIDS OF THE MASONRY WITHOUT SEGREGATION. GROUT SHALL ATTAIN A MINIMUM COMPRESSIVE STRENGTH AT 28 DAYS NOT LESS THAN THE SPECIFIED MASONRY STRENGTH f'm PER ITEM 2 (TWO) ABOVE.
7. PROVIDE A MINIMUM OF 1/2" GROUT BETWEEN MAIN REINFORCING AND MASONRY UNITS. MORTAR FIN PROJECTIONS LARGER THAN 1/4" FROM INTERIOR FACE OF CMU BLOCK TO BE KNOCKED OFF PRIOR TO GROUTING.
8. LOW LIFT CONSTRUCTION, MAXIMUM GROUT POUR HEIGHT IS 5'-4" U.N.O.
9. CELLS SHALL BE IN VERTICAL ALIGNMENT. DOWELS IN FOOTINGS SHALL BE SET TO ALIGN WITH CORES CONTAINING REINFORCING STEEL.
10. REFER TO ARCHITECTURAL DRAWINGS FOR SURFACE AND HEIGHT OF UNITS, LAYING PATTERN AND JOINT TYPE.
11. PROVIDE LEVEL 2 SPECIAL INSPECTION IN ACCORDANCE WITH TMS 402-16 SECTION 3.1.2.2a.
12. MASONRY LAP SPLICES SHALL BE A MINIMUM OF 48 BAR DIAMETERS OR THE VALUE SHOWN IN SECTION D, WHICHEVER IS LARGER.
13. ONE SET OF THREE MASONRY PRISMS TO BE BUILT AND TESTED PER ASTM C131, STANDARD TEST METHOD FOR COMPRESSIVE STRENGTH OF MASONRY PRISMS, FOR EACH VARIETY OF MASONRY BLOCK (8816,12816, SHOT BLAST, PRECISION, ETC) PRIOR TO CONSTRUCTION.

G. STRUCTURAL STEEL

1. HOT-ROLLED STRUCTURAL STEEL SHAPES SHALL BE PER ASTM A992. EXCEPT ANGLES AND CHANNELS SHALL BE PER ASTM A36, UNO.
2. STRUCTURAL PIPE SHALL BE PER ASTM A53 GRADE B, UNO.
3. STRUCTURAL HSS SHAPES SHALL BE PER ASTM A500 GRADE C, UNO.
4. STRUCTURAL PLATE STEEL SHALL BE PER ASTM A36, UNO.
5. NUTS AND BOLTS IN STRUCTURAL STEEL CONNECTIONS SHALL BE PER ASTM F1852 (DESIGNATED AS A325N OR HIGH STRENGTH BOLT ON THE DRAWINGS), WITH HARDENED WASHERS UNO. DESIGN IS BASED UPON BEARING TYPE CONNECTIONS WITH THREADS NOT EXCLUDED. PERIODIC SPECIAL INSPECTION REQUIRED. UNO, CONTACT FACES OF STEEL AT CONNECTIONS WHERE HIGH-STRENGTH BOLTS ARE USED SHALL NOT BE PAINTED. HIGH STRENGTH BOLTS SHALL BE TENSION CONTROL TO ENSURE PROPER INSTALLATION, UNO.
6. ANCHOR BOLTS SHALL BE PER ASTM F1554 GR. 36, UNO.
7. HEADED STUDS SHALL BE NELSON STUD ANCHORS (NSA) BY TRW OR APPROVED EQUAL. UNO, AND SHALL BE INSTALLED PER MANUFACTURER'S REQUIREMENTS.
8. WELDS SHALL BE BY E70XX, LOW HYDROGEN ELECTRODES. ALL WELDING SHALL CONFORM TO THE AMERICAN WELDING SOCIETY'S SPECIFICATIONS FOR THE MATERIAL BEING WELDED AND ALL WELDING TO BE PERFORMED BY ONLY AWS CERTIFIED WELDERS.
9. WELDS DESIGNATED AS DEMAND CRITICAL SHALL BE MADE WITH FILLER METALS MEETING THE REQUIREMENTS OF AWS D1.8/D1.8M CLAUSES 6.1, 6.2, AND 6.3. FILLER METAL FOR DEMAND CRITICAL WELDS SHALL HAVE A MINIMUM CHARPY V-NOTCH (CVN) TOUGHNESS OF 40 FT-LBS AT 70° F OR LOWER.
10. ALL FIELD WELDS SHALL HAVE SPECIAL INSPECTION.
11. PROVIDE SPECIAL INSPECTION IN ACCORDANCE WITH IBC 1705.2.1.
12. ALL STRUCTURAL STEEL WORK SHALL BE SHOP PAINTED AND TOUCHED UP IN THE FIELD AFTER ERECTION EXCEPT WHERE STEEL IS TO BE EMBEDDED IN CONCRETE, FIREPROOFED, OR WHERE REQUIRED FOR SPECIAL CONNECTIONS. PROVIDE 3" MINIMUM CONCRETE COVER FOR ALL STEEL EXPOSED TO EARTH.

H. METAL DECKING

1. METAL DECK SHALL CONFORM TO THE REQUIREMENTS OF THE STEEL DECK INSTITUTE.
2. TYPE AND GAUGE OF METAL DECK SHALL BE PER THE FRAMING PLANS AND NOTES. METAL DECK FINISH PER ARCHITECTURAL DRAWINGS.
3. DECKING SHALL BE ATTACHED TO STEEL SUPPORTS AND HAVE SIDE LAP ATTACHMENTS AS SHOWN ON THESE DRAWINGS.
4. DECK WELDING SHALL BE DONE IN ACCORDANCE WITH THE AMERICAN WELDING SOCIETY'S SPECIFICATIONS AND SHALL BE PERFORMED BY WELDERS EXPERIENCED IN METAL DECK WELDING.
5. DECKING SHALL BEAR NO LESS THAN 2" ON STEEL SUPPORTS AND SHALL SPAN CONTINUOUSLY OVER NO LESS THAN TWO CONSECUTIVE SPANS.
6. ITEMS SUSPENDED FROM FLOOR AND ROOF DECK SYSTEMS SHALL CONFORM TO THE APPROPRIATE TYPICAL DETAILS. IF ALTERNATE SUPPORT SYSTEMS FOR SUSPENDED ITEMS ARE DESIRED, THE CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ARCHITECT FOR APPROVAL. ALTERNATE SUPPORT FRAMING SHALL CONNECT TO APPROPRIATE STEEL FRAMING AND SHALL NOT CONNECT TO METAL DECK.
7. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO PROVIDE SHORING AS REQUIRED TO ENSURE THAT CONSTRUCTION LOADS PLACED ON PLAIN OR COMPOSITE METAL DECK DO NOT EXCEED THE DECK LOAD BEARING CAPACITY.
8. HEAVY MOVING CONSTRUCTION LOADS, SUCH AS THOSE EXERTED BY MECHANICAL LIFT, ON COMPOSITE METAL DECK WITH CONCRETE FILL SHALL BE A MAXIMUM OF 3000 LBS AND PREVENTED FROM OVERLOADING ANY OPEN BAY AREAS. IF ANY LIFTS ARE USED BY THE CONTRACTOR ON THE SLAB ON METAL DECK, THE CONTRACTOR MUST PROVE TO THE OWNER THAT ANY CRACKING IN THE SLAB ON METAL DECK WAS NOT CREATED BY THE USE OF THE LIFT.
9. SHOP DRAWINGS SHALL BE SUBMITTED TO THE ARCHITECT FOR APPROVAL PRIOR TO ANY FABRICATION.
10. VENTED DECK SHALL NOT BE ALLOWED ON THIS PROJECT.

I. COLD-FORMED STEEL

1. COLD-FORMED STEEL FRAMING SHALL CONFORM TO THE REQUIREMENTS OF THE 2016 EDITION OF THE NORTH AMERICAN SPECIFICATION FOR THE DESIGN OF COLD-FORMED STEEL STRUCTURAL MEMBERS (AISI). THE STEEL STUD MANUFACTURERS ASSOCIATION (SSMA STANDARDS), AND REQUIREMENTS AS STATED IN THE FRAMING NOTES.
2. COLD-FORMED STEEL STUDS AND JOISTS SHALL BE STRUCTURAL GRADE PER ASTM A653 AND THE FOLLOWING YIELD STRENGTHS:
   A. ALL MATERIALS USED IN INTERIOR APPLICATIONS SHALL BE 33 KSI, U.N.O.
   B. ALL MATERIALS USED IN EXTERIOR APPLICATIONS SHALL BE 50 KSI.
3. SELF-DRILLING SCREWS TO BE HILTI KWIK-PRO OR KWIK-FLEX SCREWS OR APPROVED EQUAL. #6 SCREWS MINIMUM TO BE USED WHERE NOT SPECIFICALLY NOTED ON THESE PLANS. PLACE IN ACCORDANCE WITH ESR-2196. TYPICAL FASTENER SIZES NOTED IN THE DRAWINGS:
   A. #6 SCREWS = 0.138" DIA. x 1 1/4" MINIMUM LENGTH
   B. #8 SCREWS = 0.164" DIA. x 1 1/4" MINIMUM LENGTH
4. SHOT PINS SHALL BE HILTI X-U, 0.157" MINIMUM DIA., OR EQUAL TO BE APPROVED BY THE EOR. INSTALL PER MANUFACTURER AND ESR-2269 OR AS OTHERWISE INDICATED IN THE DETAILS.
5. WALL TRACK SHALL BE UNPUNCHED WITH GAUGE TO MATCH STUD FRAMING (UNO). MINIMUM SIZE TO BE 362T125-33.
6. UTILITY PUNCHOUT HOLES IN STUDS SHALL BE LOCATED AWAY FROM CONNECTIONS UNLESS SPECIFICALLY DETAILED.
7. OPENINGS IN STUD WEBS OTHER THAN STANDARD HOLES PUNCHED BY THE MANUFACTURER ARE PROHIBITED UNLESS SPECIFICALLY DETAILED.

J. OPEN WEB STEEL JOISTS

1. ALL OPEN WEB STEEL JOISTS SHALL CONFIRM TO THE STANDARD SPECIFICATIONS OF THE STEEL JOIST INSTITUTE.
2. ALL OPEN WEB JOISTS SHALL HAVE BRIDGING AS SHOWN ON THE DRAWINGS AND AS RECOMMENDED BY THE STEEL JOIST INSTITUTE.
3. ALL OPEN WEB JOISTS SHALL BE WELDED OR BOLTED TO SUPPORTS AS DETAILED ON THE DRAWINGS AND DESIGNED FOR LOADING TO THE CONNECTION WHERE INDICATED ON PLANS AND DETAILS.
4. ALL OPEN WEB JOISTS SHALL BE SHOP PAINTED AND TOUCHED UP IN THE FIELD AFTER ERECTION, EXCEPT AT LOCATIONS TO RECEIVE FIREPROOFING.
5. ALL OPEN WEB JOISTS ARE TO BE DESIGNED BY THE MANUFACTURER TO SUPPORT THE DESIGN LOADS PROVIDED ON THESE DRAWINGS. THE CONTRACTOR SHALL COORDINATE LOADS AND DIMENSIONS AS NECESSARY.
6. SHOP DRAWINGS AND STAMPED ENGINEERING CALCULATIONS OF ALL OPEN WEB JOISTS SHALL BE SUBMITTED TO THE ARCHITECT FOR APPROVAL PRIOR TO ANY FABRICATION.

M. SHOP DRAWINGS

1. SHOP DRAWINGS SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS IN ADDITION TO ITEMS REQUIRED BY ARCHITECTURAL SPECIFICATIONS.
2. THE CONTRACTOR SHALL REVIEW ALL SHOP DRAWINGS PRIOR TO SUBMITTAL. ITEMS NOT IN ACCORDANCE WITH CONTRACT DRAWINGS SHALL BE FLAGGED FOR REVIEW.
3. VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS.
4. ANY CHANGES, SUBSTITUTIONS, OR DEVIATIONS FROM ORIGINAL STRUCTURAL DRAWINGS SHALL BE RED-LINED OR FLAGGED BY SUBMITTING PARTIES.
5. THE STRUCTURAL ENGINEER HAS THE RIGHT TO APP

2018 IBC TABLE 1705.3
REQUIRED SPECIAL INSPECTIONS AND TESTS OF CONCRETE CONSTRUCTION

TYPE	CONTINUOUS SPECIAL INSPECTION	PERIODIC SPECIAL INSPECTION	REFERENCED STANDARD	IBC REFERENCE
1. INSPECT REINFORCEMENT, INCLUDING PRESTRESSING TENDONS, AND VERIFY PLACEMENT.	--	--	ACI 318: CH. 20, 25.2, 25.3, 26.6.1-26.6.3	1908.4

C. APPLICATION OF JOINT DETAILS AT EACH CONNECTION.	--	X		

QUALITY ASSURANCE

I. QUALITY ASSURANCE PLAN

A. B. THE INTENT OF THIS QUALITY ASSURANCE PLAN IS TO IDENTIFY STRUCTURAL SYSTEMS OR ELEMENTS THAT ARE CRITICALLY IMPORTANT TO THE STRUCTURE'S ABILITY TO SAFELY RESIST CODE REQUIRED LOADS. QUALITY ASSURANCE FOR THE ITEMS LISTED BELOW WILL BE ACCOMPLISHED THROUGH THE USE OF SPECIAL INSPECTION & MATERIALS TESTING AND STRUCTURAL OBSERVATION. IN ADDITION, THE CONTRACTOR SHALL SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND OWNER IN ACCORDANCE WITH THE 2018 IBC SECTION 1704.4.

B. LATERAL FORCE RESISTING SYSTEM(S): SPECIAL REINFORCED MASONRY SHEAR WALLS.

C. COMPONENTS & ELEMENTS: MASONRY WALLS AND THEIR ANCHORAGE.

II. SPECIAL INSPECTION AND MATERIAL TESTING

A. SPECIAL INSPECTION AND ASSOCIATED MATERIALS TESTING SHALL BE PERFORMED FOR THE PROCESSES AND MATERIALS REQUIRED FOR CONSTRUCTION. THE TYPE AND FREQUENCY OF SPECIAL INSPECTIONS AND MATERIALS TESTING AS WELL AS THE FREQUENCY AND DISTRIBUTION OF RELATED REPORTS SHALL BE AS INDICATED IN THE CONSTRUCTION DOCUMENTS AND AS REQUIRED BY ALL APPLICABLE CODES.

B. THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK FOR COMPLIANCE WITH THE CONSTRUCTION DOCUMENTS. THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE ARCHITECT, OWNER AND BUILDING OFFICIAL. ALL DISCREPANCIES SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION, THEN IF UNCORRECTED, TO THE ARCHITECT, OWNER AND BUILDING OFFICIAL. AT THE CONCLUSION OF WORK, THE SPECIAL INSPECTOR SHALL SUBMIT A FINAL REPORT TO THE ARCHITECT, OWNER AND BUILDING OFFICIAL INDICATING THE WORK REQUIRING SPECIAL INSPECTION WAS INSPECTED AND IS IN CONFORMANCE WITH THE CONSTRUCTION DOCUMENTS AND THAT ALL DISCREPANCIES NOTED IN THE INSPECTION REPORTS HAVE BEEN CORRECTED.

C. SPECIAL INSPECTIONS IN ACCORDANCE WITH 2018 IBC CHAPTER 17 SHALL BE REQUIRED FOR THE FOLLOWING STRUCTURAL ITEMS:

1. STEEL CONSTRUCTION IN ACCORDANCE WITH AISC 360 CHAPTER FOR STRUCTURAL STEEL AND 2018 IBC TABLE 1705.2.3 FOR OTHER STEEL.
2. CONCRETE CONSTRUCTION IN ACCORDANCE WITH 2018 IBC TABLE 1705.3.
3. MASONRY CONSTRUCTION IN ACCORDANCE WITH TMS 402/602-16 TABLE 3 AND 4.
4. SOILS IN ACCORDANCE WITH 2018 IBC TABLE 1705.6.
5. POST INSTALLED ANCHORS IN ACCORDANCE WITH EVALUATION REPORTS AND MANUFACTURER RECOMMENDATIONS.

D. IN ADDITION TO THE SPECIAL INSPECTIONS LISTED ABOVE, SPECIAL INSPECTION FOR SEISMIC RESISTANCE IN ACCORDANCE WITH 2018 IBC SECTIONS 1705.12 1705.13 SHALL REQUIRED FOR THE FOLLOWING STRUCTURAL ITEMS:

1. STEEL CONSTRUCTION INSPECTION AND NON-DESTRUCTIVE TESTING IN ACCORDANCE AISC CHAPTER 341 CHAPTER J FOR THE ELEMENTS OF THE LATERAL FORCE RESISTING SYSTEM.
2. EXTERIOR LIGHT GAUGE WALLS AND MASONRY VENEER PERIODIC SPECIAL INSPECTION IN ACCORDANCE WITH 2018 IBC SECTION 1705.12.5.

E. THE SPECIAL INSPECTIONS LISTED ABOVE ARE NOT INTENDED TO BE ALL INCLUSIVE AND ONLY REPRESENT SPECIAL INSPECTIONS FOR STRUCTURAL PORTIONS OF THE WORK. ADDITIONAL SPECIAL INSPECTIONS OF ARCHITECTURAL, MECHANICAL, ELECTRICAL, PLUMBING OR OTHER SYSTEMS MAY BE REQUIRED. REFER TO THE APPROPRIATE DESIGN DISCIPLINES FOR ADDITIONAL INFORMATION.

F. WHERE PERIODICAL INSPECTIONS ARE REQUIRED, THE FIRST INSPECTION SHALL OCCUR AT THE START OF THE CONSTRUCTION TASK BEING INSPECTED.

III. STRUCTURAL OBSERVATION

A. THE CONTRACTOR SHALL PROVIDE THE ARCHITECT WITH WRITTEN NOTICE 48 HOURS PRIOR TO THE FOLLOWING CONSTRUCTION ACTIVITIES SO THAT APPROPRIATE STRUCTURAL OBSERVATION MAY BE PERFORMED: CONCRETE PLACEMENT, STEEL ERECTION, DIAPHRAGM NAILING/WELDING, AND GROUTING OF MASONRY. DEFICIENCIES WILL BE REPORTED IN WRITING. AT THE CONCLUSION OF WORK, THE STRUCTURAL ENGINEER WILL REVIEW THE PROJECT FOR GENERAL CONFORMANCE WITH PROJECT REQUIREMENTS. IF, IN THE OPINION OF THE STRUCTURAL ENGINEER, THE PROJECT STILL CONTAINS REPORTED DEFICIENCIES THAT HAVE NOT BEEN ADDRESSED BY THE CONTRACTOR, A WRITTEN STATEMENT WILL BE ISSUED INDICATING THAT SITE VISITS HAVE BEEN MADE AND THAT CERTAIN DEFICIENCIES REMAIN UNRESOLVED.

50% CONSTRUCTION DOCUMENTS

REVISIONS

REV	DATE	DESCRIPTION

Sheet Title
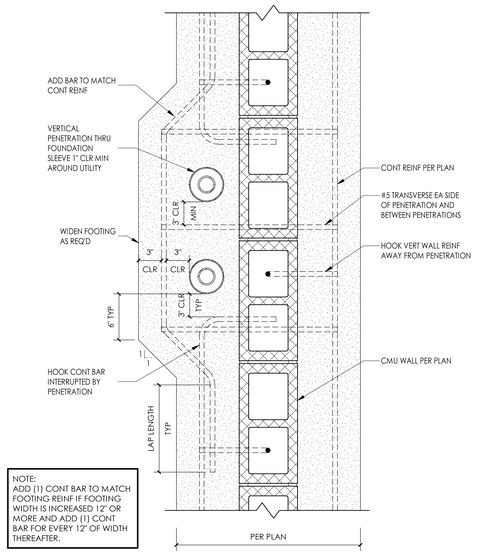
TYP. CONC. & CMU DETAILS

Date: JANUARY 19, 2023

Sheet No:
S0.3



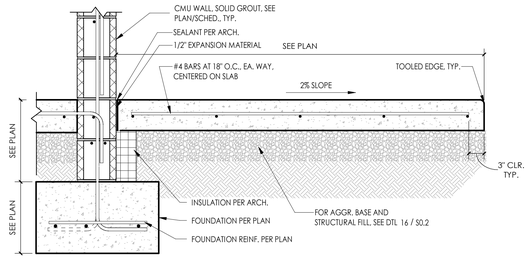
NOTE:
ADD (1) CONT BAR TO MATCH FOOTING REINF IF FOOTING WIDTH IS INCREASED 12" OR MORE AND ADD (1) CONT BAR FOR EVERY 12" OF WIDTH THEREAFTER.

8 TYP. VERT. PENETRATION AT WALL FOOTING

1 1/2" = 1'-0"

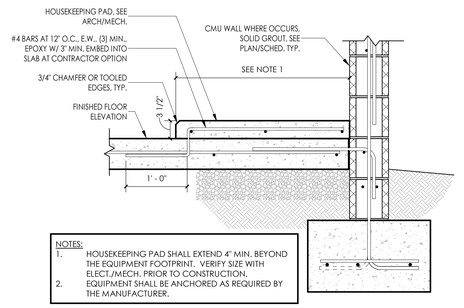
9 TYP. PENETRATION DIRECTLY UNDER ROOF DECK

1 1/2" = 1'-0"



5 EXT. CONC. AT CMU WALL

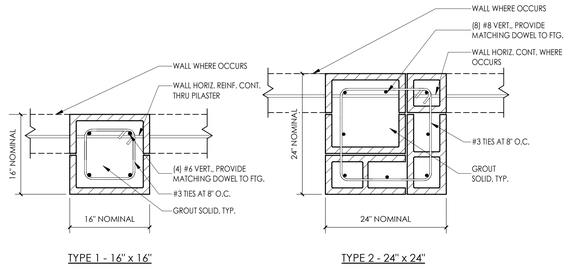
1" = 1'-0"



NOTES:
1. HOUSEKEEPING PAD SHALL EXTEND 4" MIN. BEYOND THE EQUIPMENT FOOTPRINT. VERIFY SIZE WITH ELECT./MECH. PRIOR TO CONSTRUCTION.
2. EQUIPMENT SHALL BE ANCHORED AS REQUIRED BY THE MANUFACTURER.

6 TYP. HOUSEKEEPING PAD

1" = 1'-0"

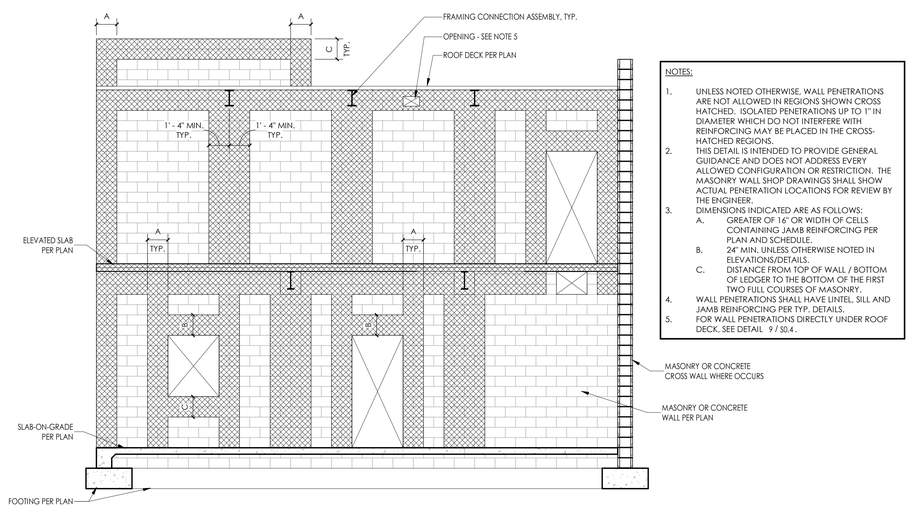


TYPE 1 - 16" x 16"

TYPE 2 - 24" x 24"

7 CMU TYP. PILASTERS

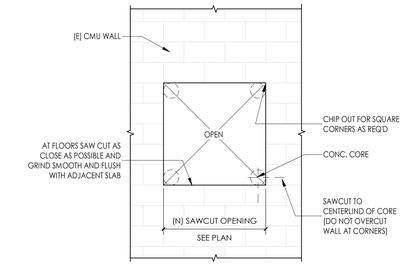
1" = 1'-0"



NOTES:
1. UNLESS NOTED OTHERWISE, WALL PENETRATIONS ARE NOT ALLOWED IN REGIONS SHOWN CROSS HATCHED. ISOLATED PENETRATIONS UP TO 1" IN DIAMETER WHICH DO NOT INTERFERE WITH REINFORCING MAY BE PLACED IN THE CROSS-HATCHED REGIONS.
2. THIS DETAIL IS INTENDED TO PROVIDE GENERAL GUIDANCE AND DOES NOT ADDRESS EVERY ALLOWED CONFIGURATION OR RESTRICTION. THE MASONRY WALL SHOP DRAWINGS SHALL SHOW ACTUAL PENETRATION LOCATIONS FOR REVIEW BY THE ENGINEER.
3. DIMENSIONS INDICATED ARE AS FOLLOWS:
   A. GREATER OF 16" OR WIDTH OF CELLS CONTAINING JAMB REINFORCING PER PLAN AND SCHEDULE.
   B. 24" MIN. UNLESS OTHERWISE NOTED IN ELEVATIONS/DETAILS.
   C. DISTANCE FROM TOP OF WALL / BOTTOM OF LEDGER TO THE BOTTOM OF THE FIRST TWO FULL COURSES OF MASONRY.
4. WALL PENETRATIONS SHALL HAVE LINTEL, SILL AND JAMB REINFORCING PER TYP. DETAILS.
5. FOR WALL PENETRATIONS DIRECTLY UNDER ROOF DECK, SEE DETAIL 9 / S0.4 .

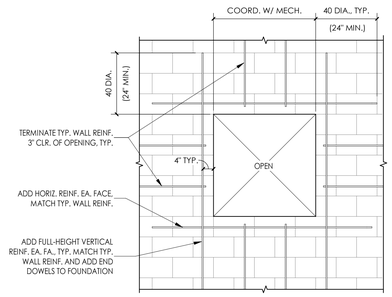
4 TYP. PROHIBITED MASONRY AND CONC. WALL PENETRATION LOCATIONS

1/4" = 1'-0"



1 CMU TYP. SAW CUT OPENING

1/2" = 1'-0"



2 CMU LOUVER OPENING REINF.

1/2" = 1'-0"

IN ALL CASES, THE WALL REINFORCEMENT MUST TAKE PRECEDENCE OVER THE LOCATION OF THE CONDUITS, AND ADEQUATE ROOM IN THE CMU CELLS NEED TO BE MAINTAINED TO ALLOW FOR THE GROUT TO FLOW PROPERLY.

IN GENERAL, THE FOLLOWING NOTES NEED TO BE FOLLOWED:

1. NO VERTICAL ELECTRICAL CONDUIT IS TO BE PLACED IN THE FIRST 8" OF WALL JAMB AT THE WALL OPENINGS, WHICH SHALL BE RESERVED FOR JAMB REINFORCEMENT ONLY. PLACE VERT. CONDUIT IN NEXT ADJACENT CELL.
2. WHERE POSSIBLE, VERT. CONDUIT WILL BE PLACED IN NON-REINFORCED CELLS.
3. NO MORE THAN ONE 3/4" DIA. VERT. CONDUIT WILL BE PLACED IN A REINFORCED CELL AND:
   A. THE CONDUIT IS TO BE LOCATED SUCH THAT GROUT WILL BE ABLE TO FLOW COMPLETELY AROUND THE REINFORCING BARS.
   B. NO MORE THAN TWO 3/4" DIA. VERT. CONDUITS WILL BE PLACED IN A NON-REINFORCED CELL, UNLESS OTHER STRUCTURAL PROVISIONS ARE MADE.
4. IN HORIZONTAL BOND BEAMS, THE REBAR IS TO TAKE PRECEDENCE WHEREVER POSSIBLE. THE MASON SHALL PROVIDE ADDITIONAL ROWS OF BOND BEAM UNITS FOR HORIZONTAL CONDUITS TO RUN. IN NO CASE SHALL HORIZONTAL CONDUIT BE PLACED IN A BOND BEAM HAVING TWO HORIZ. BARS. ONLY IN CASES WHERE NO ALTERNATIVE IS AVAILABLE SHALL ONE CONDUIT BE PLACED IN THE SAME BOND BEAM AS ONE HORIZ. REBAR. NO MORE THAN TWO 3/4" DIA. MAX. SIZE CONDUITS BE PLACED IN A SINGLE BOND BEAM, PROVIDED THAT THERE IS NO HORIZ. REBAR IN BOND BEAM.

3 CONDUIT IN CMU

REV	DATE	DESCRIPTION

Sheet Title
ENLARGED FOUNDATION PLAN - BASE BID

Date: JANUARY 19, 2023

Sheet No:
S1.11

BASE BID ROOF FRAMING PLAN NOTES:

1. B.O. DECK= TOP OF FRAMING (BOTTOM OF DECK) ELEVATION ABOVE THE FINISHED FIRST FLOOR.
2. T.O.S.= TOP OF WIDE FLANGE GIRDER ELEVATION ABOVE FINISHED FIRST FLOOR.
3. SEE FOR STEEL JOIST AND JOIST GIRDER DESIGN CRITERIA.
4. SEE 3 / S0.6 & 4 / S0.6 FOR ROOF HUNG PIPING SUPPORTS.
5. FIRE SPRINKLER CONTRACTOR SHALL LAY OUT FIRE SPRINKLER LINES SO THAT NO LINE PASSES UNDER SKYLIGHT/SMOKEVENTS OR FUTURE MECHANICAL UNITS (WHERE THESE ITEMS OCCUR).
6. FOR ROOF HATCH WITH LADDER ACCESS, SEE ARCHITECTURAL.
7. STEEL JOIST AND JOIST GIRDER SUPPLIER SHALL SUBMIT STRUCTURAL CALCULATIONS, SHOP, AND ERECTION DRAWINGS SEALED AND SIGNED BY A NEVADA REGISTERED CIVIL OR STRUCTURAL ENGINEER TO THE ENGINEER OF RECORD WHO AGREES TO REVIEW THESE DOCUMENTS FOR ACCEPTANCE PRIOR TO FABRICATION. STRUCTURAL CALCULATIONS, SHOP AND ERECTION DRAWINGS SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT FOR ACCEPTANCE AFTER THE ENGINEER OF RECORD HAS NOTED HIS/HER ACCEPTANCE.
8. JOIST AND JOIST GIRDER DRAWINGS SHALL SHOW COMPLIANCE WITH THE STANDARD SPECIFICATIONS FOR STEEL JOISTS, K-SERIES, LH-SERIES, DLH-SERIES AND JOIST GIRDERS, 44TH EDITION, PUBLISHED BY THE STEEL JOIST INSTITUTE.
9. JOIST AND JOIST GIRDERS SHALL BE IDENTIFIED AS TO TYPE, SIZE, AND MANUFACTURER BY TAGGING OR OTHER SUITABLE MEANS AT THE TIME OF MANUFACTURE OR FABRICATION. SUCH IDENTIFICATION SHALL BE MAINTAINED CONTINUOUSLY TO THE POINT OF THEIR INSTALLATION IN A STRUCTURE.

BASE BID METAL DECK SCHEDULE

MARK	DECK TYPE (SEE NOTE 1)	DECK SIZE	DECK ATTACHMENT ZONE	DIAPHRAGM CONNECTIONS (SEE NOTES 2, 3 AND 6)		
				LOW FLUTES		SIDE SEAMS
				PERPENDICULAR TO SUPPORT	PARALLEL TO SUPPORT	
PLB-I	PLB-36	1 1/2" x 18 GA	1	FASTENERS AT 36/4 PATTERN	FASTENERS AT 12" O.C. MAX	VSC2 AT 24" O.C. MAX

NOTES:

1. METAL DECK SHALL BE AS SPECIFIED BY ASC, VERCO, VULCRAFT, EPIC OR APPROVED EQUAL.
2. CONNECTIONS SHALL BE PLACED IN ACCORDANCE WITH THE DECK MANUFACTURERS STANDARD PATTERN AND REQUIREMENTS.
3. PW = 3/4" PUDDLE WELD, VSC2 = VERCO PUNCHLOK II SIDELAP CONNECTION.
4. DECK SHALL BE PLACED IN EITHER A 2-SPAN OR 3-SPAN CONDITION. SINGLE DECK SPANS WILL NOT BE ALLOWED UNLESS SPECIFICALLY NOTED.
5. REFER TO DECK ATTACHMENT DIAGRAM FOR DECK ATTACHMENT ZONE.
6. FASTENERS SHALL BE #12 SCREWS FOR SUPPORT STEEL THICKNESS LESS THAN 1/8". FASTENERS SHALL BE HILTI HSN-24 FOR SUPPORT STEEL THICKNESS 1/8" TO 3/8". FASTENERS SHALL BE HILTI X-ENP-19 FOR SUPPORT STEEL THICKNESS GREATER THAN 1/4". FOR SUPPORT STEEL THICKNESS BETWEEN 1/4" AND 3/8" (INCLUSIVE), HILTI HSN-24 OR X-ENP-19 FASTENERS MAY BE USED AT CONTRACTOR'S OPTION.

Sheet Title
LOW ROOF FRAMING PLAN - BASE BID

Date: JANUARY 19, 2023
Sheet No:
S4.01

BASE BID ROOF FRAMING PLAN NOTES:

1. B.O. DECK= TOP OF FRAMING (BOTTOM OF DECK) ELEVATION ABOVE THE FINISHED FIRST FLOOR.
2. T.O.S.= TOP OF WIDE FLANGE GIRDER ELEVATION ABOVE FINISHED FIRST FLOOR.
3. SEE FOR STEEL JOIST AND JOIST GIRDER DESIGN CRITERIA.
4. SEE 3 / S0.6 & 4 / S0.6 FOR ROOF HUNG PIPING SUPPORTS.
5. FIRE SPRINKLER CONTRACTOR SHALL LAY OUT FIRE SPRINKLER LINES SO THAT NO LINE PASSES UNDER SKYLIGHT/SMOKEVENTS OR FUTURE MECHANICAL UNITS (WHERE THESE ITEMS OCCUR).
6. FOR ROOF HATCH WITH LADDER ACCESS, SEE ARCHITECTURAL.
7. STEEL JOIST AND JOIST GIRDER SUPPLIER SHALL SUBMIT STRUCTURAL CALCULATIONS, SHOP, AND ERECTION DRAWINGS SEALED AND SIGNED BY A NEVADA REGISTERED CIVIL OR STRUCTURAL ENGINEER TO THE ENGINEER OF RECORD WHO AGREES TO REVIEW THESE DOCUMENTS FOR ACCEPTANCE PRIOR TO FABRICATION. STRUCTURAL CALCULATIONS, SHOP AND ERECTION DRAWINGS SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT FOR ACCEPTANCE AFTER THE ENGINEER OF RECORD HAS NOTED HIS/HER ACCEPTANCE.
8. JOIST AND JOIST GIRDER DRAWINGS SHALL SHOW COMPLIANCE WITH THE STANDARD SPECIFICATIONS FOR STEEL JOISTS, K-SERIES, LH-SERIES, DLH-SERIES AND JOIST GIRDERS, 44TH EDITION, PUBLISHED BY THE STEEL JOIST INSTITUTE.
9. JOIST AND JOIST GIRDERS SHALL BE IDENTIFIED AS TO TYPE, SIZE, AND MANUFACTURER BY TAGGING OR OTHER SUITABLE MEANS AT THE TIME OF MANUFACTURE OR FABRICATION. SUCH IDENTIFICATION SHALL BE MAINTAINED CONTINUOUSLY TO THE POINT OF THEIR INSTALLATION IN A STRUCTURE.

BASE BID METAL DECK SCHEDULE

MARK	DECK TYPE (SEE NOTE 1)	DECK SIZE	DECK ATTACHMENT ZONE	DIAPHRAGM CONNECTIONS (SEE NOTES 2, 3 AND 6)		
				LOW FLUTES		SIDE SEAMS
				PERPENDICULAR TO SUPPORT	PARALLEL TO SUPPORT	
PLB-I	PLB-36	1 1/2" x 18 GA	1	FASTENERS AT 36/4 PATTERN	FASTENERS AT 12" O.C. MAX	VSC2 AT 24" O.C. MAX

NOTES:

1. METAL DECK SHALL BE AS SPECIFIED BY ASC, VERCO, VULCRAFT, EPIC OR APPROVED EQUAL.
2. CONNECTIONS SHALL BE PLACED IN ACCORDANCE WITH THE DECK MANUFACTURERS STANDARD PATTERN AND REQUIREMENTS.
3. PW = 3/4" PUDDLE WELD. VSC2 = VERCO PUNCHLOK II SIDELAP CONNECTION.
4. DECK SHALL BE PLACED IN EITHER A 2-SPAN OR 3-SPAN CONDITION, SINGLE DECK SPANS WILL NOT BE ALLOWED UNLESS SPECIFICALLY NOTED.
5. REFER TO DECK ATTACHMENT DIAGRAM FOR DECK ATTACHMENT ZONE.
6. FASTENERS SHALL BE #12 SCREWS FOR SUPPORT STEEL THICKNESS LESS THAN 1/8". FASTENERS SHALL BE HILTI HSN-24 FOR SUPPORT STEEL THICKNESS 1/8" TO 3/8". FASTENERS SHALL BE HILTI X-ENP-19 FOR SUPPORT STEEL THICKNESS GREATER THAN 1/4". FOR SUPPORT STEEL THICKNESS BETWEEN 1/4" AND 3/8" (INCLUSIVE), HILTI HSN-24 OR X-ENP-19 FASTENERS MAY BE USED AT CONTRACTOR'S OPTION.

BASE BID JOIST BEARING PLATE SCHEDULE

MARK	PLATE	ANCHOR	WALL ANCHORAGE LOAD (0.6W OR 0.7E)

REV	DATE	DESCRIPTION

Sheet Title
HIGH ROOF FRAMING PLAN - BASE BID

Date: JANUARY 19, 2023

Sheet No:
S4.02

BASE BID TYP. JOIST DESIGN CRITERIA

1. JOISTS AND JOIST GIRDERS SHALL BE DESIGNED BY THE JOIST MANUFACTURER IN ACCORDANCE WITH THE STEEL JOIST INSTITUTE (SJI) AND THE 2018 IBC. THE JOIST DESIGNATIONS INDICATED IN THE CONSTRUCTION DOCUMENTS SHALL BE CONSIDERED MINIMUMS. FINAL DESIGN AND DESIGNATION SHALL BE BY THE JOIST MANUFACTURER, BASED ON THE LOADING CRITERIA PRESENTED IN THE CONSTRUCTION DOCUMENTS, AND BE OF THE DEPTHS SHOWN ON THE DRAWINGS.
2. IN ADDITION TO THE LOADS INDICATED, JOISTS AND JOIST GIRDERS SHALL BE DESIGNED FOR ALL SPECIAL LOADS INDICATED ON THE PLANS AND DETAILS, INCLUDING THE MECHANICAL LOADS IDENTIFIED ON THE PLANS.
3. DEFLECTIONS OF ALL MEMBERS SHALL BE LIMITED TO L/360 FOR LIVE LOADS AND L/240 FOR TOTAL LOADS, U.N.O.
4. PROVIDE SJI STANDARD CAMBER U.N.O.
5. PROVIDE ALL REQUIRED BRIDGING FOR THE SPANS AND LOADING SHOWN WHETHER INDICATED ON PLANS OR NOT. WHERE INDICATED ON PLANS, LINES OF BRIDGING ARE APPROXIMATE AND SHALL BE ADJUSTED AS NECESSARY BY THE JOIST MANUFACTURER FOR THEIR FINAL DESIGN. THE CONTRACTOR AND JOIST MANUFACTURER SHALL COORDINATE THE LOCATIONS OF BRIDGING WITH MECHANICAL DUCTS, PIPING, OR OTHER ITEMS TO AVOID CONFLICTS. USE X-BRIDGING OR DIAGONAL BRACING AS REQUIRED AT LOCATIONS WHERE LINES OF BRIDGING MUST BE INTERRUPTED BECAUSE OF MECHANICAL DUCTWORK OR OTHER OBSTRUCTIONS. SEE TYPICAL BRIDGING DETAILS.
6. ALL JOISTS SHALL HAVE SEAT DEPTHS (SLOPING WHERE REQUIRED) AND TOP CHORD EXTENSIONS AS INDICATED IN PLANS AND DETAILS.
7. REINFORCE JOISTS PER TYPICAL DETAILS WHERE CONCENTRATED LOADS ARE APPLIED TO JOIST CHORDS FURTHER THAN 6" AWAY FROM PANEL POINTS.
8. JOISTS SHALL BE DESIGNED WITH CLEARANCES AS REQUIRED WHERE DUCTWORK PASSES THROUGH WEB SPACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL LAYOUT OF THESE DUCTS AND FOR COMMUNICATING THESE REQUIREMENTS TO THE JOIST MANUFACTURER.
9. ALL "LH" AND "K" SERIES JOISTS SHALL BE PROVIDED WITH EITHER 6" OR 3 1/2" HIGH BEARING SEAT AS SHOWN ON THE STRUCTURAL DETAILS.
10. JOISTS SHALL BE DESIGNED FOR THE FOLLOWING LOADS:

LOAD CASE	LOAD
DEAD LOAD	20 PSF AT 1 1/2" DECK
ROOF LIVE LOAD	20 PSF
ROOF SNOW LOAD	9 PSF
WIND UPLIFT (ALLOWABLE)	SEE UPLIFT DIAGRAM
TOP CHORD AND JOIST SEAT AXIAL LOAD (0.6W OR 0.7E WALL ANCHORAGE)	SEE JOIST BEARING SEAT SCHEDULE
JOIST ADD LIVE LOAD ANYWHERE ALONG TOP OR BOTTOM CHORDS (ALL JOISTS AT OR BETWEEN PANEL POINTS)	500 LBS, U.N.O.

ATTACHMENT NOTES

(MIN. REQUIREMENTS UNLESS NOTED OTHERWISE)

GENERAL REQUIREMENTS:

THESE GUIDELINES HAVE BEEN PREPARED FOR USE BY ENGINEERS, ARCHITECTS AND CONTRACTORS, APPROVING AUTHORITIES, AND OTHERS AS AN AID IN STANDARDIZING DETAILS OF CONSTRUCTION FOR SEISMIC RESTRAINTS OF FOOD SERVICE EQUIPMENT COMPLYING WITH THE 2019 UNIFORM BUILDING CODE (UBC) AS MODIFIED BY THE NEVADA BUILDING CODE. IT IS NOT TO BE CONSTRUED TO BE A DESIGN GUIDELINE. THE APPLICATIONS OF THE DETAILS CONTAINED HEREIN TO A SPECIFIC PROJECT ARE THE RESPONSIBILITY OF THE DESIGN PROFESSIONAL. NEVADA OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT (NOSHPD) APPROVAL IS FOR ANCHORAGE ONLY. CONSTRUCTION OF EQUIPMENT MUST BE STRONG ENOUGH TO RESIST DESIGN FORCES.

THESE GUIDELINES WERE DEVELOPED USING SOUND ENGINEERING PRINCIPLES AND JUDGMENT. THEY REPRESENT REALISTIC AND SAFE DETAILS COMPATIBLE WITH GENERAL GUIDELINES AND FORCE FACTORS IN THE IBC 2019 AS MODIFIED BY NEVADA BUILDING CODE. THEY ARE SUBJECT TO REVISION AS FURTHER EXPERIENCE AND INVESTIGATION MAY SHOW IF NECESSARY. SMACNA ASSUMES NO RESPONSIBILITY AND ACCEPTS NO LIABILITY FOR THE APPLICATION OF THE PRINCIPLES OR TECHNIQUES CONTAINED IN THIS GUIDELINE.

GENERAL NOTES:

1. – KITCHEN EQUIPMENT IS MANUFACTURED IN A MULTITUDE OF DIFFERENT SHAPES, SIZES, AND WEIGHTS. IN ORDER TO CODIFY THE VARIABLES, EQUIPMENT HAS BEEN ARRANGED INTO BASIC CATEGORIES OR TYPES; ALL EQUIPMENT WITHIN A CATEGORY HAS SIMILAR RESTRAINT REQUIREMENTS. DETAILS OF ANCHORAGES AND BRACING FOR EACH OF THE BASIC TYPES HAVE BEEN DEVELOPED. THE EQUIPMENT SHOWN IN THE INDEX IS NOT NECESSARILY A COMPLETE LIST, BUT THE LISTED EQUIPMENT DETAILS MAY BE USED AS A GUIDE FOR SIMILAR SIMILAR EQUIPMENT WITHIN THE RESTRAINTS INDICATED. THE PROJECT ARCHITECT/ENGINEER SHOULD BE CONSULTED IF THERE IS ANY DOUBT ABOUT RESTRAINT REQUIREMENTS, SO THAT ALLOWANCES FOR BRACING SYSTEMS MAY BE INCLUDED IN THE CONTRACT DOCUMENTS OR CONTRACTOR'S BID.
2. – ALL DETAILS IN THIS GUIDELINE ARE FOR EQUIPMENT THAT IS DIRECTLY CONNECTED TO UTILITIES. PLUG-IN TYPES ARE USUALLY EXCLUDED. THE EXCEPTION IS FREESTANDING CABINETS GREATER THAN FIVE FEET IN HEIGHT. THE DETAILS IN THE GUIDELINE SHOW AN ENTIRE ASSEMBLY.
3. – THE DETAILS HAVE BEEN PREPARED ON THE BASIS OF NEW CONSTRUCTION. THE SAME DETAILS ARE APPLICABLE TO REMODELING, PROVIDED THE SPECIFIED STRUCTURAL CAPACITIES OF THE EXISTING STRUCTURES, SUCH AS STUD WALLS, FLOORS, ETC., ARE EQUIVALENT SUBSTANTIATED.
4. – FINISHES INDICATED ON THE DETAILS ARE NOT INCLUDED IN THE KITCHEN EQUIPMENT CONTRACT.
5. – THE FOOD SERVICE EQUIPMENT CONTRACTOR SHALL PROVIDE LOCATION DRAWINGS FOR ALL EMBEDDED ITEMS AND WALL PLATES. THE GENERAL CONTRACTOR SHALL COORDINATE THE WORK OF OTHER TRADES AS THEY RELATE TO THE INSTALLATION OF KITCHEN EQUIPMENT.
6. – BACKING PLATES ON WALLS SHALL BE INSTALLED TO ENSURE A FLAT FINISHED WELL.
7. – CONCRETE ANCHORS WILL HAVE LOCAL-GOVERNING-JURISDICTION-APPROVED VALUES EQUAL TO OR GREATER THAN BOTH THE SHEAR AND TENSION CAPACITIES LISTED ON A-34/FS1.09.1. CAST-IN-PLACE BOLTS, INSERTS, EXPANSION ANCHORS, OR HEAT-TREATED CONCRETE SCREWS MAY BE USED WHERE THE APPROVED LOADS ARE EQUAL TO OR GREATER THAN THE VALUES FOR THE SPECIFIED CONCRETE ANCHOR. THE DESIGNER SHOULD USE CAUTION WHEN USING THE SHALLOWEST ANCHOR IN THE APPROVED REPORTS BECAUSE IT MAY NOT PERFORM SATISFACTORILY WHEN SUBJECTED TO SEISMIC LOADS. SATISFACTORILY WHEN SUBJECTED TO SEISMIC LOADS.
8. – ALL SCREWS INTO METAL FRAMING SHALL PENETRATE A MINIMUM OF 1/4" (6.4 MM) OR 3 PITCHED OF THREAD. ALL SCREWS INTO WOOD FRAMING SHALL PENETRATE A MINIMUM OF 1" (25.4 MM) UNLESS NOTED OTHERWISE.

BUILDING CONSTRUCTION NOTES

1. – REFER TO THE ARCHITECTS DRAWINGS AND SPECIFICATIONS FOR CURRENT BUILDING CODES

ELECTRICAL NOTES

1. – REFER TO THE ELECTRICAL ENGINEER'S DRAWINGS AND SPECIFICATIONS FOR CURRENT ELECTRICAL CODES AND ELECTRICAL NOTES

MECHANICAL / VENTILATING NOTES

1. – REFER TO THE MECHANICAL ENGINEER'S DRAWINGS AND SPECIFICATIONS FOR CURRENT MECHANICAL CODES AND MECHANICAL NOTES

PLUMBING NOTES

1. – REFER TO THE PLUMBING ENGINEER'S DRAWINGS AND SPECIFICATIONS FOR CURRENT PLUMBING CODES AND PLUMBING NOTES

REFRIGERATION NOTES

(MIN. REQUIREMENTS UNLESS NOTED OTHERWISE)

1. – ANY DISCREPANCIES BETWEEN PLANS AND CODE REQUIREMENTS THAT MAY AFFECT THE INSTALLATION, FABRICATION, OR INSTALLATION, FABRICATION, OR OVERALL WORK IN ANY WAY SHALL BE BROUGHT TO THE ATTENTION OF THE FOOD SERVICE EQUIPMENT CONTRACTOR IMMEDIATELY BY THE REFRIGERATION CONTRACTOR, BEFORE START OF CONSTRUCTION.
2. – FOOD FACILITY REQUIREMENT NOTES AND ALL OTHER NOTES ARE TO BE CONSIDERED APART OF THESE NOTES. REFRIGERATION CONTRACTOR TO PROVIDE AS THEY APPLY.
3. – CONTRACTOR SHALL BE RESPONSIBLE THAT HIS PHASE OF WORK MEETS AND IS INSTALLED IN ACCORDANCE WITH STANDARDS REQUIRED BY ALL GENERAL, STATE, FEDERAL, AND ALL CODES PECULIAR TO MUNICIPALITY OR AREA WHERE JOB IS BEING INSTALLED INCLUDING DEPARTMENT OF HEALTH SERVICES REQUIREMENTS.
4. – CONTRACTOR TO VERIFY ALL SERVICES, SIZES, AND LOCATIONS REQUIRED FOR REFRIGERATION EQUIPMENT. PROVIDE AND INSTALL ALL COMPRESSORS, REMOTE ICE MACHINE CONDENSING UNITS, REFRIGERANT PIPING, VALVES, FITTINGS, GAUGES, INSULATION, ETC., ALL AS REQUIRED. FOR A COMPLETE WORKING SYSTEM, UNLESS NOTED OTHERWISE.
5. – CONTRACTOR SHALL SEAL ALL REFRIGERATION PENETRATIONS THROUGH WALLS, FLOORS, AND CEILINGS. WATERTIGHT AND VERMIN-PROOF.
6. – ELECTRICAL SERVICE, CONTROL WIRING, AND CONNECTIONS TO BE PROVIDED AND INSTALLED BY THE ELECTRICAL CONTRACTOR.
7. – REFRIGERATION COMPRESSOR(S) AND REMOTE ICE MACHINE CONDENSING UNIT(S) ARE TO BE LOCATED A MINIMUM OF TEN (10) FEET FROM COOKING EXHAUST FANS.
8. – REFRIGERATION COMPRESSOR(S) SHALL BE AIR COOLED, SEMI-HERMETIC TYPE WHERE POSSIBLE. BLOWER COILS SHALL BE VINYL DIPPED TYPE.
9. – CONTRACTOR TO PROVIDE & INSTALL INSULATED REFRIGERATION LINES IN WALLS AND/OR CEILINGS BEFORE THEY ARE CLOSED, AND FINISH SURFACE IS APPLIED.
10. – CONTRACTOR TO PROVIDE AND INSTALL SUPPORTS (TRAPEZE STYLE) FOR ALL OVERHEAD REFRIGERATION LINE RUNS.

FOOD FACILITY REQUIREMENTS NOTES

(MIN. REQUIREMENTS UNLESS NOTED OTHERWISE)

1. – A CONCRETE SLAB IS PROVIDED FOR TRASH, GARBAGE, AND GREASE CONTAINER. IF WALLS ENCLOSE AREA, THE INTERIOR WALL SURFACES WILL BE SMOOTH, SEALED AND WASHABLE (E.G., PLASTERED SMOOTH AND PAINTED, ETC.)
2. – **ALL FOOD-RELATED AND UTENSIL-RELATED EQUIPMENT SHALL MEET OR BE EQUIVALENT TO SANITATION STANDARDS ESTABLISHED BY AN AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI) ACCREDITED PROGRAM.**
3. – ALL FLOOR MOUNTED EQUIPMENT WILL BE INSTALLED ON MINIMUM 6" SANITARY LEGS, CASTORS, OR COMPLETELY SEALED IN POSITIONED ON A 4-INCH HIGH CURB WITH CONTINUOUSLY COVED BASE. COUNTER TOP EQUIPMENT WILL BE ON 4-INCH SANITARY LEGS OR SEALED TO THE COUNTER UNLESS READILY MOBILE.
4. – NOT USED
5. – ANY OPENABLE WINDOWS, VENT OPENINGS OR OTHER SIMILAR OPENINGS MUST BE PROVIDED WITH TIGHT FITTING SCREENS OF MINIMUM 16-MESH TO THE INCH. WINDOWS TO BE FIXED AT FOOD PREP, UNTENSIL-WASHING, OPEN FOOD AND UTENSIL STORAGE AREAS.
6. – ALL EXTERIOR DOORS OPEN OUTWARD AND ARE SELF-CLOSING AND TIGHT FITTING.
7. – BI-FOLD, FRENCH, ACCORDION STYLE AND ROLL-UP DOORS CANNOT OPEN INTO THE FOOD PREP, UTENSIL WASHING OR UNPACKAGED FOOD SERVICE AREAS.
8. – TOILET ROOM DOORS AND DRESSING ROOM DOORS MUST BE SELF-CLOSING AND TIGHT FITTING.
9. – DELIVERY DOORS TO HAVE AIR CURTAIN FANS THAT SPAN THE WIDTH OVER THE DOOR. THE FAN MUST ACTIVATE VIA A MICROSWITCH PROVIDING A MINIMUM VELOCITY OF 1600 FPM MEASURED 3-FEET ABOVE THE GROUND.
10. – A MINIMUM OF 10 FOOT-CANDLES OF LIGHT MEASURED 30-INCHES OFF FLOOR IS PROVIDED IN WALK-IN REFRIGERATED STORAGE AND DRY STORAGE ROOMS AND AT LEAST 20-FOOT CANDLES IS PROVIDED WHERE FOOD IS PROVIDED FOR CONSUMER SELF-SERVICE, WHERE FRESH PRODUCE OR PREPACKAGED FOODS ARE SOLD OR OFFERED FOR CONSUMPTION; INSIDE EQUIPMENT SUCH AS REACH-IN AND UNDER-COUNTER REFRIGERATORS; IN AREAS USED FOR HANDWASHING, WAREWASHING, EQUIPMENT AND UTENSIL STORAGE, AND IN TOILET ROOMS.
11. – A MINIMUM OF 50 FOOT-CANDLES OF LIGHT MEASURED 30-INCHES OFF FLOOR IS PROVIDED WHEN WORKING WITH FOOD OR WORKING WITH UTENSILS OR EQUIPMENT SUCH AS KNIVES, SLICERS, GRINDERS, OR SAWS WHERE EMPLOYEE SAFETY IS A FACTOR AND IN ALL AREAS DURING PERIODS OF CLEANING.
12. – SHATTERSHEILDS FOR ALL LIGHTS ABOVE FOOD PREPARATION, WORK, AND STORAGE WILL BE PROVIDED.
13. – ALL WAREWASHING SINKS TO HAVE THREE COMPARTMENTS THAT ARE A MINIMUM SIZE OF AT LEAST 18"x18"x12" DEEP (OR 16"x20"x12" DEEP) WITH A MINIMUM 18-INCH DRAINBOARD AT EACH END. IF AGAINST A WALL, IT MUST HAVE AN 8-INCH INTEGRAL BACKSPLASH. HOWEVER, IT MUST BE CAPABLE TO ACCOMMODATE THE LARGEST UTENSIL TO BE WASHED. A WAREWASHING MACHINE DOES NOT SUBSTITUTE FOR THE SINK REQUIREMENT.
14. – SINKS TO HAVE SPOUT(S) CAPABLE OF REACHING EACH COMPARTMENT.
15. – FOOD PREP SINK COMPARTMENT(S) TO BE AT LEAST 18"x18"x12" DEEP (OR 16"x20"x12" DEEP) WITH A MINIMUM 18-INCH DRAINBOARD. SEPARATE FOOD PREP SINKS TO BE PROVIDED FOR MEATS AND PRODUCE.
16. – THE THREE OR FOUR COMPARTMENT BAR SINK TO BE AT LEAST 12"x12"x10" DEEP (OR 10"x14"x10" DEEP) WITH A MINIMUM 18-INCH DRAINBOARD AT EACH END.
17. – A SEPARATE WET WASTE DUMP FIXTURE SHALL BE PROVIDED FOR DISPOSAL OF DRINK, WASTE ICE OR COFFEE WASTE.
18. – EACH HANDWASHING SINK MUST HAVE PERMANENTLY MOUNTED SINGLE-SERVICE SOAP & PAPER TOWEL DISPENSERS.
19. – THE HOT WATER HEATER WILL BE A COMMERCIAL TYPE CAPABLE OF CONSTANTLY SUPPLYING HOT WATER AT A TEMPERATURE OF 120°F TO ALL SINKS. IN SIZING THE WATER HEATER, THE PEAK HOURLY DEMAND FOR ALL SINKS, ETC., ARE ADDED TOGETHER TO DETERMINE THE MINIMUM REQUIRED RECOVERY RATE.
20. – ALL LAVATORIES OR HAND SINKS WILL HAVE A COMBINATION FAUCET OR PREMIXING FAUCET CAPABLE OF SUPPLYING WATER TEMPERED TO 100°F. SELF-CLOSING OR METERED FAUCET TO PROVIDE AT LEAST 15-SECONDS OF WATER WITHOUT REACTIVATION.
21. – ALL PLUMBING, ELECTRICAL AND GAS LINES SHALL BE CONCEALED WITHIN THE BUILDING STRUCTURE TO AS GREAT EXTENT AS POSSIBLE. ALL EXPOSED CONDUITS, PLUMBING, ETC. SHALL BE INSTALLED AT LEAST 6-INCHES OFF FLOOR AND 3/4" FROM WALLS USING STANDOFF BRACKETS.
22. – CONDUIT, PLUMBING OR PIPING CANNOT BE INSTALLED ACROSS THE AISLE WAY, TRAFFIC AREA OR DOOR OPENING.
23. – MULTIPLE RUNS OR CLUSTERS OF CONDUIT OR PIPELINES SHALL BE FURRED IN OR ENCASED IN AN APPROVED SEALED ENCLOSURE.
24. – ALL LIQUID WASTE SHALL BE DRAINED BY MEANS OF INDIRECT WASTE PIPES INTO A FLOOR SINK. FLOOR SINKS ARE TO BE INSTALLED FLUSH WITH THE FINISH FLOOR SURFACE AND HAVE SUITABLE EASILY REMOVABLE SAFETY COVER GRATES.
25. – FLOOR SINK TO BE 50% EXPOSED WHEN NO ACCESS IS PROVIDED FOR CLEANING OR BE IN LINE WITH THE FRONT FACE OF ELEVATED FREESTANDING EQUIPMENT.
26. – APPROVED BACKFLOW PREVENTION DEVICES SHALL BE PROPERLY INSTALLED UPSTREAM OF ANY POTENTIAL HAZARD BETWEEN THE POTABLE WATER SUPPLY AND THE SOURCE OF CONTAMINATION. HOSES SHALL NOT BE ATTACHED TO A FAUCET OR HOSE BIBB UNLESS AN APPROVED BACKFLOW PREVENTER IS PROVIDED.
27. – WATER SUPPLY TO CARBONATORS SHALL BE PROTECTED BY AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTER. THE RELIEF VALVE SHALL DRAIN INDIRECTLY TO SEWER WITH A LEGAL AIR GAP.
28. – FOR CLEANING FLOOR MATS, THE JANITORIAL SINK TO BE A MINIMUM 24" BY 36" FLOOR-MOUNTED TYPE. MOPS SHALL BE PLACED IN A POSITION THAT ALLOWS THEM TO AIR-DRY WITHOUT SOILING WALLS, EQUIPMENT, OR SUPPLIES.
29. – THE JANITORIAL SINK FAUCET WILL HAVE A THREADED OUTER LIP FOR HOSE ATTACHMENT AND AN APPROVED BACKFLOW PREVENTION DEVICE. NO CHEMICAL DISPENSING SYSTEMS OR SHUT-OFF VALVES TO BE ATTACHED TO MOP SINK FAUCET OUTLET (UNLESS A "SIDEKICK" PLUMBING DEVICE IS INSTALLED).
30. – NO CONDENSATE OR WASTEWATER INCLUDING HVAC WILL DRAIN INTO THE JANITORIAL SINK.
31. – GREASE TRAP TO BE LOCATED OUTSIDE THE FOODSERVICE ACTIVITY AREA, FLUSH WITH THE FINISH FLOOR WHEN INDOORS. LOCAL WASTEWATER DISTRICT OR BUILDING DEPARTMENT TO BE CONTACTED FOR GREASE REMOVAL REQUIREMENTS.
32. – FLOOR DRAINS SHALL BE INSTALLED IN FLOORS THAT ARE WATER-FLUSHED FOR CLEANING AND IN AREAS WHERE PRESSURE SPRAY METHODS FOR CLEANING EQUIPMENT ARE USED, IN RESTROOMS, JANITORIAL ROOMS, SCULLERIES, AND AT BARS WITH WAREWASHING. FLOOR SURFACE IN AREAS PURSUANT TO THIS SHALL BE SLOPED 1:50 TO THE FLOOR DRAINS.
33. – ADEQUATE VENTILATION IS TO BE PROVIDED TO ALL TOILET ROOMS, JANITOR CLOSET WITH MOP SINKS, AND INDOOR TRASH ROOMS AND IN DRESSING/CHANGE ROOM(S).
34. – THE FLOOR FINISH WILL HAVE A SMOOTH SURFACE UNDER ALL EQUIPMENT AND THE WALKWAYS WILL HAVE A LIGHT TEXTURE ONLY.
35. – THE PAINT USED ON WALLS AND CEILINGS OF ALL KITCHEN, FOOD PREP, WORK, STORAGE AREAS WILL BE A GLOSS OR SEMI-GLOSS ENAMEL. FINISH MATERIAL SHALL BE A LIGHT COLOR IN FOOD PREP AREAS FOR EASY CLEANING.
36. – PRIOR TO INSTALLATION, SAMPLES OF FINISHES TO BE SUBMITTED TO ENVIRONMENTAL HEALTH FOR APPROVAL AS NEEDED.
37. – COLD STORAGE ROOMS SHALL BE PROVIDED WITH A SECTION OF SHELVING INSTALLED TO HOLD SHALLOW COOL DOWN PANS – NOT TO EXCEED 4-INCHES IN HEIGHT. SPACE BETWEEN SHELVING TO BE AT LEAST 8-INCHES HIGH.
38. – BACKUP DRY STORAGE SHELVING SHALL BE A MINIMUM OF 96 LINEAR FEET (MEASURED WITH TIERS) OR 25% OF KITCHEN, FOOD PREP, AND WORK AREAS, WHICHEVER IS GREATER. SHELVING SHALL BE AT LEAST 18-INCHES DEEP AND START A MINIMUM SIX-INCHES OFF THE FLOOR SURFACE.
39. – SHELVING OVER WET AREAS (SINKS, MOP SINKS, ETC.) AND FOOD SURFACES WILL BE METAL.
40. – ALL SEAMS, GAPS, OPENINGS TO BE PROPERLY SEALED.

PROJECT INFORMATION:

1. – PROJECT INFOCITY OF FERNLEY COMMUNITY CENTER – 595 SILVER LACE BLVD, FERNLEY, NV 89408
2. – NAME AND PHONE NUMBER OF THE ARCHITECT IS: TSK – (702) 456-3000
3. – TYPE OF THIS FOOD FACILITY IS: 100% SINGLE SERVICE
4. – NUMBER OF EMPLOYEES PER SHIFT (INCLUDING OWNERS & MANAGERS): 4-5
5. – THIS FOOD FACILITY IS SERVED BY THE MUNICIPAL WATER DISTRICT OF THE CITY OF FERNLEY, NV.
6. – THIS FOOD FACILITY IS SERVED BY THE MUNICIPAL SEWER DISTRICT OF THE CITY OF FERNLEY, NV.
7. – SQUARE FOOTAGE OF THIS FOOD FACILITY IS: APPROXIMATELY 2375 1SQ. FT. BASE BID + 170 1SQ. FT. BID ALT "A"

PLUMBING LEGEND

- COLD WATER STUB
- COLD WATER STUB (FILTERED WATER)
- HOT WATER STUB
- DIRECT WASTE
- INDIRECT DRAIN LINE TO FLOOR SINK
- GAS STUB (NATURAL GAS SUPPLY)
- FLOOR DRAIN (WITH SLOPE PER CODE)
- (1) ITEM NUMBER (SEE EQUIPMENT SCHEDULE)
- [1] KEYNOTE SYMBOL (SEE KEYNOTES BELOW)
- ANSUL GAS SHUT-OFF VALVE
- FLOOR SINK
- FLOOR SINK (WITH 1/2 GRATE) WITH 1/2" MAX. GRATE SPACING ALL DIRECTIONS
- FLOOR SINK (WITH 3/4 GRATE) 1/2" MAX. GRATE SPACING ALL DIRECTIONS

NOTE:
REFERENCE TO PLUMBING ENGINEERING DRAWINGS FOR ADDITIONAL INFORMATION

NOTE:
SEE SHEET FS0.0.0 FOR PLUMBING NOTES AND OTHER APPLICABLE NOTES

PLUMBING KEYNOTES

1. FILTERED WATER REQUIRED. VERIFY REQUIREMENTS WITH THE VENDOR
2. 1.5" GAS SHUT-OFF VALVE - VERIFY SIZE, QUANTITY & LOCATION W/PLUMBING ENGINEER
3. PLUMBING REQUIREMENTS FOR THESE AREAS TO BE VERIFIED WITH THE ARCHITECT AND/OR PLUMBING ENGINEER
4. ACCESSIBLE HAND SINK - SEE DETAIL A/FS0.8.0
5. 3-COMPARTMENT POT SINK TO GREASE INTERCEPTOR - SEE DETAIL E/FS0.8.0
6. FLOOR SINKS IN THE WARE WASHING AREA SHALL BE 12" x12" x10" DEEP FLOOR SINK, MINIMUM 3" TRAPPED
7. DRAIN LINE FROM EVAP COIL TO FLOOR SINK SEE DETAIL E/FS0.6.1
8. 8" x 8" x 6" DEEP FLOOR SINK
9. FLOOR TROUGH WITH SUBWAY GRATE - SEE DETAIL W/FS0.8.1
10. WALL MOUNTED HOSE REEL - SEE DETAIL F/FS0.8.0
11. DISPOSER WITH CONTROL PANEL - SEE DETAIL D/FS0.8.0
12. HOT & COLD WATER STUB-UP AT +10" A.F.F., TEE-OFF AND CONNECT AS REQUIRED
13. P.C. TO INTER-CONNECT INDIRECT WASTE TO DRAIN COOLING KIT TO FLOOR SINK
14. NOT USED
15. PLUMBING CONTRACTOR TO PROVIDE AND INSTALL TEMPERING VALVES AND HOSE BIB
16. MOP SINK FAUCET, FILLER HOSES, PRE-RINSE FAUCETS, CARBONATORS, COMBI-OVENS, AND COUNTERTOP EQUIPMENT W/WATER CONNECTIONS TO BE PROVIDED WITH AN APPROVED BACKFLOW PREVENTION DEVICE WITH REDUCED PRESSURE PRINCIPLE. BACKFLOW DEVICE SHALL BE INSTALLED UPSTREAM OF ANY POTENTIAL HAZARD BETWEEN POTABLE WATER AND THE SOURCE OF CONTAMINATION.
17. NOT USED
18. NOT USED
19. NOT USED
20. SOFTEN HOT WATER FOR: DISHWASHERS, BOOSTER HEATERS, STEAMERS, AND COMBI-OVENS. FILTERED WATER FOR: COFFEE MAKERS, ICE MAKERS, DRINK DISPENSERS AND COMBI-OVENS. TREATED WATER (TOTAL DISOLVED SOLIDS) FOR: BOILERS AND STEAMERS.

ELECTRICAL KEYNOTES

1. J-BOX STUB-DOWN FROM ABOVE AND CONNECT TO HOOD LIGHTS
2. J-BOX LOCATED 12" ABOVE CEILING LINE FOR FIRE SUPPRESSION SYSTEM AUTOMAN (SEE DETAIL J/FS0.8.0)
3. OCTAGON PULL BOX FOR FIRE SUPPRESSION SYSTEM – SEE DETAIL J/FS0.8.0
4. WALL MOUNTED AIR CURTAIN'S MICRO SWITCH – SEE DETAIL G/FS0.8.0
5. NOT USED
6. DATA LINE TO SERVER VERIFY LOCATION WITH ELECTRICAL ENGINEER
7. TYPICAL WALK-IN BOX WIRING – SEE DETAIL K/FS0.8.0
8. CONVENIENCE OUTLETS – 120 VOLT 1ø 20 AMP; VERIFY ADDITIONAL LOCATIONS W/ELECTRICAL ENGINEER
9. ADDITIONAL CONVENIENCE OUTLETS, DATA & TELEPHONE LINES (IF APPLICABLE) TO BE VERIFIED W/ELECT ENGINEER
10. REFRIGERATION RACK LOCATED ON ROOF SEE SHEET A4.01 FOR EXACT LOCATION
11. J-BOX STUB-UP +10" AND CONNECT TO EQUIPMENT – SEE DETAIL H/FS0.8.0
12. DISPOSER W/CONTROL PANEL SEE DETAIL D/FS0.8.0
13. NOT USED
14. CONDENSING RACK LOCATED ON ROOF SEE SHEET A4.01 FOR EXACT LOCATION
15. EXHAUST FAN AND LIGHT TO BE INTERLOCKED IN EMPLOYEE RESTROOM
16. ALL ELECTRICAL TO STUB INTO FLOOR BOXES "BUMPED UP" 3/8" MAX. AT 2 TO 1 SLOPE TO PROTECT FROM WATER
17. EXHAUST & M.U.A. FAN MUST BE INTERLOCKED SWITCH
18. CONDUIT WITH ELECTRICAL WIRING TO STUB-UP A.F.F., FLEX AND CONNECT TO EQUIPMENT AND/OR CO'S AS REQUIRED (MOUNT CO'S IN FIXTURE). ELECTRICAL WIRING TO BE SIZED FOR ALL INCOMING SERVICE BY THE ELECTRICAL ENGINEER. E.C. TO MAKE FINAL HOOK-UPS TO ALL APPLICABLE EQUIPMENT AND TO PROVIDE AND INSTALL CONTRACTOR TO MAKE FINAL HOOK-UPS TO ALL SWITCHES BREAKERS, STARTERS, CONDUIT, JUNCTION BOXES AND OUTLETS IN FIXTURE. FIXTURE FABRICATOR TO LOCATE ALL OUTLETS AND SWITCHES WHEN PART OF FIXTURE. INTERNAL WIRING TO BE PROVIDED AND INSTALLED BY THE E.C. IN ACCORDANCE WITH ALL LOCAL CODES. E.C. SHALL SEAL ALL ELECTRICAL PENETRATIONS THROUGH FLOORS, WATER-TIGHT AND VERMIN-PROOF. A MINIMUM OF 3 WIRES REQUIRED ON ALL 208 VOLT OR LARGER CIRCUITS. SEE FOOD SERVICE EQUIPMENT SCHEDULE FOR LOADED SCHEDULE; ELEVATIONS FOR CO'S LOCATIONS; AND ELECTRICAL NOTES FOR ADDITIONAL REQUIREMENTS. (DETAIL H/FS0.8.0)
19. NOT USED

ENGINEERING GUIDE TO SPECIFICATION FOR REMOTE REFRIGERATION PACKAGE ENVIRO-THERM REMOTE SYSTEM

THE REFRIGERATION PACKAGE SHALL BE A PRE-ENGINEERED AND FACTORY ASSEMBLED UNIT, TRADE NAME "EVIRO-THERM", AS MANUFACTURED BY COLDZONE, A DIVISION OF HEAT TRANSFER PRODUCTS GROUP, 1933 VINEYARD AVE. ONTARIO, CA 91761. PHONE: (909) 786-3656, FAX: (714) 529-8503.

DEALER SHALL FURNISH AND INSTALL, WHERE SHOWN ON PLANS, (1) COLDZONE U.L. APPROVED "ENVIRO-THERM" AIR-COOLED REMOTE REFRIGERATION PACKAGE

1. ENCLOSURE
THE FRAME SHALL BE MADE OF STRUCTURAL STEEL AND THE ENCLOSURE AND PANELS SHALL BE MADE OF HEAVY GAUGE CARBON STEEL. ENTIRE FRAME SHALL BE PRE-ASSEMBLED, WELDED, CLEANED AND PAINTED WITH A PRIME COAT OF ZINC CHROMATE AND SHALL BE FINISHED WITH A COAT OF EPOXY BASED "ENVIRO-KOTE".

2. REFRIGERATION UNIT (ENVIRO-THERM)
A. THE ENVIRO-THERM REFRIGERATION UNIT SHALL BE PROVIDED WITH SINGLE STAGE HERMETIC SCROLL COPPELAND COMPRESSORS, MULTI-CIRCUITED AIR-COOLED CONDENSER OPERATING WITHIN THE RECOMMENDED RANGE OF SUCTION AND DISCHARGE PRESSURE FOR WALK-IN COOLERS, FREEZERS & REFRIGERATED FIXTURES. EACH CIRCUIT OF THE MULTI-CIRCUIT CONDENSER SHALL BE SIZED FOR MINIMUM OF 20° F.T.D.
B. EACH COMPRESSOR UNIT SHALL BE EQUIPPED WITH COPELAND COMPRESSOR, LARGE PUMP DOWN CAPACITY RECEIVER WITH TWO SHUTOFF VALVES, LIQUID LINE DRIER, SIGHT GLASS, SUCTION AND DIS- CHARGE VIBRATION ELIMINATOR, HIGH-LOW PRESSURE CONTROL, CRANKCASE HEATER AND FLOOD BACK HEAD PRESSURE CONTROL FOR LOW AMBIENT - ALL FACTORY ASSEMBLED.
C. ALL COMPRESSOR UNITS SHALL BE NEW AND FACTORY ASSEMBLED TO OPERATE WITH THE REFRIGERANT SPECIFIED IN THE REFRIGERATION ENGINEERING SUMMARY SHEET.

3. PRE-PIPING
A. ALL TUBING SHALL BE SECURELY SUPPORTED AND ANCHORED WITH CLAMPS.
B. ALL REFRIGERANT LINES SHALL BE EXTENDED TO ONE SIDE OF THE PACKAGE IN A NEAT AND ORDERLY MANNER.
C. ENDS OF LINES SHALL BE CAPPED AGAINST CONTAMINATION AFTER THE UNIT IS COMPLETED. THESE CAPPED ENDS ARE TO BE OPENED ONLY AT FINAL CONNECTION OF THE PACKAGE TO FIXTURES.

4. CONTROL PANEL
A. THE PACKAGE SHALL HAVE FACTORY MOUNTED AND PRE-WIRED CONTROL PANEL COMPLETE WITH INTERLOCKED MAIN FUSED DISCONNECT, COMPRESSOR CIRCUIT BREAKERS, CONTACTORS AND TIME CLOCKS WIRED FOR SINGLE POINT POWER CONNECTION.
B. ELECTRICAL CONTRACTOR SHALL PROVIDE AND INSTALL MAIN POWER LINES TO PANEL, AND USE WIREHARNESS WIRING FOR CONTROL AND DEFROST HEATER BETWEEN THE DEFROST CLOCK AND THE REFRIGERATION FIXTURES, ALL IN ACCORDANCE WITH THE WIRING DIAGRAM AND LOCAL CODES.

GENERAL NOTES

1. GENERAL CONTRACTOR
A. CONTRACTORS SHALL VERIFY ALL DIMENSIONS AND COORDINATE WITH OTHER TRADES.
B. GENERAL CONTRACTOR SHALL PREPARE AND WEATHERPROOFING THE PLATFORM AND CURBED OPENINGS.

2. REFRIGERATION CONTRACTOR
A. THE COMPLETE SYSTEM SHALL BE EVACUATED WITH VACUUM PUMP.
B. ALL COPPER TUBING TO BE REFRIGERANT GRADE A.C.R. OR TYPE "L".
C. CHARGE, TEST, AND ADJUST EACH UNIT TO BE IN AN OPERATIONAL SYSTEM.
D. SILVER SOLDER AND/OR SIL-FOS SHALL BE USED FOR ALL REFRIGERANT PIPING. SOFT SOLDER IS NOT
E. ALL PIPING TO BE PRESSURE TESTED WITH NITROGEN AT 300 PSI. AFTER THE CONDENSING UNIT AND COIL HAVE BEEN CONNECTED, THE BALANCE OF THE SYSTEM SHALL BE LEAK TESTED WITH ALL VALVES OPEN.
F. REFRIGERATION CONTRACTOR TO PROVIDE AND INSTALL DRAIN LINE HEATER IN FREEZER TO BE CONNECTED BY ELECTRICAL CONTRACTOR

3. ELECTRICAL CONTRACTOR
A. ELECTRICAL CONTRACTOR TO PROVIDE POWER FROM REFRIGERATION PACKAGE AND CONNECT CONTROL AND DEFROST SYSTEM AS CALLED FOR IN THE WIRING DIAGRAM.
B. ELECTRICAL CONTRACTOR TO PROVIDE COLOR CODED SERVICE FROM TIME CLOCK AT THE REFRIGERATION PACKAGE TO THE EVAPORATOR IN THE FIXTURE FOR DEFROST.
C. ALL ELECTRICAL WIRING AND INSTALLATION SHALL BE IN ACCORDANCE WITH THE WIRING DIAGRAM AND LOCAL CODES.

4. PLUMBING CONTRACTOR
A. PLUMBING CONTRACTOR TO PROVIDE HARD A.C.R. OR TYPE "L" COPPER DRAIN LINES FOR WALK-IN REFRIGERATOR AND FREEZER, PITCHED 1/4" PER FOOT OF RUN. IN FREEZER, UNHEATED DRAIN LINE MUST BE OUTSIDE OF FREEZER WALL TO PREVENT FREEZING. TRAP DRAIN LINE OUTSIDE OF REFRIGERATED SPACE TO AVOID ENTRANCE OF WARM AND MOIST AIR.
B. PLUMBING CONTRACTOR TO PROVIDE INDIVIDUAL DRAIN LINE FOR EACH EVAPORATOR UNLESS OTHERWISE CALLED FOR.
C. ALL PLUMBING INSTALLATION SHALL BE IN ACCORDANCE WITH LOCAL CODES.

A | ACCESSIBLE HAND SINK DETAILS — NTS

ACCESSIBLE HAND SINK REQUIREMENT NOTES

1. WATER AND DRAIN PIPES UNDER ACCESSIBLE HAND SINKS SHALL BE INSULATED OR OTHERWISE COVERED. THERE SHALL BE NO SHARP OR ABRASIVE OBJECTS OR SURFACES UNDER HAND SINKS.
2. FAUCET CONTROLS AND OPERATING MECHANISMS SHALL BE OPERABLE WITH ONE HAND AND SHALL NOT REQUIRE TIGHT GRASPING, PINCHING OR TWISTING OF THE WRIST. THE FORCE REQUIRED TO ACTIVATE CONTROLS SHALL BE NO GREATER THAN 5 LBF. LEVER-OPERATED, PUSH-TYPE AND ELECTRONICALLY CONTROLLED MECHANISMS ARE EXAMPLES OF ACCEPTABLE DESIGNS. SELF-CLOSING VALVES ARE ALLOWED IF THE FAUCET REMAINS OPEN FOR AT LEAST 10 SECONDS.
3. WHERE TOWEL, SANITARY NAPKINS, WASTE RECEPTACLES, SOAP DISPENSER AND OTHER SIMILAR DISPENSING AND DISPOSAL FIXTURES ARE PROVIDED, AT LEAST ONE OF EACH TYPE SHALL BE LOCATED WITHIN ALL OPERABLE PARTS WITHIN 40 INCHES FROM THE FINISHED FLOOR.
4. ALL DIMENSIONS SHOWN ARE MINIMUM CLEARANCES, UNLESS NOTED.
5. AREA BELOW HAND SINKS SHALL BE ACCESSIBLE AND CLEAR.

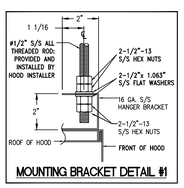
F | HOOD MOUNTING BRACKET DETAIL. NTS



MOUNTING BRACKET DETAIL #1

LIGHT DUTY IS FOR OVENS, CHEESEMELTERS, RETHERMALIZERS, STEAM JACKETED KETTLES AND COMPARTMENT STEAMERS.
MEDIUM DUTY IS FOR GRIDDLES, FRYERS, PASTA COOKERS, TILTING SKILLETS, BRAISING PANS, ROTISSERIES, CONVEYOR PIZZA OVENS.

NOTE: ALL SQUARE, ROUND, RECTANGULAR OR LINEAR HVAC DIFFUSERS SHALL NOT BE LOCATED ANY CLOSER THAN 48" FROM HOOD FRONT OR ENDS, AND SHALL BE DISTRIBUTED EVENLY ALONG THE LENGTH OF THE HOOD.

G | TYPE 1 HOOD SPECIFICATION AND LISTING NTS

TYPE 1 HOOD LISTING

cULus ☐ UL: MH26919 – Exhaust hoods with exhaust damper NSF
☐ UL: MH45396 – Exhaust hoods without exhaust damper

SPRING AIR SYSTEMS INC. HOODS ARE cULus AND UL LISTED, BUILT IN ACCORDANCE WITH UNDERWRITERS LABORATORIES UL710 STANDARD UNDER "EXHAUST HOODS WITHOUT EXHAUST FIRE DAMPERS", AND IN ACCORDANCE WITH UNDERWRITERS' LABORATORIES OF CANADA STANDARD S646-98, "HOODS FOR COMMERCIAL AND INSTITUTIONAL KITCHENS", CURRENT EDITION OF THE NFPA-96 AND INTERNATIONAL MECHANICAL CODE UNDER FILE NUMBERS MH26919 AND MH45396. HOODS COMPLY WITH NSF/ANSI 2 AND ALL APPLICABLE REQUIREMENTS. PRODUCTS APPEAR IN NSF OFFICIAL LISTING.

NFPA-96 4.21 HOOD CLEARANCE

NFPA-96 4.21 CLEARANCE NOTE: WHERE ENCLOSURES ARE NOT REQUIRED, HOOD, GREASE REMOVAL DEVICES, EXHAUST FANS, AND DUCTS SHALL HAVE A CLEARANCE OF A LEAST 17.99" (18") TO COMBUSTIBLE MATERIALS, 2.99" (3") TO LIMITED-COMBUSTIBLE MATERIAL, AND 0" (0") TO NON-COMBUSTIBLE MATERIAL. ALL WALLS SHOWN ARE ASSUMED LIMITED-COMBUSTIBLE, UNLESS OTHERWISE NOTED OR UNLESS A NFPA-96 CLEARANCE REDUCTION SYSTEM IS USED AND IS ACCEPTABLE BY THE AUTHORITY HAVE JURISDICTION.

SUPPLY AIR PLENUM FEATURES

MB PLENUM:
THE MB PLENUM IS CONSTRUCTED WITH 18 GA. STAINLESS STEEL, ON ALL EXPOSED SURFACES.

THE MB PLENUM COMES WITH THREE MAKEUP AIR BOUNDARY REGIONS.
1. APPLIANCE REGION – A S/S PERFORATED PANEL, DISCHARGES AN AIR CURTAIN AROUND THE APPLIANCES PERIMETER.
2. CHEF REGION – S/S PERFORATED PANEL, THAT DISCHARGES TOWARDS CHEF.
3. KITCHEN AMBIENT REGION – A S/S PERFORATED PANEL ASSEMBLY, THAT DISCHARGES, HORIZONTALLY INTO KITCHEN SPACE.

MJ PLENUM:
THE MJ PLENUM IS CONSTRUCTED WITH 18 GA. STAINLESS STEEL, ON ALL EXPOSED SURFACES.
THE MJ PLENUM, COMES WITH A MJ BLOWER ASSEMBLY THAT IS CONSTRUCTED WITH GA. 16 SATIN COATED (PAINTED BOX). IT INCLUDES, A FUSIBLE LINK FIRE DAMPER AND A REOSTAT CONTROL BOX.

MZ PLENUM:
THE MZ PLENUM IS DESIGN WITH GA.16 ALUMINUM HOUSING AND ALUMINUM PERFORATED BOTTOM DISCHARGE.
LOCATION: FINISHED CEILING MOUNTED AND 3" TO 30" FROM END OR FRONT EDGE OF THE HOOD.

ALL SQUARE, ROUND, RECTANGULAR OR LINEAR HVAC DIFFUSERS SHALL NOT BE LOCATED ANY CLOSER THAN 48" (1219MM) TO HOOD FRONT OR ENDS, AND SHALL BE DISTRIBUTED EVENLY ALONG THE LENGTH OF THE HOOD

APPLIANCE RATING:
LIGHT DUTY : OVENS, CHEESEMELTERS, RETHERMALIZERS, STEAM JACKETED KETTLES AND COMPARTMENT STEAMERS.
MEDIUM DUTY: GRIDDLES, FRYERS, PASTA COOKERS, TILTING SKILLETS, BRAISING PANS, ROTISSERIES, AND CONVEYOR PIZZA OVENS

ANSUL R-102 FIRE SUPPRESSION SYSTEM.

WET CHEMICAL FIRE SUPPRESSION FACTORY PRE-PIPING SCHEMATIC. FIRE SUPPRESSION SYSTEM IS DESIGN IN COMPLIANCE WITH UL STANDARD UL300 AND ULC STANDARD ULC/ORD-C1254.6-1995.
COMPONENTS INDICATED ARE SUPPLIED BY SPRING AIR, OR BY A LICENSED/AUTHORIZED FIRE SUPPRESSION INSTALLER". ANY OTHER ITEM/ COMPONENTS NOT SHOWN, THAT MAY BE REQUIRED BY LOCAL CODE REQUIREMENTS ARE NOT INCLUDED.
ALL FIRE SUPPRESSION COMPONENTS SHOWN ON THE HOOD, ARE PROVIDED AND INSTALLED BY S.A.S. AND ALL OTHER REQUIRED ARE PROVIDED BY A LICENSED/AUTHORIZED FIRE SUPPRESSION INSTALLER.
UL/ULC FIRE SUPPRESSION SYSTEM DESIGN IS BASED ON THE APPLIANCE LINEUP SHOWN. CAREFULLY REVIEW THE APPLIANCE LINEUP FOR ACCURACY AND CLEARLY INDICATE CHANGES. THE FIRE SUPPRESSION SYSTEM IS ENGINEERED BY SPRING AIR SYSTEMS BASED ON THIS LINEUP. SPRING AIR SYSTEMS WILL NOT BE RESPONSIBLE FOR ANY CHARGES RESULTING FROM APPLIANCE LINEUP CHANGES ONSITE THAT ARE NOT REFLECTED ON THIS DRAWING. UPON RECEIPT OF THIS COMPLETED FORM WE WILL GENERATE FIRE SUPPRESSION DRAWINGS THAT ARE TO BE SUBMITTED TO THE AHJ FOR PERMITS.

WET CHEMICAL FIRE SUPPRESSION NOTE:

1. THE REMOTE PULL STATION SHOULD BE MOUNTED AT A POINT OF EGRESS AND POSITIONED AT 48" ABOVE THE FINISHED FLOOR.
2. THE FIRE SUPPRESSION SYSTEM IS TO BE INSTALLED, INSPECTED, AND MAINTAINED IN ACCORDANCE TO NFPA17A AND NFPA96.
3. THE APPLIANCES NOZZLES AND FUSIBLE LINK LOCATION ARE BASED ON THE APPLIANCE LAYOUT INFORMATION MADE AVAILABLE TO SPRING AIR SYSTEMS INC. THE APPLIANCES AND THEIR LOCATION MUST BE REVIEWED BEFORE APPROVING DRAWINGS.
4. THE ELECTRIC GAS VALVE IS DESIGNED TO SHUT OFF THE FLOW OF GAS TO THE APPLIANCES UPON ACTUATION OF THE REGULATED RELEASE ASSEMBLY. THE GAS VALVE IS SUPPLIED BY SPRING AIR SYSTEMS INC. AND INSTALLED IN THE APPLIANCES GAS LINE, DOWNSTREAM OF THE MANUAL SHUT OFF VALVE AND CLOSE TO THE HOOD, BUT NOT UNDER THE HOOD. THE GAS VALVE MUST BE EASILY ACCESSIBLE. INSTALL BY MECHANICAL CONTRACTOR.

NOTE: FUSIBLE LINK SELECTION FOR HOODS: K STYLE AND ML STYLE 450°C – 232°C

APPLIANCES CLEARANCE

NOTE:
1) THE FRONT OF THE HOOD REQUIRES A MINIMUM OVERHANG OF 12", FROM THE FRONT EDGE OF THE COOKING SURFACE TO THE FRONT BOTTOM EDGE OF THE HOOD.
2) THE LEFT AND RIGHT END OF THE HOOD, MUST OVERHANG THE SIDES OF THE APPLIANCE BY AT LEAST 6"
3) THE DISTANCE FROM THE APPLIANCE COOKING SURFACE, TO THE BOTTOM OF THE HOOD'S EXTRACTOR, MUST BE BETWEEN 18" TO 51"
4) A MINIMUM OF 8" CLEARANCE, FROM THE BACK OF THE APPLIANCE TO THE BACK WALL, IS REQUIRED

WARNING:
ANY CHANGES IN THE HOOD TYPE OR MAKES/MODELS OF COOKING EQUIPMENT, MAY AFFECT THE SIZE OF REQUIRED AIR-FLOWS FOR THE HOOD.__COOKING EQUIPMENT MODEL, MANUFACTURER & LOCATION MUST BE VERIFIED FOR FIRE SUPPRESSION PRIOR TO FABRICATION.

GENERAL NOTES

1. THIS DRAWING IS INFORMATIONAL ONLY AND IS INTENDED TO AID IN THE PREPARATION OF CONTRACTOR BIDS.
2. HATCHED REGION REPRESENTS AREA TO BE FIRE PROTECTED.
3. DESIGN OF THE FIRE SPRINKLER SYSTEM SHALL BE IN ACCORDANCE WITH NFPA 13, LOCAL AND STATE AUTHORITIES BY A NEVADA LICENSED FIRE PROTECTION PROFESSIONAL. WORK INCLUDES INSTALLATION OF NEW PIPING AND HEADS AS REQUIRED TO ACCOMMODATE NEW FLOOR PLAN, DUCTWORK, PIPING AND CONDUITS. SEE SPECIFICATIONS AND DRAWINGS FOR PROJECT REQUIREMENTS.
4. FIRE SPRINKLER CONTRACTOR SHALL PERFORM A HYDRAULIC ANALYSIS TO VERIFY EXISTING CONDITIONS PRIOR TO PERFORMANCE OF WORK.
5. EXACT LOCATIONS OF NEW HEADS SHALL BE REVIEWED AND APPROVED BY THE ARCHITECT.
6. THE FIRE SPRINKLER CONTRACTOR/DESIGNER SHALL OBTAIN WATER SUPPLY INFORMATION FROM THE CITY OF FERNLYE FIRE DEPARTMENT.
7. CONTRACTOR SHALL PROVIDE PIPING COMPONENTS TO ALLOW FOR PIPE MOVEMENT AT SEISMIC JOINTS. REVIEW STRUCTURAL DRAWINGS FOR EXPANSION JOINT INFORMATION.
8. DO NOT ROUTE ANY PIPING DIRECTLY ABOVE ELECTRICAL EQUIPMENT OR PANELS.
9. ALL NEW PIPING IS TO BE STEEL WITH SCREWED FITTINGS FOR PIPING 2" AND SMALLER AND WELDED, GROOVED OR MECHANICAL T OUTLETS FOR PIPING 2.5" AND LARGER. PLAIN END PIPING CONNECTIONS WILL NOT BE ACCEPTABLE. PLASTIC PIPING WILL NOT BE ACCEPTABLE. ALL PIPING TO BE CONCEALED ABOVE CEILINGS UNLESS OTHERWISE NOTED PIPING IS TO BE INSTALLED TO DRAIN IN STRICT ACCORDANCE WITH NFPA 13. PIPING SHALL RUN STRAIGHT AND TRUE WITH BUILDING FEATURES.
10. SYSTEM SHALL BE HYDRAULICALLY DESIGNED. CONTRACTOR SHALL OBTAIN WATER SUPPLY INFORMATION AND DETERMINE SPRINKLER HEAD SPACING AND DESIGN DENSITIES FOR HYDRAULIC CALCULATIONS.
11. CONTRACTOR SHALL HOLD A VALID NEVADA CONTRACTORS LICENSE FOR THE TYPE OF WORK BEING PERFORMED.
12. ALL PIPING SHALL BE SUSPENDED AND BRACED IN STRICT ACCORDANCE WITH NFPA 13 AND FACTORY MUTUAL.
13. THIS IS A PERFORMANCE SPECIFICATION AND THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ALL PERMITS, FEES, DESIGN, MATERIAL, FABRICATION, STORAGE, INSTALLATION, TESTING AND CLEANUP FOR A COMPLETE AND OPERABLE SYSTEM. SYSTEM SHALL MEET THE REQUIREMENTS NFPA 13, 24, NEC, LOCAL AND STATE BUILDING OFFICIALS, AND HEALTH DEPARTMENT. SCOPE OF WORK INCLUDES A COMPLETE AND OPERABLE WET FIRE SPRINKLER AND STANDPIPE SYSTEM THROUGHOUT.
    A. ALARM DEVICES WITH WIRING CONNECTIONS FOR ELECTRICAL/ALARM CONTRACTOR.
    B. SUBMIT COMPLETE SET OF DRAWINGS, CALCULATIONS AND CATALOG CUTS OF MATERIALS TO THE AUTHORITY HAVING JURISDICTION FOR APPROVAL. OBTAIN APPROVAL PRIOR TO INSTALLATION. DRAWINGS AND CALCULATIONS SHALL BE SIGNED BY A NICET CERTIFIED LEVEL III FIRE SYSTEMS TECHNICIAN.

SYMBOLS AND ABBREVIATIONS LIST

WSP	WET SPRINKLER PIPING
(E)	EXISTING
(N)	NEW
P.O.C.	POINT OF CONNECTION
S.O.G.	SLAB ON GRADE
D.I.P.	DUCTILE IRON PIPE
SSU	STANDARD SPRAY UPRIGHT
SSP	STANDARD SPRAY PENDENT
FDC	FIRE DEPARTMENT CONNECTION
PIV	POST INDICATOR VALVE
	OS & Y GATE VALVE W/ TAMPER SWITCH.
	OS & Y GATE VALVE W/ TAMPER SWITCH OR GATE VALVE.
	CHECK VALVE

	FIRE BARRIERS	FIRE DAMPER (FD)	RUSKIN MODEL #DIBD2 FIRE DAMPER HAVING A UL555 RATING. DAMPER SHALL HAVE FUSIBLE INK RATED AT 165°F		SEE PLANS FOR LOCATION, APPLICATION AND DETAILS	MANUFACTURER RESPONSIBLE TO VERIFY EXACT SIZE/MODEL/STYLE FOR EACH APPLICATION. PROVIDE ACCESS DOORS AS REQUIRED , COORDINATE ACESS DOORS WITH ARCHITECT	
	SMOKE BARRIERS	SMOKE DAMPER (SD)	RUSKIN MODEL #SD102 SMOKE DAMPER HAVING A UL555 RATING.		SEE PLANS FOR LOCATION, APPLICATION AND DETAILS	MANUFACTURER RESPONSIBLE TO VERIFY EXACT SIZE/MODEL/STYLE FOR EACH APPLICATION. PROVIDE ACCESS DOORS AS REQUIRED , COORDINATE ACESS DOORS WITH ARCHITECT	
	FIRE SMOKE BARRIERS	COMBINATION FIRE & SMOKE DAMPER (FSD)	RUSKIN MODEL #FSD-36 COMBINATION FIRE/SMOKE DAMPER HAVING A UL555 RATING. DAMPER SHALL HAVE FUSIBLE INK RATED AT 165°F		SEE PLANS FOR LOCATION, APPLICATION AND DETAILS	MANUFACTURER RESPONSIBLE TO VERIFY EXACT SIZE/MODEL/STYLE FOR EACH APPLICATION. PROVIDE ACCESS DOORS AS REQUIRED , COORDINATE ACESS DOORS WITH ARCHITECT	

NOTES:
1. PROVIDE INLET AND OUTLET SIZES ABOVE UNLESS SIZES ARE SPECIFICALLY NOTED ON PLANS.
2. DIRECTIONAL AIR THROW PATTERNS SHALL BE FIELD ADJUSTED IN ACCORDANCE WITH REPRESENTATIONS BELOW AND AS NOTED ON DRAWINGS.

3. INLETS NOTED WITH AN "R" ARE ON THE RETURN SYSTEM AND INLETS NOTED WITH AN "E" ARE ON THE EXHAUST SYSTEM.

4. AIR DISTRIBUTION SHALL BE FACTORY WHITE FINISH, UNLESS NOTED OTHERWISE.

GENERAL NOTES

1. ALL WORK AND MATERIALS SHALL CONFORM TO THE LATEST ADOPTED EDITION OF THE IBC, UMC, UPC, NEC, NFPA, NEVADA STATE FIRE MARSHAL REGULATIONS, LOCAL AND STATE ORDINANCES, AND INDUSTRY STANDARDS.
2. THE INFORMATION REGARDING EXISTING CONDITIONS SHOWN ON THE DRAWINGS IS BELIEVED TO BE CORRECT, BUT IS NOT GUARANTEED. THE CONTRACTOR SHALL RELY ON SITE VISITS AND NECESSARY INVESTIGATION TO ENSURE THAT HIS BID IS CORRECT AND COMPLETE AS REQUIRED TO PROVIDE THE SCOPE OF WORK DESCRIBED ON THE DRAWINGS. EXTRA COST WILL NOT BE ALLOWED TO THE CONTRACTOR FOR FAILURE TO PERFORM THIS TASK.
3. SUBMIT FOR REVIEW AND APPROVAL ELECTRONIC COPIES OF SUBMITTALS FOR ALL EQUIPMENT, DUCTWORK, AIR DISTRIBUTION, PLUMBING FIXTURES, INSULATION, VALVES, AND PIPING MATERIALS.
4. AS-BUILT DRAWINGS SHALL BE SUBMITTED FOR REVIEW AND APPROVAL UPON COMPLETION OF THE WORK, AND PRIOR TO FINAL PAYMENT. AS-BUILT DRAWINGS SHALL BE MAINTAINED ON SITE AS THE WORK PROGRESSES AND SHALL BE AVAILABLE FOR REVIEW BY THE OWNER AND/OR ARCHITECT/ENGINEER AT ALL TIMES.
5. ALL EQUIPMENT AND MATERIALS SHALL BE INSTALLED IN STRICT ACCORDANCE WITH THE MANUFACTURER'S WRITTEN INSTALLATION INSTRUCTIONS.
6. THE WORK AND MATERIALS SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FROM THE DATE OF ACCEPTANCE BY THE OWNER.
7. COORDINATE THE ACTUAL LOCATION OF ROOFTOP UNITS, FANS, PIPES, VENTS, ETC. THROUGH THE ROOF WITH THE ROOF PLANS.
8. COORDINATE THE EXACT LOCATION OF EQUIPMENT AND OF PENETRATIONS THROUGH THE ROOF, FLOORS, AND WALLS WITH STRUCTURAL DRAWINGS PRIOR TO ANY ROUGH-IN.
9. REFER TO THE ARCHITECTURAL DRAWINGS FOR THE FULL EXTENT OF DEMOLITION AND NEW WORK TO BE PERFORMED.
10. SEISMIC BRACING FOR MECHANICAL SYSTEMS (EQUIPMENT, DUCTWORK, PIPING, AND CONDUIT) SHALL COMPLY WITH ALL APPLICABLE REQUIREMENTS OF THE 2018 INTERNATIONAL BUILDING CODE (IBC) INCLUDING ALL APPLICABLE PROVISIONS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS (ASCE) MINIMUM DESIGN LOADS FOR BUILDINGS (ASCE STANDARD 7-16 SECTION 13.1.3).
11. PIPING SHALL BE INSTALLED SUCH THAT IT DOES NOT OBSTRUCT ACCESS OR REMOVAL OF MECHANICAL EQUIPMENT.
12. DASHED OUTLINES DENOTE THE REQUIRED SERVICE CLEARANCE SPACE (SEE DUCTWORK PLANS). NO PIPING, DUCTWORK, CONDUIT, AND/OR CEILING HANGERS SHALL BE INSTALLED IN THE DESIGNATED SERVICE/ACCESS CLEARANCE AREA.
13. SEE ARCHITECTURAL AND/OR STRUCTURAL DRAWINGS FOR HOLE CORING REQUIREMENTS.
14. SEE REFLECTED CEILING PLANS FOR THE EXACT LOCATION OF ALL DIFFUSERS AND GRILLES LOCATED IN CEILINGS.
15. COORDINATE ROUTING OF DUCTWORK WITH PIPING, PLUMBING, FIRE SPRINKLER, AND ELECTRICAL TRADES PRIOR TO BEGINNING WORK.
16. ALL EQUIPMENT, PIPING, DUCTWORK, ETC. SHALL BE SUPPORTED AS REQUIRED TO PROVIDE A VIBRATION-FREE INSTALLATION.
17. ALL ROOF PENETRATIONS SHALL BE FLASHED AND COUNTER-FLASHED WATERTIGHT.
18. CONSTRUCT ALL DUCTWORK LOCATED BETWEEN AIR HANDLING UNITS AND VARIABLE AIR VOLUME BOXES FOR 4 INCH W.G. PRESSURE CLASS PER SMACNA REQUIREMENTS. CONSTRUCT ALL OTHER DUCTWORK FOR 2 INCH W.G. PRESSURE CLASS, EXCEPT WHERE NOTED OTHERWISE, PER SMACNA REQUIREMENTS.
19. ALL DUCT BRANCH SIZES TO CEILING DIFFUSERS SHALL BE CEILING DIFFUSER NECK SIZE, EXCEPT WHERE NOTED OTHERWISE.
20. PROVIDE FLEXIBLE DUCT CONNECTIONS WHEN CONNECTING DUCTWORK TO EQUIPMENT.
21. TESTING AND BALANCING SHALL BE CONDUCTED BY AN AABC CERTIFIED TEST AND BALANCE CONTRACTOR. TEST AND BALANCE ALL AIR AND WATER SYSTEMS TO ACHIEVE THE LISTED VOLUMES. SET ALL VOLUME DAMPERS AND TEST/BALANCE SYSTEMS SUCH THAT THE VOLUME INDICATED ON THE DRAWINGS IS BEING DELIVERED. PROVIDE A WRITTEN REPORT SHOWING 'KA' FACTORS, FPM, AND CFM FOR EACH DIFFUSER, REGISTER, AND GRILLE, AND THE TOTAL AIR VOLUME FOR EACH TESTED SYSTEM. THE FINALIZED REPORT SHALL BE SUBMITTED TO THE ARCHITECT/ENGINEER FOR REVIEW AND APPROVAL UPON COMPLETION OF THE TESTING AND BALANCING AND BEFORE SCHEDULING THE FINAL OBSERVATION.
22. PROVIDE MANUAL VOLUME DAMPERS AT EACH SUPPLY AND EXHAUST DUCT BRANCH. MANUAL VOLUME DAMPERS SHALL BE LOCATED AS FAR AWAY FROM THE DIFFUSER/GRILLE AS POSSIBLE.
23. FLEXIBLE DUCT LENGTHS SHALL NOT EXCEED 5'-0" (INSTALL IN CONCEALED LOCATIONS ONLY).
24. PROVIDE A MINIMUM OF 12" BELOW DUCTWORK TO CEILING FOR REMOVAL OF LIGHT FIXTURES.
25. COORDINATE THE EXACT SIZE AND LOCATION OF DUCTWORK WITH ALL OTHER TRADES.
26. VERIFY FINAL THERMOSTAT LOCATIONS WITH BUILT-IN CABINETS, DOOR SWINGS, ETC.
27. THERMOSTATS MOUNTED ON EXTERIOR WALLS SHALL HAVE AN INSULATED BASE.
28. SEE KITCHEN DRAWINGS FOR EXACT LOCATIONS AND CONNECTION SIZES OF KITCHEN HOODS.
29. ANY DRAIN LINES WHICH DAYLIGHT ABOVE APPROVED RECEPTOR SHALL BE 2 PIPE DIAMETERS ABOVE RECEPTOR'S FLOOD RIM.
30. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONNECTION TO ALL NEW KITCHEN EQUIPMENT. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL CONTRACTOR RESPONSIBILITIES. INSTALLATION SHALL BE COMPLETE AND SHALL BE OPERABLE TO THE SATISFACTION OF THE OWNER'S REPRESENTATIVE.
31. PRIOR TO ROUGH-IN OF ANY PLUMBING FOR KITCHEN EQUIPMENT FURNISHED BY OTHERS, REVIEW EXACT LOCATIONS OF ROUGH-INS WITH DIMENSIONED ROUGH-IN FOOD SERVICE DRAWINGS AND CUT SHEETS.
32. SYMBOL (xx) DENOTES KITCHEN EQUIPMENT. SEE FOOD SERVICE DRAWINGS FOR EXACT ROUGH-IN AND LOCATION.

GENERAL NOTES:

1. ALL DATA DERATED FOR OPERATION AT 4,150 FT. ELEVATION.
2. COOLING CAPACITY BASED ON 100° F. AMBIENT.
3. VERIFY VOLTAGES AND AMPS PRIOR TO ORDERING EQUIPMENT.
4. DIVISION 26 TO FURNISH PRODUCTS OF COMBUSTION DETECTOR
5. ELECTRICALSERVICE SHALL BE THROUGH THE CURB.
6. OPERATING WEIGHT INCLUDES AN ALLOWANCE FOR SEISMIC ROOF CURB.
7. THERE ARE NO DDC REQUIREMENTS.

ACCESSORIES/FEATURES:

1. STAINLESS STEEL HEAT EXCHANGER
2. DRY BULB ECONOMIZER 0-100%
3. ALL UNIT SHALL HAVE POWER EXHAUST, EXCEPT RTU-11 & RTU-12 WHICH SHALL HAVE BAROMETRIC RELIEF
4. 2" FACTORY FILTER RACK WITH HINGED ACCESS PANEL AND MERV8 FILTERS
5. DISCONNECT FACTORY INSTALLED
6. UNPOWERED GFCI FACTORY INSTALLED/FIELD WIRED

GENERAL NOTES:

1. PERFORMACE HAS BEEN DERATED FOR OPERATION AT 4,000 FT ELEVATION.
2. UNIT SHALL HAVE DOWN DISCHARGE & DOWN RETURN.
3. UNIT SHALL HAVE AN INVERTER SCROLL COMPRESSOR WITH INTEGRATED OIL SENSOR.
4. UNIT SHALL HAVE A DIRECT DRIVE PLENUM BLOWER.
5. CONDENSING FANS SHALL HAVE EC MOTORS.
6. UNIT SHALL HAVE AN ELECTRONIC EXPANSION VALVE.
7. UNIT SHALL HAVE 2" EXTERIOR DUAL-WALL CONSTRUCTION W/ R-13 INSULATION-MINIMUM 20GA EXTERIOR W/ 14GA BASE.
8. THE FURNACE SECTION SHALL HAVE AN 81% EFFICIENT FURNACE, WITH MODULATING INDUCER TO MAINTAIN CONSTANT COMBUSTION EFFICIENCY ACROSS FIRING RANGE. 6:1 TURNDOWN WITH NG AND 5:1 TURNDOWN WITH LP

ACCESSORIES/FEATURES

1. SEISMIC ROOF CURB - UNIT SHALL BE 14" MINIMUM ABOVE FINISHED ROOF
2. INTEGRATED MONITORING VIA CELLULAR CONNECTION BY MANUFACTURER
3. REFRIGERATION PRESSURE MONITORING ON HIGH AND LOW PRESSURE SIDE OF SYSTEM INCLUDED THROUGH DIGITAL INTERFACE
4. SUCTION LINE ACCUMULATOR
5. AVERAGING INTAKE, EVAP AND DISCHARGE TEMPERATURE SENSORS (DISCHARGE SENSOR TO BE FACTORY MOUNTED WITHIN UNIT)
6. SUPPLY CFM MONITORING INTEGRAL TO UNIT WITH CFM MEASUREMENT INCLUDED THROUGH DIGITAL INTERFACE
7. FULLY MODULATING HOT GAS REHEAT
8. 15 DEGREE LOW AMBIENT OPERATION
9. REFRIGERATION PRESSURE MONITORING ON HIGH AND LOW PRESSURE SIDE OF SYSTEM INCLUDED THROUGH DIGITAL INTERFACE

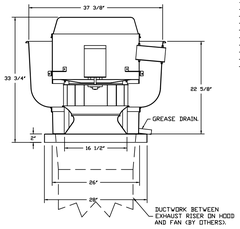
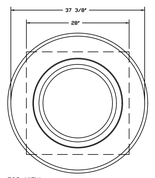
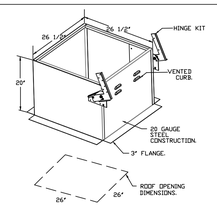
FAN #1 DU80MFA - EXHAUST FAN (KEF-1)





TOP VIEW



FEATURES:

- DIRECT DRIVE CONSTRUCTION (NO BELTS/PULLEYS).
- ROOF MOUNTED FANS.
- RESTAURANT MODEL.
- UL705 AND UL762 AND ULC-S645
- VARIABLE SPEED CONTROL.
- INTERNAL WIRING.
- THERMAL OVERLOAD PROTECTION (SINGLE PHASE).
- HIGH TEMPERATURE OPERATION 300°F (149°C).
- GREASE CLASSIFICATION TESTING.
- NEMA 3R SAFETY DISCONNECT SWITCH.

NORMAL TEMPERATURE TEST
EXHAUST FAN MUST OPERATE CONTINUOUSLY WHILE EXHAUSTING AIR AT 300°F (149°C) UNTIL ALL FAN PARTS HAVE REACHED THERMAL EQUILIBRIUM, AND WITHOUT ANY DETERIORATING EFFECTS TO THE FAN WHICH WOULD CAUSE UNSAFE OPERATION.

ABNORMAL FLAME-UP TEST
EXHAUST FAN MUST OPERATE CONTINUOUSLY WHILE EXHAUSTING BURNING GREASE VAPORS AT 600°F (316°C) FOR A PERIOD OF 15 MINUTES WITHOUT THE FAN BECOMING DAMAGED TO ANY EXTENT THAT COULD CAUSE AN UNSAFE CONDITION.

OPTIONS
- GREASE BOX.
- FAN BASE CERAMIC SEAL - INSTALLED AT PLANT - FOR GREASE DUCTS.
- EXHAUST FAN HEAT BAFFLE.
- VAV PACKAGE W/ MANUAL CONTROL (VFD INCLUDED).
- VFD FACTORY MOUNTED AND WIRED IN EXHAUST FAN.
- VFD MOUNTING BRACKET FOR DU/DR 180 - 200.
- 2 YEAR PARTS WARRANTY.

FAN#1 (KEF-1) - EXHAUST PERFORMANCE CURVES.

3000 CFM, 2 SP @ 1513 RPM AND 2.674 BHP AT 4154 FEET AND 120 DEG F.
* PLEASE NOTE THAT THESE CURVES WERE ADJUSTED FOR JOB SPECIFIC TEMPERATURE AND ALTITUDE.

Date: MARCH 21, 2023

Sheet No:

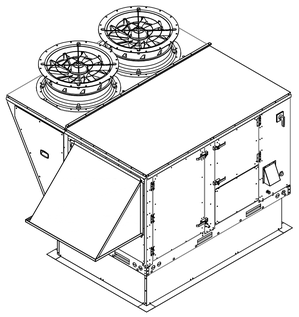
M5.02

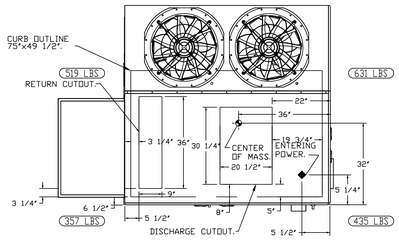
FAN #2 CASRTU2-I.200-18MF-8T - HEATER (RTU-1)

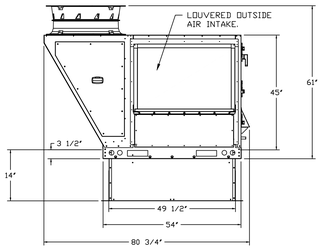
NOTES:

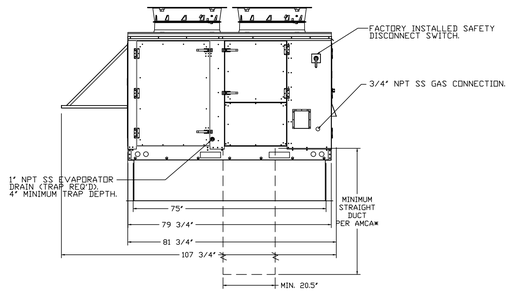
1. DO NOT OBSTRUCT OUTSIDE AIR INLET, OUTSIDE AIR COIL OR OUTSIDE AIR FAN.
2. ( ) DENOTES CORNER WEIGHT.
3. ROOF OPENING MUST BE 2" SMALLER THAN CURB DIMENSIONS IN BOTH DIRECTIONS.

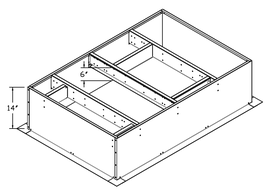
*NOTE: SUPPLY DUCT MUST BE INSTALLED TO MEET SMACNA STANDARDS. A MINIMUM STRAIGHT DUCT LENGTH MUST BE MAINTAINED DOWNSTREAM OF UNIT DISCHARGE AS OUTLINED IN AMCA PUBLICATION 201. WHEN USING RECTANGULAR DUCTWORK, ELBOWS MUST BE RADIUS THROAT, RADIUS BACK WITH TURNING VANES. FLEXIBLE DUCTWORK AND SQUARE THROAT/SQUARE BACK ELBOWS SHOULD NOT BE USED. ANY TRANSITION AND/OR TURNS IN THE DUCTWORK WILL CAUSE SYSTEM EFFECT. SYSTEM EFFECT WILL DRASTICALLY INCREASE STATIC PRESSURE AND REDUCE AIRFLOW. DO NOT RELY ON UNIT TO SUPPORT DUCT IN ANY WAY. FAILURE TO PROPERLY SIZE DUCTWORK MAY CAUSE SYSTEM EFFECTS AND REDUCE PERFORMANCE OF THE EQUIPMENT.
SUGGESTED STRAIGHT DUCT SIZE IS 20.5" x 30.25".

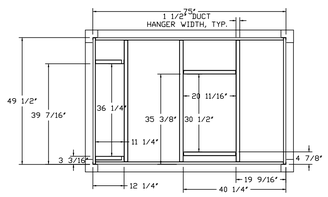












FAN#2 (RTU-1) - HEATER PERFORMANCE CURVES.

3500 CFM, 2.559 SP @ 2047 RPM AND 2.965 BHP AT 4154 FEET AND 10 DEG F.
* PLEASE NOTE THAT THESE CURVES WERE ADJUSTED FOR JOB SPECIFIC TEMPERATURE AND ALTITUDE.

M6.01

PLUMBING FIXTURE SCHEDULE

WC-1	WATER CLOSET ADA "AMERICAN STANDARD" AFWALL MODEL 2257.101 WALL MOUNTED STANDARD HEIGHT OR ADA HEIGHT (SEE ARCHITECTURAL SHEETS) VITREOUS CHINA TOILET WITH ELONGATED BOWL. FURNISH WITH "SLOAN" ROYAL 111-1.28 FLUSH VALVE AND "OLSONITE" MODEL #10SSCT TOILET SEAT.
WC-2	WATER CLOSET ADA "AMERICAN STANDARD" BABY DEVORO FLOWISE MODEL 2282.001 FLOOR MOUNTED. VITREOUS CHINA TOILET WITH ELONGATED BOWL. FURNISH WITH "AMERICAN STANDARD" MANUAL #6047.121.002 AND MODEL #5001G.055 TOILET SEAT.
UR-1	URINAL "AMERICAN STANDARD" WASHBROOK MODEL 6590.001 WALL MOUNTED VITREOUS CHINA URINAL WITH ELONGATED RIM. FURNISH WITH "SLOAN" ROYAL 186-0.5 FLUSH VALVE.
L-1	LAVATORY "AMERICAN STANDARD" LUCERNE MODEL 0355.012 WALL HUNG VITREOUS CHINA LAVATORY. FURNISH WITH "CHICAGO" MODEL EVR-A12D-41ABCP FAUCET 4" FIXED CENTERS, SINGLE SUPPLY FOR TEMPERED WATER, 0.35 GPM AND GRID DRAIN. INSULATE HOT AND COLD WATER PIPING AND WASTE PIPING BELOW FIXTURE WITH "TRUE-BRO" LAV GUARD PROTECTIVE MOLDED CLOSED CELL VINYL PIPE COVERS, WITH VANDAL RESISTANT SNAP-CLIP FASTENERS. FURNISH WITH NIBCO WEBSTONE MODEL H-77201W THERMOSTATIC MIXING VALVE.
L-2	LAVATORY "BRADLEY" MODEL ELX-2 2-STATION EXPRESS LAVATORY SYSTEM WITH 4" CENTERSET DRILLING, NSD NO SOAP DISPENSER/NO DRILLING, ALP-WHT ALPINE WHITE COLOR, NBS NO BACKSPLASH, COAL ACCESS PANEL AND IW-CHROME CHROME-PLATED INDIVIDUAL WASTE ASSEMBLY. TMA THERMOSTATIC MIXING ASSEMBLY. FURNISH WITH "CHICAGO" MODEL EVR-A12D-41ABCP FAUCET 4" FIXED CENTERS, SINGLE SUPPLY FOR TEMPERED WATER, 0.35 GPM AND GRID DRAIN.
S-1	SINK "ELKAY" MODEL #LR1919PD SINGLE COMPARTMENT 18 GAUGE 16"X13 ½"X7 ½" DEEP BOWL SIZE STAINLESS STEEL SINK. FURNISH WITH CHICAGO MODEL #210-A317VPCABCP FAUCET WITH WRIST BLADE HANDLES, LKPD1 DRAIN STRAINER, 17 GAUGE CHROME PLATED P-TRAP, BRASSCRAFT STOPS AND RISERS.
FS-1	FLOOR SINK ZURN MODEL Z1902 CAST IRON DRAIN, 12"X12"X10" DEEP WITH ENAMELED CAST IRON WITH HALF GRATE. CAST TRAP WITH TRAP PRIMER.
HB-1	HOSE BIBB WOODFORD MODEL P-24 HOSE BIBB WITH VACUUM BREAKER AND 3/4" THREADED HOSE CONNECTION. PROVIDE WITH LOOSE TEE KEY.
HB-2	HOSE BIBB WOODFORD MODEL B65, FREEZELESS WALL HYDRANT WITH ANTI-SIPHON VACUUM BREAKER, 3/4" THREADED HOSE CONNECTION. PROVIDE WITH LOOSE TEE KEY.
RD/ORD	OVERFLOW ROOF DRAIN ZURN MODEL Z-100 WITH UNDERDECK CLAMP, SUMP RECEIVER AND EXTENSION. SIZE AS INDICATED ON DRAWINGS. FURNISH WITH 2" EXTERNAL DAM FOR OVERFLOW APPLICATION
DS	DOWNSPOUT NOZZLE ZURN MODEL Z199 NICKEL BRONZE BODY AND FLANGE.
WHA-1	WATER HAMMER ARRESTOR "SIOUX CHIEF" HYDRA-RESTER PISTON STYLE WATER HAMMER ARRESTOR, 650 SERIES, TYPE L COPPER TUBE, POLY PISTON WITH TWO EPSM O-RINGS, COPPER MIP THREAD. PDI SIZING
SGV-1	SEISMIC GAS VALVE "PACIFIC SEISMIC PRODUCTS" MODEL 316 CALIFORNIA SEISMIC VALVE WITH MONITORING SWITCH. ASCE 25-97 LISTED.
BFP-1	BACKFLOW PREVENTER WILKENS MODEL 375 LEAD-FREE REDUCED PRESSURE BACKFLOW PREVENTER, COMPLETE WITH CAST SILICON ALLOY BODY AND BALL VALVE TEST COCKS.
IMB-1	ICE MAKER BOX "GUY GRAY MANUFACTURING CO." MODEL MIB1HAAB METAL POWDER COATED ICE MAKER OUTLET BOX WITH BRASS QUARTER TURN HAMMER ARRESTER VALVE AND 1/2" SWEAT CONNECTION.
CWB-1	CLOTHES WASHER BOX "GUY GRAY MANUFACTURING CO." W2700HA BRASS QUARTER TURN VALVES WITH HAMMER ARRESTORS 1/2" SWEAT CONNECTIONS.
TP-1	TRAP PRIMER PRECISION PLUMBING PRODUCTS MODEL PR-500
SHR-1	SHOWER "MOEN" MODEL #8375 SINGLE HANDLE PRESSURE BALANCING SHOWER VALVE WITH INTEGRAL STOPS, VANDAL RESISTANT SHOWER HEAD
SHR-2	SHOWER "MOEN" MODEL #8342 ADA COMPLIANT SINGLE HANDLE PRESSURE BALANCING SHOWER VALVE WITH INTEGRAL STOPS, VANDAL RESISTANT SHOWER HEAD AND HANDHELD SHOWER HEAD WITH SLIDE BAR.
MS-1	SERVICE SINK "CECO" MODEL 871 CORNER SERVICE SINK 28"X28" ENAMELED CAST IRON WITH CHROME FLAT STRAINER AND RIM GUARDS. FURNISH WITH CHICAGO MODEL 897-CP FAUCET WITH VACUUM BREAKER AND WALL SUPPORT.
EWC-1	ELECTRIC WATER COOLER "ELKAY" MODEL LZS8WSSK , WALL MOUNTED WATER COOLER WITH BOTTLE FILLING STATION, STAINLESS STEEL, BI-LEVEL, PUSH-BUTTON OPERATED, VANDAL RESISTANT, BARRIER-FREE, 8 GPH, ELECTRIC WATER COOLER WITH IN WALL MOUNTING FRAME. ELECTRICAL SERVICE SHALL BE 115V, 60 HZ, 370 WATTS, 5 FLA. PROVIDE WITH CANE DETECTION SHIELD.
EWC-2	ELECTRIC WATER COOLER "ELKAY" MODEL LZSTL8WSLK , WALL MOUNTED WATER COOLER WITH BOTTLE FILLING STATION, STAINLESS STEEL, BI-LEVEL, PUSH-BUTTON OPERATED, VANDAL RESISTANT, BARRIER-FREE, 8 GPH, ELECTRIC WATER COOLER WITH IN WALL MOUNTING FRAME. ELECTRICAL SERVICE SHALL BE 115V, 60 HZ, 370 WATTS, 5 FLA. PROVIDE WITH CANE DETECTION SHIELD.
FD-1	FLOOR DRAIN ZURN MODEL Z415B, CAST IRON DRAIN BODY WITH FLASHING COLLAR AND ADJUSTABLE STRAINER HEAD. STRAINER FINISH PER SPECIFICATION, CAST TRAP WITH TRAP PRIMER CONNECTION
YH-1	YARD HYDRANT ZURN MODEL Z1396, NON-FREEZE YARD HYDRANT COMPLETE WITH DURA-COATED CAST IRON HEAD AND LIFT HANDLE WITH LOCKING CAPABILITY, BRONZE INTERIOR PARTS, GALVANIZED STEEL CASING, BRONZE VALVE HOUSING, AND 3/4" FEMALE IP INLET CONNECTION. HYDRANT IS EQUIPPED WITH A TAPPED 1/8" DRAIN PORT IN THE VALVE HOUSING, AND 3/4" MALE HOSE CONNECTION.
TD-1	TRENCH DRAIN ZURN MODEL Z886-HD TRENCH DRAIN, 6.75" WIDE x LENTH AS REQUIRED. PROVIDE CLASS A HPS HEEL-PROOF SLOTTED STAINLESS STEEL GRATE, LIGHT DUTY. GRATE SHALL BE CAPABLE OF LOCKING TO GRATE FRAME WITH VANDAL PROOF LOCKDOWN OPTION.
ETP-1	ELECTRIC TRAP PRIMER PPP, INC MPB-500 "MINI-PRIME" ELECTRONIC TRAP PRIMING ASSEMBLY WITH 12"x12" METAL CABINET. 1" AIR GAP FITTING, 24-HOUR TIMER TO PROVIDE MINIMUM OF 2 OUNCES OF WATER AT FACTORY PRESET SETTING OF 10 SECONDS, MANUAL OVERRIDE SWITCH AND TEST BUTTON, SOLENOID VALVE, 1/2"CW INLET CONNECTION. 120 VOLT REQUIRED. FURNISH WITH HINGED, POWDER COATED ACCESS DOOR

EQUIPMENT SCHEDULE

WH 1 / WH 2	WATER HEATER LOCHINVAR MODEL SWR285N HIGH EFFICIENCY WATER HEATER, 110 GALLON STORAGE, 285 MBH INPUT, 328 GPH RECOVERY @ 100°F RISE. FURNISH WITH PRESSURE AND TEMPERATURE RELIEF VALVE, CONCENTRIC VENT KIT, AND CONDENSATE NEUTRALIZATION KIT. 115 V, OP. WGT. = 1720 LBS.
WH 3	WATER HEATER LOCHINVAR MODEL SWR400N HIGH EFFICIENCY WATER HEATER, 110 GALLON STORAGE, 399 MBH INPUT, 459 GPH RECOVERY @ 100°F RISE. FURNISH WITH PRESSURE AND TEMPERATURE RELIEF VALVE, CONCENTRIC VENT KIT, AND CONDENSATE NEUTRALIZATION KIT. 115 V, OP. WGT. = 1720 LBS.
CP 1	CIRCULATION PUMP TACO MODEL 009-SF5, 3.5 GPM AT 13' TDH, 1/8 HP. 115 VOLT. BRONZE BODY.
CP 2	CIRCULATION PUMP TACO MODEL 009-SF5, 2 GPM AT 10' TDH, 1/8 HP. 115 VOLT. BRONZE BODY.
ET 1 / ET 2	EXPANSION TANK WATTS MODEL #DETA-60 DOMESTIC WATER EXPANSION TANK.
TMV 1	THERMOSTATIC MIXING VALVE LEONARD PNV-100-LF DIGITAL MIXING VALVE SET TO 110°F, 17 GPM @ 5 PSI DROP. MINIMUM 0.25 GPM. 115 VOLT
TMV 2	THERMOSTATIC MIXING VALVE LEONARD PNV-100-LF DIGITAL MIXING VALVE SET TO 140°F, 40 GPM @ 5 PSI DROP. MINIMUM 0.25 GPM. 115 VOLT

MAXIMUM FIXTURE UNIT LOADING FOR WATER PIPE

NOMINAL PIPE SIZE (INCHES)	3/4"	1"	1 1/4"	1 1/2"	2"	2 1/2"	3"	4"	6"

NOTES 1. WATER BRANCH LINES WHERE LESS THAN 10'-0" LONG MAY BE SAME SIZE AS OUTLETS SCHEDULED ABOVE.

GENERAL NOTES

1. ALL WORK AND MATERIALS SHALL CONFORM TO THE LATEST ADOPTED EDITION OF THE IBC, UMC, UPC, NEC, NFPA, NEVADA STATE FIRE MARSHAL REGULATIONS, LOCAL AND STATE ORDINANCES, AND INDUSTRY STANDARDS.
2. SUBMIT FOR REVIEW AND APPROVAL ELECTRONIC COPIES OF SUBMITTALS FOR ALL EQUIPMENT, DUCTWORK, AIR DISTRIBUTION, PLUMBING FIXTURES, INSULATION, VALVES, AND PIPING MATERIALS.
3. AS-BUILT DRAWINGS SHALL BE SUBMITTED FOR REVIEW AND APPROVAL UPON COMPLETION OF THE WORK, AND PRIOR TO FINAL PAYMENT. AS-BUILT DRAWINGS SHALL BE MAINTAINED ON SITE AS THE WORK PROGRESSES AND SHALL BE AVAILABLE FOR REVIEW BY THE OWNER AND/OR ARCHITECT/ENGINEER AT ALL TIMES.
4. ALL EQUIPMENT AND MATERIALS SHALL BE INSTALLED IN STRICT ACCORDANCE WITH THE MANUFACTURER'S WRITTEN INSTALLATION INSTRUCTIONS.
5. THE WORK AND MATERIALS SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FROM THE DATE OF ACCEPTANCE BY THE OWNER.
6. COORDINATE THE ACTUAL LOCATION OF ROOFTOP UNITS, VENTS THROUGH THE ROOF, ETC. WITH THE ROOF PLANS.
7. COORDINATE THE EXACT LOCATION OF EQUIPMENT AND OF PENETRATIONS THROUGH THE ROOF, FLOORS, AND WALLS WITH STRUCTURAL DRAWINGS PRIOR TO ANY ROUGH-IN.
8. SEISMIC BRACING FOR MECHANICAL SYSTEMS (EQUIPMENT, DUCTWORK, PIPING, AND CONDUIT) SHALL COMPLY WITH ALL APPLICABLE REQUIREMENTS OF THE 2018 INTERNATIONAL BUILDING CODE (IBC) INCLUDING ALL APPLICABLE PROVISIONS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS (ASCE) MINIMUM DESIGN LOADS FOR BUILDINGS (ASCE STANDARD 7-16 SECTION 13.1.3).
9. PIPING SHALL BE INSTALLED SUCH THAT IT DOES NOT OBSTRUCT ACCESS OR REMOVAL OF MECHANICAL EQUIPMENT.
10. DASHED OUTLINES DENOTE THE REQUIRED SERVICE CLEARANCE SPACE (SEE DUCTWORK PLANS). NO PIPING, DUCTWORK, CONDUIT, AND/OR CEILING HANGERS SHALL BE INSTALLED IN THE DESIGNATED SERVICE/ACCESS CLEARANCE AREA.
11. SEE ARCHITECTURAL AND/OR STRUCTURAL DRAWINGS FOR HOLE CORING REQUIREMENTS.
12. COORDINATE ROUTING OF DUCTWORK WITH PIPING, PLUMBING, FIRE SPRINKLER, AND ELECTRICAL TRADES PRIOR TO BEGINNING WORK.
13. ALL EQUIPMENT, PIPING,ETC. SHALL BE SUPPORTED AS REQUIRED TO PROVIDE A VIBRATION-FREE INSTALLATION.
14. ALL ROOF PENETRATIONS SHALL BE FLASHED AND COUNTER-FLASHED WATERTIGHT.
15. TESTING AND BALANCING SHALL BE CONDUCTED BY AN AABC CERTIFIED TEST AND BALANCE CONTRACTOR. TEST AND BALANCE ALL WATER SYSTEMS TO ACHIEVE THE LISTED VOLUMES. THE FINALIZED REPORT SHALL BE SUBMITTED TO THE ARCHITECT/ENGINEER FOR REVIEW AND APPROVAL UPON COMPLETION OF THE TESTING AND BALANCING AND BEFORE SCHEDULING THE FINAL OBSERVATION.
16. ALL PIPING WORK SHALL BE COORDINATED WITH ALL TRADES AND EXISTING CONDITIONS PRIOR TO COMMENCING WORK. OFFSETS IN PIPING AROUND OBSTRUCTIONS SHALL BE PROVIDED AS REQUIRED.
17. DO NOT ROUTE ANY PIPING DIRECTLY ABOVE ELECTRICAL EQUIPMENT, SWITCHBOARDS, DISTRIBUTION PANELS, MCC'S, ETC. AS PROHIBITED BY THE 2017 NEC.
18. DO NOT FABRICATE PIPING FROM THE DRAWINGS. SPACE ALLOCATION SHALL BE DETERMINED IN THE FIELD AND COORDINATED WITH OTHER TRADES PRIOR TO FABRICATION.
19. VERIFY THE EXACT LOCATION, INVERT ELEVATION, SIZE, AND POINT OF CONNECTION OF ALL NEW AND EXISTING UTILITIES PRIOR TO ROUGH-IN OF ANY PLUMBING PIPING.
20. REFER TO THE ARCHITECTURAL DRAWINGS FOR EXACT LOCATIONS AND MOUNTING HEIGHTS OF PLUMBING FIXTURES AS REQUIRED TO COMPLY WITH ADA REQUIREMENTS.
21. INSULATE DOMESTIC HOT AND COLD WATER PIPING AND WASTE PIPING BELOW ADA PLUMBING FIXTURES WITH 'TRUEBRO' LAV GUARD 2 PROTECTIVE MOLDED CLOSED-CELL VINYL PIPE COVERS WITH VANDAL-RESISTANT SNAP-CLIP FASTENERS, AND WITH AN ASTM E84-07 FLAME/SMOKE TEST RATING OF 25/50 OR LESS.
22. INSTALL A RIGID CAP ON ALL ABANDONED WATER, WASTE, AND VENT PIPING.
23. PROVIDE ALL PLUMBING FIXTURES AND EQUIPMENT WITH ACCESSIBLE STOPS.
24. SLOPE ALL SEWER, WASTE, AND RAINWATER PIPING AT A MINIMUM OF 1/4" PER FOOT.
25. SLOPE ALL CONDENSATE DRAIN PIPING AT 1/8" PER FOOT.
26. PROVIDE A 1/8" X 6" STEEL BACKING PLATE BOLTED TO A MINIMUM OF 4 STUDS FOR ALL WALL-HUNG FIXTURES. PROVIDE CONCEALED ARMS FOR LAVATORIES BOLTING TO A BACKING PLATE.
27. ADA WATER CLOSETS SHALL HAVE THE WATER ROUGH-IN LOCATED TO RESULT IN THE FLUSH HANDLE FACING THE WIDE SIDE OF THE STALL.
28. IN ADDITION TO WHERE SHOWN ON THE DRAWINGS, PROVIDE CLEANOUTS FOR ALL SINKS, URINALS, & LAVATORIES.
29. PROVIDE CLEANOUT AND ACCESS PANEL ON EVERY ROOF DRAIN LEADER BEFORE TRANSITIONING BELOW GRADE.
30. INSTALL FLOOR SINKS TO BE ACCESSIBLE FOR CLEANING AND INSPECTION.
31. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONNECTION TO ALL NEW KITCHEN EQUIPMENT. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL CONTRACTOR RESPONSIBILITIES. PROVIDE ALL REQUIRED FAUCETS, STOPS, INDIRECT DRAINS, AND INSTALL ALL TRIM FURNISHED WITH ALL EQUIPMENT. INSTALLATION SHALL BE COMPLETE AND SHALL BE OPERABLE TO THE SATISFACTION OF THE OWNER'S REPRESENTATIVE.
32. PRIOR TO ROUGH-IN OF ANY PLUMBING FOR KITCHEN EQUIPMENT FURNISHED BY OTHERS, REVIEW EXACT LOCATIONS OF ROUGH-INS WITH DIMENSIONED ROUGH-IN FOOD SERVICE DRAWINGS AND CUT SHEETS.
33. SYMBOL (XX) DENOTES KITCHEN EQUIPMENT. SEE FOOD SERVICE DRAWINGS FOR EXACT ROUGH-IN AND LOCATION.
34. INTERLOCK FIRE SUPPRESSION SYSTEM WITH THE GAS SOLENOID VALVE AND THE CONTROL PANEL. ACTIVATION OF FIRE SUPPRESSION SYSTEM SHALL SHUT OFF GAS TO ALL GAS FIRED EQUIPMENT BELOW THE HOODS AND SHUT DOWN THE MAKE-UP AIR UNITS AND EXHAUST FANS.

PLUMBING FOOD SERVICE NOTES

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONNECTION TO ALL NEW BAR AND KITCHEN EQUIPMENT. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL CONTRACTOR RESPONSIBILITIES. PROVIDE ALL REQUIRED FAUCETS, STOPS, INDIRECT DRAINS, AND INSTALL ALL TRIM FURNISHED WITH ALL EQUIPMENT. INSTALLATION SHALL BE COMPLETE AND SHALL BE OPERABLE TO THE SATISFACTION OF THE OWNER'S REPRESENTATIVE.
2. PRIOR TO ROUGH-IN OF ANY PLUMBING FOR BAR AND KITCHEN EQUIPMENT FURNISHED BY OTHERS, REVIEW EXACT LOCATIONS OF ROUGH-INS WITH DIMENSIONED ROUGH-IN FOOD SERVICE DRAWINGS AND CUT SHEETS.
3. INTERLOCK FIRE SUPPRESSION SYSTEM WITH THE GAS SOLENOID VALVE AND THE CONTROL PANEL. ACTIVATION OF FIRE SUPPRESSION SYSTEM SHALL SHUT OFF GAS TO ALL GAS FIRED EQUIPMENT BELOW THE HOODS AND SHUT DOWN THE MAKE-UP AIR UNITS AND EXHAUST FANS.
4. ALL HORIZONTAL PIPING LINES AS EXTENDED AND CONNECTED TO EQUIPMENT SHALL BE RUN AT THE HIGHEST POSSIBLE ELEVATION AND NOT LESS THAN 6" ABOVE FINISHED FLOOR TO PROVIDE CLEARANCE FOR CLEANING. INDIRECT WASTE LINES WITHIN EQUIPMENT SHALL BE ROUTED TO CONFORM WITHIN INTERIOR SHELVES, SPACES, OR STRUCTURES.
5. ALL EXPOSED PIPING FOR KETTLES AND ANY EXPOSED PIPING ABOVE COUNTER HEIGHT SHALL BE CHROME PLATED, STAINLESS, OR FITTED WIHT CHROME PLATED SLEEVES. ALL OTHER EXPOSED/SEMI-EXPOSED PING SHALL BE PAINTED SILVER WITH "CHROMATONE" OR EQUAL.

J/H	FIREMAN'S PHONE: MOUNTED AT +48" TO TOP UNO, JACK OR HANDSET		
EOLR	END OF LINE RESISTOR	S D	DUCT SMOKE DETECTOR: SUPPLER AND/OR RETURN PER MECHANICAL CODE.
	HORN: WALL MOUNT 90° AFF TO TOP OF DEVICE AND NOT LESS THAN 6" BELOW CEILING		

NOTES:

1. THE CONTRACTOR SHALL SERVE AS THE CITY/STATE LICENSED DESIGNER AND INSTALLER FOR THE FIRE ALARM SYSTEM. A COMPLETE TURN-KEY SYSTEM SHALL BE DESIGNED, FURNISHED, AND INSTALLED BY THE CONTRACTOR INCLUDING, BUT NOT LIMITED TO THE CONTROL PANEL, DEVICES, MODULES, EQUIPMENT ETC. REQUIRED FOR A COMPLETE SYSTEM. INSTALL AN APPROVED MANUAL, AUTOMATIC, OR MANUAL AND AUTOMATIC FIRE ALARM SYSTEM IN ACCORDANCE WITH THE PROVISIONS OF THE IFC, IBC, NFPA-70, NFPA-72, NFPA-101, NEC 760, ADA AND LOCAL AHJ REQUIREMENTS.
2. THE CONTRACTOR'S DESIGN AND BID SHALL BE BASED ON ALL PROJECT DRAWINGS AND SPECIFICATIONS FOR ALL DISCIPLINES, INCLUDING BUT NOT LIMITED TO MECHANICAL, FIRE SPRINKLER, KITCHEN, ARCHITECTURAL, SECURITY, BUILDING AUTOMATION, AND STRUCTURAL SYSTEMS. FIRE ALARM DEVICES AS SHOWN ON PLANS ARE SHOWN DIAGRAMMATICALLY FOR BIDDING PURPOSES ONLY AND IS INDICATED ON THE DRAWINGS AND IN THE SPECIFICATIONS AS MINIMUM CRITERIA. THE CONTRACTOR SHALL COORDINATE WITH THE LOCAL AHJ AND COMPLY WITH APPLICABLE CODES FOR ANY ADDITIONAL DEVICES OR EQUIPMENT THAT MAY BE REQUIRED.
3. INSTALLATION OF THE FIRE ALARM SYSTEM SHALL NOT BE STARTED UNTIL DETAILED PLANS AND SPECIFICATIONS HAVE BEEN APPROVED BY THE LOCAL AHJ AND THE ENGINEER OF RECORD.
4. FIRE ALARM SYSTEM SHALL BE CLASS 1 CIRCUITING AS REQUIRED BY LOCAL AHJ AND NFPA-70.
5. ALL FIRE ALARM WIRING TO BE RUN IN 3/4" CONDUIT.
6. BATTERY BACKUP SYSTEM SHALL BE CALCULATED TO PROVIDE A MINIMUM OF 24 HOURS OF STANDBY AND A MINIMUM OF 5 MINUTES OF ALARM OR PER AHJ REQUIREMENTS.
7. CONNECT TO THE TELEPHONE SYSTEM WITH DIAL OUT BY POINT.
8. FIRE ALARM NOTIFICATION APPLIANCE CANDELA VALUE SHALL MEET THE REQUIREMENTS OF NFPA 72, BASED ON ROOM SIZE. IT IS THE CONTRACTORS RESPONSIBILITY TO ADD ADDITIONAL NOTIFICATION APPLIANCES AS REQUIRED TO COMPLY WITH THE REQUIREMENTS OF NFPA 72.
9. MANUAL PULL STATIONS SHALL BE MOUNTED 48" TO CENTER OF DEVICE.
10. DETECTORS ARE NOT TO BE LOCATED IN A DIRECT AIRFLOW OR CLOSER THAN 3' FROM AN AIR SUPPLY DIFFUSER OR RETURN AIR OPENING IN ACCORDANCE WITH NFPA-72 A.17.7.4.1, (2010).
11. DETECTOR LOCATION FOR DOOR HOLD ACTIVATION SHALL BE PER NFPA-72, 17.7.5.6.6.1, (1-3), (2010), WHEN REQUIRED.
12. AREA SMOKE DETECTION AND DUCT DETECTORS SHALL SHUT DOWN ALL MECHANICAL UNITS.
13. UPON COMPLETION OF THE INSTALLATION OF THE FIRE ALARM SYSTEM, A FINAL INSPECTION AND TEST OF THE ENTIRE SYSTEM SHALL BE MADE IN THE PRESENCE OF THE LOCAL AHJ. A COPY OF THE RECORD OF COMPLETION AND CERTIFICATE OF OCCUPANCY SHALL BE SUBMITTED TO THE ENGINEER OF RECORD.
14. THE CONTRACTOR SHALL ENSURE ADEQUATE AUDIBILITY OF THE VOICE MESSAGES UPON PROJECT COMPLETION AND RELOCATE OR ADD SPEAKERS TO MEET THIS REQUIREMENT AT NO COST TO THE OWNER.
15. PROVIDE DOCUMENT BOX ADJACENT TO FACP WITH RECORD DRAWINGS (PRINTED) WITH USB DRIVE CONTAINING LATEST PROGRAM COPY AND ELECTRONIC RECORD DRAWINGS.
16. THE CONTRACTOR SHALL PRODUCE A COMPLETE SET OF DRAWINGS, PRODUCT SUBMITTALS AND CALCULATIONS FOR A COMPLETE FIRE ALARM SYSTEM INSTALLATION. DRAWINGS SHALL BE PREPARED BY A LICENSED FIRE ALARM SUB-CONTRACTOR (NICET II & NEVADA STATE FIRE MARSHAL 'F' CARD). THESE DRAWINGS SHALL BEAR THE NAME OF THE CONTRACTOR AND QUALIFYING CERTIFICATIONS. ALL DRAWINGS SHALL BE PREPARED BY THE CONTRACTOR UTILIZING THEIR OWN DEVICE LAYOUT, WIRING, SCHEDULES, CALCULATIONS, AND ALL OTHER REQUIREMENTS FOR A COMPLETE PACKAGE. FLOOR PLANS (ELECTRONIC) WILL BE PROVIDED TO THE AWARDED CONTRACTOR UPON REQUEST. DOCUMENTS PROVIDED ARE FOR GUIDANCE ONLY AND REFER TO PROPOSED DEVICE LOCATIONS AND WIRING REQUIREMENTS. THE CONTRACTOR SHALL PROVIDE A COMPLETE LAYOUT AND SYSTEM DESIGN. THE CONTRACTOR IS RESPONSIBLE FOR OBTAINING A PERMIT WITH THE LOCAL AUTHORITY WITH THEIR PREPARED DOCUMENTS.

ONELINE DIAGRAM NOTES

1. ONELINE DIAGRAM IS FOR REFERENCE ONLY. CONTRACTOR SHALL PROVIDE A ONELINE DIAGRAM THAT SHOWS ALL DEVICES, NEW AND EXISTING, AS THEY ARE CONNECTED ON THE FLOOR PLAN.

SHEET NOTES

(1) ANNUNCIATOR SHALL BE CAPABLE OF VIEWING EVENTS AND OPERATING THE FIRE ALARM SYSTEM. A KEY SHALL BE REQUIRED FOR OPERATING OR RESETTING THE SYSTEM FROM THIS LOCATION.

(2) PROVIDE AMPLIFIER CABINET SIZED FOR SYSTEM LOAD.

Sheet Title

LEGENDS, FA ONELINE DIAGRAM & DRAWING SCHEDULE

Date: MARCH 21, 2023

Sheet No:

E0.01

LIGHTING CONTROL SEQUENCE OF OPERATION

GENERAL
- THE LIGHTING CONTROL SYSTEM IS A NETWORKED DISTRIBUTED RELAY SYSTEM WITH ROOM CONTROLLERS CONNECTED TO THE BUILDING LCP

OFFICE/ADMIN (STANDALONE CONTROL)
- DIMMING WALL SWITCH SHALL CONTROL LOCAL LIGHTING IN OFFICE SPACES, WITH RAISE-LOWER-OFF FUNCTIONALITY.
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL LIGHTS
  - 10-MINUTE INACTIVITY TIME-OUT
  - MANUAL ON-AUTOMATIC OFF
  - MAY BE COMBINATION WALL SENSOR-DIMMER
- DAYLIGHT SENSOR(S) IN THE IECC DAYLIGHT ZONE SHALL AUTOMATICALLY DIM LIGHT FIXTURES WITHIN THE DAYLIGHT ZONE
  - TARGET FOOTCANDLE THRESHOLD AT FLOOR: 40FC
  - ALL FIXTURES IN EXTERIOR FACING OFFICES SHALL BE CONSIDERED WITHIN THE IECC DAYLIGHT ZONE.

GYMNASIUM (NETWORKED CONTROL)
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL LIGHTS
  - 20-MINUTE INACTIVITY TIME-OUT
  - AUTO ON TO 50%
- DAYLIGHT SENSOR(S) IN THE IECC DAYLIGHT ZONE SHALL AUTOMATICALLY DIM LIGHT FIXTURES WITHIN THE DAYLIGHT ZONE
- KEY OPERATED SWITCHPAD SHALL OPERATE FIXTURES. PROVIDE WITH ON/OFF/RAISE/LOWER, WHEN IN MANUAL OPERATION MODE - OVERRIDE AUTOMATIC CONTROL (DAYLIGHT/OCCUPANCY SENSORS).
- 'OFF' SWITCH SHALL REDUCE LIGHTING LEVEL TO MINIMUM OF .2 FC WHEN OCCUPIED. WHEN UN-OCCUPIED, ALL FIXTURES SHALL TURN OFF. FIRE ALARM SYSTEM ACTIVATION SHALL FORCE ALL LIGHTS 'ON' TO FULL BRIGHT IN SPACE. COMPLY WITH IBC 1008.2.1
- PROVIDE ENGRAVED PLACARD AFFIXED TO WALL ADJACENT TO EACH SWITCH LOCATION IN SPACE INDICATING OPERATION AND FUNCTION. PROVIDE SAMPLE FOR REVIEW
- EMERGENCY LIGHTING VIA INVERTER CONNECTED LIGHTS – WHEN NORMAL POWER IS LOST THE FIXTURES SHALL BYPASS ALL CONTROL AND TURN ON FULL BRIGHT

EVENTS CENTER/TEEN CENTER/GROUP ROOMS
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL LIGHTS
  - 20-MINUTE INACTIVITY TIME-OUT
- DAYLIGHT SENSOR(S) IN THE IECC DAYLIGHT ZONE SHALL AUTOMATICALLY DIM LIGHT FIXTURES WITHIN THE DAYLIGHT ZONE
- KEY OPERATED SWITCHPAD SHALL OPERATE FIXTURES. PROVIDE WITH ON/OFF/RAISE/LOWER, WHEN IN MANUAL OPERATION MODE - OVERRIDE AUTOMATIC CONTROL (DAYLIGHT/OCCUPANCY SENSORS).
- 'OFF' SWITCH SHALL REDUCE LIGHTING LEVEL TO MINIMUM OF .2 FC WHEN OCCUPIED. WHEN UN-OCCUPIED, ALL FIXTURES SHALL TURN OFF. FIRE ALARM SYSTEM ACTIVATION SHALL FORCE ALL LIGHTS 'ON' TO FULL BRIGHT IN SPACE. COMPLY WITH IBC 1008.2.1
- PROVIDE ENGRAVED PLACARD AFFIXED TO WALL ADJACENT TO EACH SWITCH LOCATION IN SPACE INDICATING OPERATION AND FUNCTION. PROVIDE SAMPLE FOR REVIEW
- EMERGENCY LIGHTING VIA INVERTER CONNECTED LIGHTS – WHEN NORMAL POWER IS LOST THE FIXTURES SHALL BYPASS ALL CONTROL AND TURN ON FULL BRIGHT

CORRIDORS/ENTRY (NETWORKED CONTROL)
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL LIGHTS
  - 20-MINUTE INACTIVITY SHALL DIM LIGHTS TO 50%
  - OUTSIDE OF OPERATING HOURS: OFF AFTER 10-MINUTE SENSOR TIMEOUT
  - AUTOMATIC ON-AUTOMATIC OFF
- FIRE ALARM SYSTEM ACTIVATION SHALL FORCE ALL LIGHTS 'ON' TO FULL BRIGHT IN SPACE.
- LIGHTS CIRCUITED TO AN INVERTER SHALL PROVIDE FULL LIGHT OUTPUT IN EMERGENCY OPERATION AND RELEASE ALL OTHER CONTROL

KITCHEN
- MANUAL ON/OFF/RAISE/LOWER CONTROL

RESTROOMS-SINGLE OCCUPANT
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL FIXTURES
  - FIXTURES SHALL BE MANUAL ON-AUTOMATIC OFF
  - SENSORS SHALL HAVE A 10 MINUTE TIMEOUT
  - LOCAL SWITCH FOR ON-OFF CONTROL

RESTROOMS-MULTIPLE STALL/LOCKER ROOMS (NETWORKED CONTROL)
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL FIXTURES
  - 10-MINUTE INACTIVITY SHALL DIM LIGHTS TO 50%
  - OUTSIDE OF OPERATING HOURS: OFF AFTER 10-MINUTE SENSOR TIMEOUT
  - AUTOMATIC ON-AUTOMATIC OFF
  - TIME CLOCK CONTROLLED VIA LCP

STORAGE ROOMS, SUPPORT AREAS (STANDALONE CONTROL)
- OCCUPANCY SENSOR(S) SHALL CONTROL ALL FIXTURES
  - FIXTURES SHALL BE AUTOMATIC ON-AUTOMATIC OFF
  - 10-MINUTE INACTIVITY TIMEOUT
  - LOCAL SWITCH FOR ON-OFF CONTROL

ELECTRICAL/TELECOMM/MECHANICAL ROOMS (STANDALONE CONTROL)
- MANUAL ON/OFF CONTROL

EXTERIOR - BUILDING MOUNTED (NETWORKED CONTROL)
- 365/7 DAY PROGRAMMABLE ASTRONOMICAL TIME CLOCK AND SINGLE PHOTOCELL (VIA LCP)
  - MOTION SENSOR SHALL DIM FIXTURES TO 30% OUTPUT IN PERIODS OF NO MOTION DETECTED; FIXTURES SHALL GO TO FULL OUTPUT WHEN OCCUPANCY IS DETECTED. 10-MINUTE INACTIVITY TIMEOUT.
  - FIXTURES SHALL AUTOMATICALLY TURN ON/OFF AT DUSK/DAWN
    - THE OWNER SHALL HAVE THE OPTION TO TURN OFF ALL LIGHTING AT PRE-PROGRAMMED TIMES
  - POWER CIRCUIT SHALL BE FED VIA LIGHTING INVERTER AND TURN ON ALL EXTERIOR BUILDING MOUNTED FIXTURES IN EMERGENCY MODE (BUILDING POWER LOSS) AND BYPASS ALL CONTROL

EXTERIOR - PARKING LOT (NETWORKED CONTROL)
- MOTION SENSORS SHALL CONTROL ALL FIXTURES INTEGRAL TO FIXTURE
  - DUSK TO DAWN OPERATION VIA INTEGRAL PHOTOCELL
  - FIXTURES SHALL DIM TO 30% IN PERIODS OF NO MOTION DETECTED; FIXTURE SHALL GO TO FULL OUTPUT WHEN OCCUPANCY IS DETECTED.
  - 10-MINUTE INACTIVITY TIMEOUT WITH 5-MINUTE RAMP DOWN BACK TO 10% OUTPUT.
  - PROVIDE PROGRAMMABLE CONTROLLER FOR OWNER TO ADJUST TIMING AND OUTPUTS REMOTELY

LIGHTING FIXTURE SCHEDULE

LIGHTING FIXTURE CATALOG NUMBERS ARE SERIES TYPE ONLY. PROVIDE TRIMS, BALLASTS, MOUNTING EQUIPMENT, FITTINGS AND LAMPS AS REQUIRED BY THE SPECIFICATIONS AND PROJECT CONDITIONS FOR A COMPLETE INSTALLATION.THIS IS NOT A STANDALONE SCHEDULE AND FIXTURES MUST INCORPORATE ALL WORK INDICATED OR IMPLIED THROUGHOUT THE DRAWINGS AND SPECIFICATIONS.

LIGHTING SYSTEM FOOTCANDLE LEVELS ARE BASED ON THE UTILIZATION OF STANDARD REFLECTANCES OF 80-50-20 (CEILING-WALL-FLOOR) PER I.E.S. (ILLUMINATED ENGINEERING SOCIETY). THE ROOM SURFACES ARE USED AS AN INTEGRAL COMPONENT OF THE LIGHTING SYSTEMS. THE REFLECTANCE OF THE SURFACE PAINT COLOR, MATERIAL, AND OTHER ROOM SURFACES DIRECTLY AFFECTS THE DELIVERY OF LIGHT TO THE WORK PLANE, A SIGNIFICANT DROP IN OVERALL LIGHTING LEVELS WILL OCCUR IF REFLECTANCES ARE LOWERED. THE ARCHITECT/OWNER SHALL NOTIFY THE ENGINEER IMMEDIATELY IF FINISHES DO NOT FALL INLINE WITH THE REFLECTANCES MENTIONED ABOVE.

SUBSTITUTION: DEFINITIONS

OR EQUAL = EQUAL OR SUPERIOR TO SPECIFIED IN ALL RESPECTS WILL BE ALLOWED. ENGINEER'S PRE-BID APPROVAL IS NOT REQUIRED. PROPOSED EQUAL FIXTURES ARE SUBJECT TO REVIEW DURING THE STANDARD SUBMITTAL PROCESS.

NO EQUAL = PROVIDE SPECIFIED FIXTURE. SUBSTITUTIONS ARE NOT ALLOWED.

SUBJECT TO REVIEW = EQUAL OR SUPERIOR TO SPECIFIED IN ALL RESPECTS MAY BE ALLOWED ONLY WITH ENGINEER'S APPROVAL. ALL SUBSTITUTIONS MUST BE SUBMITTED AS REQUIRED BY SPECIFICATIONS AND ACCOMPANIED WITH POINT BY POINT LIGHTING CALCULATIONS. DETERMINATION OF EQUAL IS ENGINEER'S SOLE DISCRETION.

GENERAL NOTES

1. PANELBOARD AND BREAKER INTERRUPTING CAPACITIES (AIC) SHALL BE FULLY RATED AS AN ASSEMBLY. SERIES RATING OF BREAKER DEVICES AND EQUIPMENT IS NOT PERMITTED.ALL CONDUCTOR SIZES ARE BASED ON COPPER. ALUMINUM IS NOT PERMITTED.
2. INSTALL NVE TRANSFORMER PAD, CONDUIT, ETC. PER UTILITY REQUIREMENTS. SEE NVE DRAWINGS FOR ALL WORK REQUIRED. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL WORK, INCLUDING THAT REQUIRED BY NVE IN BID. COORDINATE WITH NVE.
3. ALL SWITCHBOARDS AND DISTRIBUTION BOARDS SHALL BE FULLY BUSSED.
4. ALL CONTRACTOR PROVIDED EQUIPMENT SHALL COMPLY WITH NV ENERGY SPECIFICATIONS AND REQUIREMENTS.
5. DO NOT SPLICE FEEDER CONDUCTORS UNLESS PRIOR APPROVAL HAS BEEN OBTAINED FROM THE ENGINEER.
6. ALL SWITCHBOARDS, DISTRIBUTION BOARDS, AND PANEL BOARDS SHALL HAVE REMAINDER OF SECTION BUSSED SPACE (TO PROVIDE MINIMUM OF 10% SPARE CAPACITY).
7. CONTRACTOR SHALL PREPARE THE SHORT CIRCUIT AND COORDINATION STUDY PRIOR TO ORDERING DISTRIBUTION EQUIPMENT TO VERIFY ALL EQUIPMENT RATINGS, BREAKER TYPES, AND SETTINGS REQUIRED. ANY CHANGES TO EQUIPMENT RATINGS OR BREAKER TYPES IN ORDER TO PROVIDE A CODE REQUIRED SELECTIVELY COORDINATED SYSTEM SHALL NOT RESULT IN ADDITIONAL COST TO THE OWNER.
8. PROVIDE ENGRAVED NAMEPLATES (SCREW ATTACHED) ON ALL PANELS, TRANSFORMERS, SWITCHBOARDS, DISTRIBUTION BOARDS. DISCONNECT SWITCHES, SIMILAR TO THE FOLLOWING. MINIMUM SIZE 1 1/2"x3".

208/120V 3PH 4W
PANEL L1A
FED FROM DIST PNL DP-1

SHEET NOTES

1. NV ENERGY TRANSFORMER PAD, PROVIDE AND INSTALL AS REQUIRED. COORDINATE ALL UTILITY WORK WITH NV ENERGY.
2. INTERNALLY MOUNTED SPD WITH DISCONNECT. 240KA/PHASE WITH STATUS INDICATOR LIGHT ON EACH PHASE, AUDIBLE ALARM, TRANSIENT COUNTER AND PUSH TO TEST. SEE SPECIFICATIONS.
3. REMAINDER OF SPACE SHALL BE FULLY BUSSED. PROVIDE SPACE FOR (2) 225A/3P BREAKERS, MINIMUM.
4. MANUAL TRANSFER SWITCH, 1000A, 480V, 3-POLE, NEMA 3R RATED, PAD MOUNTED.

Date: MARCH 21, 2023
Sheet No:
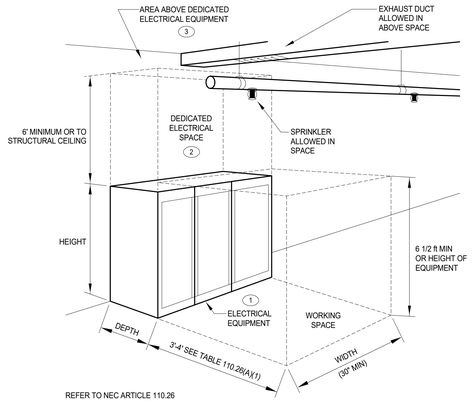
E0.05



REFER TO NEC ARTICLE 110.26

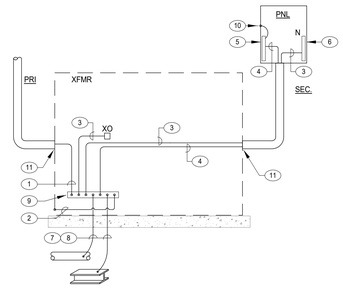
NEC-ARTICLE 110.26 WORKING SPACE & DEDICATED ELECTRICAL SPACE REQUIREMENTS

6 / E0.06

SCALE: NONE

DETAIL NOTES

1. ELECTRICAL EQUIPMENT INCLUDES SWITCHGEAR, SWITCHBOARDS, DISTRIBUTION BOARDS, PANEL BOARDS, MOTOR CONTROL CENTER OR SIMILAR EQUIPMENT.
2. NO PIPING, DUCTS, LEAK PROTECTION APPARATUS, OR OTHER EQUIPMENT FOREIGN TO THE ELECTRICAL INSTALLATION SHALL BE LOCATED IN THIS ZONE.
3. THE AREA ABOVE THE DEDICATED SPACE REQUIRED BY 110.26(E)(1)(a) SHALL BE PERMITTED TO CONTAIN FOREIGN SYSTEMS, PROVIDED PROTECTION IS INSTALLED TO AVOID DAMAGE TO THE ELECTRICAL EQUIPMENT FROM CONDENSATION, LEAKS, OR BREAKS IN SUCH FOREIGN SYSTEM.



TRANSFORMER GROUNDING AND BONDING DETAIL

4 / E0.06

SCALE: NONE

TRANSFORMER GROUNDING AND BONDING NOTES

1. EQUIPMENT GROUNDING CONDUCTOR (PRIMARY) - PER NEC 2017, ARTICLE 250.122 AND 250.66.
2. SYSTEM BONDING JUMPER - PER NEC 2017, ARTICLE 250.28(D)(1).
3. GROUNDED CONDUCTOR (NEUTRAL) - DO NOT BOND THE GROUNDED CONDUCTOR TO THE FIRST SYSTEM DISCONNECTING MEANS IF THE SYSTEM BONDING JUMPER IS INSTALLED IN THE TRANSFORMER ENCLOSURE. SIZE THE SYSTEM BONDING JUMPER PER NEC 2017, ARTICLE 250.28(D)(1).
4. SUPPLY SIDE BONDING JUMPER (SECONDARY) - PER NEC 2017, ARTICLE 250.66, 250.30(A)(2) AND 250.102(C)(1).
5. EQUIPMENT GROUNDING TERMINAL BAR.
6. ISOLATED NEUTRAL TERMINAL BAR.
7. GROUNDING ELECTRODE - PER NEC 2017, ARTICLE 250.30(A)(4).
8. BONDING JUMPERS - PER NEC 2017, ARTICLE 250.66 AND 250.104(D)(1)(2)(3).
9. EQUIPMENT GROUNDING TERMINAL BAR - PER NEC 2017, ARTICLE 250.30(A)(1)(5) CONNECT TO A SINGLE POINT.
10. SUPPLY SIDE BONDING JUMPER (IF REQUIRED - SEE NOTE #3). PER NEC 2017, ARTICLE 250.30(A)(2).
11. BUSHINGS - PER NEC 2017, ARTICLE 300.4(G) AND 250.92.

REV	DATE	DESCRIPTION

Sheet Title
DETAILS

Date: MARCH 21, 2023
Sheet No:
E0.07

GENERAL NOTES

1. THIS DRAWING REPRESENTS THE EXISTING LIGHTING, POWER AND COMMUNICATIONS SYSTEMS WITHIN THE EXISTING BUILDING (AREA TO BE REMODELED). THE CONTRACTOR IS RESPONSIBLE FOR REMOVING, RELOCATING AND REWIRING ALL EQUIPMENT AS INDICATED ON THE DRAWINGS, INCLUDING EQUIPMENT THAT LIES WITHIN WALLS AND CEILINGS TO BE DEMOLISHED OR REMODELED.

2. (X) AND/OR DASHED LINES INDICATE EXISTING EQUIPMENT TO BE REMOVED, (R) AND/OR DASHED LINES INDICATE EXISTING EQUIPMENT TO BE RELOCATED, (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT TO REMAIN UNLESS NOTED OTHERWISE.

3. SALVAGEABLE ITEMS REMOVED DURING DEMOLITION SHALL BE OFFERED TO OWNER PRIOR TO DISPOSAL OR REMOVAL FROM SITE.

4. EXISTING CIRCUITS AS INDICATED ARE BASED ON CASUAL FIELD OBSERVATION AND INFORMATION PER RECORD DRAWINGS AND SHALL BE FIELD VERIFIED BY ELECTRICAL CONTRACTOR PRIOR TO START OF DEMOLITION WORK.

5. THE CONTRACTOR MAY SALVAGE AND REUSE EXISTING BOXES AND CONDUIT WHERE POSSIBLE. DAMAGED CONDUIT, FITTINGS BOXES, ETC. MAY NOT BE RE-USED. NEW CIRCUITING AS INDICATED ON THE DRAWINGS IS SHOWN FOR INTENT ONLY AND MAY VARY BASED ON ACTUAL FIELD CONDITIONS (NEW CIRCUITING SHALL MATCH EXISTING WHERE POSSIBLE TO UTILIZE EXISTING HOME-RUN CONDUITS, ETC.). KEEP AS-BUILT DRAWINGS CURRENT WITH ANY DEVIATION IN CIRCUITING FROM WHAT IS INDICATED WITHIN THESE PLANS.

6. THE CONTRACTOR SHALL REMOVE FROM THE JOB SITE ALL DISCARDED AND ABANDONED MATERIALS LEFT OVER FROM DEMOLITION AND INSTALLATION. THIS INCLUDES, BUT IS NOT LIMITED TO, CONDUIT, FASTENERS AND BOXES. MATERIALS EMBEDDED IN GRADE AND / OR CONCRETE MAY BE ABANDONED IN PLACE. ALL ABANDONED CONDUIT SHALL BE CAPPED.

SHEET NOTES

D01 DEMOLISH EXISTING POLE LIGHT AND BASE COMPLETE. REMOVE CONDUCTORS TO NEAREST FIXTURE TO REMAIN. EXISTING POLES CIRCUITED TO ADJACENT BUILDING (SENIOR CENTER).

DEMOLITION SITE PLAN

Date: MARCH 21, 2023

Sheet No:
E1.01

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. SEE ONELINE DIAGRAM(S) FOR CONDUIT, WIRE SIZES AND EQUIPMENT REQUIREMENTS.
3. IT IS THE CONTRACTOR'S RESPONSIBILITY TO COORDINATE WITH APPLICABLE UTILITY COMPANY'S DRAWINGS AND REPRESENTATIVES FOR DETERMINING THE EXACT RESPONSIBILITY OF EACH PARTY.
4. SEE UTILITY DRAWINGS FOR ALL UTILITY WORK WORK REQUIRED. CONTRACTOR SHALL BE RESPONSIBLE FOR INCLUDING ALL WORK REQUIRED IN BID. COORDINATE WITH EACH SITE UTILITY.
5. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CALL 1-800-227-2600 FOR LOCATES PRIOR TO DIGGING. IT IS ALSO THE CONTRACTORS RESPONSIBILITY TO LOCATE ALL NON-UTILITY UNDERGROUND ITEMS.
6. THE MAXIMUM NUMBER OF CONDUIT BENDS SHOULD NOT BE GREATER THAN 270 DEGREES BETWEEN PULLING STRUCTURES. THIS INCLUDES THE AGGREGATE OF ALL HORIZONTAL AND VERTICAL CHANGES.
7. ALL CONDUIT, INNERDUCT, PULLBOXES AND VAULTS SHALL BE LABELED PER THE SPECIFICATIONS.
8. PROVIDE #10 CU CONDUCTORS IN 3/4" CONDUIT MINIMUM, UNLESS NOTED OTHERWISE, FOR ALL SITE LIGHTING AND SITE RECEPTACLE CIRCUITS.
9. ALL RECEPTACLES WITH WEATHER PROOF DESIGNATION SHALL BE PROVIDED WITH 'WHILE IN USE' COVERS.
10. FURNISH AND INSTALL METALLIC TRACE TAPE ON TOP OF CONDUITS IN TRENCH.
11. EACH CONDUIT AND INNERDUCT SHALL BE PROVIDED WITH A 1250 LBS. PULL ROPE.
12. COORDINATE LOCATION OF BELOW-GRADE CONDUITS, DUCT BANKS, ETC. WITH CIVIL ENGINEER AND OTHER TRADES PRIOR TO ROUGH-IN.

SHEET NOTES

P05 WIREMOLD OUTDOOR GROUND BOX, #XB814 WITH DUPLEX COVER, #XBB814C520BK. LOCATE AS DIRECTED BY ARCHITECT/OWNER.

ALL WORK PART OF BASE BID UNLESS NOTED OTHERWISE

Sheet Title
NEW WORK SITE PLAN

Date: MARCH 21, 2023
Sheet No:
E1.02

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. LIGHTING FIXTURES DESIGNATED AS 'EMERGENCY' SHALL BE WIRED TO OPERATE WITH LOCAL SWITCHING UNDER NORMAL POWER CONDITIONS AND SHALL OPERATE VIA EMERGENCY BATTERY PACK OR INVERTER UPON LOSS OF BUILDING UTILITY POWER ONLT, UNLESS NOTED OTHERWISE.
3. EXIT SIGNS SHALL BE WIRED AHEAD OF LOCAL SWITCHING AND LIGHTING CONTROL PANEL FOR CONTINUOUS OPERATION. EXIT SIGNS SHALL BE WALL-MOUNTED ABOVE DOORS WHERE PRACTICAL. PROVIDE ADDITIONAL EXIT SIGNS AS NECESSARY FOR APPROVAL BY THE AUTHORITY HAVING JURISDICTION, PER ARCHITECT'S FINAL PATH OF EGRESS / EXITING PLAN.
4. ELECTRICAL CONDUITS SHALL BE RUN CONCEALED WHERE BUILDING CONSTRUCTION ALLOWS. ANY EXPOSED CONDUIT SHALL BE APPROVED BY THE ARCHITECT PRIOR TO INSTALLATION. ANY EXPOSED CONDUIT, FITTING, SUPPORTS, ETC SHALL BE PAINTED TO MATCH THE SURFACE ON WHICH THEY ARE INSTALLED.
5. REFER TO ARCHITECTURAL REFLECTED CEILING PLANS, SECTIONS, ELEVATIONS, ETC. FOR EXACT LOCATION OF LIGHTING FIXTURES.
6. EXACT LOCATION AND MOUNTING HEIGHT OF EXTERIOR BUILDING-MOUNTED FIXTURES SHALL BE COORDINATED WITH ARCHITECT PRIOR TO ROUGH-IN.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING FINAL FIXTURE LOCATIONS, ABOVE-CEILING HOUSING CLEARANCES, ETC. WITH MECHANICAL, PLUMBING, SPRINKLER CONTRACTOR AND OTHER TRADES PRIOR TO ROUGH-IN.
8. PROVIDE MULTIPLE-GANG FACEPLATES AS NECESSARY WHERE TWO OR MORE LIGHT SWITCHES ARE INDICATED IN A COMMON LOCATION. SINGLE-GANG FACEPLATES FOR A GROUP OF LIGHT SWITCHES ARE NOT PERMITTED.
9. PROVIDE STAINLESS STEEL DEVICE PLATES IN KITCHEN AND ROUGH-SERVICE AREAS.
10. CONDUIT FOR BUILDING-MOUNTED LIGHT FIXTURES SHALL BE ROUTED THROUGH INTERIOR OF BUILDING. LIGHT FIXTURE BACKBOXES SHALL BE RECESSED.

LIGHTING PLAN - BASE BID

Date: MARCH 21, 2023

Sheet No:
E2.01

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. CONTRACTOR SHALL COORDINATE FINAL RECEPTACLE LOCATIONS WITH TELECOM OUTLETS PRIOR TO ROUGH-IN. EACH TELECOM OUTLET SHALL HAVE A RECEPTACLE LOCATED WITHIN 12", MEASURED FROM CENTER OF DEVICES.
3. MODULAR FURNITURE: ELECTRICAL CONTRACTOR RESPONSIBLE FOR ON-SITE COORDINATION WITH FURNITURE SUPPLIER TO VERIFY FINAL WIRING REQUIREMENTS, CIRCUITING, J-BOX LOCATIONS, ETC. PRIOR TO ROUGH-IN. ELECTRICAL CONTRACTOR TO PROVIDE ALL HARDWARE AND ACCESSORIES NECESSARY FOR A COMPLETE INSTALLATION. FURNITURE SUPPLIER TO PROVIDE POWER WHIPS, ELECTRICAL CONTRACTOR TO MAKE FINAL CONNECTIONS TO FURNITURE. DESIGN INTENT OF THESE DRAWINGS ASSUMES 3-CIRCUIT, 8-WIRE MODULAR FURNITURE SYSTEM (3H, 3N, G, DED, G). NO MORE THAN SIX (6) WORKSTATIONS PER EACH 3-CIRCUIT GROUP, UNLESS NOTED OTHERWISE.
4. COORDINATE EXACT MOUNTING HEIGHTS AND LOCATIONS OF GENERAL RECEPTACLES, SPECIAL OUTLETS AND DISCONNECT SWITCHES IN SHOP AREAS WITH OWNER AND EQUIPMENT SUPPLIERS PRIOR TO ROUGH-IN.
5. CONDUITS FOR ROOF-MOUNTED DEVICES AND EQUIPMENT SHALL BE RUN BELOW ROOF DECK/SYSTEM. ROOF MOUNTED CONDUITS WILL ONLY BE CONSIDERED AND APPROVED IN WRITING BY THE ARCHITECT/ENGINEER.
6. VERIFY EXACT ELECTRICAL REQUIREMENTS, PLUG CONFIGURATIONS, ETC., AND FINAL LOCATIONS OF OWNER-PROVIDED EQUIPMENT WITH OWNER'S REPRESENTATIVE PRIOR TO ORDERING OF MATERIALS AND ROUGH-IN.

SHEET NOTES

P01 POWERED AUTOMATIC VALVE JUNCTION BOX FLUSH IN WALL. COORDINATE ROUGH-IN WITH PLUMBING CONTRACTOR. INSTALL POWER SUPPLY IN ACCESSIBLE LOCATION. CONNECT ALL VALVES AS REQUIRED FOR COMPLETE SYSTEM.

P04 MOUNT RECEPTACLE TO TOP OF RACK, 6'0" AFF. VERIFY EXACT LOCATION WITH TELECOM CONTRACTOR PRIOR TO ROUGH IN.

(###) SHEET NOTES

K01 PROVIDE CONDUIT SEAL-OFFS AT ALL CONDUITS LEAVING COOLER AND FREEZER.

K02 CONNECT FREEZER DRAIN HEAT TRACE. COORDINATE REQUIREMENTS WITH FOOD SERVICE VENDOR AND MECHANICAL CONTRACTOR. FIELD VERIFY.

K03 PROVIDE SWITCH, JUNCTION BOX, AND CONNECTION FOR WALK-IN COOLER AND FREEZER LIGHTING. THE ELECTRICAL CONTRACTOR SHALL INSTALL LIGHTING FIXTURES IN WALK-IN COOLER AND WALK-IN FREEZER, PROVIDED BY OTHERS. COORDINATE REQUIREMENTS WITH KITCHEN EQUIPMENT PROVIDER. FIELD VERIFY.

K04 PROVIDE RECESSED CONTACTOR CABINET WITH HINGED AND LOCKABLE COVER FOR ALL HOOD EQUIPMENT SHUTDOWN BY ANSUL SYSTEM. PROVIDE ELECTRICALLY OPERATED AND MECHANICALLY HELD CONTACTORS, QUANTITY AND SIZE AS INDICATED IN EQUIPMENT SCHEDULE. PROVIDE LABELS FOR EACH CONTACTOR INDICATING THE LOAD CONTROLLED.

K05 CONTACTOR CONTROLS SHALL BE CONNECTED TO KITCHEN EXHAUST HOOD/ANSUL SYSTEM. WHEN THE ANSUL SYSTEM IS ACTIVATED, CONTACTORS SHALL OPEN, INTERRUPTING POWER TO CONNECTED KITCHEN EQUIPMENT. CONTACTORS SHALL REQUIRE MANUAL RESET AFTER FIRE SUPPRESSION EVENT IS CLEARED.

K06 CONNECT GAS SOLENOID VALVE VIA CONTACTOR FOR ANSUL SYSTEM HOOD SHUTDOWN. SOLENOID LOCATED IN MECHANICAL ROOM 113A. SEE SHEET 4/P142.

K07 J-BOX STUB DOWN FROM ABOVE AND CONNECT TO HOOD LIGHTS. EXHAUST AND MAKE UP AIR FANS MUST BE INTERLOCKED TO SWITCH.

K08 WALL MOUNTED AIR CURTAIN CONTROLLED VIA DOOR MICRO SWITCH. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL INFORMATION.

K09 J-BOX LOCATED 12" ABOVE CEILING FOR FIRE SUPPRESSION SYSTEM. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL INFORMATION.

K10 DISPOSER CONTROL PANEL PROVIDED BY FOOD SERVICE. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL INFORMATION.

K11 ALL ELECTRICAL TO STUB INTO FLOOR BOXES "BUMPED UP" 3/8" MAXIMUM AT 2:1 SLOPE TO PROTECT FROM WATER.

K12 COORDINATE OVERHEAD CORD REEL / CORD DROP AND ELEVATION WITH FOOD SERVICE VENDOR. SEE FOOD SERVICE DRAWINGS FOR ADDITIONAL INFORMATION.

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. CONTRACTOR SHALL COORDINATE FINAL RECEPTACLE LOCATIONS WITH TELECOM OUTLETS PRIOR TO ROUGH-IN. EACH TELECOM OUTLET SHALL HAVE A RECEPTACLE LOCATED WITHIN 12", MEASURED FROM CENTER OF DEVICES.
3. MODULAR FURNITURE: ELECTRICAL CONTRACTOR RESPONSIBLE FOR ON-SITE COORDINATION WITH FURNITURE SUPPLIER TO VERIFY FINAL WIRING REQUIREMENTS, CIRCUITING, J-BOX LOCATIONS, ETC. PRIOR TO ROUGH-IN. ELECTRICAL CONTRACTOR TO PROVIDE ALL HARDWARE AND ACCESSORIES NECESSARY FOR A COMPLETE INSTALLATION. FURNITURE SUPPLIER TO PROVIDE POWER WHIPS, ELECTRICAL CONTRACTOR TO MAKE FINAL CONNECTIONS TO FURNITURE. DESIGN INTENT OF THESE DRAWINGS ASSUMES 3-CIRCUIT, 8-WIRE MODULAR FURNITURE SYSTEM (3H, 3N, G, DED, G). NO MORE THAN SIX (6) WORKSTATIONS PER EACH 3-CIRCUIT GROUP, UNLESS NOTED OTHERWISE.
4. COORDINATE EXACT MOUNTING HEIGHTS AND LOCATIONS OF GENERAL RECEPTACLES, SPECIAL OUTLETS AND DISCONNECT SWITCHES IN SHOP AREAS WITH OWNER AND EQUIPMENT SUPPLIERS PRIOR TO ROUGH-IN.
5. CONDUITS FOR ROOF-MOUNTED DEVICES AND EQUIPMENT SHALL BE RUN BELOW ROOF DECK/SYSTEM. ROOF MOUNTED CONDUITS WILL ONLY BE CONSIDERED AND APPROVED IN WRITING BY THE ARCHITECT/ENGINEER.
6. VERIFY EXACT ELECTRICAL REQUIREMENTS, PLUG CONFIGURATIONS, ETC., AND FINAL LOCATIONS OF OWNER-PROVIDED EQUIPMENT WITH OWNER'S REPRESENTATIVE PRIOR TO ORDERING OF MATERIALS AND ROUGH-IN.

TELECOM GENERAL NOTES

ITEM	DESCRIPTION
27.1	STANDARDS AND CODES: ALL TELECOMMUNICATIONS (TELECOM), AUDIO-VISUAL (AV) AND ELECTRONIC SAFETY AND SECURITY (ESS) WORK SHALL BE INSTALLED IN ACCORDANCE WITH THE NATIONAL ELECTRIC CODE (NEC), ANSI/TIA STANDARDS AND ANSI/INFOCOMM STANDARDS REFERENCED IN THE DIVISION 27 AND DIVISION 28 SPECIFICATIONS.
27.2	GENERAL REQUIREMENTS: INCLUDE ALL LABOR, MATERIALS, EQUIPMENT, TOOLS, TRANSPORTATION, STORAGE COSTS, EXCAVATION, TRAINING, INSURANCE, TEMPORARY PROTECTION, PERMITS, INSPECTIONS, TAXES AND ALL NECESSARY AND RELATED ITEMS REQUIRED TO PROVIDE A COMPLETE AND OPERATIONAL TELECOM SYSTEM, AUDIO/VISUAL SYSTEM AND SECURITY SYSTEM AS SHOWN ON THE CONTRACT DRAWINGS AND DESCRIBED IN THE SPECIFICATIONS. THE DIVISION 26 ELECTRICAL CONTRACTOR, DIVISION 27 TELECOM CONTRACTOR AND DIVISION 28 SECURITY CONTRACTOR ARE RESPONSIBLE FOR THE WORK SHOWN ON THE TELECOM DRAWINGS AND DESCRIBED IN THE DIVISION 27 & 28 SPECIFICATIONS. INFORMATION SHOWN ON THE TELECOM DRAWINGS IS DIAGRAMMATIC. FIELD VERIFY ALL DIMENSIONS, LOCATIONS, AND LAYOUT. REVIEW ALL ARCHITECTURAL, STRUCTURAL, CIVIL, MECHANICAL AND SPECIALTY SYSTEMS DRAWINGS AND ADJUST ALL WORK TO MEET THE REQUIREMENTS OR CONDITIONS SHOWN THEREON. DO NOT SCALE THE TELECOM PLANS FOR RACEWAY, OUTLET, RACK OR EQUIPMENT LOCATIONS.
27.3	RACEWAY: THE DIVISION 26 ELECTRICAL CONTRACTOR IS RESPONSIBLE FOR THE INSTALLATION, SUPPORT AND SEISMIC BRACING OF ALL RACEWAY SHOWN ON THE TELECOM DRAWINGS AND DESCRIBED IN THE DIVISION 27 & 28 SPECIFICATIONS. THIS INCLUDES BUT IS NOT LIMITED TO ALL WIRE BASKET TRAY, CONDUIT, OUTLET BOXES, PULL BOXES, PULL STRING, SLEEVES. WHERE RACEWAY IS SHOWN ON THE TELECOM DRAWINGS BUT NOT SPECIFIED IN THE DIVISION 27 AND 28 SPECIFICATIONS, THE RACEWAY WILL BE INSTALLED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DIVISION 26 SPECIFICATIONS. THE DIVISION 26 ELECTRICAL CONTRACTOR SHALL INSTALL WALL OR CEILING MOUNTED OUTLET BOXES AT ALL TELECOM OUTLETS AND WILL INSTALL AN 1" EMT CONDUIT (UON) FROM THE OUTLET BOX TO AN ACCESSIBLE CEILING SPACE. THE DIVISION 27 CONTRACTOR SHALL INSTALL J-HOOKS FROM THIS POINT TO THE TELECOM ROOM. WHERE NO ACCESSIBLE CEILING SPACE EXISTS OR IN AREAS WITHOUT CEILINGS, THE ELECTRICAL CONTRACTOR SHALL INSTALL CONDUIT FROM THE OUTLET BOX TO THE TELECOM ROOM NO EXPOSED TELECOM OR A/V CABLING IS PERMITTED WITH THE EXCEPTION OF CABLING ROUTED WITHIN THE TELECOM ROOM. ALL CABLING MUST BE CONCEALED ABOVE ACCESSIBLE CEILINGS OR ROUTED IN CONDUIT. THE DIVISION 26 ELECTRICAL CONTRACTOR SHALL INSTALL CONDUIT FOR ROUTING OF HORIZONTAL TELECOM CABLING ROUTED IN INACCESSIBLE CEILING OR WALL SPACES. CONDUIT SHALL BE SIZED SO AS NOT TO EXCEED 40% FILL RATE. ALL RACEWAY SHALL BE RUN PERPENDICULAR TO BUILDING GRID LINES. TELECOM RACEWAY SHALL BE INSTALLED SO THAT THE FOLLOWING MINIMUM CLEAR DISTANCES ARE MAINTAINED FROM SOURCES OF ELECTRO-MAGNETIC INTERFERENCE (EMI). 6" CLEAR FROM POWER CABLES, 12" CLEAR FROM FLUORESCENT LIGHTING AND 36" CLEAR FROM TRANSFORMERS AND MOTORS. THE DIVISION 26 ELECTRICAL CONTRACTOR IS RESPONSIBLE FOR FURNISHING ALL ACCESS DOORS REQUIRED TO PROVIDE REASONABLE ACCESS FOR THE INSTALLATION OF TELECOM CABLING.
27.4	FIRESTOPPING: ALL PENETRATIONS THROUGH FIRE RATED OR ACOUSTICAL WALLS MUST BE FIRE STOPPED WITH A UL LISTED FIRE STOP ASSEMBLY. ALL FIRE STOPPING ASSEMBLIES SHALL SHALL MEET OR EXCEED THE RATING OF THE WALL OR FLOOR BEING PENETRATED. THE DIVISION 26 ELECTRICAL CONTRACTOR IS RESPONSIBLE FOR INSTALLATION OF FIRESTOPPING BETWEEN ALL TELECOM RACEWAYS AND THE BUILDING STRUCTURE. THE DIVISION 27 TELECOM CONTRACTOR IS RESPONSIBLE FOR INSTALLATION OF FIRESTOPPING BETWEEN THE TELECOM CABLING AND THE TELECOM RACEWAY.
27.5	STRUCTURED CABLING: THE DIVISION 27 TELECOM CONTRACTOR IS RESPONSIBLE FOR INSTALLING ALL REMAINING WORK SHOWN ON THE TELECOM DRAWINGS OR DESCRIBED IN THE DIVISION 27 SPECIFICATIONS. THIS INCLUDES BUT IS NOT LIMITED TO HORIZONTAL VOICE & DATA CABLING, TELECOM OUTLET FACEPLATES, TELECOM OUTLET JACKS, DATA PATCH PANELS, VOICE TERMINATION BLOCKS, RACKS, RACK MOUNTED CABLE MANAGEMENT DEVICES, VELCRO CABLE TIES, D-RINGS, PATCH CORDS, STATION CORDS, CROSS CONNECT WIRE, LABELING, CABLE TESTING AND CERTIFICATION, ETC.
27.6	CABLING AND TERMINATIONS: ALL PREMISE HORIZONTAL DATA AND VOICE CABLING, PATCH CORDS AND WORKSTATION CORDS SHALL BE CATEGORY 6 UNSHIELDED TWISTED PAIR. ALL PATCH PANELS AND OUTLET JACKS SHALL BE CATEGORY 6. HORIZONTAL CAT 6 DATA AND VOICE CABLING SHALL HAVE A PLENUM RATED (CMP) JACKET (JACKET COLOR BLUE). NO SPLICES WILL BE PERMITTED IN ANY TELECOM CABLING UNLESS EXPLICITLY SHOWN ON THE DRAWINGS. THE MAXIMUM CABLE LENGTH BETWEEN THE WORK AREA OUTLET AND THE TERMINATION IN THE TELECOM ROOM SHALL BE 295 FEET. NOTIFY THE ENGINEER OF HORIZONTAL CABLES LONGER THAN 295 FEET PRIOR TO INSTALLATION. PROVIDE SLACK IN CABLES AT ENTRANCES AND EXITS OF CONDUIT SLEEVES AND AT TRANSITIONS FROM HORIZONTAL TO VERTICAL CABLE LADDERS AND CABLE TRAYS. PROVIDE A MINIMUM 10'-0" MAINTENANCE LOOP IN THE TELECOM ROOMS FOR ALL HORIZONTAL CABLING TO ALLOW MINOR RELOCATION OF THE TELECOM RACKS. TELECOM CABLING SHALL BE INSTALLED IN A NEAT AND WORKMANLIKE MANNER. ALL CABLES SHALL BE NEATLY BUNDLED AND DRESSED IN THE TELECOM ROOMS. LOOSELY BUNDLE HORIZONTAL CABLE WITH VELCRO TIE WRAPS AT 1'-0" CENTERS INSIDE THE TELECOM ROOMS AND AT 2'-0" CENTERS OUTSIDE THE TELECOM ROOM. DO NOT EXCEED QTY (24) CABLES PER BUNDLE.
27.7	TESTING AND CERTIFICATION: ALL DATA, VOICE AND A/V CABLING SHALL BE TESTED AND CERTIFIED IN ACCORDANCE WITH THE DIVISION 27 SPECIFICATIONS. CERTIFIED TEST REPORTS SHALL BE SUBMITTED FOR APPROVAL AT THE COMPLETION OF THE PROJECT.
27.8	SUPERVISION: ALL WORK SHALL BE SUPERVISED ON A DAILY BASIS BY A BICSI CERTIFIED SUPERVISOR HAVING A MINIMUM OF THREE (3) YEARS EXPERIENCE IN THE INSTALLATION OF STRUCTURED CABLING AND TELECOMMUNICATION SYSTEMS.
27.9	AS-BUILT DRAWINGS: PRIOR TO FINAL ACCEPTANCE, THE CONTRACTOR SHALL PROVIDE ONE SET OF AS-BUILT TELECOM DRAWINGS IN PDF FORMAT INDICATING THE FOLLOWING ADDITIONAL INFORMATION: EXACT ROUTING OF J-HOOKS AND ALL RACEWAY LARGER THAN 2", QTY AND LAYOUT OF ALL TELECOM OUTLETS, QUANTITY OF TELECOM DROPS AT EACH OUTLET, CONTRACTORS NAME, ADDRESS AND TELEPHONE PHONE NUMBER. RECORD NOTATIONS SHALL BE CLEARLY DRAWN WITH A DRAFTING APPEARANCE EQUAL TO THE ORIGINAL DRAWINGS.
27.10	EXAMINATION OF SITE: BEFORE SUBMITTING A PROPOSAL, THE CONTRACTOR SHALL EXAMINE THE SITE AND BECOME FAMILIAR WITH THE EXISTING CONDITIONS AND LIMITATIONS. NO EXTRAS WILL BE ALLOWED BECAUSE OF THE CONTRACTOR'S MISUNDERSTANDING OF THE AMOUNT OF WORK INVOLVED OR LACK OF KNOWLEDGE OF ANY SITE CONDITIONS WHICH MAY AFFECT THE WORK. ANY APPARENT VARIANCE OF THE DRAWINGS OR SPECIFICATIONS FROM THE EXISTING CONDITIONS AT THE SITE SHALL BE CALLED TO THE ATTENTION OF THE ENGINEER BEFORE SUBMITTING A PROPOSAL.
27.11	GUARANTEE: THE CATEGORY 6 STRUCTURED CABLING SYSTEM INCLUDING HORIZONTAL CABLING, PATCH PANELS, PATCH CORDS AND TELECOM OUTLET JACKS SHALL CARRY A MINIMUM TWENTY (20) YEAR MANUFACTURER WARRANTY FROM BELDEN/CDT. THE COMPLETE TELECOM SYSTEM AND ALL PORTIONS THEREOF, SHALL BE GUARANTEED TO BE FREE FROM DEFECTS IN WORKMANSHIP AND MATERIALS FOR A MINIMUM PERIOD OF ONE (1) YEAR FROM DATE OF FINAL ACCEPTANCE. PROMPTLY REMEDY SUCH DEFECTS AND ANY SUBSEQUENT DAMAGE CAUSED BY THE DEFECTS OR REPAIR THEREOF AT NO EXPENSE TO THE OWNER. SEE THE DIVISION 27 SPECS FOR ADDITIONAL WARRANTY AND/OR EXTENDED WARRANTY REQUIREMENTS.
27.12	SUBSTANTIAL COMPLETION: THE FOLLOWING ARE PREREQUISITES FOR SUBSTANTIAL COMPLETION OF THE TELECOM SYSTEM: ALL WORK COMPLETED IN ACCORDANCE WITH THE CONTRACT DOCUMENTS, PUNCH LIST ITEMS COMPLETED AND SIGNED OFF, CERTIFIED CABLE TEST REPORTS SUBMITTED AND APPROVED, AS-BUILT DRWGS AND TERMINATION SCHEDULES SUBMITTED AND APPROVED, MFG'S WARRANTY AND CONTRACTOR'S GUARANTEE SUBMITTED, EXTRA STOCK ITEMS TURNED OVER TO THE OWNER.

RACEWAY LEGEND

SYMBOL	DESCRIPTION
	CONDUIT. SIZE AS INDICATED ON DRAWINGS
	CONDUIT UNDERGROUND OR IN SLAB
	CONDUIT STUB OUT WITH BUSHING.
	HORIZONTAL OR VERTICAL SLEEVE WITH BUSHINGS.
	CONDUIT UP OR DOWN.
J J	J-HOOKS (WHERE SPECIFIC ROUTING REQUIRED)
	CABLE TRAY OR LADDER RACK. SIZE INDICATED ON DWGS
	WIRE BASKET TRAY. SIZE INDICATED ON DRWGS. SEE 5/T0.2.
	VERTICAL LADDER RACK.
	CONDUIT OR SLEEVE STUB UP.

EQUIPMENT & CABLING LEGEND

SYMBOL	DESCRIPTION
	TELECOM 4-POST EQUIP RACK W/ VERTICAL CABLE MANAGERS.
	RACK, WIRING BLOCK OR EQUIPMENT GROUND.
PBB	2" X 12" X 1/4" TELECOM PRIMARY BONDING BUSBAR (SEE 4/T0.2).
RING	24" DIAMETER STEEL WALL MOUNTED CABLE SLACK STORAGE RING WITH RECLOSEABLE VELCRO FASTENERS.

TELECOM LEGEND

SYMBOL	DESCRIPTION
2D	DATA OUTLET: 4 11/16" X 4 11/16" X 2 1/8" DEEP BOX +18" AFF (UON) WITH SINGLE GANG RING AND 1" CONDUIT TO TELECOM CABINET. PROVIDE 4-PORT FACEPLATE WITH QTY (2) PLENUM RATED CAT 6 DATA DROP (JACKET COLOR WHITE) TERMINATED ON CAT 6 JACKS (JACK COLOR WHITE). SEE PLANS FOR QUANTITY OF DATA DROPS AT EACH OUTLET. SEE 1.2/T0.02 FOR ADDITIONAL REQUIREMENTS.
1D WAP	WALL MOUNTED DATA OUTLET FOR WIRELESS ACCESS POINT: 4 11/16" X 4 11/16" X 2 1/8" DEEP BOX WITH SINGLE GANG RING AND 1" CONDUIT TO TELECOM CABINET (SEE PLANS FOR MOUNTING HEIGHT). PROVIDE 1-PORT FACEPLATE WITH QTY (1) PLENUM RATED CAT 6 DATA DROP (JACKET COLOR WHITE) TERMINATED ON CAT 6 JACK (JACK COLOR WHITE).
1D WAP	CEILING MOUNTED DATA OUTLET FOR WIRELESS ACCESS POINT: 4 11/16" X 4 11/16" X 2 1/8" DEEP BOX SECURED TO CEILING WITH SINGLE GANG RING AND 1" CONDUIT TO TELECOM CABINET. PROVIDE 1-PORT FACEPLATE WITH QTY (1) PLENUM RATED CAT 6 DATA DROP (JACKET COLOR WHITE) TERMINATED ON CAT 6 JACK (JACK COLOR WHITE).

ACCESS CONTROL SYSTEM LEGEND

SYMBOL	DESCRIPTION
ACP	ACCESS CONTROL PANEL AND POWER SUPPLY CABINET WALL MOUNTED IN MDF ROOM (SEE T0.05).
CR	CONTACTLESS SMART CARD READER.
ES	ELECTRIC STRIKE (SEE ARCHITECTURAL DOOR HARDWARE SCHED).
RX	REQUEST TO EXIT MOTION DETECTOR.
C	MAGNETIC DOOR POSITION CONTACTS.
PS	120VAC TO 24VDC POWER SUPPLY (SEE ARCHITECTURAL DOOR HARDWARE SCHED).
PT	POWER TRANSFER HINGE (SEE ARCHITECTURAL DOOR HARDWARE SCHEDULE).
LA	PANIC BAR WITH LOCAL ALARM.
ML	MAGNETIC LOCK.
PB	PUSH BUTTON DOOR RELEASE.
DS	VIDEO INTERCOM DOOR STATION.
VI	VIDEO INTERCOM MASTER STATION.

INTRUSION DETECTION LEGEND

SYMBOL	DESCRIPTION
IDCP	INTRUSION DETECTION CONTROL PANEL WITH ADDRESSABLE EXPANSION MODULE, RELAY OUTPUT MODULE, LOCKABLE ENCLOSURE, DIALER, POWER SUPPLIES, BATTERIES AND BATTERY CHARGERS TO ACCOMMODATE ALL DEVICES AND ZONES SHOWN ON THE DRAWINGS (SEE 1/T-0.7). PROVIDE QTY (2) CAT 6 DROPS TO PANEL.
KP	ALPHA KEYPAD / ANNUNCIATOR.
C	MAGNETIC DOOR POSITION CONTACT WITH ADDRESSABLE MODULE. NOTE - CONTACTS ON DOORS WITH ACCESS CONTROL PROVIDED AND INSTALLED BY ACCESS CONTROL CONTRACTOR AND CONNECTED TO INTRUSION SYSTEM BY INTRUSION DETECTION SYSTEM CONTRACTOR VIA ADDRESSABLE MODULE.
MD	PIR MOTION DETECTION SENSOR WITH ADDRESSABLE MODULE.

GYM SOUND SYSTEM LEGEND

SYMBOL	DESCRIPTION
S6	2-WAY 10-INCH 200 WATT 70V LOUDSPEAKER.
M	WALL MOUNTED DUAL XLR MICROPHONE INPUT PLATE. PROVIDE SINGLE GANG STAINLESS STEEL DECORA COVER PLATE.
AV	35RU WALL MOUNTED LOCKABLE SOUND SYSTEM EQUIPMENT CABINET WITH PERFORATED FRONT DOOR. SEE AV0.2 FOR RACK MOUNTED EQUIPMENT REQUIREMENTS.
TP	7" DIAGONAL WIRELESS TOUCH SCREEN CONTROLLER.
DSP	8-INPUT X 8-OUTPUT X 8-FLEX I/O DIGITAL SIGNAL PROCESSOR.
AMP	4-CHANNEL 4 x 400 WATT AMPLIFIER.
WR	2-CHANNEL UHF WIRELESS RECEIVER.
MP	MEDIA PLAYER.
ALS	ASSISTED LISTENING SYSTEM.

ABBREVIATIONS

AFF	ABOVE FINISH FLOOR
AV	AUDIO / VISUAL
AWG	AMERICAN WIRE GAUGE

WG	WIRE GUARD
WP	WALL PHONE

VIDEO SURVEILLANCE LEGEND

SYMBOL	DESCRIPTION
	FIXED CCTV CAMERA: INSTALL QTY (1) PLENUM CAT 6 DROP TERMINATED ON "REVCONNECT" FIELD MOUNT PLUG (SEE T0.06 FOR CAMERA AND CABLING REQUIREMENTS).
	MULTI-SENSOR CCTV CAMERA: INSTALL QTY (1) PLENUM CAT 6 DROP TERMINATED ON "REVCONNECT" FIELD MOUNT PLUG (SEE T0.06 FOR CAMERA AND CABLING REQUIREMENTS).
NVR	NETWORK VIDEO RECORDER RACK MOUNTED IN TELECOM ROOM.

PUBLIC ADDRESS SYSTEM LEGEND

SYMBOL	DESCRIPTION
S1	FLUSH CEILING MOUNTED 2-WAY 30 WATT 70V PA SPEAKER. PROVIDE 16/2 SPEAKER CABLE ROUTED IN CONDUIT BETWEEN SPEAKERS AND HOMERUN TO AMPLIFIER.
S2	FLUSH CEILING MOUNTED 2-WAY 60 WATT 70V PA SPEAKER. PROVIDE 16/2 SPEAKER CABLE ROUTED IN CONDUIT BETWEEN SPEAKERS AND HOMERUN TO AMPLIFIER.
S3	FLUSH GYPBOARD CEILING MOUNTED 5 WATT 70V PA SPEAKER WITH WHITE GRILLE AND VOLUME CONTROL. PROVIDE 16/2 SPEAKER CABLE ROUTED IN CONDUIT BETWEEN SPEAKERS AND HOMERUN TO AMPLIFIER.
AMP	4-CHANNEL 100 WATT PER CHANNEL 70V PUBLIC ADDRESS AMPLIFIER. INTERFACE AMPLIFIER WITH FIRE ALARM SYSTEM TO MUTE SPEAKERS WHEN FIRE ALARM ACTIVATED.

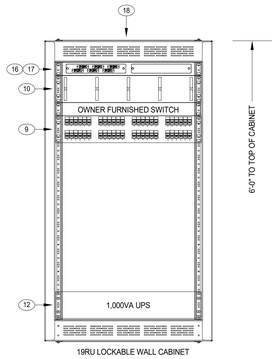
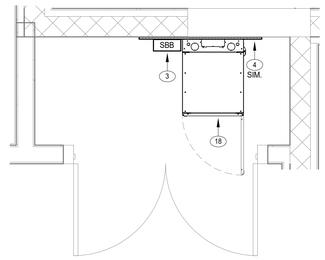
T0.03



4 T0.04 IDF ROOM WALL MOUNTED TELECOM CABINET



3 T0.04 ENLARGED IDF COMM ROOM PLAN

SCALE: 1/2" = 1'-0"

TELECOM ROOM AND RACK SHEET NOTES

1. UL LISTED 4-POST RACK WITH SQUARE PUNCHED EQUIPMENT MOUNTING ANGLES. BOLT RACKS TO CONCRETE WITH (4) 1/2" DIAMETER CONCRETE EXPANSION ANCHORS WITH MINIMUM 3" EMBEDMENT DEPTH. SECURE TOP OF RACKS TO OVERHEAD LADDER RACK WITH 12" HIGH CABLE RUNWAY ELEVATION KIT. INSTALL #6 GROUND WIRE FROM RACK TO GROUND BAR (PROVIDE A SEPARATE DEDICATED GROUND CONDUCTOR FOR EACH RACK - DO NO DAISY CHAIN GROUND CONDUCTORS). PROVIDE MANUFACTURER RACK GROUNDING KIT TO ENABLE GROUND LUG ATTACHMENT TO RACK. PROVIDE BASE DUST COVER WITH EACH RACK. PROVIDE QTY (50) CAGE NUTS WITH EACH RACK TO ALLOW DEVICES WITH STANDARD MOUNTING HOLES TO MOUNT IN SQUARE PUNCHED RAILS.
2. 7'-0" HIGH X 6" WIDE DOUBLE SIDED VERTICAL CABLE MANAGER WITH HINGED COVERS.
3. BICSI PATTERNED COPPER BONDING BUSBAR WITH INSULATED STANDOFFS. PROVIDE 1/4" THICK X 4" HIGH X 20" WIDE PRIMARY BUS BAR (PBB) IN THE MDF AND 1/4" THICK X 2" HIGH X 12" WIDE SECONDARY BONDING BUS BAR (SBB) IN THE IDF.
4. 3/4" FIRE TREATED AC PLYWOOD (TYPICAL ALL 4 WALLS). RUN PLYWOOD SHEETS VERTICALLY FROM 6" AFF TO 8'-6". PAINT PLYWOOD WITH 2 COATS OF WHITE PAINT. MASK FIRE TREATMENT LABELS ON PLYWOOD PRIOR TO PAINTING.
5. (2)4" PVC SCHEDULE 40 CONDUITS STUBBED UP 4" AFF AND ROUTED UNDERGROUND TO EXTISTING CHARTER PULLBOX. SEE SITE PLAN FOR ADDITIONAL CONDUIT DETAILS.
6. 4" SLEEVES THROUGH WALL FOR ROUTING OF HORIZONTAL CAT 6 CABLING. INSTALL QTY OF SLEEVES TO ACCOMMODATE ALL CABLING. DO NOT EXCEED 40% FILL. SLEEVES INSTALLED AT ABOVE CEILING HEIGHT.
7. 12" WIDE HORIZONTAL LADDER RACK AT 96" AFF. SECURE LADDER RACK TO WALL WITH MFG'S TRIANGULAR SUPPORT BRACKETS AT 4'-0" O.C. WHERE PLYWOOD DOES NOT EXIST, INSTALL SUPPORT BRACKET FASTENERS INTO METAL STUD FRAMING. SUPPORT LADDER RACK WITH THREADED ROD WHERE SPANS EXCEED 4'-0". BOND ALL SECTIONS OF LADDER RACK TOGETHER WITH BONDING JUMPERS AND BOND TO GROUND BAR W/#6 CONDUCTOR. INSTALL BUTT SPLICES BETWEEN ENDS OF HORIZONTAL LADDER RACK. USE MFG'S CORNER CLAMPS AT PERPENDICULAR INTERSECTION OF LADDER RACK. SEE B/T002 FOR ADDITIONAL DETAILS.
8. PROVIDE QTY (2) CABLE RUNWAY RADIUS DROPS ABOVE EACH VERTICAL CABLE MANAGER TO MAINTAIN CABLE BEND RADIUS. COORDINATE LAYOUT OF OVERHEAD LADDER RACK CROSS MEMBERS SO THAT RADIUS DROPS ARE LOCATED DIRECTLY ABOVE VERTICAL CABLE MANAGERS. WHERE CROSS MEMBERS CONFLICT WITH THE VERTICAL CABLE MANAGERS, CUT AND REMOVE CROSS MEMBERS AND REPLACE WITH REMOVABLE CROSS MEMBERS. WHERE RADIUS DROPS ARE CONNECTED TO REMOVABLE CROSS MEMBERS, INSTALL CUSTOM RADIUS DROPS.
9. 48-PORT CAT 6 PATCH PANEL.
10. 2RU CABLE MANAGER WITH HINGED COVER.
11. 1RU VIDEO SURVEILLANCE CAMERA NVR.
12. 2RU UPS WITH IP MANAGEMENT MODULE.
13. NOT USED.
14. INTRUSION DETECTION SYSTEM CONTROL PANEL.
15. DOOR ACCESS CONTROL SYSTEM PANEL.
16. 1RU FIBER TERMINATION CABINET (CORNING CCH-01U).
17. INSTALL 12-STRAND TIGHT BUFFERED RISER RATED SINGLEMODE FIBER OPTIC CABLE FROM MDF ROOM TO IDF ROOM (CORNING MIC RISER P/N 012E81-33131-24). TERMINATE FIBER AT BOTH ENDS IN 12-FIBER SINGLEMODE FUSION SPLICE CASSETTE WITH DUPLEX LC CONNECTORS (CORNING P/N CCH-CS12-A9-P00RE).
18. 4'-0" HIGH X 2'-0" WIDE X 2'-6" DEEP UL LISTED LOCKABLE WALL CABINET WITH FRONT AND REAR L-SHAPED MOUNTING BRACKETS. SECURE CABINET TO WALL WITH MINIMUM QTY (4) LAG BOLTS. INSTALL #6 GROUND WIRE FROM CABINET TO GROUND BAR. PROVIDE MANUFACTURER CABINET GROUNDING KIT TO ENABLE GROUND LUG ATTACHMENT TO RACK. PROVIDE QTY (50) EQUIPMENT MOUNTING SCREWS.
19. (1)2" PVC SCHEDULE 40 CONDUIT STUBBED UP 4" AFF AND ROUTED UNDERGROUND TO EXISTING AT&T PULLBOX. SEE SITE PLAN FOR ADDITIONAL CONDUIT DETAILS

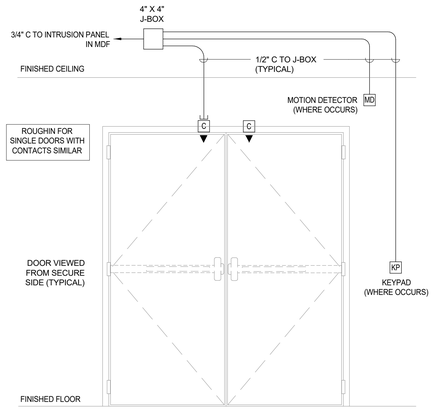
ENLARGED TELECOM ROOM PLANS

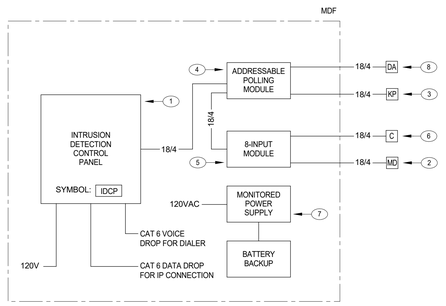
Date: MARCH 21, 2023

Sheet No:
T0.04



5 T0.05 DOUBLE DOOR WITH CONTACTS

SCALE: N.T.S.



4 T0.05 INTRUSION DETECTION SYSTEM ONELINE DIAGRAM

SCALE: NONE

INTRUSION DETECTION SYSTEM CONTRACTOR QUALIFICATIONS

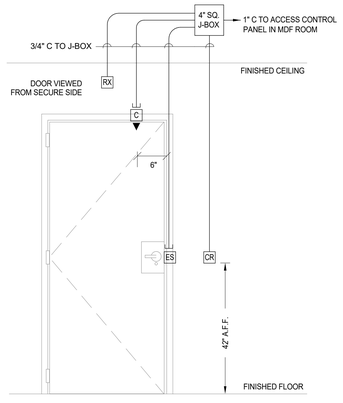
1. CONTRACTOR INSTALLING THE INTRUSION DETECTION SYSTEM SHALL BE A FIRM NORMALLY ENGAGED IN THE INSTALLATION, MAINTENANCE AND SUPPORT OF INTRUSION DETECTION AND/OR DOOR ACCESS CONTROL SYSTEMS. THE CONTRACTOR MUST HAVE A MINIMUM OF 5-YEARS EXPERIENCE INSTALLING SECURITY SYSTEMS OF SIMILAR SIZE AND SCOPE.
2. CONTRACTOR INSTALLING THE SYSTEM MUST BE A BOSCH AUTHORIZED INTRUSION ALARM SYSTEM INSTALLER.
3. THE CONTRACTOR SHALL HAVE SERVICE FACILITIES NEAR THE PROJECT SITE AND SHALL RESPOND TO SERVICE CALLS WITHIN A FOUR (4) HOUR PERIOD AFTER RECEIPT OF A SERVICE CALL. THIS INCLUDES WEEKENDS AND HOLIDAYS. AT THE TIME OF SERVICE, THE CONTRACTOR SHALL PROVIDE ALL EQUIPMENT, MATERIAL AND PERSONNEL NECESSARY TO PERFORM ALL REPAIRS.

INTRUSION DETECTION SYSTEM GENERAL NOTES

1. FURNISH AND INSTALL A COMPLETE AND OPERATIONAL INTRUSION DETECTION SYSTEM. FURNISH AND INSTALL ALL ANCILLARY DEVICES, EQUIPMENT AND CABLING FOR A COMPLETE SYSTEM. INSTALL ALL WORK IN ACCORDANCE WITH THE FOLLOWING CODES AND STANDARDS:
   A. ANSI/NFPA-70
   B. UL 1076 (BURGLAR ALARM AND SYSTEMS)
   C. AMERICAN WITH DISABILITIES ACT (ADA).
2. AT A MINIMUM, THE SYSTEM SHALL CONSIST OF THE FOLLOWING COMPONENTS:
   A. ADDRESSABLE MAGNETIC DOOR POSITION CONTACTS AT ALL EXTERIOR DOORS.
   B. ADDRESSABLE MOTION DETECTORS AT ALL PERIMETER ENTRY DOORS.
   C. KEYPADS FOR ARMING AND DISARMING THE SYSTEM AT ALL MAIN ENTRANCE DOORS.
   D. ZONED INTRUSION DETECTION PANEL WITH CAPACITY FOR ALL DEVICES SHOWN ON THE DRAWINGS PLUS 25% FUTURE EXPANSION. PROVIDE ZONE EXPANDERS, RELAY OUTPUTS, ETC. AS REQUIRED FOR A COMPLETE AND OPERABLE SYSTEM.
   E. AUTO DIALER.
   F. POWER SUPPLIES TO POWER THE PANEL AND ALL DEVICES.
   G. BATTERIES AND BATTERY CHARGERS. SUBMIT BATTERY CALCULATIONS FOR APPROVAL. BATTERIES SHALL BACKUP THE ENTIRE SYSTEM FOR A MINIMUM OF 4 HOURS.
3. ALL SECURITY DEVICES INCLUDING DOOR POSITION CONTACTS AND MOTION SENSORS SHALL BE ADDRESSABLE. WHEN A DEVICE IS IN ALARM THE SYSTEM SHALL IDENTIFY AND REPORT THE LOCATION OF THE DEVICE.
4. ALL INTRUSION DETECTION CABLING TO BE ROUTED IN CONDUIT FROM THE DEVICE TO THE PANEL LOCATED IN THE TELECOM ROOM. NO EXPOSED CABLING IS PERMITTED. PROVIDE RECESSED SINGLE GANG AND/OR DOUBLE GANG BACK BOXES AS REQUIRED AT EACH DEVICE. CABLING ROUTED IN UNDERGROUND CONDUIT SHALL BE RATED FOR OUTDOOR WET LOCATIONS.
5. NOT ALL DEVICES AND CABLING ARE SHOWN ON THE PLAN. SUBMIT SHOP DRAWINGS FOR APPROVAL INCLUDING POINT-TO-POINT WIRING AND PANEL BLOCK DIAGRAMS SHOWING ALL DEVICES AND REQUIRED CABLING.
6. SUBMIT CUT SHEETS FOR APPROVAL OF ALL SECURITY DEVICES, PANELS, ZONE EXPANDERS, RELAY BOARDS, AUTO DIALER, POWER SUPPLIES, BATTERIES, BATTERY CHARGERS AND CABLING.
7. AT THE COMPLETION OF THE PROJECT, TEST AND COMMISSION THE ENTIRE SYSTEM. PROGRAM THE SYSTEM IN ACCORDANCE WITH OWNER REQUIREMENTS.
8. COORDINATE DIAL-OUT AND CENTRAL STATION MONITORING WITH THE OWNER.
9. PROGRAM ZONES, SCHEDULES AND ACCESS CODES AS DIRECTED BY THE OWNER.
10. PROVIDE 1-HOUR TRAINING TO THE OWNER AT THE COMPLETION OF THE PROJECT. PROVIDE 2 SETS OF O&M MANUALS.
11. THE ENTIRE INTRUSION DETECTION SYSTEM SHALL BE GUARANTEED TO BE FREE FROM DEFECTS IN WORKMANSHIP AND MATERIALS FOR 1-YEAR FROM THE DATE OF FINAL ACCEPTANCE. CONTRACTOR WILL PROMPTLY REMEDY SUCH DEFECTS AND ANY SUBSEQUENT DAMAGE CAUSED BY THE DEFECTS OR REPAIR AT NO EXPENSE TO THE OWNER.

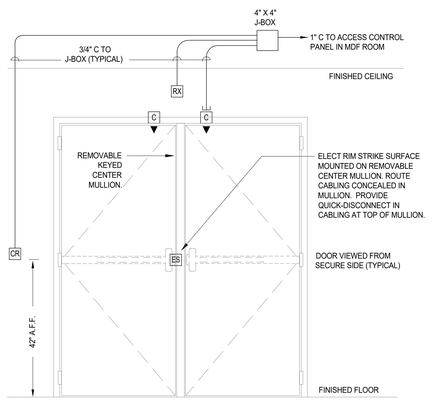
INTRUSION DETECTION SYSTEM SHEET NOTES

1. MAIN INTRUSION DETECTION PANEL (BOSCH P/N'S B9512G, B430, B8103, D101, D110, D1640, B520, D1218).
2. PIR MOTION DETECTOR WITH ANTI-MASK PROTECTION AND MOUNTING BRACKET (BOSCH P/N'S ISC-PPR1-WA16G, B328).
3. TOUCH SCREEN KEYPAD (BOSCH B942W).
4. ADDRESSABLE POLLING MODULE (BOSCH B299). WHERE FIELD DEVICES ARE DAISY CHAINED OFF OF POLLING MODULE, PROVIDE POPIT MODULES AS REQUIRED (BOSCH D9127U).
5. ADDRESSABLE 8-INPUT MODULE (BOSCH B208).
6. DOUBLE POLE, DOUBLE THROW DOOR CONTACTS PROVIDED ON DOORS WITH ACCESS CONTROL (GE 1076D OR EQUAL).
7. MONITORED POWER SUPPLY WITH BATTERY BACKUP (BOSCH P/N'S B520, D1218).
8. LATCHING DURESS ALARM PUSH BUTTON.



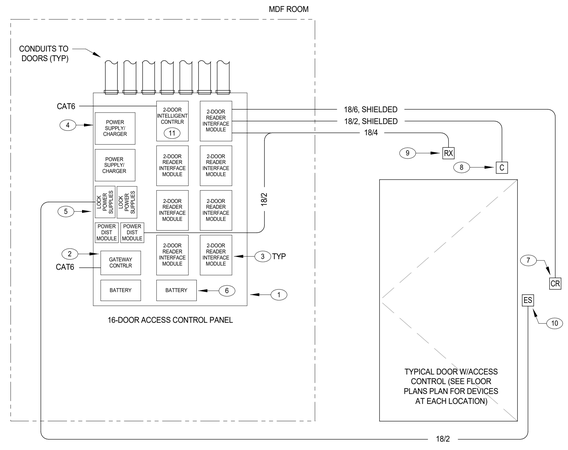
3 T0.05 CONDUIT ROUGHIN: SINGLE DOOR CARD READER IN W/ELECT STRIKE

SCALE: N.T.S.



2 T0.05 CONDUIT ROUGHIN: DOUBLE DOOR CARD READER IN W/ELECT RIM STRIKE

SCALE: N.T.S.



1 T0.05 ACCESS CONTROL SYSTEM ONELINE DIAGRAM

SCALE: NONE

ACCESS CONTROL SYSTEM GENERAL NOTES

1. THE CONTRACTOR MUST BE A GENETEC CERTIFIED PARTNER AND HAVE THE NECESSARY CERTIFICATIONS TO PURCHASE, INSTALL AND CONFIGURE THE SPECIFIED GENETEC EQUIPMENT AND SOFTWARE. THE SYSTEM PROGRAMMER SHALL HAVE ATTENDED MANUFACTURER TRAINING AND OBTAINED CERTIFICATION IN GENETEC™ SECURITY CENTER - SYNERGIS™ TECHNICAL CERTIFICATION.
2. SEE FLOOR PLANS FOR ACCESS CONTROL FIELD DEVICES AT EACH DOOR.
3. NOT ALL DEVICES AND CABLING ARE SHOWN IN THE SINGLE LINE DIAGRAM. SUBMIT SHOP DRAWINGS FOR APPROVAL INCLUDING POINT-TO-POINT WIRING AND PANEL BLOCK DIAGRAMS SHOWING ALL DEVICES AND REQUIRED CABLING.
4. SUBMIT SHOP DRAWINGS FOR APPROVAL SHOWING THE LAYOUT OF THE EQUIPMENT MOUNTED IN THE ACCESS CONTROL ENCLOSURE(S) INCLUDING GATEWAYS, INTELLIGENT CONTROLLERS, CARD READER BOARDS, I/O BOARDS, ADD-IN BOARDS, POWER SUPPLIES, BATTERY CHARGERS, FUSES, RELAYS, BATTERIES, NETWORK OUTLETS, ELECTRICAL OUTLETS, CABLE MANAGEMENT WIREWAYS, FANS, ETC.
5. SUBMIT MANUFACTURER PRODUCT DATA SHEETS FOR APPROVAL OF ALL ACCESS CONTROL EQUIPMENT INCLUDING BUT NOT LIMITED TO EQUIPMENT ENCLOSURES, CONTROLLERS, ADD-IN BOARDS, RELAYS, POWER SUPPLIES, BATTERIES, CABLING, REQUEST TO EXITS, DOOR CONTACTS, CARD READERS, ELECTRIC STRIKES, ELECTRIC LOCKS, LOCAL ALARMS, PUSH BUTTONS, WIRELESS RECEIVERS, ETC.
6. SUBMIT BATTERY CALCULATIONS FOR APPROVAL. BATTERIES SHALL BACKUP THE ENTIRE SYSTEM FOR A MINIMUM OF 4 HOURS.
7. ALL ACCESS CONTROL CABLING IS TO BE ROUTED IN CONDUIT FROM THE ACCESS CONTROL FIELD DEVICES AT EACH DOOR TO THE ACCESS CONTROL PANEL.
8. WHERE CABLING IS ROUTED IN UNDERGROUND CONDUIT, PROVIDE OUTDOOR RATED CABLE SUITABLE FOR WET UNDERGROUND DUCT INSTALLATION.

ACCESS CONTROL SYSTEM SHEET NOTES

1. 36" HIGH X 30" WIDE X 6 1/2" DEEP DOOR ACCESS CONTROL PANEL INCLUDING GATEWAY CONTROLLER, INTELLIGENT CONTROLLER, CARD READER INTERFACE MODULES, I/O MODULES, POWER SUPPLIES, BATTERY CHARGERS, POWER DISTRIBUTION MODULES, BATTERIES, ETC. MOUNT COMPONENTS IN LOCKABLE ENCLOSURE WITH TAMPER SWITCH AND FANFILTER KIT. LABEL OUTSIDE OF CABINET WITH ENGRAVED PLATE.
2. ACCESS CONTROL GATEWAY CONTROLLER WITH CAT 6 NETWORK DROP. CONTRACTOR TO CONFIGURE CONTROLLER TO COMMUNICATE WITH ACCESS CONTROL SERVER.
3. 2-DOOR CARD READER INTERFACE MODULES.
4. POWER SUPPLY / BATTERY CHARGER.
5. DISTRIBUTION AND LOCK POWER SUPPLIES.
6. 12V 12AH BATTERIES TO BACKUP DEVICES FOR MINIMUM OF 2 HOURS.
7. CONTACTLESS SMART CARD READER AT ACCESS CONTROL DOORS.
8. DOUBLE POLE DOUBLE THROW MAGNETIC DOOR POSITION CONTACTS.
9. REQUEST-TO-EXIT (REX) MOTION DETECTOR.
10. ELECTRIC STRIKE. SEE ARCHITECTURAL DOOR HARDWARE SCHEDULE.
11. 2-DOOR INTELLIGENT SYSTEM CONTROLLER WITH CAT 6 NETWORK DROP.

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. SEE ONELINE DIAGRAM(S) FOR CONDUIT, WIRE SIZES AND EQUIPMENT REQUIREMENTS.
3. IT IS THE CONTRACTOR'S RESPONSIBILITY TO COORDINATE WITH APPLICABLE UTILITY COMPANY'S DRAWINGS AND REPRESENTATIVES FOR DETERMINING THE EXACT RESPONSIBILITY OF EACH PARTY.
4. SEE UTILITY DRAWINGS FOR ALL UTILITY WORK WORK REQUIRED. CONTRACTOR SHALL BE RESPONSIBLE FOR INCLUDING ALL WORK REQUIRED IN BID. COORDINATE WITH EACH SITE UTILITY.
5. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CALL 1-800-227-2600 FOR LOCATES PRIOR TO DIGGING. IT IS ALSO THE CONTRACTORS RESPONSIBILITY TO LOCATE ALL NON-UTILITY UNDERGROUND ITEMS.
6. THE MAXIMUM NUMBER OF CONDUIT BENDS SHOULD NOT BE GREATER THAN 270 DEGREES BETWEEN PULLING STRUCTURES. THIS INCLUDES THE AGGREGATE OF ALL HORIZONTAL AND VERTICAL CHANGES.
7. ALL CONDUIT, INNERDUCT, PULLBOXES AND VAULTS SHALL BE LABELED PER THE SPECIFICATIONS.
8. PROVIDE #10 CU CONDUCTORS IN 3/4" CONDUIT MINIMUM, UNLESS NOTED OTHERWISE, FOR ALL SITE LIGHTING AND SITE RECEPTACLE CIRCUITS.
9. ALL RECEPTACLES WITH WEATHER PROOF DESIGNATION SHALL BE PROVIDED WITH 'WHILE IN USE' COVERS.
10. FURNISH AND INSTALL METALLIC TRACE TAPE ON TOP OF CONDUITS IN TRENCH.
11. EACH CONDUIT AND INNERDUCT SHALL BE PROVIDED WITH A 1250 LBS. PULL ROPE.
12. COORDINATE LOCATION OF BELOW-GRADE CONDUITS, DUCT BANKS, ETC. WITH CIVIL ENGINEER AND OTHER TRADES PRIOR TO ROUGH-IN.

(###) SHEET NOTES

T01 (2)4" PVC SCHEDULE 40 CONDUITS ROUTED UNDERGROUND FROM EXISTING CHARTER PULLBOX AND STUBBING UP 4" AFF IN MDF COMM ROOM. FURNISH ONE CONDUIT WITH A 4-3 CELL FABRIC INNERDUCT WITH PULL STRINGS. ONE CONDUIT LEFT EMPTY FOR SPARE WITH PULL STRING.

T02 (1)2" PVC SCHEDULE 40 CONDUIT ROUTED UNDERGROUND FROM EXISTING AT&T PULLBOX AND STUBBING UP 4" AFF IN MDF COMM ROOM. FURNISH CONDUIT WITH A 2-3 CELL FABRIC INNERDUCT WITH PULL STRINGS.

6. SEE 16 / S0.2 & GENERAL NOTES FOR ENGINEERING FILL REQUIREMENTS AND SUBGRADE PREPARATION REQUIREMENTS.
7. SEE ARCHITECTURAL AND/OR MECHANICAL/PLUMBING DRAWINGS FOR ANY FLOOR DRAINS OR SINKS. CONTRACTOR TO COORDINATE.
8. SEE 7 / S0.2 FOR TYPICAL SLAB ON GRADE JOINTS. JOINTS TO BE PLACED AT 10'-0" MAX. O.C. AND LOCATED AT ALL RE-ENTRANT SLAB CORNERS, INTERIOR COLUMN LOCATIONS, OR ANY OTHER SLAB ON GRADE DISCONTINUITIES. SEE 12 / S0.2 FOR SLAB ON GRADE DOWELED JOINT INTERSECTIONS.
9. SEE 6 / S0.2 FOR TYPICAL FOUNDATION REINFORCING LAPS AT CORNERS, ENDS, AND INTERSECTIONS.
10. SEE 10 / S0.2 & 11 / S0.2 FOR TYPICAL REINFORCING HOOKS, BENDS AND HOOKS & BENDS FOR TIES.
11. PLACE 15 MIL VAPOR BARRIER BENEATH CONCRETE SLAB (OVER AGGREGATE BASE) AT LOCATIONS WITH TILE FLOORING (OR OTHER FLOORING SENSITIVE TO MOISTURE). SEAL ALL SEAMS AND SEAL AROUND ALL PENETRATIONS PER VAPOR BARRIER MANUFACTURER RECOMMENDATIONS.
12. SEE 5 / S0.3 FOR TYPICAL CMU CONTROL JOINT. SEE / — FOR TYPICAL CLAY BRICK EXPANSION JOINTS.
13. CONTRACTOR TO VERIFY AND COORDINATE ALL DIMENSIONS AND CONDITIONS WITH ARCH. PRIOR TO FABRICATION OR ERECTION.
14. SEE SHEETS S0.9 & S0.10 FOR TYPICAL INTERIOR WALL DETAILS.

EARLY LEARNING CONTINUOUS FOOTINGS SCHEDULE

NOTE: FOR INTERIOR COLUMN FOUNDATION SECTION, SEE 4 / S0.2 .

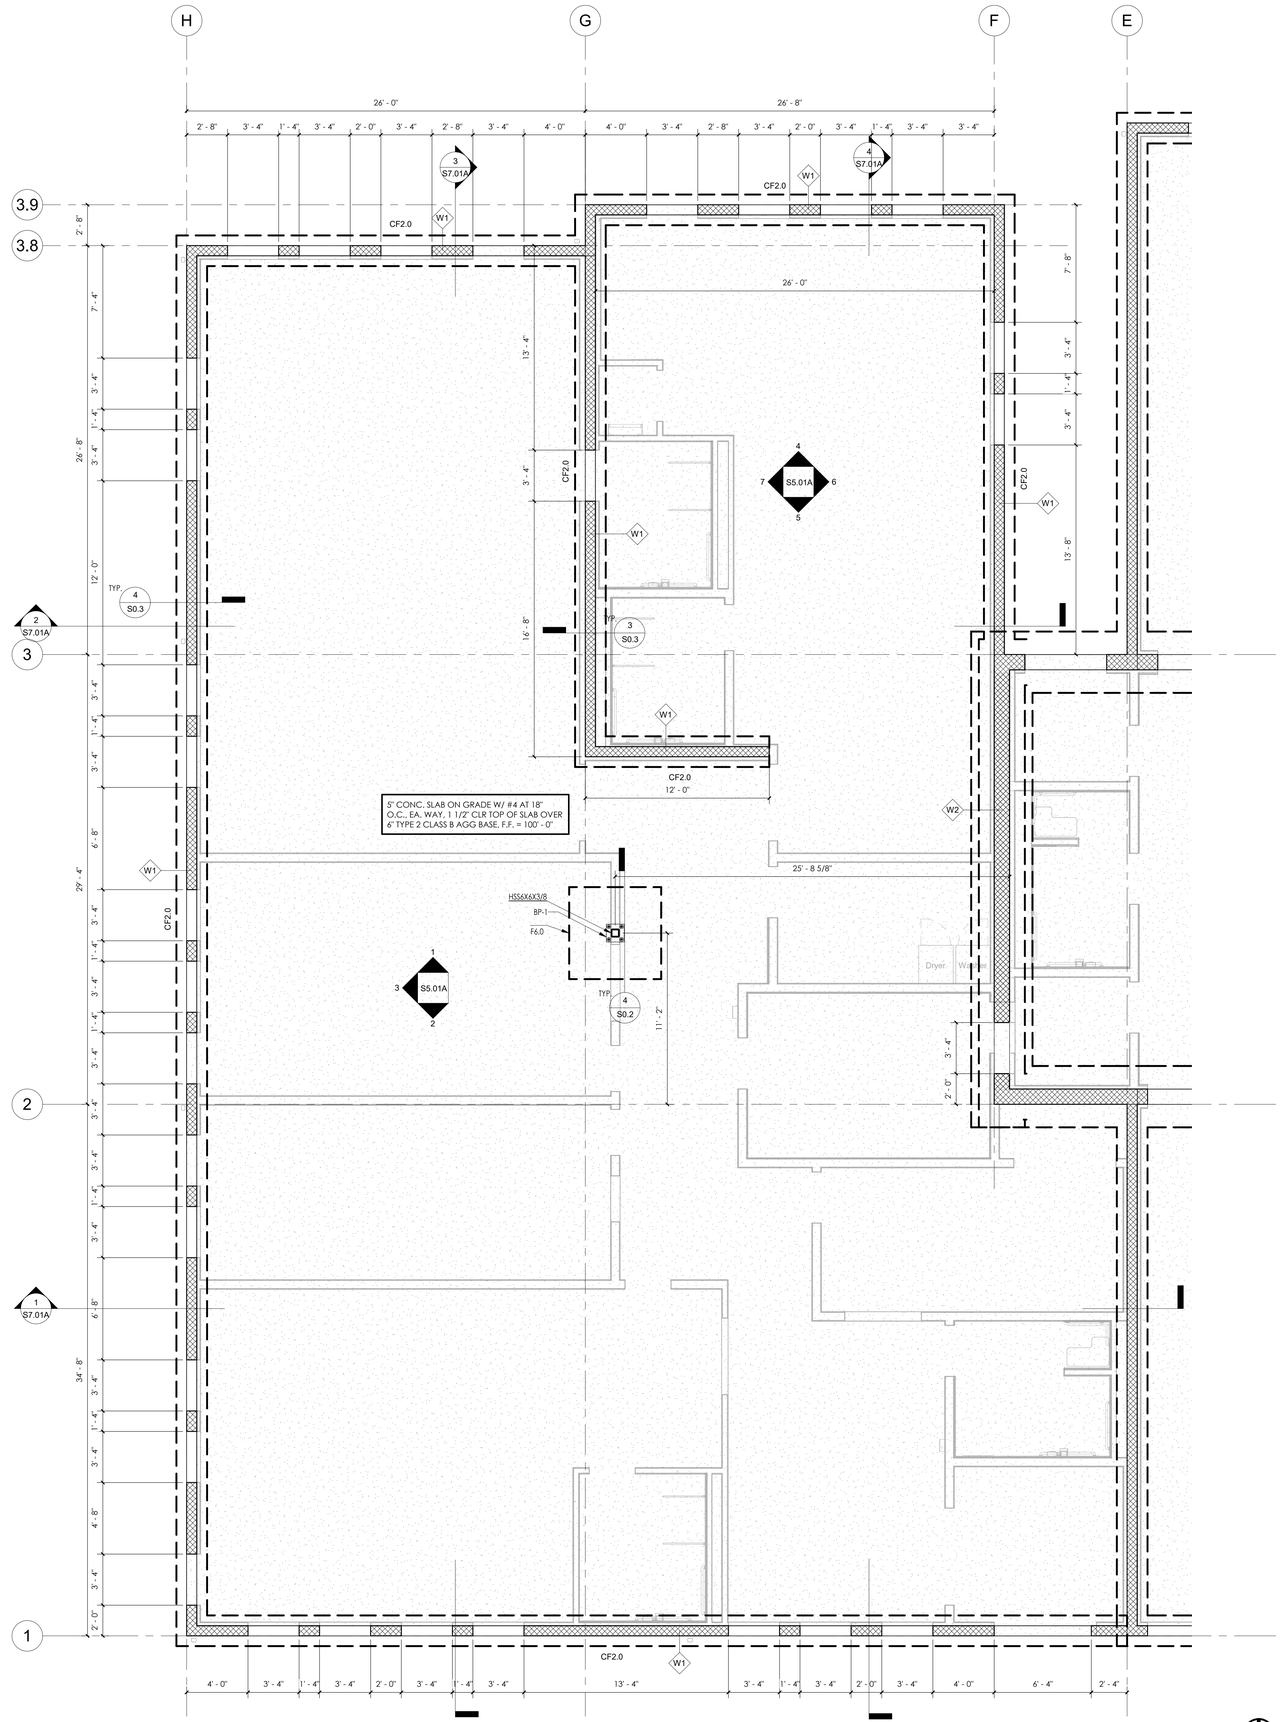
EARLY LEARNING - BASEPLATES

EARLY LEARNING CMU WALL SCHEDULE

MARK	TYPE	WIDTH	REINFORCEMENT		FOOTING DOWELS	REMARKS
			VERT.	HORIZ.		
W1	CMU	8"	#5 AT 24" O.C., CENTERED	#4 AT 32" O.C.	TO MATCH VERTS.	(2) #5 (HORIZ) CONT. BARS AT T.O. WALL AND/OR ROOF & FLOOR LINE. SEE DETAILS

NOTES:

1. **SEE WALL ELEVATIONS FOR ADDITIONAL REINFORCING WHERE REQUIRED.**
2. ALL CMU WALLS TO BE FULLY GROUTED.
3. MASONRY SHALL BE CONSTRUCTED OF HOLLOW OPEN END UNITS WHEREVER POSSIBLE AND SHALL BE LAID IN A RUNNING BOND PATTERN.
4. FOLLOW DETAIL 9 / S0.3 FOR MIN. CMU CORNER AND 12B / S0.3 FOR JAMB REINFORCEMENT.
5. JAMB STEEL BARS IN SHORT SHEAR PIERS ARE NOT ADDITIVE TO WALL SCHEDULE STEEL. PLACE THE MORE RESTRICTIVE REINFORCING.
6. PROVIDE HORIZONTAL CORNER BARS AT ALL CORNERS AND INTERSECTING WALLS PER 9 / S0.3 .
7. PROVIDE (2) #5 CONT. HORIZONTAL CHORD STEEL AT ALL ROOF AND FLOOR LINE LEVELS PER DETAILS, U.N.O.
8. PROVIDE CONT. HORIZ. #5 BAR OR BARS AT JOIST WALL ANCHORS PER DETAILS (WHERE OCCURS).
9. ALL HORIZONTAL BARS SHALL BE ANCHORED AROUND END VERTICAL REINFORCING BARS AT JAMBS WITH A STANDARD HOOK.
10. PROVIDE CMU REINFORCEMENT LAP SPLICES PER GENERAL NOTES.
11. BARS E.F. SHALL BE PLACED 1/2" CLEAR OF THE INSIDE FACE OF THE CMU SHELL. INCLUDING AT JAMBS.
12. BARS CENTERED SHALL BE CENTERED IN THE CMU WALL, HORIZ. STEEL TO BE PLACED ALONG SIDE.



1 **FOUNDATION PLAN - EARLY LEARNING**
1/4" = 1'-0"

GENERAL NOTES

1. SEE WALL ELEVATIONS FOR MORE RESTRICTIVE WALL REINFORCEMENT. VERTICAL WALL REINFORCING SHALL BE EMBEDDED IN FOUNDATIONS TO MATCH VERTICAL AND TYPICAL REINFORCING IN ELEVATIONS.
2. CONTRACTOR SHALL PROVIDE CONSTRUCTION JOINTS (C.J.) AND CONTROL JOINTS (ALTERNATE S.J. AND D.J.) FOR ALL SLABS ON GRADE IN ACCORDANCE WITH DETAILS 1 / S0.3 & 7 / S0.2, RESPECTIVELY. A DRAWING SHOWING THE PROPOSED LAYOUT OF ALL SLAB JOINTS SHALL BE SUBMITTED TO THE ARCHITECT FOR REVIEW AND APPROVAL.

Sheet Title
ENLARGED FOUNDATION PLAN - ALT. A

Date: JANUARY 19, 2023
Sheet No:
S1.11A

ROOF FRAMING PLAN NOTES:

1. B.O. DECK= TOP OF FRAMING (BOTTOM OF DECK) ELEVATION ABOVE THE FINISHED FIRST FLOOR.
2. SEE FOR STEEL JOIST AND JOIST GIRDER DESIGN CRITERIA.
3. SEE 3 / S0.6 & 4 / S0.6 FOR ROOF HUNG PIPING SUPPORTS.
4. FIRE SPRINKLER CONTRACTOR SHALL LAY OUT FIRE SPRINKLER LINES SO THAT NO LINE PASSES UNDER SKYLIGHT/SMOKEVENTS OR FUTURE MECHANICAL UNITS (WHERE THESE ITEMS OCCUR).
5. FOR ROOF HATCH WITH LADDER ACCESS, SEE ARCHITECTURAL.
6. STEEL JOIST AND JOIST GIRDER SUPPLIER SHALL SUBMIT STRUCTURAL CALCULATIONS, SHOP, AND ERECTION DRAWINGS SEALED AND SIGNED BY A NEVADA REGISTERED CIVIL OR STRUCTURAL ENGINEER TO THE ENGINEER OF RECORD WHO AGREES TO REVIEW THESE DOCUMENTS FOR ACCEPTANCE PRIOR TO FABRICATION. STRUCTURAL CALCULATIONS, SHOP AND ERECTION DRAWINGS SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT FOR ACCEPTANCE AFTER THE ENGINEER OF RECORD HAS NOTED HIS/HER ACCEPTANCE.
7. JOIST AND JOIST GIRDER DRAWINGS SHALL SHOW COMPLIANCE WITH THE STANDARD SPECIFICATIONS FOR STEEL JOISTS, K-SERIES, LH-SERIES, DLH-SERIES AND JOIST GIRDERS, 44TH EDITION, PUBLISHED BY THE STEEL JOIST INSTITUTE.
8. JOIST AND JOIST GIRDERS SHALL BE IDENTIFIED AS TO TYPE, SIZE, AND MANUFACTURER BY TAGGING OR OTHER SUITABLE MEANS AT THE TIME OF MANUFACTURE OR FABRICATION. SUCH IDENTIFICATION SHALL BE MAINTAINED CONTINUOUSLY TO THE POINT OF THEIR INSTALLATION IN A STRUCTURE.

EARLY LEARNING METAL DECK SCHEDULE

MARK	DECK TYPE (SEE NOTE 1)	DECK SIZE	DECK ATTACHMENT ZONE	DIAPHRAGM CONNECTIONS (SEE NOTES 2, 3 AND 6)		
				LOW FLUTES		SIDE SEAMS
				PERPENDICULAR TO SUPPORT	PARALLEL TO SUPPORT	
PLB-I	PLB-36	1 1/2" x 18 GA	1	FASTENERS AT 36/4 PATTERN	FASTENERS AT 12" O.C. MAX	VSC2 AT 24" O.C. MAX

NOTES:

1. METAL DECK SHALL BE AS SPECIFIED BY ASC, VERCO, VULCRAFT, EPIC OR APPROVED EQUAL.
2. CONNECTIONS SHALL BE PLACED IN ACCORDANCE WITH THE DECK MANUFACTURERS STANDARD PATTERN AND REQUIREMENTS.
3. PW = 3/4" PUDDLE WELD, VSC2 = VERCO PUNCHLOK II SIDELAP CONNECTION.
4. DECK SHALL BE PLACED IN EITHER A 2-SPAN OR 3-SPAN CONDITION. SINGLE DECK SPANS WILL NOT BE ALLOWED UNLESS SPECIFICALLY NOTED.
5. REFER TO DECK ATTACHMENT DIAGRAM FOR DECK ATTACHMENT ZONE.
6. FASTENERS SHALL BE #12 SCREWS FOR SUPPORT STEEL THICKNESS LESS THAN 1/8". FASTENERS SHALL BE HILTI HSN-24 FOR SUPPORT STEEL THICKNESS 1/8" TO 3/8". FASTENERS SHALL BE HILTI X-ENP-19 FOR SUPPORT STEEL THICKNESS GREATER THAN 1/4", FOR SUPPORT STEEL THICKNESS BETWEEN 1/4" AND 3/8" (INCLUSIVE), HILTI HSN-24 OR X-ENP-19 FASTENERS MAY BE USED AT CONTRACTOR'S OPTION.

ROOF FRAMING PLAN - ALT. A

Date: JANUARY 19, 2023
Sheet No:
S4.01A

ALT. A TYP. JOIST DESIGN CRITERIA

1. JOISTS AND JOIST GIRDERS SHALL BE DESIGNED BY THE JOIST MANUFACTURER IN ACCORDANCE WITH THE STEEL JOIST INSTITUTE (SJI) AND THE 2018 IBC. THE JOIST DESIGNATIONS INDICATED IN THE CONSTRUCTION DOCUMENTS SHALL BE CONSIDERED MINIMUMS. FINAL DESIGN AND DESIGNATION SHALL BE BY THE JOIST MANUFACTURER, BASED ON THE LOADING CRITERIA PRESENTED IN THE CONSTRUCTION DOCUMENTS, AND BE OF THE DEPTHS SHOWN ON THE DRAWINGS.
2. IN ADDITION TO THE LOADS INDICATED, JOISTS AND JOIST GIRDERS SHALL BE DESIGNED FOR ALL SPECIAL LOADS INDICATED ON THE PLANS AND DETAILS, INCLUDING THE MECHANICAL LOADS IDENTIFIED ON THE PLANS.
3. DEFLECTIONS OF ALL MEMBERS SHALL BE LIMITED TO L/360 FOR LIVE LOADS AND L/240 FOR TOTAL LOADS, U.N.O.
4. PROVIDE SJI STANDARD CAMBER U.N.O.
5. PROVIDE ALL REQUIRED BRIDGING FOR THE SPANS AND LOADING SHOWN WHETHER INDICATED ON PLANS OR NOT. WHERE INDICATED ON PLANS, LINES OF BRIDGING ARE APPROXIMATE AND SHALL BE ADJUSTED AS NECESSARY BY THE JOIST MANUFACTURER FOR THEIR FINAL DESIGN. THE CONTRACTOR AND JOIST MANUFACTURER SHALL COORDINATE THE LOCATIONS OF BRIDGING WITH MECHANICAL DUCTS, PIPING, OR OTHER ITEMS TO AVOID CONFLICTS. USE X-BRIDGING OR DIAGONAL BRACING AS REQUIRED AT LOCATIONS WHERE LINES OF BRIDGING MUST BE INTERRUPTED BECAUSE OF MECHANICAL DUCTWORK OR OTHER OBSTRUCTIONS. SEE TYPICAL BRIDGING DETAILS.
6. ALL JOISTS SHALL HAVE SEAT DEPTHS (SLOPING WHERE REQUIRED) AND TOP CHORD EXTENSIONS AS INDICATED IN PLANS AND DETAILS.
7. REINFORCE JOISTS PER TYPICAL DETAILS WHERE CONCENTRATED LOADS ARE APPLIED TO JOIST CHORDS FURTHER THAN 6" AWAY FROM PANEL POINTS.
8. JOISTS SHALL BE DESIGNED WITH CLEARANCES AS REQUIRED WHERE DUCTWORK PASSES THROUGH WEB SPACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL LAYOUT OF THESE DUCTS AND FOR COMMUNICATING THESE REQUIREMENTS TO THE JOIST MANUFACTURER.
9. ALL "LH" AND "K" SERIES JOISTS SHALL BE PROVIDED WITH EITHER 6" OR 3 1/2" HIGH BEARING SEAT AS SHOWN ON THE STRUCTURAL DETAILS.
10. JOISTS SHALL BE DESIGNED FOR THE FOLLOWING LOADS:

LOAD CASE	LOAD
DEAD LOAD	20 PSF AT 1 1/2" DECK
ROOF LIVE LOAD	20 PSF
ROOF SNOW LOAD	9 PSF
WIND UPLIFT (ALLOWABLE)	SEE UPLIFT DIAGRAM
TOP CHORD AND JOIST SEAT AXIAL LOAD (0.6W OR 0.7E WALL ANCHORAGE)	SEE JOIST BEARING SEAT SCHEDULE
JOIST ADD LIVE LOAD ANYWHERE ALONG TOP OR BOTTOM CHORDS (ALL JOISTS AT OR BETWEEN PANEL POINTS)	500 LBS, U.N.O.

PLUMBING PARTIAL ROOF PLAN - ALT. A

Date: MARCH 21, 2023

Sheet No:

P4.01A

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. LIGHTING FIXTURES DESIGNATED AS 'EMERGENCY' SHALL BE WIRED TO OPERATE WITH LOCAL SWITCHING UNDER NORMAL POWER CONDITIONS AND SHALL OPERATE VIA EMERGENCY BATTERY PACK OR INVERTER UPON LOSS OF BUILDING UTILITY POWER ONLT, UNLESS NOTED OTHERWISE.
3. EXIT SIGNS SHALL BE WIRED AHEAD OF LOCAL SWITCHING AND LIGHTING CONTROL PANEL FOR CONTINUOUS OPERATION. EXIT SIGNS SHALL BE WALL-MOUNTED ABOVE DOORS WHERE PRACTICAL. PROVIDE ADDITIONAL EXIT SIGNS AS NECESSARY FOR APPROVAL BY THE AUTHORITY HAVING JURISDICTION, PER ARCHITECT'S FINAL PATH OF EGRESS / EXITING PLAN.
4. ELECTRICAL CONDUITS SHALL BE RUN CONCEALED WHERE BUILDING CONSTRUCTION ALLOWS. ANY EXPOSED CONDUIT SHALL BE APPROVED BY THE ARCHITECT PRIOR TO INSTALLATION. ANY EXPOSED CONDUIT, FITTING, SUPPORTS, ETC SHALL BE PAINTED TO MATCH THE SURFACE ON WHICH THEY ARE INSTALLED.
5. REFER TO ARCHITECTURAL REFLECTED CEILING PLANS, SECTIONS, ELEVATIONS, ETC. FOR EXACT LOCATION OF LIGHTING FIXTURES.
6. EXACT LOCATION AND MOUNTING HEIGHT OF EXTERIOR BUILDING-MOUNTED FIXTURES SHALL BE COORDINATED WITH ARCHITECT PRIOR TO ROUGH-IN.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING FINAL FIXTURE LOCATIONS, ABOVE-CEILING HOUSING CLEARANCES, ETC. WITH MECHANICAL, PLUMBING, SPRINKLER CONTRACTOR AND OTHER TRADES PRIOR TO ROUGH-IN.
8. PROVIDE MULTIPLE-GANG FACEPLATES AS NECESSARY WHERE TWO OR MORE LIGHT SWITCHES ARE INDICATED IN A COMMON LOCATION. SINGLE-GANG FACEPLATES FOR A GROUP OF LIGHT SWITCHES ARE NOT PERMITTED.
9. PROVIDE STAINLESS STEEL DEVICE PLATES IN KITCHEN AND ROUGH-SERVICE AREAS.
10. CONDUIT FOR BUILDING-MOUNTED LIGHT FIXTURES SHALL BE ROUTED THROUGH INTERIOR OF BUILDING. LIGHT FIXTURE BACKBOXES SHALL BE RECESSED.

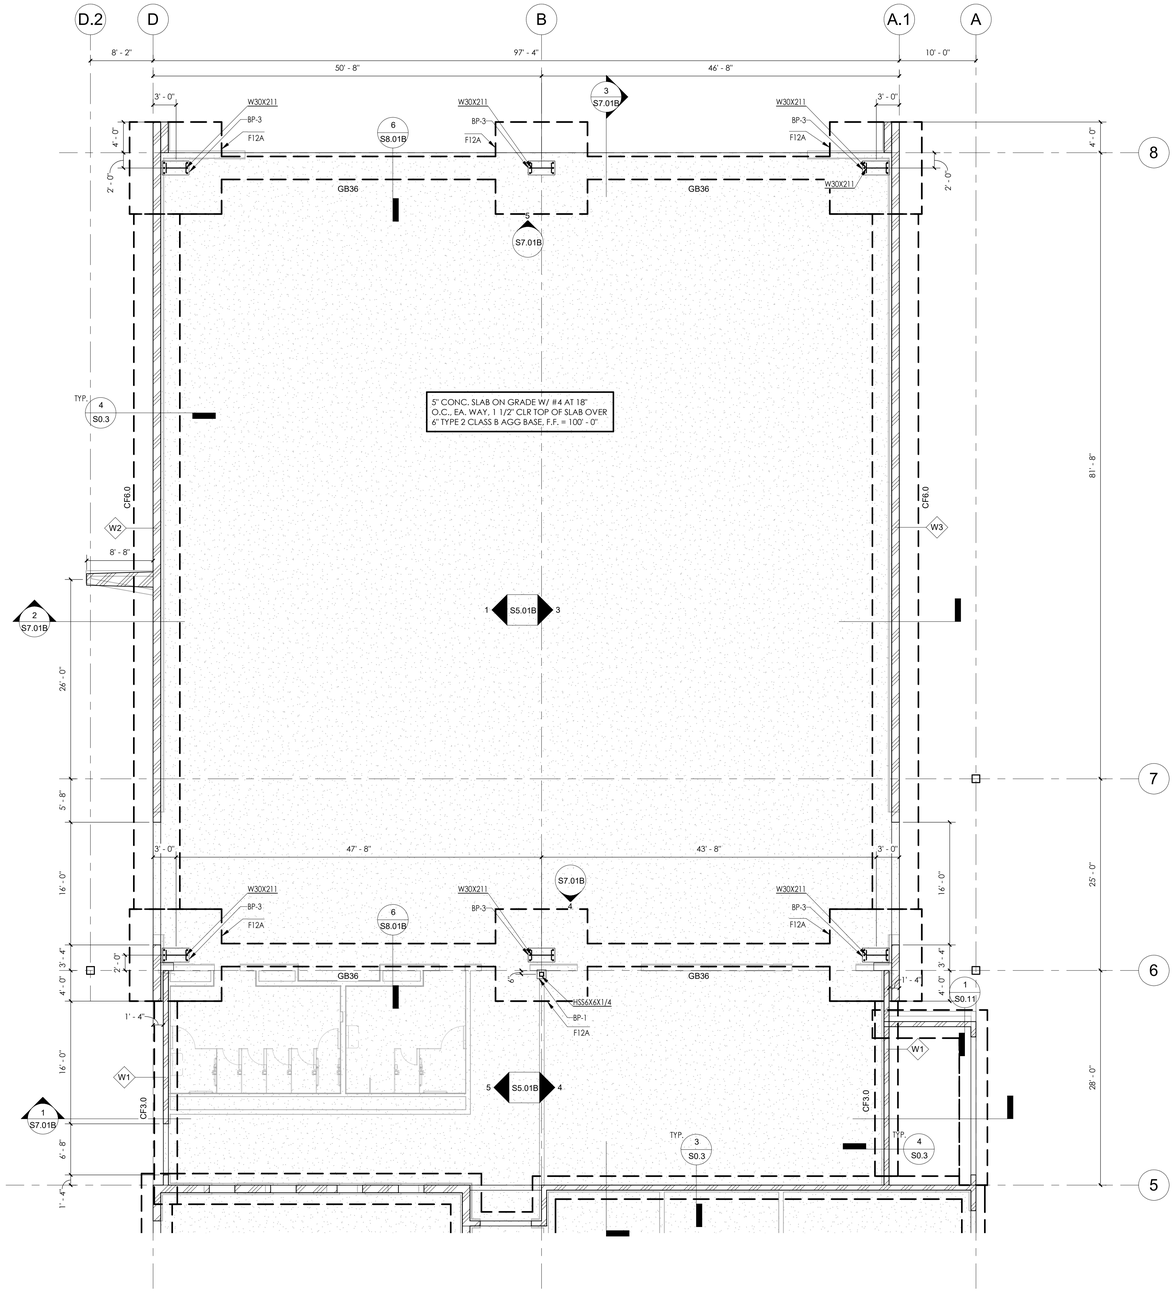
W3	CMU	12"	#6 AT 16" O.C., AT EA. FACE	#5 AT 24" O.C.	TO MATCH VERTS.	(2) #5 (HORIZ) CONT. BARS AT T.O. WALL AND/OR ROOF & FLOOR LINE, SEE DETAILS

NOTES:

1. **SEE WALL ELEVATIONS FOR ADDITIONAL REINFORCING WHERE REQUIRED.**
2. ALL CMU WALLS TO BE FULLY GROUTED.
3. MASONRY SHALL BE CONSTRUCTED OF HOLLOW OPEN END UNITS WHEREVER POSSIBLE AND SHALL BE LAID IN A RUNNING BOND PATTERN.
4. FOLLOW DETAIL 9 / S0.3 FOR MIN. CMU CORNER AND 12B / S0.3 FOR JAMB REINFORCEMENT.
5. JAMB STEEL BARS IN SHORT SHEAR PIERS ARE NOT ADDITIVE TO WALL SCHEDULE STEEL. PLACE THE MORE RESTRICTIVE REINFORCING.
6. PROVIDE HORIZONTAL CORNER BARS AT ALL CORNERS AND INTERSECTING WALLS PER 9 / S0.3 .
7. PROVIDE (2) #5 CONT. HORIZONTAL CHORD STEEL AT ALL ROOF AND FLOOR LINE LEVELS PER DETAILS, U.N.O.
8. PROVIDE CONT. HORIZ. #5 BAR OR BARS AT JOIST WALL ANCHORS PER DETAILS (WHERE OCCURS).
9. ALL HORIZONTAL BARS SHALL BE ANCHORED AROUND END VERTICAL REINFORCING BARS AT JAMBS WITH A STANDARD HOOK.
10. PROVIDE CMU REINFORCEMENT LAP SPLICES PER GENERAL NOTES.
11. BARS E.F. SHALL BE PLACED 1/2" CLEAR OF THE INSIDE FACE OF THE CMU SHELL, INCLUDING AT JAMBS.
12. BARS CENTERED SHALL BE CENTERED IN THE CMU WALL, HORIZ. STEEL TO BE PLACED ALONG SIDE.



N

1 FOUNDATION PLAN - GYMNASIUM

1/8" = 1'-0"

GENERAL NOTES

1. SEE WALL ELEVATIONS FOR MORE RESTRICTIVE WALL REINFORCEMENT. VERTICAL WALL REINFORCING SHALL BE EMBEDDED IN FOUNDATIONS TO MATCH VERTICAL AND TYPICAL REINFORCING IN ELEVATIONS.
2. CONTRACTOR SHALL PROVIDE CONSTRUCTION JOINTS (C.J.) AND CONTROL JOINTS (ALTERNATE S.J. AND D.J.) FOR ALL SLABS ON GRADE IN ACCORDANCE WITH DETAILS 1 / S0.3 & 7 / S0.2, RESPECTIVELY. A DRAWING SHOWING THE PROPOSED LAYOUT OF ALL SLAB JOINTS SHALL BE SUBMITTED TO THE ARCHITECT FOR REVIEW AND APPROVAL.

REVISIONS		
REV	DATE	DESCRIPTION

Sheet Title
ENLARGED FOUNDATION PLAN - ALT. B

Date: JANUARY 19, 2023
Sheet No:
S1.11B

ROOF FRAMING PLAN NOTES:

1. B.O. DECK= TOP OF FRAMING (BOTTOM OF DECK) ELEVATION ABOVE THE FINISHED FIRST FLOOR.
2. T.O.S.= TOP OF WIDE FLANGE GIRDER ELEVATION ABOVE THE FINISHED FIRST FLOOR.
3. SEE FOR STEEL JOIST AND JOIST GIRDER DESIGN CRITERIA.
4. SEE 3 / S0.6 & 4 / S0.6 FOR ROOF HUNG PIPING SUPPORTS.
5. FIRE SPRINKLER CONTRACTOR SHALL LAY OUT FIRE SPRINKLER LINES SO THAT NO LINE PASSES UNDER SKYLIGHT/SMOKEVENTS OR FUTURE MECHANICAL UNITS (WHERE THESE ITEMS OCCUR).
6. STEEL JOIST AND JOIST GIRDER SUPPLIER SHALL SUBMIT STRUCTURAL CALCULATIONS, SHOP, AND ERECTION DRAWINGS SEALED AND SIGNED BY A NEVADA REGISTERED CIVIL OR STRUCTURAL ENGINEER TO THE ENGINEER OF RECORD WHO AGREES TO REVIEW THESE DOCUMENTS FOR ACCEPTANCE PRIOR TO FABRICATION. STRUCTURAL CALCULATIONS, SHOP AND ERECTION DRAWINGS SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT FOR ACCEPTANCE AFTER THE ENGINEER OF RECORD HAS NOTED HIS/HER ACCEPTANCE.
7. JOIST AND JOIST GIRDER DRAWINGS SHALL SHOW COMPLIANCE WITH THE STANDARD SPECIFICATIONS FOR STEEL JOISTS, K-SERIES, LH-SERIES, DLH-SERIES AND JOIST GIRDERS, 44TH EDITION, PUBLISHED BY THE STEEL JOIST INSTITUTE.
8. JOIST AND JOIST GIRDERS SHALL BE IDENTIFIED AS TO TYPE, SIZE, AND MANUFACTURER BY TAGGING OR OTHER SUITABLE MEANS AT THE TIME OF MANUFACTURE OR FABRICATION. SUCH IDENTIFICATION SHALL BE MAINTAINED CONTINUOUSLY TO THE POINT OF THEIR INSTALLATION IN A STRUCTURE.
9. SEE SHEETS S0.9 & S0.10 FOR TYPICAL INTERIOR WALL DETAILS.

GYMNASIUM METAL DECK SCHEDULE

MARK	DECK TYPE (SEE NOTE 1)	DECK SIZE	DECK ATTACHMENT ZONE	DIAPHRAGM CONNECTIONS (SEE NOTES 2, 3 AND 6)		
				LOW FLUTES		SIDE SEAMS
				PERPENDICULAR TO SUPPORT	PARALLEL TO SUPPORT	
ER3.5A	EPICORE ER3.5A	3 1/2" x 18 GA	III	PW AT 24/6 PATTERN	PW AT 12" O.C. MAX	#12 SCREWS AT 12" O.C. MAX
PLB-I	PLB-36	1 1/2" x 18 GA	I	FASTENERS AT 36/4 PATTERN	FASTENERS AT 12" O.C. MAX	VSC2 AT 24" O.C. MAX

NOTES:

1. METAL DECK SHALL BE AS SPECIFIED BY ASC, VERCO, VULCRAFT, EPIC OR APPROVED EQUAL.
2. CONNECTIONS SHALL BE PLACED IN ACCORDANCE WITH THE DECK MANUFACTURERS STANDARD PATTERN AND REQUIREMENTS.
3. PW = 3/4" PUDDLE WELD, VSC2 = VERCO PUNCHLOK II SIDELAP CONNECTION.
4. DECK SHALL BE PLACED IN EITHER A 2-SPAN OR 3-SPAN CONDITION. SINGLE DECK SPANS WILL NOT BE ALLOWED UNLESS SPECIFICALLY NOTED.
5. REFER TO DECK ATTACHMENT DIAGRAM FOR DECK ATTACHMENT ZONE.
6. FASTENERS SHALL BE #12 SCREWS FOR SUPPORT STEEL THICKNESS LESS THAN 1/8". FASTENERS SHALL BE HILTI HSN-24 FOR SUPPORT STEEL THICKNESS 1/8" TO 3/8". FASTENERS SHALL BE HILTI X-ENP-19 FOR SUPPORT STEEL THICKNESS GREATER THAN 1/4". FOR SUPPORT STEEL THICKNESS BETWEEN 1/4" AND 3/8" (INCLUSIVE), HILTI HSN-24 OR X-ENP-19 FASTENERS MAY BE USED AT CONTRACTOR'S OPTION.

50% CONSTRUCTION DOCUMENTS

REVISIONS		
REV	DATE	DESCRIPTION

Sheet Title
ROOF FRAMING PLAN - ALT. B

Date: JANUARY 19, 2023
Sheet No:
S4.01B

ALT. B TYP. JOIST DESIGN CRITERIA

1. JOISTS AND JOIST GIRDERS SHALL BE DESIGNED BY THE JOIST MANUFACTURER IN ACCORDANCE WITH THE STEEL JOIST INSTITUTE (SJI) AND THE 2018 IBC. THE JOIST DESIGNATIONS INDICATED IN THE CONSTRUCTION DOCUMENTS SHALL BE CONSIDERED MINIMUMS. FINAL DESIGN AND DESIGNATION SHALL BE BY THE JOIST MANUFACTURER, BASED ON THE LOADING CRITERIA PRESENTED IN THE CONSTRUCTION DOCUMENTS, AND BE OF THE DEPTHS SHOWN ON THE DRAWINGS.
2. IN ADDITION TO THE LOADS INDICATED, JOISTS AND JOIST GIRDERS SHALL BE DESIGNED FOR ALL SPECIAL LOADS INDICATED ON THE PLANS AND DETAILS, INCLUDING THE MECHANICAL LOADS IDENTIFIED ON THE PLANS.
3. DEFLECTIONS OF ALL MEMBERS SHALL BE LIMITED TO L/360 FOR LIVE LOADS AND L/240 FOR TOTAL LOADS, U.N.O.
4. PROVIDE SJI STANDARD CAMBER U.N.O.
5. PROVIDE ALL REQUIRED BRIDGING FOR THE SPANS AND LOADING SHOWN WHETHER INDICATED ON PLANS OR NOT. WHERE INDICATED ON PLANS, LINES OF BRIDGING ARE APPROXIMATE AND SHALL BE ADJUSTED AS NECESSARY BY THE JOIST MANUFACTURER FOR THEIR FINAL DESIGN. THE CONTRACTOR AND JOIST MANUFACTURER SHALL COORDINATE THE LOCATIONS OF BRIDGING WITH MECHANICAL DUCTS, PIPING, OR OTHER ITEMS TO AVOID CONFLICTS. USE X-BRIDGING OR DIAGONAL BRACING AS REQUIRED AT LOCATIONS WHERE LINES OF BRIDGING MUST BE INTERRUPTED BECAUSE OF MECHANICAL DUCTWORK OR OTHER OBSTRUCTIONS. SEE TYPICAL BRIDGING DETAILS.
6. ALL JOISTS SHALL HAVE SEAT DEPTHS (SLOPING WHERE REQUIRED) AND TOP CHORD EXTENSIONS AS INDICATED IN PLANS AND DETAILS.
7. REINFORCE JOISTS PER TYPICAL DETAILS WHERE CONCENTRATED LOADS ARE APPLIED TO JOIST CHORDS FURTHER THAN 6" AWAY FROM PANEL POINTS.
8. JOISTS SHALL BE DESIGNED WITH CLEARANCES AS REQUIRED WHERE DUCTWORK PASSES THROUGH WEB SPACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL LAYOUT OF THESE DUCTS AND FOR COMMUNICATING THESE REQUIREMENTS TO THE JOIST MANUFACTURER.
9. ALL "LH" AND "X" SERIES JOISTS SHALL BE PROVIDED WITH EITHER 6" OR 3 1/2" HIGH BEARING SEAT AS SHOWN ON THE STRUCTURAL DETAILS.
10. JOISTS SHALL BE DESIGNED FOR THE FOLLOWING LOADS:

LOAD CASE	LOAD
DEAD LOAD	20 PSF AT 1 1/2" DECK 22 PSF AT 3 1/2" DECK
ROOF LIVE LOAD	20 PSF
ROOF SNOW LOAD	9 PSF
WIND UPLIFT (ALLOWABLE)	SEE UPLIFT DIAGRAM
TOP CHORD AND JOIST SEAT AXIAL LOAD (0.6W OR 0.7E WALL ANCHORAGE)	SEE JOIST BEARING SEAT SCHEDULE
JOIST ADD LIVE LOAD ANYWHERE ALONG TOP OR BOTTOM CHORDS (ALL JOISTS AT OR BETWEEN PANEL POINTS)	500 LBS, U.N.O.

ADD LOADS

PLUMBING PARTIAL ROOF PLAN - ALT. B

Date: MARCH 21, 2023

Sheet No:

P4.01B

GENERAL NOTES

1. (E) AND/OR SOLID HALFTONE LINES INDICATE EXISTING EQUIPMENT, (R) AND/OR DASHED LINES INDICATE RELOCATED EQUIPMENT, (N) AND/OR SOLID LINES INDICATE NEW EQUIPMENT UNLESS NOTED OTHERWISE.
2. LIGHTING FIXTURES DESIGNATED AS 'EMERGENCY' SHALL BE WIRED TO OPERATE WITH LOCAL SWITCHING UNDER NORMAL POWER CONDITIONS AND SHALL OPERATE VIA EMERGENCY BATTERY PACK OR INVERTER UPON LOSS OF BUILDING UTILITY POWER ONLT, UNLESS NOTED OTHERWISE.
3. EXIT SIGNS SHALL BE WIRED AHEAD OF LOCAL SWITCHING AND LIGHTING CONTROL PANEL FOR CONTINUOUS OPERATION. EXIT SIGNS SHALL BE WALL-MOUNTED ABOVE DOORS WHERE PRACTICAL. PROVIDE ADDITIONAL EXIT SIGNS AS NECESSARY FOR APPROVAL BY THE AUTHORITY HAVING JURISDICTION, PER ARCHITECT'S FINAL PATH OF EGRESS / EXITING PLAN.
4. ELECTRICAL CONDUITS SHALL BE RUN CONCEALED WHERE BUILDING CONSTRUCTION ALLOWS. ANY EXPOSED CONDUIT SHALL BE APPROVED BY THE ARCHITECT PRIOR TO INSTALLATION. ANY EXPOSED CONDUIT, FITTING, SUPPORTS, ETC SHALL BE PAINTED TO MATCH THE SURFACE ON WHICH THEY ARE INSTALLED.
5. REFER TO ARCHITECTURAL REFLECTED CEILING PLANS, SECTIONS, ELEVATIONS, ETC. FOR EXACT LOCATION OF LIGHTING FIXTURES.
6. EXACT LOCATION AND MOUNTING HEIGHT OF EXTERIOR BUILDING-MOUNTED FIXTURES SHALL BE COORDINATED WITH ARCHITECT PRIOR TO ROUGH-IN.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING FINAL FIXTURE LOCATIONS, ABOVE-CEILING HOUSING CLEARANCES, ETC. WITH MECHANICAL, PLUMBING, SPRINKLER CONTRACTOR AND OTHER TRADES PRIOR TO ROUGH-IN.
8. PROVIDE MULTIPLE-GANG FACEPLATES AS NECESSARY WHERE TWO OR MORE LIGHT SWITCHES ARE INDICATED IN A COMMON LOCATION. SINGLE-GANG FACEPLATES FOR A GROUP OF LIGHT SWITCHES ARE NOT PERMITTED.
9. PROVIDE STAINLESS STEEL DEVICE PLATES IN KITCHEN AND ROUGH-SERVICE AREAS.
10. CONDUIT FOR BUILDING-MOUNTED LIGHT FIXTURES SHALL BE ROUTED THROUGH INTERIOR OF BUILDING. LIGHT FIXTURE BACKBOXES SHALL BE RECESSED.

CONSTRUCTABILITY / DOCUMENT REVIEW

City of Fernley Community Response & Resource Center (CRRC)

Preconstruction Services | April 04, 2023

50% CONSTRUCTION DOCUMENTS – CONSTRUCTABILITY REVIEW

The Constructability Review is a collection of questions, comments, recommendations and other relevant information highlighted on the design documents. This review is done in an effort to make sure the scope of work is clear, the documents are coordinated, and that they assist the subcontractors in bidding, construction and project administration. The primary goal is to reduce and mitigate cost, quality issues, and schedule impacts to the project.

- 50% CD Review Summary and Markups Files: https://core.egnyte.com/fl/bVzeKecD82

The Constructability / Document review is provided in two formats to aid in the evaluation of this information. Both **Summary** format and **Markup** format are provided; further described below.

Summary: Questions and comments are represented as individual items within a log, separated by Page Label. A Thumbnail is provided as a screenshot reference along with the author and the page label on which the markup was created. The comment is provided on the right-hand side.

CITY OF FERNLEY

City Council
AGENDA REPORT

Meeting Date: April 19, 2023

REPORT TO:	Mayor and City Council
REPORT FROM:	**Trisha Conner, Assistant to the City Manager**

FINANCIAL IMPACT:		**CURRENTLY BUDGETED:**		**FUND/ACCOUNT:**
Yes:	No: X	Yes: N/A	No:	N/A

ACTION REQUESTED: Motion

AGENDA ITEM: (For Possible Action):

Discuss and Possible Action regarding the City of Fernley's projects and initiatives identified in the Western Nevada Development District's Comprehensive Economic Development Strategy.

AGENDA ITEM BRIEF:

The Western Nevada Development District (WNDD) Comprehensive Economic Development Strategy (CEDS) is a strategy-driven plan for regional economic development. It is the result of a regionally-owned planning process designed to build capacity and guide the economic prosperity and residency of an area or region. The CEDS is a prerequisite for designation by EDA of WNDD as an Economic Development District (EDD). The CEDS goes through an annual update. The annual update includes a review of the goals, strategies as well as projects/initiatives by each agency included in the WNDD CEDS. The annual update of local projects/initiatives should include a process to solicit input from elected officials. Staff is seeking input from Council of the City projects/initiatives to be incorporated into the annual update.

RECOMMENDED MOTION:

"I move to approve the City of Fernley's project/initiatives list for the 2023 annual update of the WNDD Comprehensive Economic Development Strategy."

BUSINESS IMPACT (per NRS Chapter 237):

A Business Impact Statement is not required because this is not a rule (term excludes vehicles by which legislative powers are exercised under NRS Chapters 271, 278, 278A, or 278B).

See attached report for background, analysis, alternatives.

ALTERNATIVES:

Council may change the list.

BACKGROUND:
Back in 2012, the Stronger Economies Together (SET) program, a USDA Rural Development initiative, established the basis for the 2014 CEDS. SET brought over 200 people from throughout the region to develop the SET Blueprint and this regional collaboration, final document, and SET work groups provided the basis for the WNDD CEDS. Members of City staff and elected officials attended the SET workshops.

The Western Nevada Development District represents the eight counties of Churchill, Douglas, Humboldt, Lyon, Mineral, Pershing, Storey and Washoe; the municipality of Carson City; the cities of Fallon, Fernley, Lovelock, Reno, Sparks, Winnemucca; and the Pyramid Lake Paiute Tribe/NUMU as well as the associate members located within the region. A cornerstone of WNDD's mission to diversify and strengthen the regional economy is the Comprehensive Economic Development Strategy (CEDS), which is a roadmap to progress and prosperity. The CEDS is a locally based, regionally driven economic development planning process and document that successfully engages the region's community leaders, private sector partners, and stakeholders. This framework enables the region and its partners to strengthen their leverage and expand regional capacity to attract outside resources to build a sustainable and resilient economy. The result creates an economic roadmap to diversify and strengthen the regional economy and to qualify the region for additional assistance from the Economic Development Administration of the U.S. Department of Commerce (EDA).

WNDD CEDS 2020-2025 Goals & Strategies

- Economic Resiliency
- Infrastructure
- Transportation
- Housing
- Quality of Life
- Workforce

The CEDS is used by local and regional economic development partners to coordinate and prioritize regional economic development projects and strategies. The coordination and prioritization become more important when the growth opportunities in the region are considered. These opportunities do not stop at existing county and city boundaries and the opportunities impact multiple jurisdictions. The CEDS is implemented by local and regional economic development partners as they develop projects and programs and make investments related to activities identified in the CEDS. The plan identifies goals, strategies, and implementable actions for the community to pursue for economic and community development. When applying for investment assistance from the U.S. Economic Development Administration or USDA Rural Development, projects cited in the CEDS or included as a part of the plans goals and strategies will strengthen an application and, dependent upon the funding agency, may be required to secure additional application points. The CEDS may also be used for applications to other public and private sector funding agencies, the CEDS should not be viewed as being solely for EDA and USDA applications. The CEDS is updated annually and revisited, revised, and rewritten every five years.

WNDD CEDS 2023 Update
The Western Nevada Development District and the University Center for Economic Development, part of the College of Business at the University of Nevada, Reno, conducted the annual evaluation and update workshop for WNDD's 2020 through 2025 Comprehensive Economic Development Strategy on March 31, 2023. This strategic economic development planning workshop was hosted by the City of Fernley in the City Council Chambers. Workshop participants included WNDD members and key community stakeholders who were given

an opportunity to evaluate the existing strategic economic development vision, goals, and actionable items. The participants also prioritized projects, assessed existing local and regional socio-demographics, and economic and housing conditions. The workshop completed a revised Strengths, Weaknesses, Opportunities, and Threats (SWOT) Analysis for the region, and teed up the final selection of revised priority CEDS projects for the coming year.

Fernley Projects/Initiatives Update
The WNDD CEDS contains a list of projects supporting economic development with an emphasis on infrastructure that alight with the visions, goals, and objectives of the CEDS. Including these projects in the CEDS makes them more competitive for EDA and other funding, and informs the WNDD Board and staff on what is being planned in terms of community and economic development across the region.The review and update of Fernley projects/initiatives should include a process to solicit input from elected officials and staff with final approval of the CEDS Update by the respective governing board. Staff is recommending the following priority projects to be incorporated into the 2023 annual update of the WNDD's CEDS.

Recommended Projects/Initiatives

- Community Response & Resource Center - Construction
- Fernley Lands Bill (BOR Park Development - Develop federal surplus property into urban recreation complex/parks/areas
- Railroad Underpass Improvements at I-80 Exit 46, west Fernley
- Fernley Railroad Depot Improvements - sewer, water lines, restrooms, roof repair, interior upgrades, access, and landscaping
- Main Street Revitalization
- Surface Water Treatment Integration at Water Treatment Plant Design and Construction
- Investigation into the Improvements to Deliver and Treat Brady's Hot Springs Water to the Water Treatment Plant
- Highway 50 Looping Water Main Design and Construction
- East Wastewater Treatment Plant - Preliminary Engineering Report and Construction
- Shadow Lane Reconstruction Project (US 50A/95A to SR 828)
- Fernley Industrial Park Rehabilitation and Street Reconstruction Project
- Fernley Intersection Improvements - Logan/Pilot Intersection, and US 95A/Main Street Intersection Design and Construction
- Area Plan Completion - North Fernley, South Fernley, and Southwest Fernley
- Red Rock Road Extension north to US 50A - Construction
- Red Rock Road Sanitary Sewer Realignment - Construction
- Red Rock Road Waterline Extension - Construction

WNDD CEDS Update Timeline
The updated CEDS will be submitted to the WNDD Board for approval May 22, 2023. Once the CEDS is approved, it will be submitted to the Seattle EDA Regional Office.

RELEVANT LAWS, STATUTES, AND REGULATIONS:

N/A

FINANCIAL IMPLICATIONS:

The approval of the item does not require financial allocations at this time. Until or unless the specific projects move forward, financial consideration will be completed at that time.

ATTACHMENTS:
None

CITY OF FERNLEY

City Council
AGENDA REPORT

Meeting Date: April 19, 2023

REPORT TO:	Mayor and City Council
REPORT FROM:	**Brandi Jensen, City Attorney**

FINANCIAL IMPACT:		**CURRENTLY BUDGETED:**		**FUND/ACCOUNT:**
Yes:x	No:	Yes:x	No:	City Clerk budget for ordinances

ACTION REQUESTED: Motion

AGENDA ITEM: (For Possible Action):

Discussion and Possible Action to direct staff to modify the municipal code in Title 2 Chapter 2 City Manager (formerly known as Bill 317).

AGENDA ITEM BRIEF:

Council requested this item be brought back to have additional changes made to Title 2 Chapter 2 regarding the City Manager.

RECOMMENDED MOTION:

I move to direct staff to modify Chapter 2 of the municipal code as follows

BUSINESS IMPACT (per NRS Chapter 237):

A Business Impact Statement is not required because this is not a rule (term excludes vehicles by which legislative powers are exercised under NRS Chapters 271, 278, 278A, or 278B).

See attached report for background, analysis, alternatives.

ALTERNATIVES:

The Council could leave Chapter 2 as it reads now. Council can modify various sections of the Code as well.

BACKGROUND:

The City Council approved Bill 317 bringing the City closer to being in compliance with State and Federal Law.

Council requested to bring the matter back to make additional changes.

RELEVANT LAWS, STATUTES, AND REGULATIONS:

United States Constitution; Nevada Revised Statutes Chapter 266; Nevada Constitution; Humprheys, Seila and Meyers Supreme Court cases (all cases on termination of an executive branch position).

FINANCIAL IMPLICATIONS:

The ordinance posting costs

ATTACHMENTS:

1. Form of Government Fernley (5.18.22)
2. Bill# 317 Muni Code 2 City Manager

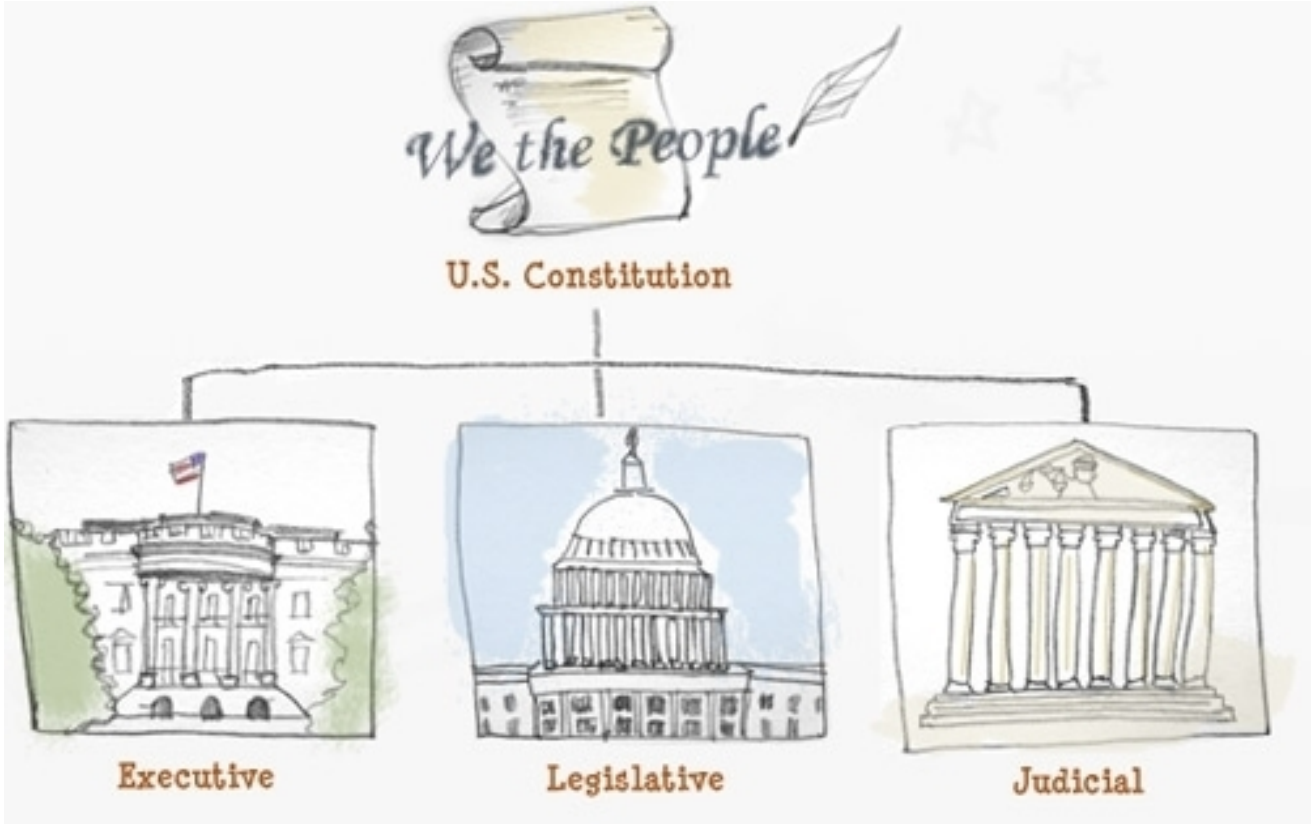
TODAY WE ARE COVERING: THE FORM OF GOVERNMENT IN THE CITY OF FERNLEY

- How government is created
- What are the three branches
- What are the forms of government
- What form do we have
- How do we properly set up our local government for success

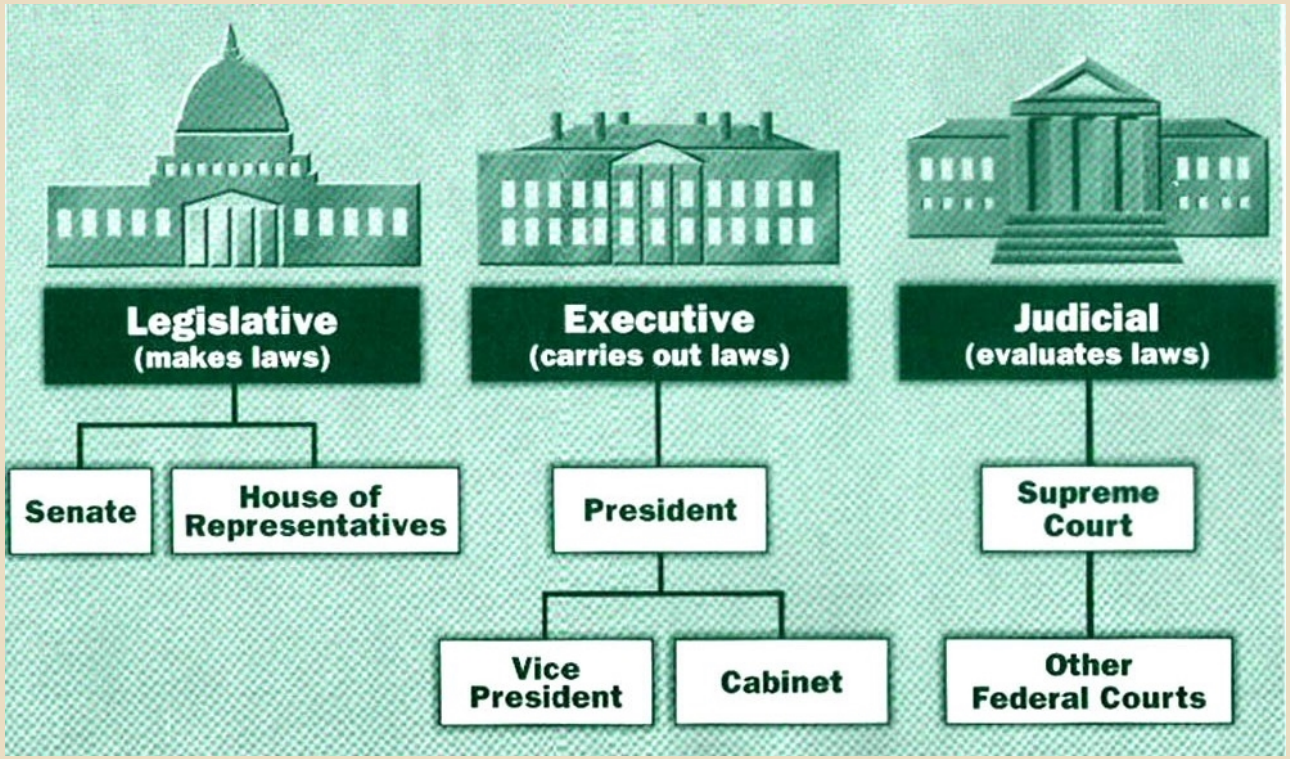
THE CONSTITUTION

- Our founding fathers created the constitution
- Created the 3 branches of government and separation of powers
- Checks and Balances

WHAT ARE THE THREE BRANCHES OF GOVERNMENT?

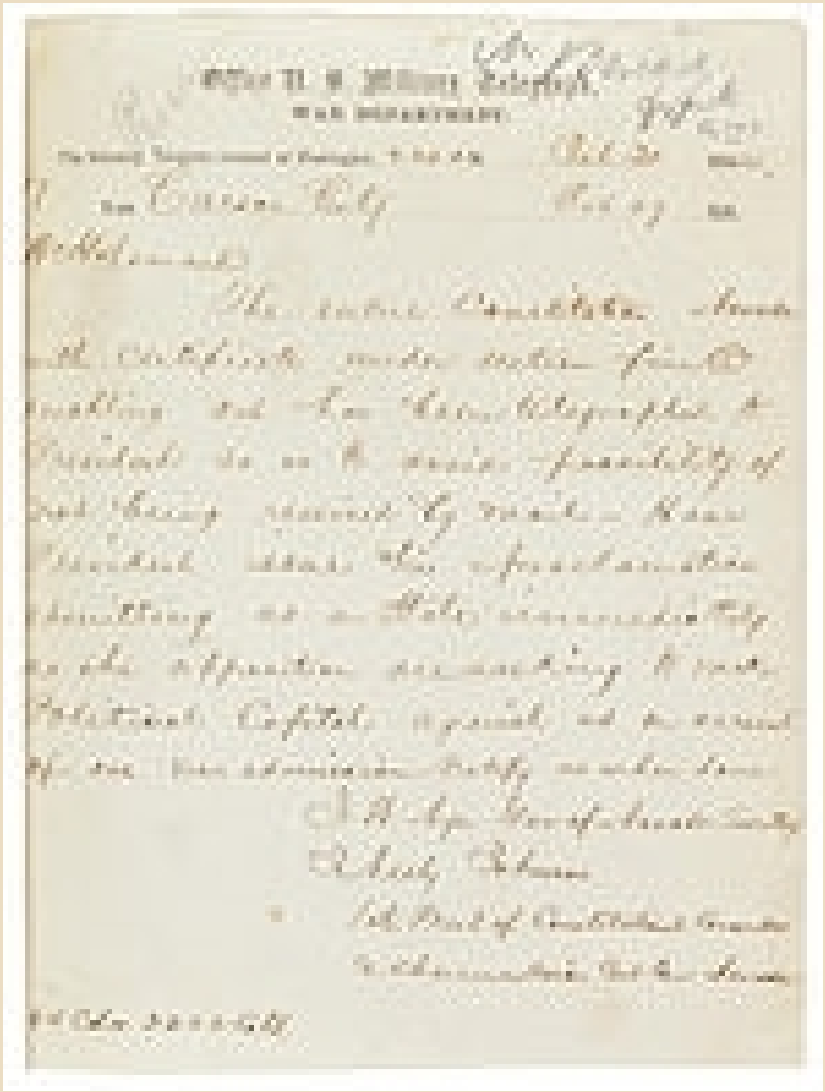


FEDERAL LEVEL:



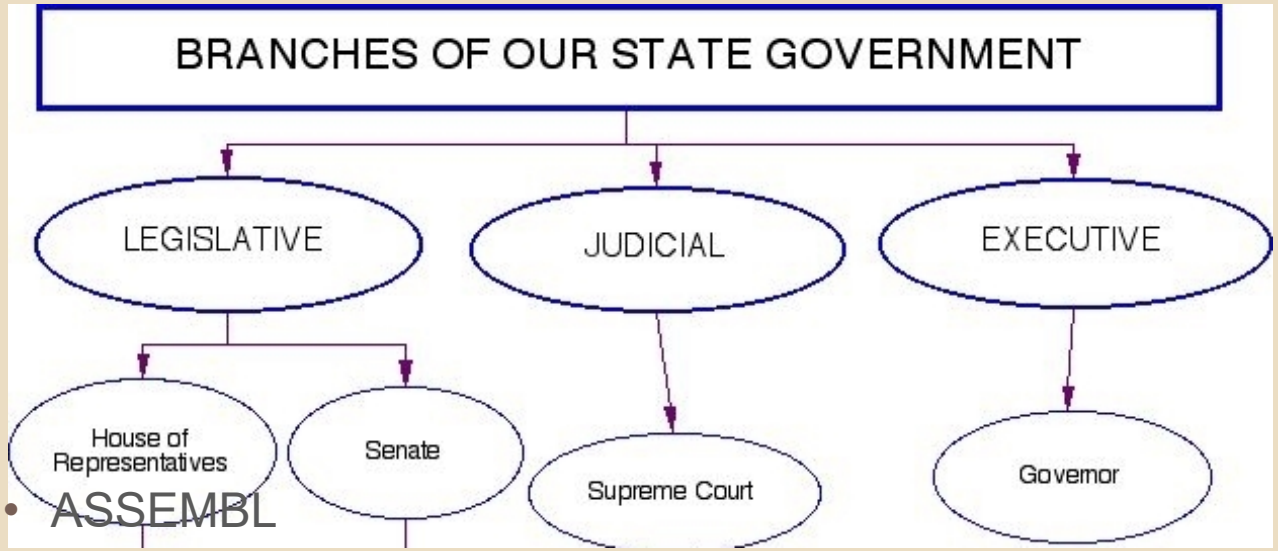
NEVADA CONSTITUTION AND THREE BRANCHES

- Under the separation of powers doctrine of the Nevada Constitution, each of the three branches of government is vested with the authority to exercise its own functions, and **no branch** may exercise the functions of another unless expressly permitted to do so by the Nevada Constitution.



- The powers of the Government of the State of Nevada shall be divided into three separate departments, — the Legislative, — the Executive and the Judicial; and no persons charged with the exercise of powers properly belonging to one of these departments shall exercise any functions, appertaining to either of the others, except in the cases expressly directed or permitted in this constitution.

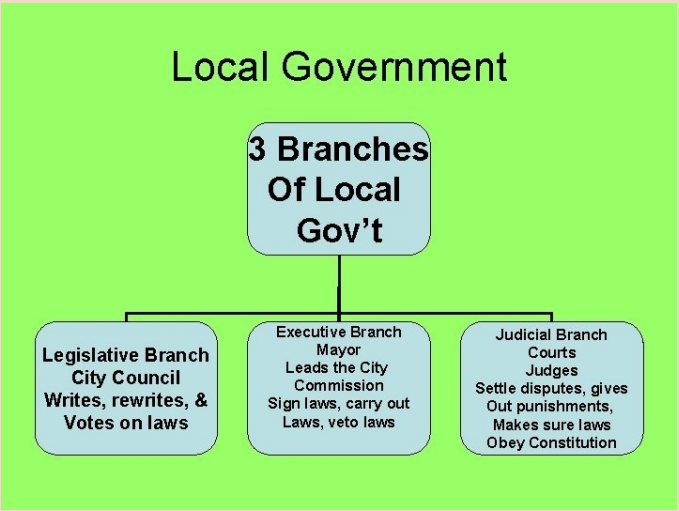
STATE LEVEL:



- ASSEMBLY

THREE BRANCHES OF GOVERNMENT IN FERNLEY

- Executive = Mayor
- Legislative = City Council
- Judicial = Municipal Court Judge



WHO IS THE JUDICIAL BRANCH?

The Municipal Court

MUNICIPAL COURT

- The Court is independent and co-equal to the Legislative and Executive branches.
- Municipal Courts are Part of the Nevada Judiciary.
- Subject to the Judicial Disciplinary Board
- Created pursuant to NRS 266.
- Funded by the City of Fernley.
- Municipal Court Judge is appointed by the Mayor. The Council approves that appointment.

CITY OF SPARKS V. SPARKS MUNICIPAL COURT

Enjoining the City from interfering with the Municipal Court's ability to make personnel decisions under the separation of powers doctrine.

Managing court employees (including firing) is not in the express legislative powers and is unconstitutional.

Any statutory scheme that would allow the legislative branch of municipal government to control or exercise the inherent power of another branch violates the separation of powers doctrine.

Money – Purse Strings – lie within the authority of the Legislative Branch

EVALUATIONS OF THE JUDGE AND THE JUDICIAL EMPLOYEES

- Judiciary only
- Judicial Employees are reviewed by the Judicial department and not the Mayor or Council
- Council does not evaluate the Judge

CREATING CITY GOVERNMENT IN NEVADA

- Nevada created a constitution
- Nevada constitution establishes three branches of government and separation of powers
- Then Legislature created laws (NRS)
- NRS lays out two types of local city government

HOW TO CREATE A CITY CHARTER V. GENERAL LAW

Charter- Legislature creates

- The charter (a document) creates the powers with NRS 268

General – Voter's create

- NRS 266 (a chapter of statutes) creates the powers

FERNLEY IS A GENERAL LAW

- NRS 266.015 “The municipal government of all incorporated cities under this chapter is hereby vested in a mayor and a city council.”
- NRS 266.165: The Chief Executive of a City shall be the Mayor

CITIES IN NEVADA

CHARTER CITIES

- Boulder
- Caliente
- Carlin
- Carson City
- Elko
- Henderson
- Las Vegas
- Mesquite
- North Las Vegas
- Reno
- Sparks
- Wells
- Yerington

GENERAL LAW CITIES

- Ely
- Fallon
- Fernley
- Lovelock
- West Wendover
- Winnemucca

GENERAL LAW CITIES – CITY MANAGER OR NO CITY MANAGER

HAS A CITY MANAGER

- Fernley
- West Wendover
- Winnemucca

DOES NOT HAVE A CITY MANAGER

- Ely
- Fallon
- Lovelock

TYPES OF GOVERNMENT

COUNCIL MANAGER

- City Manager as Chief Executive Officer
- Mayor is in the Legislative Branch

MAYOR COUNCIL

- Mayor as Chief Executive Officer
- Mayor is the Executive Branch leader
- Mayor is NOT in the legislative branch

TWO TYPES OF MAYOR COUNCIL

STRONG MAYOR

- The mayor may appoint and remove departmental heads.
- The mayor drafts and proposes a budget to city council.
- The mayor possesses veto or line-item veto power.
- The mayor officially represents the city on the state, national and international levels.
- The mayor exercises oversight of the city's day-to-day operations.
- The mayor enforces city laws and ordinances.
- The mayor is not a member of city council.

WEAK MAYOR

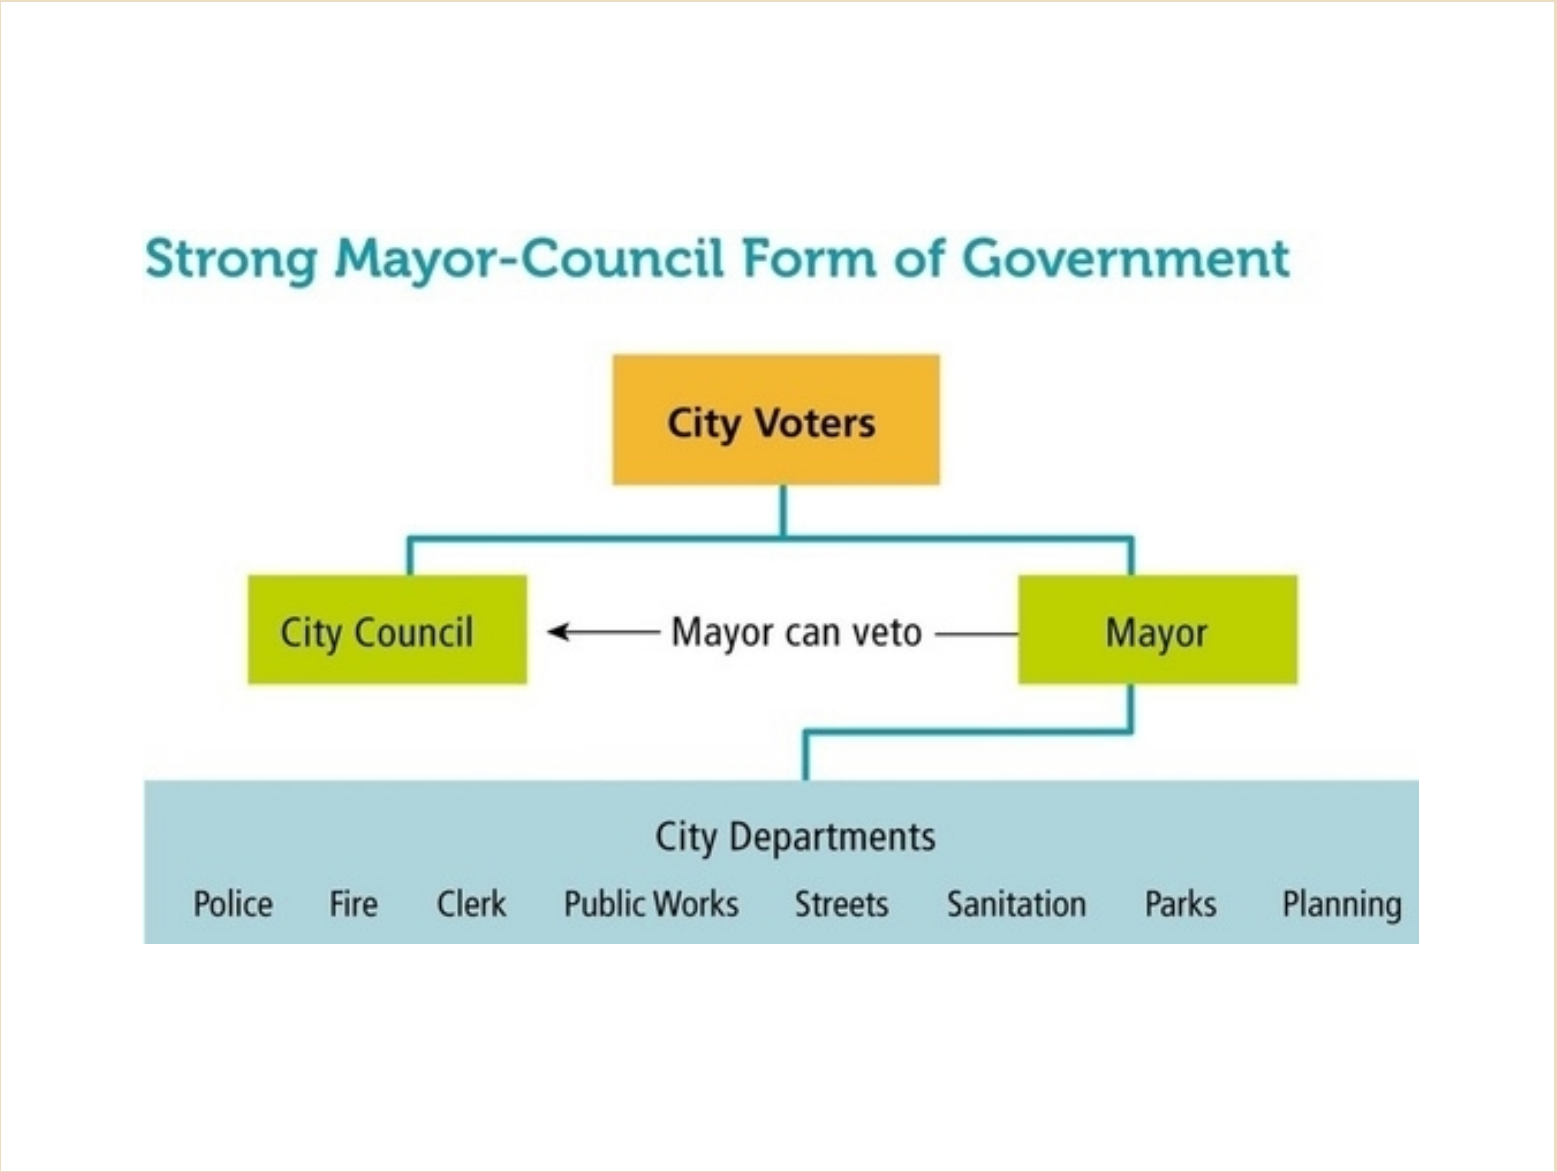
- City council appoints and approves departmental heads.
- City council (usually in consultation with the mayor or an appointed administrative officer) drafts a budget.
- The mayor possesses limited or no veto power.
- The mayor officially represents the city on the state, national and international levels.
- The mayor may be a member of city council or the presiding officer of city council.

THE MAYOR IS THE EXECUTIVE BRANCH

Per NRS 266: The Chief Executive of a City shall be the mayor.

MAYOR – COUNCIL GOVERNMENT

Because of NRS 266, we are a Strong Mayor-Council form of government structured like the federal/state government.



EXECUTIVE POWER
HOW THIS COMPARES TO THE FEDS

PRESIDENT

- State of the Union
- Veto & Sign Bills
- Supervise General Affairs of the Country
- Enforce the laws of Congress
- Make suggestions for new laws
- Nominate/Appoint (A&C)

MAYOR

- State of the City
- Veto & Sign Bills
- Supervise General Affairs of the City
- Enforce the laws of Council
- Make suggestions for new laws
- Nominate/Appoint (A&C)

MAYOR'S DUTIES IN A GENERAL LAW 266 CITY

- **NRS 266.190 General duties.**
- 1. The mayor shall exercise a careful supervision over the general affairs of the city.
- 2. In exercising the duty of supervision pursuant to subsection 1, the mayor shall:
- (a) From time to time, give the city council information in writing relative to the state of the city, and recommend such measures as the mayor may deem beneficial to the city.
- (b) See that all the general laws and ordinances of the city are observed and enforced.
- (c) Take all proper measures for the preservation of public peace and order, and the suppression of riots, tumults and all forms of public disturbances, for which purpose the mayor may, if the city is not participating in a metropolitan police department, appoint extra police officers temporarily and use and command the police force. If the city is participating in a metropolitan police department, the mayor may request law enforcement assistance from the sheriff. In either case, if local law enforcement forces are inadequate, the mayor shall call upon the Governor for military aid in the manner provided by law.
- (d) Sign all licenses and warrants and claims against the city.
- (e) See that all contracts are fully kept and faithfully performed, and, to that end and in any such case where necessary or proper to protect the interests of the city, shall cause legal proceedings to be instituted or defended at the expense of the city.
- (f) Perform such other duties as the city council shall prescribe by ordinance.

WHO IS THE LEGISLATIVE BRANCH?

The City Council

The City's Legislative function is to make and pass laws to control the power of the purse.

LEGISLATIVE POWERS
HOW THIS COMPARES TO FEDS

CONGRESSIONAL POWERS

- Make laws
- Approve President appointments
- Approves Budget

COUNCIL POWERS

- Make laws
- Approve Mayor appointments
- Approves Budget

WHAT TO RETAIN:

- Fernley is a general law city (266)
- Fernley is a Mayor-Council Govt
- Fernley is a Strong Mayor Govt

CAN YOU CREATE OFFICERS AS THE LEGISLATIVE BRANCH

NRS 266.390 THE CITY COUNCIL MAY CREATE ANY OFFICE DEEMED NECESSARY

IS A CITY MANAGER TYPE POSITION EXECUTIVE BRANCH?

MAYORS AND CITY MANAGERS SERVE IN THE EXECUTIVE ROLE FOR CITIES

CAN THE COUNCIL REQUIRE THE POSITION BE APPOINTED BY THE MAYOR AND CONFIRMED BY COUNCIL

FEDERAL APPOINTMENTS

- The United States Constitution provides that the president "shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the Supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for." (Article II, section 2).

CITY APPOINTMENTS

- Nevada Constitution
- NRS 266.395: The mayor, with the advice and consent of the city council, shall appoint all such officers as may be provided for by law or ordinance.

TERMINATION OF AN EXECUTIVE POSITION –SUPREME COURT OF THE UNITED STATES

- Myers –removal of appointed officials lies with President, Senate cannot require approval
- Humprheys – removal of executive employees is the exclusive power of the Chief Executive Officer
- Seila – unencumbered Presidential authority for removal of all executive officers

CAN THE COUNCIL TERMINATE OR IS IT UNCONSTITUTIONAL

- United states supreme court rules unconstitutional all three times to remove an executive officer
- Nevada supreme court ruled managing employees of a separate branch (including firing) is not in the express legislative powers and is unconstitutional.

TERMINATION OF AN EXECUTIVE POSITION – NEVADA CONSTITUTION

- Nevada Constitution grants the Legislature the authority to create laws for the removal of civil officers for malfeasance and nonfeasance
- NRS allows for the removal of officers by majority vote (limited by constitution)
- Mayor can terminate the position
- Council can terminate for malfeasance/nonfeasance only

MALFEASANCE AND NONFEASANCE DEFINED

MALFEASANCE

- Intentional conduct that is unlawful.
- Malfeasance is at a higher level of wrongdoing than nonfeasance (failure to act where there was a duty to act)

NONFEASANCE

- Nonfeasance is a legal concept that refers to the willful failure to execute or perform an act or duty required by one's position, office, or law whereby that neglect results in harm or damage to a person or property. The perpetrator can be found liable and subject to prosecution.

NRS 266.430

- In case the mayor or any municipal officer is adjudged guilty of nonfeasance, misfeasance or malfeasance by any court of competent jurisdiction he or she shall be fined in a sum not exceeding $1,000. The court in which such conviction shall be had shall enter an order removing such officer from office; and the officer shall not be eligible to any municipal office thereafter.
- 32 NRS references to malfeasance nonfeasance

HOW CAN WE REGULATE THE EXECUTIVE BRANCH – THE MAYOR?

Purse strings

Recall

Malfeasance

WHAT ARE WE CHANGING

- REPORTS TO THE MAYOR
- EVALUATED BY THE MAYOR
- FIRED BY THE MAYOR
- FIRED BY THE COUNCIL FOR MALFEASANCE NONFEASANCE

CONCLUSION

- The position is an executive branch position
- The position is under the Mayor
- The Mayor can appoint with City Council confirmation
- The Mayor can terminate the position
- The Council can terminate under Malfeasance Nonfeasance
- Now – what to name the position

WHAT DO YOU NAME THE POSITION

PROBLEM: CAN'T HAVE TWO CHIEF EXECUTIVE OFFICERS

In some strong-mayor governments, the mayor will appoint a chief administrative officer who will supervise department heads, prepare the budget, and coordinate departments. This officer is sometimes called a city manager;

While the term used in the council–manager government, the manager is responsible **only** to the mayor in this variant.

WHAT TO NAME THE POSITION

CITY MANAGER

- Legal
- Creates confusion that the position is the chief executive officer

CHIEF ADMINISTRATIVE OFFICER

- Legal
- Eliminates confusion

BILL # 317

CITY OF FERNLEY

ORDINANCE #2022- 011

AN ORDINANCE AMENDING THE CITY OF FERNLEY MUNICIPAL CODE CHAPTER 2 IN VARIOUS SECTIONS, INCLUDING, BUT NOT LIMITED TO SUPERVISION OF THE CITY MANAGER; SECTION 2.02.02 APPOINTMENT AND SALARY OF THE CITY MANAGER; (RESIDENCY AND HIRING RESOLUTION); AND SECTION 2.02.03 REMOVAL OF THE CITY MANAGER.

THE CITY COUNCIL OF THE CITY OF FERNLEY DO ORDAIN THE FOLLOWING:

Chapter 2 City Manager shall read as follows:

CHAPTER 2. CITY MANAGER

Sec. 2.02.01. Creation of office.

The office of City Manager, hereinafter referred to as "City Manager" or "Manager," is hereby created.

(Prior Code, § 1.05.01)

Sec. 2.02.02. Appointment and salary of the city manager.

(a) Appointment. The City Manager, pursuant to NRS 266.395 and 266.405, shall be appointed by the Mayor with consent of the City Council. Consent shall be defined as a majority vote of the Council.

(b) Qualifications. The Manager shall be chosen by the Mayor and City Council on the basis of executive and administrative qualifications with special reference to actual experience or knowledge regarding the duties of the office hereinafter set forth. The Manager serves at-will at the pleasure of the Mayor and may be terminated for any reason or no reason, with or without notice, so long as the termination is not for an illegal reason. All recommendations for appointment or removal shall be without regard to political beliefs or affiliations. At the time of appointment, the appointee need not be a resident of the city or state, but within twelve months of employment, shall reside within the city limits. No Mayor or Councilmember shall receive such appointment unless in compliance with state law restriction on point.

(c) The salary and benefits of the City Manager shall be set by the mayor with approval of the City Council, including but not limited to personal time off, insurance benefits for the city manager and dependents, retirement benefits, bonuses and raises, all of which are discretionary, and not guaranteed.

(d) The City Manager is subject to the City's Handbook and Personnel Policies except those policies covering discipline, lay-off and dispute resolution. The City Manager is excluded from any due process rights which may be provided in those policies, considering the at-will status of the position.

(Prior Code, § 1.05.02; 2.02.02 version 12.21..22))

Sec. 2.02.03. Removal of the city manager.

(a) The City Manager may be removed by the Mayor. The Council reserves the right to remove the City Manager once the City Manager has been deemed by a Court to have committed malfeasance or nonfeasance.

(b) The City Manager may appeal the Mayor's decision to remove the employee to the City Council. The removed City Manager shall file said appeal with the Human Resources Manager within 5 days of removal by the Mayor. The Human Resources manager shall place the item on the agenda within 30 days of the filing of the appeal. The City Manager will not be on paid leave during the appellate process. The Mayor's removal of the City Manager can only be overturned by a super-majority vote of Council during the appellate hearing. The Mayor is not obligated but may present evidence and or reasoning for the termination. Said presentation of evidence can be informally presented. The removed City Manager may also present evidence and or testimony during this hearing informally. Said hearing will be subject to the rules of NRS and Open Meeting Law.

(Prior Code, § 1.05.03)

Sec. 2.02.04. Powers and duties of the city manager.

(a) Chief administrative officer. Insofar as the Mayor is the Chief Executive Officer of the City under NRS 266.165 with the attendant responsibilities, powers, and duties as described in NRS 266.190, the City Manager shall be the Chief Administrative Officer/Chief Operational Officer, and the City Manager shall direct his or her efforts toward enforcing the vision, budget, and ordinances established by the City Council. The City Manager shall communicate and cooperate with the Chief Executive Officer, the Mayor, in accomplishing these described objectives, powers, and responsibilities. It is the City Manager's responsibility to keep the Mayor and City Council informed relative to the City's needs and conditions, as well as to provide the Mayor and City Council with any reports that may be required by law or requested by the Mayor or City Council.

(b) Exceptions to authority. The City Manager shall be the administrative head of the City and shall be responsible to the City Council for the administration of all departments with the following exceptions:

(1) Statutory Positions and Evaluations. The City Manager shall have no authority over statutory positions and evaluations. Statutory positions are those established through NRS: The City Attorney, City Clerk, City Treasurer, and Municipal Judge.

(2) Annual Evaluation. The City Manager shall be subject to an employee evaluation process once a year at a minimum. Said evaluations shall be conducted in compliance with the open meeting law. Evaluations will be conducted by the Mayor with an evaluation form that has been approved by the City Council and the Mayor. The Mayor has the discretion but is not required to solicit a peer review from the statutory positions (using an approved peer review form).

(3) Paid Administrative Leave for Violations of Law or Policy. The City Manager shall also have the authority to place any statutory position, except the Municipal Judge, on immediate and paid administrative leave for violations of law or policy. Placing an employee on paid administrative leave is not a disciplinary action. The City Manager shall notify the Mayor and City Council that the statutory

position was placed on administrative leave within 24 hours of the statutory position being placed on leave.

(4) Investigations. Except for the Municipal Judge, the City Manager shall also have the authority to initiate an investigation regarding all City employees, including, but not limited to, the statutory positions, the Mayor, and the City Councilmembers, for violations of the law and/or the policies of the City. Within 24 hours of the initiation of the investigation, the City Manager shall notify the Mayor and City Councilmembers (who are not the subject of the investigation), that an investigation has begun only with regard to a statutory position, the Mayor, or a City Councilmember, as well as any notification as required by policy or law. Should an incident arise regarding the City Manager, the Deputy City Manager shall take the position of the City Manager in the requirements above. Should the position of Deputy City Manager not exist, the Mayor shall take the position of the City Manager in the requirements above.

(5) Chief Executive Officer. Under NRS Ch. 266, the Mayor is the Chief Executive Officer. Therefore, when a personnel issue arises with the City Manager, the point of contact shall be the Mayor.

(6) Issue with the City Manager. Any person who knows of an alleged personnel issue involving the City Manager may decide to move forward through the process by contacting the Mayor.

(7) Mayor Authority to Place City Manager on Leave. After consultation with Legal and Human Resources, the Mayor shall also have the authority to place the City Manager on immediate paid administrative leave for violations of law or policy.

(8) Non-Disciplinary. Placing an employee on paid administrative leave is not a disciplinary action.

(9) Notification. The Mayor shall notify the City Council that the City Manager was placed on administrative leave within 24 hours of the City Manager being placed on leave.

(c) Administrative authority. The City Manager shall be responsible to the council for the proper administration of the affairs of the City. The City Manager's chief guide in conducting and structuring City personnel will be the City Personnel Policy Manual and the Collective Bargaining Agreement. The City Manager's authority is further defined as follows:

(1) The Mayor should be consulted and informed of policy decisions prior to making such a decision. The City Manager shall also inform the Mayor and the City Council of all significant personnel decisions including but not limited to termination, resignations, etc. The City Manager shall immediately share with the Mayor all adopted internal policies. All external policies (those affecting the public rather than City internal/administrative policies) shall be brought before the Council for approval.

(2) Appoint and, when necessary for the good of the City suspend or remove all subordinates of the City Manager when allowed by law. The Manager may authorize the head of a department or office to appoint, suspend, or remove subordinates in such department or office.

(3) The City Manager shall submit personnel decisions regarding the creation of new positions, reclassifications of any positions, and any rate increase or raise to the City Council for its approval. Any and all raises must be in compliance with the Collective Bargaining Agreement. Any action by the City Council relative to personnel issues shall be properly noticed and in compliance with the NRS Ch. 241 and in compliance with the City Personnel Manual and Collective Bargaining Agreement.

(4) Prepare the City budget annually and submit it to the Council together with a message describing the important features and be responsible for its administration after adoption. The City Manager shall prepare the budget with equal participation and input from the City Treasurer. Both the City Manager and the City Treasurer shall meet at a minimum on a weekly basis for the 90 days prior to the budget adoption by Council, or as otherwise directed by the Mayor, and work together cooperatively on preparing the budget. Said meetings are to be set up by the City Manager's office.

(5) Prepare and submit to the Council as of the end of the fiscal year a complete report on the finances and administrative activities of the Council for the preceding year.

(6) Keep the Council advised of the financial condition and future needs of the City and make such recommendations as may be deemed desirable.

(7) Recommend to the Council a schedule under the City Manager (all positions but for the statutory positions), including minimum and maximum rates, and step increases subject to approval by City Council.

(8) Recommend to the Council adoption of such measures as may be deemed necessary or conducive to the maintenance or improvement of the health, safety, or welfare of the community or for the improvement of administrative services.

(9) Consolidate, combine, reorganize, and/or reclassify offices, positions, departments, or units under his or her jurisdiction, with the approval of the Council, to structure the operational departments of the City.

(10) Attend all meetings of the Council unless excused by the Mayor and take part in the discussion of all matters coming before the Council. The City Clerk shall notice the City Manager of all regular and special meetings of the Council.

(11) Supervise the purchase of all materials, supplies, and equipment for which funds are provided in the budget; let contracts necessary for operation or maintenance of the City services. The City Manager shall have the spending authority set out in the Citywide approved Purchasing Policy.

(12) Investigate the affairs of the City or any Department or Division thereof, as appropriate, and pursuant to the above sections. Investigate or delegate the investigation of all complaints in relation to matters concerning the administration of the government of the City, and in regard to service maintained by the public utilities in the City, and see that all franchises, permits, and privileges granted by the City are faithfully observed.

(13) Devote his or her time to the discharge of all official duties and will not engage in other employment while working for the City unless approved by the mayor.

(14) Perform such other duties as may be required by the Mayor, not inconsistent with laws or ordinances.

(Prior Code, § 1.05.04)

Sec. 2.02.05. Executive branch appointment authority.

As the Council is the legislative branch, and the Mayor and the City Manager are the executive branch, neither the Council nor any of its members shall direct or request the appointment of any person to, or removal from, office by the Manager or any of the Manager's subordinates, or in any manner take part in the appointment of officers and employees in the administrative services of the City, except for the statutory positions through the Mayor. Except for the purpose of inquiry, the Council and its members shall deal with the administration solely through the Mayor and the City Manager and neither the Council nor any member thereof shall give orders to any subordinates of the City Manager, either publicly or privately.

(Prior Code, § 1.05.05)

Sec. 2.02.06. Emergencies.

The City Manager shall have the authority to make purchases for emergencies pursuant to the purchasing policy.

(Prior Code, § 1.05.06)

Sec. 2.02.07. Temporary absence or vacancy; acting city manager.

(a) In the event of a temporary absence by the Manager, should the position exist, the Deputy City Manager shall automatically become the Acting City Manager. The City Manager is obligated, if reasonably possible, to immediately notify the Deputy City Manager of said action. The City Manager is obligated to give as much advance notice as possible of any planned absence to the Deputy City Manager.

(b) If the Deputy City Manager is unable to perform as the Acting City Manager, or the position does not exist, the City Manager may appoint an Acting City Manager during his or her absence.

(c) If the City Manager is incapacitated to the point that he or she cannot make a temporary appointment, the Mayor shall be empowered to appoint an Acting City Manager.

(d) If the City Manager is absent due to a suspension or placed on administrative leave by the Council, the Mayor shall be empowered to appoint an Acting City Manager.

(e) During a vacancy of the City Manager's position, the Mayor with confirmation by Council may appoint an Acting City Manager. The Acting City Manager shall exercise the full authority of the Manager during the temporary absence or vacancy of the City Manager's position.

(Prior Code, § 1.05.07)

Sec. 2.02.08. Saving clause.

If any section, subsection, or sentence, clause, or phrase of this chapter is for any reason held invalid, such decision or decisions shall not affect the validity of the remaining portions of this chapter.

(Prior Code, § 1.05.08; Ord. No. 2015-002)

PROPOSED on the 2nd Day of Nov, 2022.

CITY OF FERNLEY

City Council
AGENDA REPORT

Meeting Date: April 19, 2023

REPORT TO:	Mayor and City Council
REPORT FROM:	**RanDee Gahr**

FINANCIAL IMPACT:		**CURRENTLY BUDGETED:**		**FUND/ACCOUNT:**
Yes:X	No:	Yes: X	No:	100-525-322 & 100-525-600

ACTION REQUESTED: Motion

AGENDA ITEM: (For Possible Action):

Possible action to direct staff to proceed with sponsoring a low-cost Rabies Vaccine / Dog Microchip clinic on May 20, 2023.

AGENDA ITEM BRIEF:

Key Points:

1. Rabies vaccinations are required for each dog under NRS 441A.410 and FMC 6.04 (A). The average cost of an appointment is $35.00 and vaccinations are typically around $15-20 each.
2. Most dogs that are impounded by Animal Control do not have updated Rabies vaccinations and owners are required to license their dogs within 30 days of impoundment.
3. The majority of dogs that are impounded by Animal Control do not have microchips or other identification. Animals that are microchipped are more easily reunited with their owners, which may result in fewer dogs being impounded, which results in fewer trips to the Lyon County Animal Shelter in Silver Springs.

RECOMMENDED MOTION:

"I move to allow citizens of the City of Fernley to sponsor a Rabies Vaccinations / Dog Microchip Clinic at a charge of fifteen dollars per dog."

BUSINESS IMPACT (per NRS Chapter 237):

Nevada Statutes: NRS 441A.410, NAC 441A.410

Fernley Municipal Code: Fernley Municipal Code 6.04 (A)

See attached report for background, analysis, alternatives.

ALTERNATIVES:

BACKGROUND:

Yearly, Animal Control impounds nearly 200 dogs, and of those, most do not have an up-to-date rabies certificate and are not equipped with a microchip. The cost to vaccinate a dog against Rabies is about $50.00 for each animal and some community members are on a fixed income or are unable to drive to outlying low-cost vaccination clinics. Fernley Animal Control would like to host a low-cost vaccination clinic at City Hall on May 20th, providing not only affordable Rabies vaccinations, but also giving free microchips to attendees in the hopes that more animals can be reunited in the field instead of having to be impounded at the shelter. The event would be for Fernley residents only and participants would be required to license their dogs at the time of the vaccination. Vaccines would be purchased for $15.00 and dogs would be provided a free microchip if not already installed.

RELEVANT LAWS, STATUTES, AND REGULATIONS:

Nevada Statutes: NRS 441A.410, NAC 441A.410
Fernley Municipal Code: Fernley Municipal Code 6.04 (A)

FINANCIAL IMPLICATIONS:

Vaccine-$4.00
Microchip-$7.50
Tag- $0.47
Form-$1.00
Total-$12.97 per dog

In addition, the vet's fee is $350 for the 4 hour event.

CITY OF FERNLEY

City Council
AGENDA REPORT

Meeting Date: April 19, 2023

REPORT TO:	Mayor and City Council
REPORT FROM:	**Lydia Altick, Deputy City Manager**

FINANCIAL IMPACT:		**CURRENTLY BUDGETED:**		**FUND/ACCOUNT:**
Yes:X	No:	Yes:	No: X	General Fund Revenue / 100-000-320-170

ACTION REQUESTED: Resolution

AGENDA ITEM: (For Possible Action):

Discuss and Possible Action to adopt Resolution 23-003 to increase dog license fees.

AGENDA ITEM BRIEF:

SUPPORTING INFORMATION

The Animal Control Officer's primary responsibility is to protect public safety and is the Rabies Control Authority for the City of Fernley. Nevada Administrative Code 441A.410 requires all dogs, cats and ferrets to be vaccinated against rabies and FMC 6.04 (A) requires all dogs to be licensed with Animal Control to ensure compliance with Rabies vaccination protocol.

License fees last updated in 2002, charge $5.00 for altered dogs and $10.00 for intact dogs per year, up to the expiration of the Rabies certificate. A lost or worn tag costs $1.00 to replace.

Research of the surrounding jurisdictions has revealed that Fernley charges less than most other comparable cities and counties in Northern Nevada. The goal of Animal Control is to increase the license fee for only unaltered animals to $25.00 per year up to the expiration of the Rabies certificate.

Other comparable jurisdictions' fees are listed below:

Location	Altered	Unaltered	Senior
Carson City	**$8.00**	**$25.00**	-
Churchill County	**$2.50**	**$2.50**	-
Elko County	**$5.00**	**$10.00**	-
Humboldt County/City of Winnemucca	**$5.00**	**$15.00**	-

Lyon County	**$5.00**	**$25.00**	**Free, 65+**
Washoe County	**$8.00**	**$20.00**	**-**

RECOMMENDED MOTION:

"I move to adopt Resolution 23-003 to increase dog license fees."

BUSINESS IMPACT (per NRS Chapter 237):

A Business Impact Statement is not required because this is not a rule (term excludes vehicles by which legislative powers are exercised under NRS Chapters 271, 278, 278A, or 278B).

See attached report for background, analysis, alternatives.

ALTERNATIVES:

Keep dog license fees the same as they are today.

BACKGROUND:

PRIOR COUNCIL ACTION/REVIEW

In 2018, a proposal was brought before City Council to increase the license fees from $10.00 for intact animals to $25.00, which did not pass. Prior to this, in October 2002, City Council passed the current license fees of $5.00 for altered animals and $10.00 for unaltered animals.

RELEVANT LAWS, STATUTES, AND REGULATIONS:

Nevada Statutes: NRS 441A.410, NAC 441A.410
Fernley Municipal Code: Fernley Municipal Code 6.04 (A)
Policies & Procedure Manual: N/A
Community Assessment: N/A
Other: Resolution #02-009

FINANCIAL IMPLICATIONS:

Raising dog licensing fees will align the City of Fernley with current Lyon County fees.

ATTACHMENTS:

1. Resolution 23-003

CITY OF FERNLEY
RESOLUTION #23-003

A RESOLUTION OF THE CITY OF FERNLEY ADOPTING DOG LICENSING FEES

WHEREAS, the City of Fernley, a political subdivision of the State of Nevada, organized pursuant to the provisions of NRS Chapter 266; and,

WHEREAS, the City of Fernley Council initially established an animal control program to implement City Code Title 6, pertaining to animals and animal services; and,

WHEREAS, the City Code, Title 6, Section 6.04(a) sets forth the requirement for dog licensing and allows the City to set fees for such licenses; and,

WHEREAS, the City wishes to implement the provisions of City Code Title 6, including section 6.04(a), in order to protect the health, safety and welfare of the residents of the City.

NOT, THEREFORE, BE IT RESOLVED, that:

1. Fees for dog licenses and tags, other than dogs housed in a kennel, shall be listed and effective June 1, 2023.
    a. Dog license and tag for each intact dog $25.00;
    b. Dog license and tag for each altered dog $5.00; and,
    c. Replacement for a lost or worn out tag $5.00.
